# #VENDOR REPORT

THE POWERSELLING PROPOSITION

SOFTSHELL

# Akribisch, handverlesen ...

... und mit professionellem Know-how hat unser Team in den vergangenen zwölf Monaten gearbeitet. Fakten und Hintergründe haben wir recherchiert und Detail für Detail zusammengetragen, um Ihnen zum fünften Mal die vollständigste und umfangreichste Übersicht der weltweiten Cybersecurity-Landschaft präsentieren zu können: den Softshell Vendor Report.

In der Branche geht es aktuell so dynamisch zu wie selten zuvor, und die Zahl der Akteure im weltweiten Security-Markt ist im letzten Jahr einmal mehr gewachsen. Wir haben uns deshalb für eine Aufteilung des Reports in zwei Teile entschieden. Einer der Hauptgründe: Die Zahl der Security-as-a-Service (SaaS)-Anbieter steigt zusehends, ein Ende ist nicht in Sicht.

Teil eins bilden die klassischen Software- und Hardware-Anbieter, Teil zwei gibt Ihnen eine Übersicht über die wachsende Zahl der SaaS-Anbieter und ihrer Angebote. Das sorgt nicht nur für deutlich mehr Übersicht und Vergleichbarkeit, sondern trägt der steigenden Bedeutung dieser Marktteilnehmer Rechnung.

Welche Entwicklungen darüber hinaus den Markt verändern, welche Themen die Branche umtreiben und welche Statistiken am meisten Eindruck hinterlassen, das haben wir auf den nächsten Seiten für Sie zusammengestellt.

Viel Spaß beim Lesen
Ihr Softshell-Team

# Über den Softshell Vendor Report

Die Softshell AG ist Herausgeber des jährlich erscheinenden Softshell Vendor Report. Unser Kerngeschäft ist seit vielen Jahren die Cybersecurity-Distribution. Wir kennen den Markt und können als neutrale Instanz den nationalen und internationalen Cybersecurity-Markt analysieren. Im Fokus unserer Analysetätigkeit steht, wie erfolgreich Hersteller auf dem deutschsprachigen Markt agieren, aus welchen Ländern sie stammen und auf welche Technologien sie setzen. Die Marktreife der Hersteller bewerten wir seit 2015 mit einem Score. Zudem haben wir 2017 ein Gütesiegel für die Branche eingeführt: Alle Anbieter, die im Vendor Report einen Score erreichen, werden mit einem Softshell Vendor Award ausgezeichnet.

Internationale Cybersecurity-Hersteller, die auf den deutschen Markt expandieren wollen, unterstützt Softshell mit Dienstleistungen jenseits der klassischen Distributionsaufgaben. Softshell hat die notwendige Expertise, um am deutschen Markt langfristig Vertriebserfolge zu erzielen.

Für Endkunden auf der Suche nach der passenden Cybersecurity-Lösung ist Softshell die erste Anlaufstelle. Wir sondieren für den Kunden den Markt, spüren relevante Anbieter auf und stehen Ihnen während des Auswahlprozesses als Sparringspartner zur Verfügung.

Zudem agieren wir als Interessenvertretung der Händler im Dialog mit den Herstellern. Mit Qualifizierungs- und Schulungsmaßnahmen begleitet Softshell die Fachhandelspartner und vermittelt aktuelles Know-how rund um den sich ständig veränderten Bedarf an Cybersecurity-Technologien.

## So gehen wir vor

Wir betreiben umfangreiche Marktrecherche, um in Erfahrung zu bringen, welche Anbieter in den Report aufgenommen werden. Unser Ziel ist es, alle aktiven B2B-Player im weltweiten Cybersecurity-Markt abzubilden, egal, ob Sie im Raum DACH operieren oder nicht. Eine Berücksichtigung im Softshell Vendor Report ist mit keinerlei Kosten verbunden, die Bewertung erfolgt wertfrei und ausschließlich anhand der erhobenen Daten. Hersteller, die mit Softshell zusammenarbeiten, werden ebenso neutral bewertet

## Kategorien

Alle Anbieter im Softshell Vendor Report ordnen wir in zwei Kategorien ein:

1. Anbieter, die mit Kontaktdaten und allgemeinen Informationen veröffentlicht sind und für die ein Softshell Vendor Score (SVS) errechenbar ist, der zwischen den Werten 0.0 und 10 liegt.

