

MOOSE RACING®

2018 EQUIPMENT GUIDE

Drive. It seems like such a simple word or concept, but it means so much more to us. Every rider has their own drive. Whether you are powering through corners at your local motocross track, or you are downshifting through a set of sand whoops on your latest adventure touring ride, you have your own version of drive and we are honored that you have chosen to take us along.

At Moose Racing we are driven each and every day to bring you an unparalleled offering of apparel, parts and accessories that no other brand can touch. Our drive is to see you succeed on and off the track because it's not just what we are, it's who we are. Moose Racing. The global leader for more than 30 years.

ADV1™ GEAR

Back roads, dirt roads or no road at all, the spirit of an adventure touring rider doesn't conform to road signs and manufactured pavement. It starts with a desire to seek out places many fear to go, often times on continents the general public is only familiar with from a grade school globe and ends with a shower in the river du jour. Such is the spirit of our new ADV1 gear. Produced from highly technical fabrics and possessing features that match other adventure touring apparel, but doesn't approach costs in the stratosphere. When you decide to embark on your next two-wheeled crusade, make sure you are veiled with no reservations. You can buy something more expensive from those who cut their teeth in the asphalt market, or you can go with ADV1 from the original offroad company, Moose Racing.

- Main hoops support each side case when mounted
- Matte-finish, black powder coating protects the finish of each mount

- Some mounts also feature machined aluminum clamps or signal relocaters if required
- Some applications offer a choice of symmetrical or asymmetrical mount locations for staggered side cases sizes (called out in chart)
- All hardware is zinc-plated with flange style heads; nuts are also flange style with nylon or metal locking threads

CARBON FIBER SKID PLATES BY ELINE

\$159⁹⁵

- Thick composite plates with many advantages over aluminum
- The use of antiballistic composite material gives our composite a longer fatigue life and greater tensile strength than aluminum
- Composite plates are molded to the exact shape desired, making for a closer fit and more protective plate
- Composite plates absorb vibration and do not amplify sounds like aluminum plates do
- When hit hard, aluminum permanently deforms, bending frame tubes and slicing into water pumps
- Composite plates will bounce back from hard hits and look great long after aluminum plates give up
- Skid plates protect the side engine cases and the water pump in addition to the frame and the center case
- Designed with a high front to keep mud from building up on the engine
- Mounting hardware included

BRAIDED CLUTCH LINES \$56⁹⁵

- Venhill Engineering in the UK makes Moose Racing Stainless Steel Clutch lines to the highest specifications
- Each line is made from top quality PTFE coated hose, wrapped with British made stainless steel, and PVC coated for protection and great looks
- Rubber protection boots and extra rigid tubing are used to protect vulnerable areas from heat and impact and to prevent hose flex under compression
- Each line is designed to withstand a minimum of 14,000 PSI
- Installing our stainless lines gives a large performance increase by significantly reducing expansion under pressure, and absorption of water when compared to stock rubber hoses

STAINLESS STEEL BRAIDED BRAKE LINES

\$46⁹⁵ - \$69⁹⁵

- Swivel union ends are the secret to easier fitting, and ensure a kink and stress free installation
- Venhill Engineering in the UK makes Moose Racing Stainless Steel Brake Lines to the highest specifications
- Each line is made from top quality PTFE coated hose, wrapped with British made stainless steel, and PVC coated for protection and great looks
- Rubber protection boots and extra rigid tubing are used to protect vulnerable areas from heat and impact and to prevent hose flex under compression
- Each line is designed to withstand a minimum of 14,000 PSI
- Installing our stainless lines gives a large performance increase by significantly reducing expansion under pressure, and absorption of water when compared to stock rubber hoses

520 FB-RING CHAIN **\$107.95 - \$119.95**

- This is the top of the line. The strongest, most durable sealed chain that we offer
- FB = Fine Blanking, an incredibly precise manufacturing process that yields perfectly cut links
- Tight tolerances make the plate, pin, and bushing union accurate and strong
- Due to the accuracy of the cuts and the use of stronger alloyed steel the FB has our highest tensile strength rating, nearly 8,000 lbs
- Special sealing rings are chemically treated to gain strength and reduce friction
- The FB treatment allows the O-rings to be impregnated with grease
- FB rings are stronger and more durable than X-rings, with significantly less friction
- Gold links and rollers, silver inner plates, pins and bushings
- Clip-type connecting link included
- CC recommended / average tensile load 450cc & above / 7,937 lbs
- Replacement connecting M link available - retail \$5.95

CHART

CHROMOLY-STEEL FRONT SPROCKETS

\$14.95 - \$26.95

- Machined from impact and wear resistant chromoly steel
- Inner splines are broached to provide maximum spline-to-countershaft contact. This helps distribute driveline forces over the largest possible area
- Heat treated, then finished with a nickel coating for corrosion resistance and lubricity
- **BE SURE TO CHECK FOR CLEARANCE WHEN ORDERING SIZES LARGER THAN STOCK**
- Made in the USA

ALUMINUM REAR SPROCKETS

\$38.95 - \$64.95

- The 7075 T651 aluminum we use for these sprockets receives an extra tempering which reduces distortion and provides optimal thickness vs. typically thinner 7075 T6 sprockets
- 100% machined, no stamping or grinding
- Optimal tooth thickness results in maximum tooth and chain contact
- We leave the "cleaning" grooves out of our sprockets, because more aluminum contacting your chain means longer chain and sprocket life
- Moose Racing rear sprockets come anodized in black; select Moose Racing rear sprockets are available in red, orange, or blue
- Made in the USA

