Welcome to the HP Product Guide. The latest edition will ensure that you have access to a definitive and detailed guide to our world-beating product portfolio.

Pricing Notes

Within the guide, we have quoted List Prices (LP). This will provide an indication of the typical buying price that you will pay for HP products.

Please be aware that these prices do not represent suggested retail prices. The prices quoted within this guide do not include the current rate of VAT or any other localised tax that may be applicable.

Your HP supplier will be able to provide the actual price that you will pay for all your specific requirements.

Legal Disclaimer

What is Top Config?

HP's Top Config is an online build-to-customer-order program which simplifies the configuration, quote and order processes, delivering exactly the PC the customer wants at a competitive price in a reduced time.

HP's channel partners benefit from suitable availability without requiring specific in-house resources and, at the same time, achieve a better margin. The program is expanding to include corporate notebooks and industry standard servers throughout FY05.

1) Through Top Config, HP's objective is to achieve direct-like agility and operational efficiency with the reach, convenience, services and personalization of the channel.

2) HP's Top Config program means customers get products configured to match their needs with the serviceability and reliability associated with using their trusted HP partners ? at a highly competitive price and with fast turnaround time.

3) Top Config is one of our key channel go-to-market drivers.

Whilst it boasts direct-like agility, all orders are through our channel partners. Top Config is a key differentiator HP and our partners can bring to customers.

Value for Customer

? Configuration I want

? From my trusted reseller

? Competitive Pricing

? 10day SLA

Value for Partner

- ? No Inventory
- ? On-line configuration
- ? Bundling & Up selling capabilities
- ? Lower Distribution costs

Top Value

HP's Top Value programme offers a comprehensive line up of HP products at an upfront competitive price.

HP manages the inventory by working closely with HP Top Value partners to ensure that the great products are always in stock.

This makes Top Value a valuable tool for your customers as they can purchase a Top Value product at a competitive price and have it delivered next day!

You are under constant pressure to deliver more with less, even in the face of declining budgets and spending constraints – while your IT department requires higher performing systems for their more demanding workloads. You need an affordable UNIX server that you can install quickly and justify easily. The HP Integrity rx2800 i2 Server is the economical and easy way to boost

HP Integrity rx2800 i2 Server

Standard features

- Compact scaling - run entry-class UNIX workloads with outstanding performance and scalability**

The HP Integrity rx2800 i2 Server gives you up to 9x performance boost compared to legacy Integrity Servers in a 2U footprint, with 2x more CPU performance, quad-core Intel® Itanium® 9300 processors, 3x more memory, and 2x I/O slots, plus 2x GbE NICs.

- Out-of-the-box cost savings with lower TCOs and greater energy efficiency.**

With the HP Integrity rx2800 i2 Server you reduce your solution acquisition costs: hardware, OS, and support by up to 58% less cost vs. rx6600 (8c to 8c) and 28% less cost vs. rx2660 (4c to 4c). Reduce OS licensing fees using HP-UX with up to 50% lower price per core than earlier Integrity Servers.

- Operational excellence - increase productivity with state-of-the-art management tools**

The HP Integrity 2800 i2 Server with HP Insight Control featuring iLO 3 enables administrators to proactively manage HP Integrity server health, deploy servers quickly, reduce power consumption and control Integrity servers remotely from outside the data center.

- Expansion slots: Max support of 6 IO slots with two 3-slot PCIe riser cards. Choice of two riser cards: 3-slot PCIe riser card (one full-length/half-height x8 speed/x16 connector slot, and two half-length/full-height x4 speed/x8 connector slots), and 2-slot PCIe riser card (one full-length/full-height x8 speed/x16 connector slot, and one half-length/full-height x8 speed/x16 connector slot). Minimum of one riser card, max. of two.
- Memory, maximum: 384 GB
- Memory type: DDR3
- Power supply type: Hot plug redundant power supply
- Number of processors: 2 or 1
- Processor core available: 4 or 2
- Processor speed: 1.73 GHz
- Processor family: Intel® Itanium ® 9300 series
- Drive description: (8) SFF SAS and/or; (8) SFF SSD
- Infrastructure management: Insight Control with iLO Advanced (iLO 3)