2. Anbieter, die mit Kontaktdaten und allgemeinen Informationen veröffentlicht sind, für die jedoch KEIN Softshell Vendor Score (SVS) errechenbar ist. Ist es Softshell mehrfach nicht gelungen, zu einem Unternehmensvertreter Kontakt aufzunehmen, können wir keinen Score ermitteln. In diesen Fällen wird das Score-Feld mit “n.a.” ausgefüllt.

## Erhebungsmethoden

Unser Research-Team kontaktiert alle im Report gelisteten Hersteller mehrfach und auf verschiedenen Kanälen. Im nächsten Schritt sind die Anbieter aufgefordert, unseren „Softshell Vendor Report Information Form“ mit allgemeinen Unternehmensinformationen und ihrem Lösungsangebot auszufüllen, die passenden Technologiekategorien auszuwählen und sieben Fragen zu Ihrer Tätigkeit im deutschsprachigen Markt zu beantworten.

## Sie wollen mehr wissen?

Einige Anbieter sind an diversen Adressen im Raum DACH vertreten, was im Report nicht darstellbar ist. Darauf weist das Sternchen (*) hinter der letzten Adresse hin.

Wenn Ihr Unternehmen im Report gelistet ist und Sie bemerken, dass Daten fehlen, sich geändert haben oder falsch sind, nehmen Sie bitte Kontakt zu uns auf unter editorial-office@softshell.ag. Die korrigierte Version erscheint dann in der nächsten Auflage des Softshell Vendor Reports.

Auf Anfrage stellen wir Ihnen gern weitere Infos zu unseren Erhebungsmethoden und Recherchequellen bereit oder versorgen Sie mit zusätzlichen Daten zu einzelnen Unternehmen. Wir freuen uns auf Ihre Rückmeldungen.

# Softshell Vendor Score

**Der Softshell Vendor Score ist ein Punktesystem, das Auskunft darüber gibt, wie gut ein Unternehmen sich mit seinen Lösungen auf die lokalen Anforderungen der DACH-Region einstellt und wie responsiv es ist.**

Der Score setzt sich aus sieben Parametern zusammen und wird wie folgt berechnet:

1. Stehen rund um Ihr Produkt/Ihren Service Informationen in deutscher Sprache zur Verfügung?
   a) German collateral (Datenblätter, Whitepapers, Technische Dokumentation, Marketing-Materialien etc.): 5 Punkte
   b) Website: 5 Punkte

2. Bieten Sie Support in deutscher Sprache an?
   a) Technischer Support: 10 Punkte b) Vertrieb: 10 Punkte

3. Sind Ihre Support-Mitarbeiter in der DACH-Region angesiedelt?
   a) Technischer Support: 10 Punkte b) Vertrieb: 10 Punkte

4. Haben Sie eine im Handelsregister eingetragene Firma/ein Büro im Raum DACH?
   a) Legal Entity/im Handelsregister eingetragene Firma: 10
   b) Büro(s): 5 Punkte

*(Hinweis: Die Punkte werden nicht aufaddiert, maximale Punktzahl ist 10)*

5. Gibt es einen Referenzkunden im Raum DACH und/oder eine Case Study/Anwenderstory?
   a) Ja: 10 Punkte

6. Arbeiten Sie mit Resellern oder Distributoren im Raum DACH?
   a) Reseller: 10 Punkte b) Distributor: 10 Punkte

*(Hinweis: Punkte werden nicht aufaddiert, max. Punktzahl ist 10)*

7. Sind Sie im Gartner Magic Quadrant/Gartner „Cool Vendor“ Report 2016, 2017, 2018, 2019/Forrester Wave/IDC gelistet oder ist Ihr Unternehmen nach ISO 2700x/BSI/Common Criteria (min. Level 3) zertifiziert?
   a) Ja: 5 Punkte

*(Hinweis: Punkte werden nicht aufaddiert, max. Punktzahl ist 5)*

Im Zusammenspiel geben diese Kriterien Aufschluss darüber, mit welcher Ernsthaftigkeit ein Unternehmen das Geschäft in der Region DACH verfolgt und welchen Stellenwert der deutschsprachige Markt hat. Auch spiegelt der Score wider, wie gut deutschsprachige Kunden die Lösung oder den Service annehmen, wie aktiv das Unternehmen im Raum DACH ist und wie gut die Erfolgsaussichten hierzulande sind. Wir überprüfen alle vom Hersteller gemachten Angaben händisch, um die Richtigkeit und Nachvollziehbarkeit der Daten sicherzustellen.