SPROCKET LOCK BOLT KIT

\$9.95

- Set of six grade 10 steel sprocket bolts and Fuji-lock nuts
- Good for replacing stripped or stretched bolts
- Replace the whole set when you change sprockets
- Fits all full size Japanese and European off-road/MX models
- Made in the USA

GASKET SET INCLUDED

- Moose Racing pistons feature x-style forgings and fully boxed-style (race pistons) forgings for ultimate strength, minimizing friction, durability, power, and weight reduction
- We are proud to introduce our new Pro Race Piston kits for select models
- The Pro Race Piston increases the durability by reducing the stresses in the pin bore area
- The Pro Race Piston allows the pin to flex while removing stress from the area
- Full radius dome designs maximize quench while eliminating hot spots that promote detonation
- Internal bracing maximizes durability while decreasing friction in the pin assembly
- Fully-boxed style (race pistons) forgings come standard with skirt coating which reduces friction, which in turn reduces heat. These are called out in the application chart
- Our race piston kits include a DLC pin. This technology has been proven and used because of its high resistance to abrasive wear, which extends the service life and reliability under extreme conditions
- Each Moose Racing piston kit includes a high performance piston, wrist pin, rings, circlips, and a top end gasket kit
- Replacement parts available
- BE SURE TO USE RACE FUEL WITH SOME APPLICATIONS (CALLED OUT IN CHART)
- Made in the USA

RADIATOR CAPS

\$19.95 - \$20.95

- Old and faulty radiator caps can cause steam and fluid to be pumped out of the radiator overflow hose
- A replacement cap is the least expensive and easiest way to solve or troubleshoot your liquid cooled bike/ATV radiator problems
- Upgrading to a high pressure 1.6 bar, 1.8 bar or 2.1 bar from the stock radiator cap is the simplest and least expensive way to avoid over-boiling your engine
- Raising your cooling system's maximum operating pressure increases your coolant's boiling point, allowing you to ride harder and longer
- Black finished cap
- Universal fit for most Japanese models
- High temperature corrosion resistant silicone seals

*SPARK ARRESTOR REPACKS
WHEN CHOOSING A REPACK KIT FOR A SPARK ARRESTOR SILENCER, SUBTRACT 5.5" FROM THE LENGTH OF THE MUFFLER BODY FOR THE ACTUAL PACKABLE LENGTH AND ORDER BASED ON THAT LENGTH. EXAMPLE: A FMF TURBINE CORE 2 WITH A 14" LONG BODY WILL HAVE AN 8.5" PACKABLE LENGTH. ORDER THE NEXT LONGEST LENGTH. USE THIS RULE FOR PRO CIRCUIT ALSO.

**CUT TO LENGTH UNIVERSAL PILLOWS
PART NUMBERS PROVIDED ABOVE ARE DESIGNED TO PACK ALL MUFFLERS WITH CORE DIAMETERS BETWEEN 1.75" - 2.25" AND SHELL CIRCUMFERENCES BETWEEN 12" AND 13.5". MEASURE THE DISTANCE AROUND THE OUTSIDE OF THE MUFFLER'S SHELL TO DETERMINE ITS CIRCUMFERENCE.

WHEEL SPACERS \$5.95 - \$34.95

- Replace or upgrade OEM wheel spacers with these durable parts
- Water and dirt grind between wheel bearing seals and soft OEM aluminum wheel spacers, this creates grooves and allows for bearing contamination
- Moose Racing wheel spacers feature hardened steel contact surfaces
- This makes for a tight seal that will last for years and keep your bearings fresh
- Our spacers are made from either anodized aluminum with a press fit - hardened steel shell, or solid - hardened and ground bearing steel, depending on application
- Upgrade to Moose Racing wheel spacers when you replace damaged wheel bearings, or before you have to

Moose Racing Gives Back - Moose Racing has sponsored top Pro athletes for decades, but we are also very proud of the support we give to amateur riders at all levels. We are fortunate to associate ourselves with riders like Pete Laubmeier who conducts riding schools and informational clinics as a part of his AMA District 16 effort. Youth riders are our future and this is a small way we can give back and encourage new participants to the sport of motorcycling.

N.O. = NORMALLY OPEN N.C. = NORMALLY CLOSED

HOW TO CHOOSE THE PROPER KILL SWITCH:

THERE ARE TWO TYPES OF ELECTRICAL SYSTEMS USED ON ATVS, NORMALLY OPEN (N.O.) AND NORMALLY CLOSED (N.C.) BOTH WORK BY GROUNDING THE PRIMARY IGNITION LEAD. N.O. SWITCHES ARE THE OPEN TYPE, THEY WORK BY GROUNDING THE PRIMARY IGNITION LEAD WHEN THE TETHER IS PULLED AWAY FROM THE BARS. N.C. SWITCHES WORK THE OPPOSITE OF N.O. N.C. ARE TYPICALLY USED ON BATTERY TYPE IGNITIONS WHICH MAY HAVE AN IGNITION KEY AS AN IDENTIFIER. MOST NEWER MORE COMPLEX ELECTRICAL SYSTEMS ARE N.C. IF IN DOUBT? CHECK YOUR MACHINE'S WIRING SCHEMATIC.
