

EPSON ACULASER **M8000N SERIES**

Our top-performing mono laser

The Epson AcuLaser M8000N Series is Epson's fastest laser printer, producing an incredible 44 ppm in A4 and up to 25 ppm in A3. It features a high resolution of 1200x1200 dpi with genuine Adobe® PostScript® 3™ and PDF direct print for faster, more accurate processing. This is ideal for services and workgroups that need very high-volume, high quality output.

All the interfaces you need: Ethernet 10/100 Base Tx, high-speed USB, Parallel ports as standard

Great flexibility in large print runs: supports alternative paper orientation as standard, while options include a stacker, duplex printing, 3 extra A3/A4 paper cassettes.

Fast handling of complex print jobs: thanks to standard 128Mb memory, expandable to 578 Mb.

Switch between media: increase your print capabilities in seconds by adding an additional paper cassette, that accepts A3 paper.

High productivity, low total cost of ownership

Built for durability, this affordable printer incorporates many long-life components so that you can print thousands of pages without any problem. The Return Imaging Cartridge Programme further contributes to the low running costs and makes this printer an extremely cost-effective solution.

Advanced security

With built-in SSL data encryption for network use, the Epson AcuLaser M8000N goes even further to protect your work. It also provides an anti-copy function to distinguish copies from an original, and an optional CF card for setting up confidential jobs. The optional EpsonNet Authentication print solution can be installed to ensure that printouts go only to their intended audience.