Zudem lässt die erreichte Punktzahl erkennen, wie viele Kriterien ein Unternehmen zum Zeitpunkt der Recherche und Kontaktaufnahme erfüllt hat. Es ist nicht auszuschließen, dass sich die Situation einzelner Anbieter seit Abschluss der Recherche geändert hat. Bitte kontaktieren Sie uns in diesem Fall, damit wir die neusten Informationen in unsere Datenbestände übernehmen können.

**Hinweis zum Softshell Vendor Score:**
Selbst, wenn Sie den deutschen Markt bisher nicht aktiv bespielen und deshalb einen Score von 0.0 erhalten, ist es empfehlenswert, uns zu antworten, denn wir bewerten auch die Tatsache, wie responsiv ein Unternehmen ist. Wer seine Daten für die Marktübersicht bereitstellt und die Qualifizierungsfragen beantwortet, wird von uns als zuverlässiger und vertrauenswürdiger Partner im internationalen Kontext eingestuft. Diese Tatsache honorieren wir mit einem blauen Award. Erhalten wir nach mehrmaliger Kontaktaufnahme keine Antwort von Ihrem Unternehmen, machen wir das durch den Zusatz n.a. kenntlich.

## Softshell Vendor Awards

Ende 2017 haben wir mit den Softshell Vendor Awards ein neues Gütesiegel in der Security-Branche eingeführt. Wir schaffen damit eine noch bessere Vergleichbarkeit und würdigen alle Hersteller, die im Softshell Vendor Report einen bestimmten Score erreicht haben. Die Awards werden in vier Kategorien vergeben:

**Gold:**
Der Gold Award ist die höchste Auszeichnung und das Gütesiegel für ein solides und im Raum DACH etabliertes Unternehmen. Nur Hersteller mit einem maximalen Score von 10 Punkten im Softshell Vendor Report fallen darunter.

**Silber:**
Der Silver Award geht an Hersteller, die für den deutschsprachigen Markt sehr gute Voraussetzungen aufweisen und die Anforderungen deutscher Anwender gut erfüllen. Anbieter mit Softshell Vendor Scores von 8,82 bis 9,41 fallen in diese Kategorie.

**Bronze:**
Den Bronze Award erhalten jene Marktteilnehmer, die bereits in der Region DACH aktiv sind und das Potential besitzen, ihre Leistung in den nächsten Jahren weiter zu steigern. Anbieter mit Softshell Vendor Scores von 1,18 und 8,24 fallen in diese Kategorie.

**Blau:**
Anbieter, die den Blue Award erhalten, sind ein verlässlicher Anbieter im internationalen Umfeld, auf dem deutschen Markt jedoch bisher noch nicht tätig. Wir beobachten diese Unternehmen aktiv und erwarten, dass sie in den nächsten Jahren ihren Fußabdruck im Raum DACH vergrößern werden. Anbieter mit Softshell Vendor Scores von 0,0 und 0,59 fallen in diese Kategorie.

## Technology Categories

Nachfolgend finden Sie die Technologiekategorien, aus denen Sie beim Ausfüllen des „Softshell Vendor Report Information Form“ auswählen können. Jeder Hersteller kann maximal zehn Technologiekategorien auswählen. Macht ein Unternehmen keine Angaben zu den relevanten Technologiekategorien, prüft unser Recherche-Team die verfügbaren Produktinformationen und entscheidet, welche Kategorien zutreffend sind. Aus Platzgründen listen wir im Report nur die fettgedruckten Abkürzungen der Technologiekategorien auf.

