Comments:
 Before adding a toll please consider the average person like me who makes less than \$40K a year.

P-0643-001

Preferences for specific alternatives or options, as expressed in comments received before and after the issuance of the DEIS, were shared with local sponsor agencies to inform decision making. Following the close of the 60-day DEIS public comment period in July 2008, the CRC project's six local sponsor agencies selected a replacement I-5 bridge with light rail to Clark College as the project's Locally Preferred Alternative (LPA). These sponsor agencies, which include the Portland City Council, Vancouver City Council, TriMet Board, C-TRAN Board, Metro Council, RTC Board, considered the DEIS analysis, public comment, and a recommendation from the CRC Task Force when voting on the LPA.

With the LPA, new bridges will replace the existing Interstate Bridges to carry I-5 traffic, light rail, pedestrians and bicyclists across the Columbia River. Light rail will extend from the Expo Center MAX Station in Portland to a station and park and ride at Clark College in Vancouver. Pedestrians and bicyclists would travel along a wider and safer path than exists today.

For a more detailed description of highway, transit, and bicycle and pedestrian improvements associated with the LPA, see Chapter 2 of the FEIS.

P-0643-002

Tolling was evaluated in the DEIS and FEIS, and included in the LPA for two important reasons. First, a toll may be necessary to pay for the construction of this project, as discussed in Chapter 4 of the FEIS. Second, a toll provides a valuable travel demand management tool that encourages travelers to take alternative modes (including light rail provided by this project), travel at off-peak periods, or reduce their auto trips. This demand management reduces congestion and extends the effective service life of the facility. When the existing I-5 northbound

P-0643-002

Forced to commute from Vancouver to Wilsonville because that is where the work is. Our budget is already stress to the breaking point with the cost of gas and I already give 9% of my paycheck to the state of Oregon. Why should I have to pay a toll? This could potentially be the straw that breaks the camels back and force me out of my job. Then What????

bridge was built in 1917, it was paid for with a toll. The southbound I-5 bridge, built in 1958, was also funded partially by tolls. In 2008, the Washington legislature passed enabling language for tolling on I-5, provided that each facility is later authorized under specific legislation. Once authorized by the legislature, the Washington Transportation Commission has the authority to set the toll rates. In Oregon, and the Oregon Transportation Commission has the authority to toll a facility and to set the toll rates.
