- Flash-upgrade firmware support

Other Features Include:

Designed to work on USB platforms, the Belkin OmniView SOHO Series 4-Port KVM Switch is engineered with advanced features such as audio and microphone switching support. This enables you to switch between computers without having to unplug and re-plug speakers and microphones. The flash-upgrade feature allows users to download the latest firmware updates to ensure compatibility with the latest computers and devices. See for yourself why over 1 million Belkin OmniView KVM Switches are being used worldwide.

Belkin OmniView KVM Cables sold separately

The SOHO Series:

This Belkin OmniView SOHO Series 4-Port KVM Switch with Audio allows you to control four DVI/USB computers from one USB keyboard and mouse, and one DVI monitor. It makes choosing your connected computers easy with convenient switching through either the press of a button or a simple keystroke. Its innovative design offers built-in cable management and creates a sculpted new look for your desktop—while saving you time, space, and money.