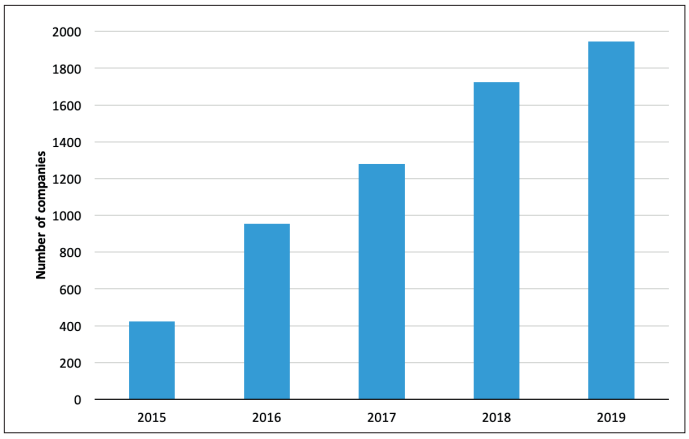
# Statistiken und Kennzahlen

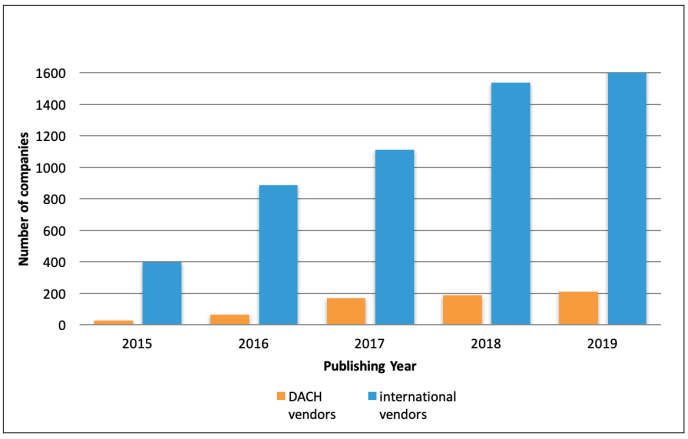
Mithilfe der im Softshell Vendor Report erhobenen Informationen ist es möglich, Aussagen über die gesamte Cybersecurity-Branche zu treffen. Wir zeigen historische Entwicklungen und ziehen Rückschlüsse auf aktuelle Trends. Nachfolgend ein Auszug der Analyse für 2019.

## Zahl der im Report gelisteten Hersteller (im Jahresverlauf)



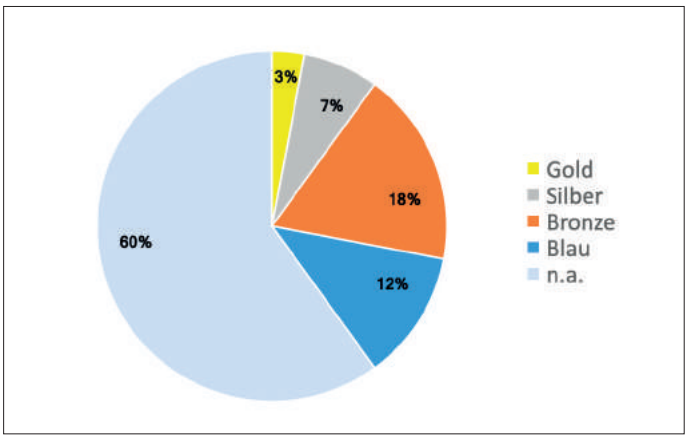
**Die Zahl der Hersteller im Report ist um rund 13% gestiegen – obwohl rund 10% der im Vorjahr gelisteten Unternehmen rausgefallen sind. Sie wurden übernommen oder haben ihren Betrieb eingestellt.**

## Zahl der internationalen Hersteller vs. Zahl der DACH-Unternehmen



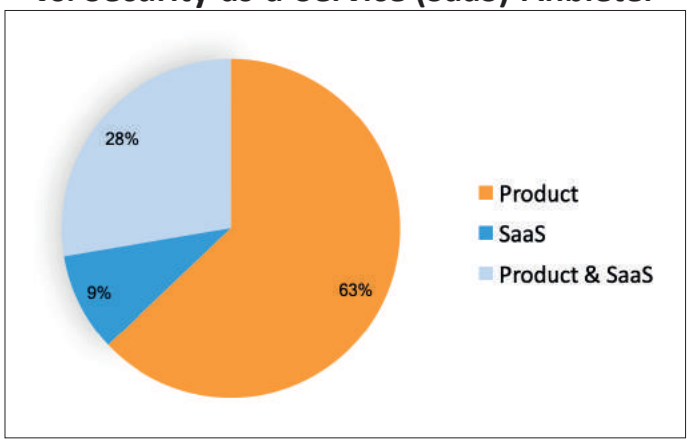
**Die Zahl der im Raum DACH aktiven Unternehmen ist 2019 etwa im gleichen Verhältnis gestiegen, wie die Zahl der internationalen Player.**