Is your branch office or data center server infrastructure challenged to support more users and applications within constrained budget, smaller IT staff and limited space or energy footprint? In your environment is downtime not an option, security is paramount and IT dynamics mandate a flexible converged infrastructure that scales with your business? The HP Integrity rx2800 i4 Server,

HP Integrity rx2800 i4 Server

Standard features

- Do More With Less**

The HP Integrity rx2800 i4 Server boosts performance up to 3x within 2U foot-print with one or two Intel® Itanium® 9500 series processors having four or eight cores and 33% higher memory bandwidth.

- Be Safe and Sound**

The HP Integrity rx2800 i4 Server employs resiliency across the system stack *Error detection, correction and isolation for processor, cache and memory *Hot-plug storage, hot-plug N+N fans and power supplies *Virtualized workload migration and fault isolation with HP Virtual Partitions (vPars)

- Play It As You Like**

HP Integrity rx2800 i4 Server can be deployed in rack-mount, tower or office friendly form factors (with reduced acoustics) providing configuration flexibility. Start small with 4 cores, 8 GB memory, 146 GB storage, 2 I/O slots and expand to 16 cores, 384 GB memory, 7.2 TB storage and 6 I/O slots.

- Expansion slots: Six (6) PCIe Gen2.0 Slots; Maximum
- Memory, maximum: 384GB
- Memory type: DDR3 RDIMM
- Power supply type: (2) 1200W Platinum Plus hot plug power supply kit Common Slot
- Number of processors: 2 or 1

Has your data center become inflexible, monolithic, hard-wired, under-utilized collection of systems and complex processes that require excessive manpower to operate? The HP Integrity Superdome 2 Server family is built on tomorrow's IT standards. Utilizing the HP Converged Infrastructure to deliver consolidation, modernization, shared services and business continuity initiatives by

HP Integrity Superdome 2 Server

Standard features

- Converged Infrastructure**

A common modular infrastructure based on a blade design, which is a smarter way to support all of your vital applications.

- Mission-critical Design**

Unified blade architecture, from X86 to Superdome, using up to 32 quad-core Intel® Itanium® processors

- BladeSystem Efficiency**

Common components used throughout.

- Expansion slots: 48 external PCIe x8 Gen2 96 external PCIe x8 Gen2 24 PCIe Mezzanine (16 Type II and 8 Type 1, PCIe x8 Gen2) 48 PCIe Mezzanine (32 Type II and 16 Type 1, PCIe x8 Gen2)
- Memory, maximum: 4TB

The HP Integrity BL860c i2 server blade is a two-socket full-height blade featuring the latest Intel® Itanium® processor 9300 series supported by up to 384 GB memory (24 DIMM slots) and features 4 Flex-10 (10 Gigabit) Ethernet ports standard. The BL860c i2 also features HP's unique Blade Link technology which combines multiple blades to create 2, 4 and 8 socket systems, providing greater

HP Integrity BL860c i2 Server Blade

Standard features

- Scale Up, Scale Out, Scale Within**

Up to two (2) Intel Itanium processor 9300 series providing 8-cores of compute power

- Always-on Resiliency**

Intel Itanium processor 9300 series provides up to 2x better reliability than the industry volume processors with features such as Intel Cache Safe Technology and error hardened latches

- Industry-leading integrated infrastructure management**

HP Virtual Connect Flex-10 technology offers up to 16 FlexNIC ports of Ethernet connectivity before adding additional server adapters

