Retrofit your existing high bays and eliminate rewiring and the need for an electrician. Our engineering department can make a custom retrofit.

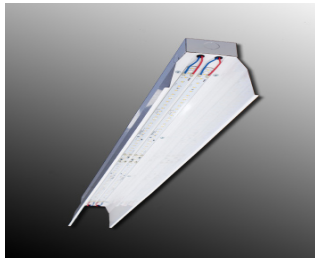

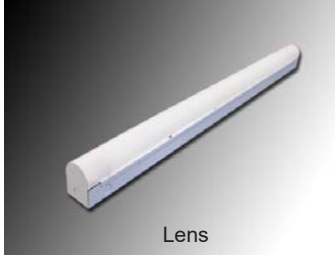

Add this Emergency to most LED Fixtures with Array and Driver.

The **ILB-CP10** from IOTA Engineering is a UL Classified LED emergency driver that allows the same LED fixture to be used for both normal and emergency operation. In the event of a power failure, the **ILB-CP10** switches to the emergency mode and operates the existing fixture for **90 minutes**. The unit contains a battery, charger, and converter circuit in a single can and is available in different mounting configurations for individual fixture requirements. The **ILB-CP10** will operate an LED array load at 10 watts with constant power at a rated output voltage of 10V-60V. The Constant Power design of the **ILB-CP10** maintains the output wattage even as the system voltage diminishes. Also suitable for field installation.

Ordering Patterns

Texas Fluorescents can create patterns with 23, 44, 45 and 66 Series. Patterns are available for recessed and pendant mounting versions with lit corners or unlit corners. See below for some of the possibilities and consult factories for exact ordering numbers and pricing.

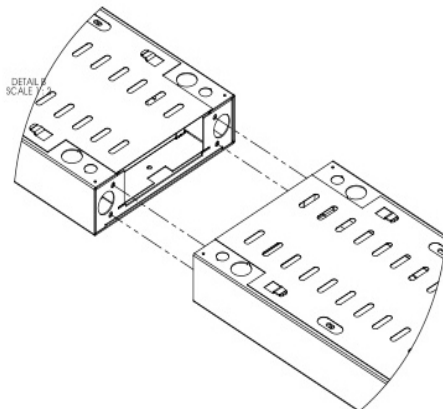

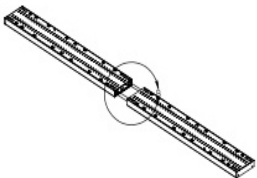

Continuous Run Ordering for 23, 44, 45, 66, LPLIN and SLP Series

1. Determine the run length and whether the run will be dimmed or not.
2. Use the above 2, 4 or 8 ft. runs from the Series Specified to add up to total run length. Use the largest individual fixtures to achieve run lengths (i.e. for 20 ft. run, use 2x8 ft. individuals and 1x4 ft. individual from above with the correct ordering info for your series). Watts and lumens for each section should be proportional for the size (i.e. If 48W with 4 ft then 8 ft should be 96W). Consult for other lengths.
3. Designate each length required in the run whether it will be the beginning of the run "B", joiner in the run "J" or the end "E" of the run. **Add the letter designation to the end of the part number.**
4. For Plug and Play electrical wiring between individual fixtures in the run, add one of the following harnesses. The number of wires is based on whether the run will be dimmable, with emergency or just ON/OFF.

Add Wiring Harness Code After the Driver Designation

- PI1 - 3 Wire Harness (normally for non-dim applications)
- PI2 - 4 Wire Harness (normally for emergency circuit)
- PI3D - 5 Wire Harness (normally for 0-10V dimming)
- PI4D - 6 Wire Harness (normally for 0-10V dimming and emergency)

Engineered ends either accept end cap to complete run or to join two fixtures together for continuous runs.

For continuous runs, first remove the end plates on the fixtures you want to join together; then using bolts and nuts (4X), attach the two ends together. Be sure both fixtures are properly aligned before tightening the bolts. Repeat steps for as long as you would like to continuous run the fixtures. Finish run with the end plate attached to the last fixture in the run.

All-In-One LED Linear Channel - Easiest Channel to Install for Individual or Continuous Runs

- Aluminum Channel
- Integral Driver
- Snap Fit Lens
- Magnetic Light Leak Block
- Integral Wire Harness

Based on your feedback, this all new All-In-One LED Linear Channel is new and improved to provide the easiest channel in the industry to specify, order and install. Whether you are surface mounting, pendant mounting and even recessed mounting, in some applications, this integral driver channel in two different profiles is the ideal solution for both individual fixtures in 4 or 8 foot and to join multiple channels for longer continuous runs in 4 foot or 8 foot multiples. This beautifully finished aluminum channel is so easy to install that the do-it-yourselfer can do it in minutes or the professional installer will do it quickly and inexpensively. A specially designed integral wiring harness (order separately) makes joining two channels electronically easy. A unique, mechanical joiner bracket with a clever special tool allows you to join two or more channels together with no light leak and a clean connection. See spec sheet for details.

All-In-One Retrofit LED Troffer Kits

Convert an existing linear fluorescent fixture to a state-of-the-art Linear LED fixture in minutes with this LED All-In-One Retrofit Kit. Choose from two great styles of Linear LED fixtures that will not only increase lighting performance, save energy and reduce maintenance but provide a fresh new look for the space. The LED Center Basket All-In-One Retrofit provides the look of a popular direct/indirect linear fixture with a special designed reflector and LED lens to provide comfortable, abundant lighting. The Chicklet Retrofit Kit provides a luminous pillow styled lends and a high level of lighting with a dramatic appearance. Each kit mounts in minutes with all the LED components neatly engineered in one simple frame that mounts to two side rails that mount between the existing fixture body and the T-bar. Available in 2x2 or 2x4 sizes and a variety of wattage, lumens and color temperatures.

The Simple LED Solution

X1LED

The Benefits of LED with
Ease, Practicality and Flexibility

THE SIMPLE LED SOLUTION

X1LED

The most economical, practical and user friendly series of LED fixtures with the energy savings, quality of light, long life and hassle-free maintenance. X1 LED fixtures are UL Listed with the latest LED T8 Bypass lamps. Fixtures provide over 40% energy savings over comparable fluorescent fixtures utilizing less expensive fixtures than the fluorescent version and have flexibility to change wattage and color temperature any time. Fixture performance will evolve over time with the evolution of the T8 LED lamp technology. Concerned about maintenance with an LED array and driver fixture, X1LED solves that by utilizing LED T8 lamps that fit into the fixture just like a fluorescent lamp.

LED System

A complete UL Listed LED fixture with no ballast or driver to fail. Special red sockets to identify fixtures made for LED T8 lamps.

Flexibility and Long Life

Change the LED T8 lamp any time to different wattage, color temperature or lumens.

Premium LED T8 Lamps

Texas Fluorescents use top quality LED T8 lamps that are field tested for demanding applications.

Universal Strip Retrofit Kit

Choice of Reflectors or Ballast Cover

For ballast cover, choose strip width 4.25" or 5"

For enhanced light output add a mirrored specular reflector (M20) or white reflector (W10).

Universal socket bar SKRUSB is ideal to retrofit 4.25" to 5" strips with either reflector or ballast cover.
