

Bibliography

The following items are specifically referred to in the general introductory text or in the footnotes of the Index. For some individual county records, additional sources have been used that are not listed below, but they are noted within the database. Medley (1993) provides references to most of those supplementary sources earlier than 1993, and Jones (2005) provides other references, together with an general update and review of literature on Kentucky botany. In addition, collection data have been extracted from all issues of the Journal of Kentucky Academy of Science, Castanea and Sida, and these sources are not necessarily cited here, unless there is special interest in new records for regions or for the state.
