CHAPTER XVI.

OWNERSHIP OF HOMES.

INTRODUCTION.

Nature of the inquiry.—The Thirteenth Census Act called for an inquiry on the population schedule as to the ownership of homes, this being the third time that information of this character had been obtained as a part of the Federal Census.

The first investigation, in 1890, was made under the authority of a special act of Congress. It was not confined to proprietorship alone, but included the value of mortgaged homes, the amount of mortgage debt resting upon them, the rates of interest charged, and, in addition, a statement for 102 selected counties as to the object for which the debt was incurred. For the purposes of this investigation the family was adopted as the statistical unit, and, because of the common interests of its members, the ownership of the farm or home by any member was credited to the family as a whole; and likewise in the case of tenancy, the family as a unit was considered as being in the situation of a tenant and not merely the member who was legally the lessee.

Only a part of the information required in 1890 was collected by the regular census enumerators, the inquiry on the population schedule being confined to a statement as to whether the home occupied by each family enumerated in the census was hired or owned by the head or a member of the family (not a boarder), and if owned, whether it was free or was encumbered. In the case of encumbered homes a further return was made of the name and address of the owner, for the purpose of securing by correspondence or through special agents the additional facts as to value and amount of encumbrance.

The information afforded by this investigation was so valuable and the conditions of proprietorship and encumbrance as they existed at that time were brought out so clearly in the report for 1890,[1] that in making provisions for taking the Twelfth Census Congress stipulated in the census act that the inquiry as to proprietorship should be included in the population schedule, but did not provide for securing supplemental data concerning value and amount of encumbrance; and a similar inquiry was inserted in the population schedule at the Thirteenth Census, as before stated.

The inquiry in 1900 and in 1910, therefore, did not go beyond the ascertainment of the facts of proprietorship and encumbrance, this information being derived from the returns made by the census enumerators, as in 1890. No attempt has been made at the last two censuses, however, to correct or supplement the work of the census enumerators, and so the figures presented in this report are based wholly upon the answers as they appear on the population schedules.

The word "proprietorship," as used in the tables and text of this chapter, is not confined to owners, as it is often used in European statistics, but has its full legal meaning and includes tenants as well as owners.

Instructions to enumerators.—For the return in 1910 of the facts as to the ownership of homes three columns were provided on the population schedule calling for a statement, first, as to whether the home occupied by each family was owned or rented; second, in the case of an owned home, whether it was owned free or was mortgaged; and third, whether the home was a farm home or not. The essential instructions to the census enumerators on these points were as follows:

Home owned or rented.—If a dwelling is occupied by more than one family it is the home of each of them, and the question should be answered with reference to each family in the dwelling.

Owned homes.—A home is to be classed as *owned* if it is owned wholly or in part by the head of the family living in the home, or by the wife of the head or by a son, or a daughter, or other *relative* living in the same house with the head of the family. It is not necessary that full payment for the property should have been made or that the family should be the sole owner.

Rented homes.—Every home not owned, either wholly or in part, by the family living in it should be classed as *rented*, whether rent is actually paid or not.

Home owned free or mortgaged.—This question applies only to those homes classed as owned homes and not to rented homes. All owned homes which are not fully paid for, or upon which there is any encumbrance in the form either of a mortgage or of a lien upon which judgment has been had in a court, are to be reported as mortgaged.

Farm or house.—A farm home is a home located on a farm, for which a farm schedule should be secured. Any other home is to be reported simply as a house.

Unknown apportioned.—For a small proportion of the homes, the census enumerators failed to report whether the homes were either owned or rented and for

[1] Report on Farms and Homes: Proprietorship and Indebtedness, Census of 1890.

certain of the homes reported as owned they also failed to state whether they were encumbered or were owned free of all encumbrance. In order to afford proper comparisons with the results derived from the report for 1890, the numbers representing the unknown quantities as to proprietorship in 1910 and in 1900 have been distributed in the proportion of the known figures for owned and rented homes and, similarly, the numbers representing the unknown quantities as to encumbrance have been distributed in the proportion of the known figures for free and encumbered homes. In the report for 1890 the figures were apportioned in detail by counties, but the apportionment for 1910, as for 1900, has been limited to the figures for the states and principal cities of the United States and to those for Alaska, Hawaii, and Porto Rico.

