MEMORANDUM OF INSTRUCTIONS

1. CONTENTS - This publication contains a list of parts embodied in the Vampire FB. Mk.9 Airframe and has been allocated Section Number 26FC.
2. DEMANDS - Normally only parts which bear reference numbers are to be demanded, but if other parts are required, the part number must be shown on the demand.
 Demands for parts to make an airframe "Serviceable", must invariably bear the serial number of the airframe.
 Certain parts in this publication do not bear reference numbers. These parts, if required, should be made up from local resources or if the manufacture of such parts be beyond the capacity of the unit, the parts are to be demanded and the demand endorsed, "Unable to manufacture locally".
 Certain parts quoted in this publication are held in other Vocabulary Stores Sections, the relevant section and reference number being shown in the Reference Number column.
 Demands are to be made out strictly in accordance with the procedure laid down in Air Publication 830, Volume I.
3. EXHAUSTION OF EXISTING STOCKS - An asterisk placed in the Part Number column against a group or part indicates that further purchases to that design will not be made, but that existing stocks are to be used until exhausted.
4. INTERCHANGEABILITY - Where a group or part bearing a reference number is interchangeable with a group or part in another type of airframe, the same section and reference number has continued to be used.
5. INDENTATION SYSTEM - It will be noted that this publication uses the Multi-Indentation System.
 The main assembly, consisting of several sub-assemblies and detail parts, indicates their relationship by the indentation of titles. The same is true in listing the detail parts under the sub-assemblies.
 This system of indentation of titles is in accordance with the following outline:-
 Main Assembly - Starts at left-hand margin.
 Sub-Assembly and/or detail parts of Main Assembly - Indented one column.
 Detail Parts of Sub-Assemblies - Indented one further column, et seq.
6. NUMBERS OFF - Numerals within a group indicate the quantity used for one only of that particular group. This is also applicable in the case of attaching parts.
7. MAJOR REPAIR - The letters "M.R." against a group or part indicate that the item is required only for major repair purposes.

8. FLEXIBLE CABLES - To facilitate the manufacture of flexible cables, a chart showing the particulars of all fittings required is to be found at the end of the publication and for easy reference, is in numerical order of part numbers.
9. PIPE LINES - To facilitate the local manufacture of pipe lines, a chart showing the necessary particulars of tubing and end fittings required is to be found at the end of the publication and for easy reference, is in numerical order.
10. AMENDMENTS to this publication will be published by means of amendment lists. These lists will be numbered consecutively and Commanding Officers will give the necessary instructions for the upkeep of the publication and completion of the amendment certificate.
It is intended, where practicable, that alterations shall be made to the publication in ink, but sometimes it will be found advisable to paste in a portion of the amendment itself. A statement of all amendment lists distributed during the quarter will be published in the Air Ministry Orders.
11. PART NUMBERS - When an assembly or group does not bear a part number in the part number column, but has it shown in parenthesis after the description, it is a reference to the drawing on which the parts following are to be found. These part numbers must not be quoted on demands.
12. INCORPORATED MODIFICATIONS AND AMENDMENTS - See Modification and Amendment Record Sheets.
13. SERIAL NUMBER - This publication is serially numbered and is to be accounted for in accordance with A.M.O. A.772/47.

The Amendments promulgated in the undermentioned Amendment Lists have been incorporated in this Publication