## Award-Verteilung 2019



**2019 erhalten 3% aller Security-Hersteller den Softshell Vendor Award in Gold. Das sind doppelt so viele Player wie noch 2018.**

## Klassische Software und Hardware-Anbieter vs. Security-as-a-Service (SaaS)-Anbieter



**37% aller Hersteller setzen inzwischen auf SaaS, 2018 waren es noch 24%.**

# Was den Markt 2019 beschäftigt

Mithilfe des Softshell Vendor Reports erhalten wir nicht nur spannende Einblicke in den Markt, sondern können auch ablesen, wohin die Reise geht und welche Player die besten Chancen hierzulande haben.

Der deutlichste Trend in diesem Jahr: Die Zahl der Hersteller, die ihre Leistungen als Service anbieten, steigt weiter an. 37% aller Unternehmen tummeln sich inzwischen in der Technologiekategorie ‚Security as a Service', 2018 waren es noch 24%. Von Patch-Management über Endpoint-Sicherheit und Firewalls bis hin zum Web-Scanning: Immer mehr Technologien sind direkt vom Hersteller beziehbar.

Zudem tendieren die Anbieter stärker als in der Vergangenheit dazu, SOC-Dienstleistungen mitanzubieten. Rund 6% aller Hersteller geben an, im SOC-Umfeld aktiv zu sein.

Deutliche Zuwächse sind obendrein bei den Stichworten IoT und Industrial IoT zu verzeichnen. Je mehr Anwender aus dem produzierenden Gewerbe IoT-Projekte planen, desto mehr Marktpotenzial eröffnet sich für Security-Hersteller.

**37 %**
**SaaS**

**6 %**
**SOC**

**15 %**
**IoT/IIoT**

Ferner haben wir die im Softshell Vendor Report gelisteten Unternehmen dazu befragt, welche Cybersecurity-Trends sie für die nächsten Jahre sehen. So haben sie geantwortet:

**Netwrix:** "Die Sicherheitsbranche richtet den Fokus immer stärker auf das Thema Daten. Gleichzeitig nehmen Compliance-Anforderungen immer mehr Raum ein und werden strenger. Blockchain wird zum Lösen von IT-Security-Aufgaben eingesetzt, IOT-Devices sind nach wie vor gefährdet, und Angriffe auf personenbezogene Daten steigen weiter an."

**Protego Labs:** "Wir sehen auf dem Serverless-Security-Markt enormes Wachstumspotenzial. Es lässt sich beobachten, dass bereits viele Unternehmen auf Serverless-Technologien umsteigen. Sicherheit ist in diesem Zusammenhang ein Muss."

**Shape Security:** "Angreifer machen sich vermehrt das Thema Automatisierung zu Nutze. Es finden Konsolidierungen bei entsprechenden Sicherheits-Tools satt. Zudem werden immer mehr SOC-Aufgaben aufgrund von Fachkräftemangel im Sicherheitsbereich outgesourct."

**Ziften Technologies:** “Künstliche Intelligenz und maschinelles Lernen werden entscheidend dazu beitragen, Zero-Day-Angriffen ein Ende zu setzen. Der Markt für Endpoint-Security und IT-Hygiene-Produkte wird sich indes weiter konsolidieren.“

**Cybereason:** “Mehr und mehr Endgeräte greifen auf Netzwerke zu, was das Cybersecurity-Risiko gerade für Großunternehmen erhöht. Hersteller von IoT-Devices haben die Herausforderung, sichere Produkte und Dienstleistungen der nächsten Generation herzustellen. Global agierende Unternehmen kämpfen zudem mit anhaltendem Fachkräftemangel und einer wachsenden Zahl von Security Analyst Openings.“

**Company**: Asignio

**Tech Category**: MFA/Authentication Mgmt; Secured Signing

**Website**:
www.asignio.com

**Description**: Bombarded with new and ever more complex forms of digital authentication, Asignio became convinced that there was a better, more elegant way to sign in. Security should get in the way of criminals and hackers; it shouldn't get in your way. We went back to something that all of us have been doing since kindergarten: writing. But instead of signing your name, you draw a series of letters or symbols that represent who you are. What's old is new again, and what's tried and true is now cutting edge. Choose the better way to sign in. Authenticate with Asignio.