UNITED STATES AND OUTLYING POSSESSIONS.

Proportion of farm homes.—Table 1 shows for the United States proper and for Alaska, Hawaii, and Porto Rico the results of the inquiry with respect to ownership of homes as made by the census enumerators in 1910, while Table 2 gives comparative figures, wherever possible, as to the number and proportion of farm homes to all homes at each of the last three censuses.

Porto Rico	219,827	.....	.....	57,561	.....	.....	26.2	.....	.....

Of the 20,255,555 families in the United States in 1910, Table 2 shows that 6,123,610, or 30.2 per cent, occupied farm homes, as compared with a total in 1900 of 5,698,901, or 35.2 per cent, and in 1890 of 4,767,179, or 37.6 per cent.

The number of farm homes in Alaska was small—less than 1 per cent of all homes—in both 1910 and 1900, but in Hawaii they represented 6.8 per cent of all homes in 1910 and 3.8 per cent in 1900, while of all the homes in Porto Rico in 1910, 57,561, or 26.2 per cent, were reported as farm homes. There are no figures available for Alaska or Hawaii prior to 1900, or for Porto Rico prior to 1910.

Proportion of unknown.—The number of farm homes and of other homes for which information is lacking in the returns for 1910 is shown in Table 3, while the percentage which such homes formed in each case of the total homes or of owned homes for 1910, in comparison with similar percentages for 1900 and 1890, wherever possible, is shown in Table 4.

[1] Less than one-tenth of 1 per cent.

These two tables show, for the United States proper, that in 1910 no report as to proprietorship was made for 14,048 farm homes and for 459,901 other homes, representing 0.2 and 3.3 per cent, respectively, of all the homes of each class, and also that no report as to encumbrance was made for 32,268 owned farm homes and for 135,464 owned homes not on farms, representing 0.8 and 2.6 per cent, respectively, of all the owned homes of each class. The percentages for both farm homes and other homes in 1910 are lower as compared with those for 1900, but the percentages for homes not on farms are higher as compared with those for 1890.

For each of the outlying territories the proportion of unknown in 1910 was small, but for both Alaska and Hawaii in 1900 it was considerable, and for Alaska particularly so with respect to proprietorship.

Proportion of owned and rented homes.—Table 5 shows, for the United States and for Alaska, Hawaii, and Porto Rico, the relative proportions of owned and rented homes, and of homes owned free or encumbered, based upon the returns for 1910 and also, wherever possible, for 1900 and 1890.

[1] Per cent not shown where base is less than 100.

Of all the families in the United States in 1910, as shown by Table 5, 54.2 per cent occupied rented homes and 45.8 per cent occupied owned homes, the homes owned free constituting 30.8 per cent and those owned encumbered constituting 15 per cent of all the homes. The proportions of rented homes and of owned encumbered homes in 1910 were somewhat larger, as compared with those for 1900 and 1890, and the proportion of owned free homes correspondingly smaller. At the census of 1890 the owned free homes constituted 34.4 per cent of all the homes, but at the census of 1900 they constituted only 31.7 per cent and at the census of 1910, as before stated, only 30.8 per cent.

Of all the farm homes in the United States in 1910, 37.2 per cent were rented, 42.5 per cent were owned free, and 20.3 per cent were owned encumbered, but of all the homes not on farms in 1910, on the other hand, 61.6 per cent were rented and only 38.4 per cent were owned, those owned free constituting 25.7 per cent and those owned encumbered 12.7 per cent. For farm homes, as in the case of all homes combined, the proportions of rented and of owned encumbered homes were somewhat larger in 1910 than in 1890, but for homes not on farms the proportion of owned encumbered homes was larger in 1910 than in 1890, while the proportion of rented homes as well as of owned

free homes was in each case somewhat smaller. The owned encumbered homes constituted of all owned homes 32.8 per cent in 1910, as against 28 per cent in 1890; of all owned farm homes they constituted 32.3 per cent in 1910, as against 28.2 per cent in 1890; and of all owned homes not on farms they constituted 33.1 per cent, as against 27.7 per cent in 1890, representing in each case an increase in the proportion of owned encumbered homes and a corresponding decrease in the proportion of owned free homes.

