 I am a Montlake resident and UW alumni and I am in full support of the Pacific Street Interchange. Having read a number of articles and heard a number of opinions on the subject I fail to understand how another solution can even come to close to PSI for effectiveness, impact, and long term traffic minimization. I found the UWs initial comments against the PSI to be very interesting. Not one of them couldn't be used to some degree against any of the alternatives that have been proposed. PSI or nothing!!!
