Product Description

The Kensington Ultimate Presenter™ with Virtual Pointer is an innovative presentation tool that works for a variety of environments and screens. Overcoming the shortcomings associated with traditional laser pointers, such as bright LED screens or safety restrictions, the Ultimate Presenter is optimised for use in conference rooms with TV displays, online meetings with remote participants and large auditoriums with multiple presentation screens. Complemented by versatile storage options and the KensingtonWorks™ software, the Ultimate Presenter is the ideal presentation tool for today's digital world. Optimised to work with macOS®, Windows®, and leading presentation software such as PowerPoint®, Keynote®, Adobe® PDF and Google® Slides.

Features

- Virtual Pointer Technology works on a variety of presentation screens including traditional projection screens, TV displays, bright LED screens and smart boards, making it the ideal pointer for every presentation scenario, including conference rooms, online meetings and large auditoriums.
- KensingtonWorks™ Software enables customisation of pointer size, shape and speed to suit your presentation environment, and additional options, such as configuring the blackout button to start and end the slide show.
- Ergonomist approved design features a contoured shape to minimise wrist twist and maximise comfort with an intuitive 4-button layout.
- 2.4GHz receiver with MicroSD card provides up to 20 metres (65ft) of wireless range, expandability to 32GB of memory and a plug & play user experience.
- Windows® and Mac® compatible to support PowerPoint®, Keynote®, Adobe® PDF and Google® Slides
- Storage Pouch conveniently stores your presenter in a soft travel pouch.