A little more than one-third (34.8 per cent) of all the homes in Alaska in 1910 were rented, as against a little less than one-fifth in 1900, but in Hawaii very nearly seven-eighths (86.9 per cent) were rented, as against four-fifths in 1900, while in Porto Rico less than one-half (43.3 per cent) of all the homes in 1910 were rented.

DIVISIONS AND STATES.

Proportion of farm homes.—The statistics of proprietorship and encumbrance for the United States and for Alaska, Hawaii, and Porto Rico, as shown by the census of 1910, are presented in detail by counties or equivalent subdivisions in Table 14, pages 1315 to 1354. The totals for each of the states comprising the United States proper are summarized for 1910 in Table 6, page 1300, and the number and proportion of farm homes in 1910, 1900, and 1890, respectively, are shown in Table 7, page 1302.

The proportion of farm homes in 1910 was smaller than in 1900 in all but 5 states, and the Mountain division, in which 4 of these states are situated, was the only geographic division which showed an increased proportion of farm homes in 1910—28.6 as compared with 27 per cent in 1900. The 4 states of this division in which the proportion increased were Montana, Wyoming, Colorado, and New Mexico, the increase for the last-named state being especially notable—from 28.3 to 43.6 per cent. The only other state to show an increased proportion during the decade was Georgia, in the South Atlantic division—from 48.6 to 50 per cent. In 1900 there were 14 states in which the proportion of farm homes was larger than in 1890, comprising 7 Southern states and all the states of the Mountain division except Colorado.

The loss in the proportion of farm homes from 1900 to 1910 was large in all the states of the East North Central, West North Central, and Pacific divisions; and it was also large in Arizona, Utah, and Nevada, of the Mountain division; in West Virginia and Florida, of the South Atlantic division, and in Oklahoma and Texas, of the West South Central division.

The proportion of farm homes in 1910 was largest in the East South Central, West South Central, South Atlantic, and West North Central divisions, with 55.3, 49.3, 42.2, and 41.5 per cent, respectively, in the order named; and in substantially half of the states in these divisions the farm homes constituted 50 per cent or more of all the homes, the largest percentages being those for Mississippi (67.1), North Dakota (62.2), Arkansas (61.4), and South Dakota (58.2).

Proportion of unknown.—Table 8, page 1303, shows, by divisions and states, the number of farm and other homes for which the facts as to proprietorship and encumbrance were not reported in 1910, while Table 9, page 1304, shows, also by divisions and states, the relative proportions of unknown quantities in the returns for 1910, 1900, and 1890, respectively.

The proportion of unknown returns as to proprietorship was very small for farm homes in 1910, being less than 1 per cent in every division and in all the states except Montana, Utah, and Nevada, and these were the only states in which the proportion was larger in 1910 than in 1900. The proportion of unknown returns as to encumbrance for farm homes in 1910 also did not exceed 2 per cent except in one state—Oklahoma—and the proportion in 1910 was less than in 1900 in every division and in every state. The proportion of unknown returns in 1900, as compared with 1890, was smaller as to proprietorship in every division except the East South Central and in all but nine states, mainly in the South, but was smaller as to encumbrance in only two divisions—Mountain and Pacific—and in seven states, six of which were in the two divisions mentioned.

For homes not on farms the proportion of unknown, with few exceptions, was much larger than for farm homes at each census, the proportion as to proprietorship in 1910 being fully 10 per cent in Idaho and nearly that (9.9) in North Dakota, and between 5 and 10 per cent in 13 other states. The proportion of unknown as to proprietorship was less in 1910 than in 1900 in every division and in all but two states—Montana and Utah—and the District of Columbia, but in 1900, as compared with 1890, the proportion was larger in every division and in all but three states, namely, New York, Montana, and Utah. The proportion of unknown as to encumbrance on homes not on farms was less in 1910 than in 1900 in every division and in every state, but the proportion in 1900, as compared with 1890, was larger in every division and in all but four states, namely, Minnesota, Montana, Wyoming, and Utah.