## CryptTalk

Encrypted calls and messages

**SVS**: 3.53

**Company**: CryptTalk **By Arenim Technologies, Ltd.*

**Tech Category**: Encryption; Endpoint Security; Mobile Security; Other; Secure Communications

**Website**: www.crypttalk.com

**Description**: CryptTalk is a totally secure communication solution offering secure calling, instant messaging and secure conference calling. By using CryptTalk, users can be sure that their calls and messages cannot be compromised and that what they say or message remains inaccessible to third parties. All this without the need of any special hardware, in a convenient and discreet way meeting all requirements of businesses. CryptTalk uses Best Practice cryptography that has been through several rounds of third-party independent testing and security reviews.

**Website**: www.cyberprotect.fr

**Description**: While security systems are essential and necessary, their vulnerabilities are now proven and exploited in many cases of cyberattacks. In fact, 100% of the companies victim of a cyber attack had a computer security system. Risk management therefore becomes unavoidable in this context where cyber risks are becoming more frequent, diversified and constantly evolving. For more than 10 years, Cyberprotect, publisher and service operator, ensures the daily effectiveness of your cybersecurity. Our mission: to detect, reduce risk and transfer residual risk to our insurance companies partners.

**Company**: Cyber Sepio Systems, Ltd.

**Tech Category**: Antivirus/Malware; Network Security; Security/Behavioral Analytics; Threat Detection, Intelligence & Mgmt

**Website**: www.sepio.systems

**Description**: Sepio Systems is a pioneer in securing organizations against infected device supply chains. The global nature of supply chains provides multiple opportunities for hackers to attack end users by manipulating devices—delivered to organizations as legitimate. This attack vector has proven efficient for attackers providing access to key assets and circumventing conventional cyber security measures. The Sepio Systems Security Suite detects altered device behavior, isolates the attack and alerts—stopping the rogue hardware before compromising the normal operations.

## DFLABS
CYBER INCIDENTS UNDER CONTROL

**SVS**: 3.53

**Company**: DFLabs S.P.A

**Tech Category**: SAO/SOAR; SIEM; Threat Detection, Intelligence & Mgmt

**Website**: www.dflabs.com

**Description**: DFLabs is a recognized global leader in security automation and orchestration technology. The company's management team has helped shape the cyber security industry, which includes co-editing several industry standards such as ISO 27043 and ISO 30121. Its flagship product, IncMan, has been adopted by Fortune 500 and Global 2000 organizations worldwide. DFLabs has operations in North America, and EMEA.

**Founded**: 2003

**Public/Privately held Company**: Privately held

**Size**: 11-50

**Address HQ**: Via Bergognone, 31, 20144, Milano, Italy

**Phone HQ**: +39 0373 82416

**Address DACH**: -

**Phone DACH**: -

**Phone EMEA**: +44 20 3286 4193

**Email**: info@dflabs.com

**SVS**: n.a.

**Company**: D-ID

**Tech Category**: AI/Machine Learning; Data Security; IAM

**Website**: www.deidentification.co

**Description**: The growing sophistication of facial recognition technologies are turning our faces into passwords. But these passwords aren't protected and cannot be changed once compromised. D-ID offers a system that protects images from unauthorized, automated face recognition. Images are processed in a ground-breaking way that causes face recognition algorithms to fail to identify the subject in the image, while maintaining enough similarity to the original image for humans not to notice the difference. This innovative solution facilitates risk-free usage of personal data and resolves privacy concerns of users.

**Founded**: 2017

**SVS**: 0.0

**Company**: Eclypses, Inc.

**Tech Category**: Cloud/VM Security; DLP; IoT/IIoT Security; Mobile Data Protection (BYOD); Secure File Sharing

**Website**: www.eclypses.com

**Description**: Eclypses framework is based on MicroToken Exchange™ (MTE), replacing actual data with MicroTokens throughout the information process both stored as well as transmitted. It can utilize existing communication networks as well as existing hardware. To deploy the architecture, in most cases, it is Plug & Play. For Data-In-Motion, only as little as two lines of code are required to be inserted, within each endpoint. The premise behind Eclypses technology is built upon the notion that If REAL DATA can be hacked, Lost or stolen, then stop using "Real" data! - Use MicroTokens instead.

**Founded**: 2016

**Public/Privately held Company**: Privately held

**Size**: 11-50

**Address HQ**: 2005 Aeroplaza Dr., Colorado Springs, CO 80916 USA

**Company**: Everykey, Inc.

**Tech Category**: Encryption; IAM

**Website**: www.everykey.com

**Description**: Everykey is a Bluetooth device that replaces your keys and passwords. Using military grade security, Everykey unlocks your phone, laptop, tablet, house door, car door, and other access-controlled devices when you are nearby, then locks them back down when you walk away. Everykey also generates secure passwords for your website accounts, then automatically logs you in when you visit a website. If you lose your Everykey, you can remotely freeze it, so no one else can use it.

**Website**:
www.f-secure.com

**Description**: For too many businesses, too many manufacturers, too many people, security is an afterthought. What's the use of being connected to everything if our data, our identities and our transactions aren't secure? From more than twenty-five years of protecting millions of computers around the globe, from the first malware to the latest targeted attack, we know this for sure: you will be hit. The only question is if you will recover and come back stronger. To do that, you need the right team in your corner. For F-Secure, cyber security is more than a product — it's how we see the world.

## MINERVA

**SVS**: 0.0

**Company**: Minerva Labs, Ltd.

**Tech Category**: Endpoint Security; SaaS

**Website**: www.minerva-labs.com

**Description**: Minerva Labs is an innovative endpoint security solution provider that protects enterprises from today's stealthiest attacks without the need to detect threats first, all before any damage has been done. Minerva's Anti-Evasion Platform prevents malware attacks that evade existing defenses. It does this by deceiving the malware and controlling how it perceives its environment. Without relying on signatures, models or behavioral patterns, the solution causes the malware to disarm itself, thwarting the attack before the need to engage costly security resources.

**Founded**: 2014

**Public/Privately held Company**: Privately held

**Company**: Rublon

**Tech Category**: MFA/Authentication Mgmt

**Website**: www.rublon.com

**Description**: Every second, malicious hackers from around the world try to take over corporate services and steal confidential data. If you have employees accessing online company resources, you are at risk. Implementing a password policy is not enough. Passwords will be too easy, get stolen, written down and reused all over the Internet. When you have no control over your employee's passwords, then you have no control over who really accesses your resources. Regain control over your company by implementing Rublon Account Security, the best two-factor authentication platform for web-based businesses.

**SVS**: n.a.

**Company**: Very Good Security, Inc.

**Tech Category**: Data Center Security/Secure Data Storage

**Website**: www.verygoodsecurity.com

**Description**: Very Good Security (VGS) is the easiest, most secure and most compliant way to collect, protect and exchange sensitive data of all types to help you lower your liability, increase your security posture, and achieve compliances in record time. It allows the enterprise to operate on sensitive data without actually possessing your sensitive data by de-scoping your applications from touching sensitive data without any code changes. It integrates seamlessly to any CI/CD workflow as part of a modern DevOps and SecOps and stops the spread of „compliance sprawl" that typically hinders business agility in the modern enterprise.

**Company**: WaToo

**Tech Category**: Data Breach Prevention; DLP; Data Security

**Website**: www.watoo.tech

**Description**: Most of existing database security tools control the access to information. Once the access is granted, information is no longer protected!! (leak, data forgery). Our solutions provide an answer to this threat and they protect data (images, pdf documents, databases) by concealing a TAG into them by means of watermarking. If a user leaks a document or a set of data extracted from a database, he/she will be precisely identified by means of the TAG hidden when he/she accessed to the information.

# II. Bestplatzierte Unternehmen sortiert nach Technology Categories

Index II weist für jede Technologie-Kategorie die Hersteller mit dem höchsten Score aus. Üblicherweise liegt dieser bei 10. Hat kein Hersteller diese maximale Punktzahl erreicht, führen wir die Hersteller mit dem nächsthöheren Score auf.

## Advanced Persistent Threats (APT)/Advanced Threat Protection (209):

| Company | Score |
|---|---|
| Bitdefender, S.R.L., 78 | 10 |