The relatively larger percentages for 1900, as compared with those for 1890, are probably due, as stated in the report for 1900, to the fact that in 1890, because of supplementary work by correspondence and through special agents, the original returns of the census enumerators were corrected in many cases and the percentages of unknown quantities thereby oftentimes materially reduced; and it is undoubtedly true that if there had been no supplementary work at that census the percentages would have been considerably larger. No supplementary work was required by the

law in 1900, and there were no means in the office at that census for checking the returns of the enumerators. This is also true with respect to the returns for 1910, so that the results for the last two censuses rest upon the returns as made by the census enumerators without any supplementary work by correspondence or through special agents.

The almost uniformly smaller proportions of unknown in the returns for 1910 for both farm homes and other homes, and as to both proprietorship and encumbrance, may be due in part to more careful work by the census enumerators, while the smaller proportions of unknown for farm homes as to proprietorship for both 1910 and 1900, as compared with 1890, is undoubtedly due to the fact that at the last two censuses the agricultural schedule contained an inquiry as to the tenure of the farm and the enumerators were required to number their farm schedules consecutively in the order of visitation and to enter the number of the farm schedule on the population schedule for each family reported thereon as occupying a farm home. Thus the farm schedule number, as entered on the population schedule, was a convenient means of checking the two sets of returns, and, in case of omissions on the population schedule, of supplying the required information as contained on the agricultural schedule.

Proportion of owned and rented homes.—Table 10, page 1305, shows, by divisions and states, for all homes combined and for farm homes and other homes separately, the proportion of owned and rented homes based upon the census returns of 1910, 1900, and 1890. Two diagrams on page 1299 also show these proportions for all homes and for farm homes, for 1910 only.

Because of the large colored population in the Southern states, the returns in 1910 for these states were tabulated separately with respect to homes occupied by white and colored families, respectively. The statistics for these two classes of the population in each of the states comprising the three southern divisions are presented in Tables 11, page 1308, and 12, page 1310. Table 11 gives for these states the number of owned and rented and free and encumbered homes occupied by each class, as shown by the returns of 1910, while Table 12 shows the proportion of owned and rented homes occupied by white and colored families in these states at the censuses of 1910, 1900, and 1890, respectively.

In the New England and Middle Atlantic divisions and in the three southern divisions the proportion of rented homes is very large and in most of the states comprising these divisions the rented homes in 1910 constituted 50 per cent or more of all the homes. The largest proportion of rented homes in 1910 was that for the District of Columbia, where very nearly three-fourths (74.8 per cent) of all the homes were rented. Rhode Island had the next largest proportion, 71.7 per cent, and there were nine other states in which the rented homes constituted more than three-fifths of all the homes in 1910, namely, Georgia (69.6), South Carolina (69.4), New York (69.1), Louisiana (68), Massachusetts (66.9), Mississippi (66), Alabama (65.1), New Jersey (65), and Connecticut (62.8). The Northern states having these large proportions are those in which there is a large proportion of urban population and in which the proportion of farm homes is very small. The large proportion of rented homes in the Southern states, on the other hand, is due to their large colored population, among which, as shown by Table 12, more than three-fourths of all the homes occupied by colored families are rented.

The proportion of rented homes in North Dakota constituted about one-fourth (24.9 per cent), in New Mexico less than three-tenths (29.7 per cent), and in South Dakota and Idaho not much more than three-tenths (32.1 and 32.7 per cent, respectively) of all the owned homes. In each of these states the proportion of owned farm homes in 1910 was large, and in this class of homes the proportion of rented homes is comparatively small.

In most of the states there has been but little change since 1900 in the proportion of rented homes, the proportion in some states having increased somewhat and in other states having remained stationary or slightly decreased. The increase has been very decided, however, in Arizona, Nevada, and Oklahoma, while in Colorado there has been, on the other hand, a very considerable decrease in the proportion of rented homes.

The proportion of owned encumbered homes of all owned homes in 1910 was, in general, largest in the states comprising the New England, Middle Atlantic, East North Central, and West North Central divisions. Of the individual states in these divisions, there were two—New Jersey and Connecticut—in which more than one-half of all the owned homes in 1910 were owned subject to encumbrance, and there were six other states in which more than two-fifths of all the owned homes were encumbered. In the Southern and Western states the proportions of encumbered homes were much smaller, and in many of these states in 1910 less than one-fifth, and in Nevada and New Mexico particularly, less than one-tenth of all the owned homes were encumbered.

The proportion of owned encumbered homes in 1910 was larger than in 1900 in a large majority of the states, and in most of them it was also larger in 1900 than in 1890. In six states—Michigan, Minnesota, Iowa, South Dakota, Nebraska, and Kansas—the proportion of owned encumbered homes was lower at each succeeding census, while in Vermont it was less in 1910, but higher in 1900 as compared with 1890. In every Southern state except Delaware, Virginia, and West Virginia the proportion of owned encumbered homes was larger in 1910 than in 1900, and in all of these states without exception it was larger in 1900 than in 1890; and

it should be said in explanation of the very small proportion of encumbered homes reported in 1890 for most of the Southern states that, as stated in the report for that census, it is evident that the enumerators did not report all the mortgaged homes occupied by owners.

PRINCIPAL CITIES.

The statistics of proprietorship and encumbrance, as shown by the census of 1910, are presented for all incorporated places of 10,000 inhabitants or more, and for the wards of all cities of more than 50,000 inhabitants, in Table 15, pages 1355 to 1366. Statistics are also shown in this table for all places in Alaska having 500 or more inhabitants, for Honolulu and Hilo in Hawaii, and for all places in Porto Rico having a population of 5,000 or more. The totals for each city of 100,000 inhabitants or more are summarized for 1910 in Table 13, page 1313, together with the proportions of owned and rented homes in these cities, as shown by the returns of 1910, 1900, and 1890, respectively.

Of the 50 cities considered in Table 13, Spokane, Wash., is the only city in which less than one-half of all the homes in 1910 were rented, and in that city the proportion was very nearly half—48.7 per cent. In 39 of these cities fully three-fifths of all the homes in 1910 were rented, and in 16 of them the proportion was more than three-fourths. There are 5 cities—New York, Boston, Fall River, Cambridge, and Newark—in which the rented homes constituted more than four-fifths of all the homes in 1910, and there are 2 other cities also—Jersey City and Providence—in which the proportion was nearly as large.

In New York City as a whole, not quite nine-tenths (88.3 per cent) of all the homes in 1910 were rented homes, but in Manhattan Borough alone very nearly all the homes were rented, the owned homes constituting less than 3 per cent of all the homes in that borough. In Bronx and Brooklyn Boroughs more than four-fifths of all the homes in 1910 were rented, but in the two remaining boroughs the proportion of rented homes was not so large—somewhat more than three-fifths in each case.

PROPORTION OF HOMES OWNED FREE, OWNED ENCUMBERED, AND RENTED, BY STATES: 1910.

[1] Figures for 1890 are exclusive of Indian Territory and Indian reservations, areas specially enumerated but for which statistics of ownership of homes are not available.
[2] Per cent not shown where base is less than 100.
[3] Includes Indian Territory for 1900.

PER CENT DISTRIBUTION OF HOMES ACCORDING TO PROPRIETORSHIP AND ENCUMBRANCE, BY DIVISIONS AND STATES: 1910, 1900, AND 1890—Continued.

Table 10—Continued.

DIVISION AND STATE	OTHER HOMES: 1910						OTHER HOMES: 1900						OTHER HOMES: 1890[1]					
	Per cent of total.				Per cent of owned.		Per cent of total.				Per cent of owned.		Per cent of total.				Per cent of owned.