- Expansion slots: 3
- Memory, maximum: 384 GB
- Memory slots: 24 DIMM slots
- Memory protection features: Advanced ECC
- Memory type: PC3-10600R or PC3-10600E RDIMMs or UDIMMs DDR3
- Network controller: (2) 10GbE NC532i Flex-10 Multifunction 4 Ports
- Number of processors: 2 or 1
- Processor core available: 4 or 2
- Processor speed: 1.73 GHz
- Processor family: Intel® Itanium®

Do you need a high performance blade server that is designed for database, Java, and technical computing applications? The HP Integrity BL860c i4 Server Blade is a two-socket full-height blade featuring the latest Intel® Itanium® processor 9500 series supported by up to 384 GB memory (24 DIMM slots) and features 4 FlexFabric Converged Network Adapter (CNA) ports standard. The

HP Integrity BL860c i4 Server Blade

Standard features

- Speed Up Mission-Critical Applications**

The HP Integrity BL860c i4 Server Blade comes in one or two, 4-core and 8-core, Intel Itanium Processor 9500 Series that provide up to 16 cores of computing power for the most demanding mission-critical workload requirements.

- Scale Up to Increase Performance**

The HP Integrity BL860c i4 Server Blade includes the HP Blade Link technology, which enables linear scalability from 2- to 4- to 8-socket server blades to meet your changing business demands.

- Improve Reliability and Increase Manageability**

HP-UX 11i v3 provides a proven operating environment delivering the industry's most resilient UNIX platform so your mission-critical applications are running and secure without compromise.

The Brocade 8Gb SAN Switch for HP BladeSystem c-Class delivers an easy to manage embedded Fibre Channel switch with 8 Gbps performance. The Brocade 8Gb SAN Switch hot-plugs into the back of the HP BladeSystem c-Class Enclosure. The integrated design frees up rack space, enables shared power and cooling, and reduces cabling and small form-factor pluggables. Enhanced

Brocade 8Gb SAN Switch for HP BladeSystem c-Class

Standard features

- Enables data center consolidation with HP BladeSystem c-Class through a state-of-the-art zero-footprint design while lowering cost through shared power and cooling, fewer cables and SFPs, and a reduction in space
- Providing support for up to a single trunk made up of all eight SAN ports for a total of up to 64 Gbps balanced throughput. Trunking of the SAN-facing ports with external Brocade or HP B-series Switches provides a high-bandwidth solution while lowering costs through fewer SFPs and cables.
- Integrates with HP Onboard Administrator for BladeSystem, HP Systems Insight Manager, and HP Storage Essentials and leverages HP B-series management and monitoring tools. An SMI-s API enables the use of industry standard interfaces to integrate management with other applications.
- Availability features: Redundant switches per BladeSystem for high availability; Hot-swappable; Hot-code load activation
- Media type technology: Small Form-Factor Pluggables (8 Gbps SFP+ and 4 Gbps SFP)
- Aggregate switch bandwidth: 384 Gbps; End-to-end, full duplex
- Port speed: 8 Gbps
- Number of ports: 12 - 24; Range, depending on model
- Software (optional): Power Pack+ Software Bundle; Adaptive Networking; ISL Trunking; Advanced Performance Monitoring; Fabric Watch; Extended Fabric; Fabric Manager; Data Center Fabric Manager Enterprise Software; Data Center Fabric Manager Professional Plus Software
- Encryption capability: No
- Protocol supported: Fibre Channel
- Feature: Enables data center consolidation and cost savings through a state-of-the-art integrated design: Zero footprint design, shared power and cooling, and fewer SFPs and cables
- Feature: Enables emerging applications such as server virtualization with high throughput connections from the server to the storage while providing investment protection: Next generation 8 Gbps technology that includes backward compatibility with 2Gb and 4Gb networks; Non-blocking architecture that supports up to 384 Gbps full duplex; Support higher bandwidth trunks for performance and lower cost; Assures Service Level Agreements for virtualized environments with Adaptive Networking technology

The Brocade 8Gb SAN Switch for HP BladeSystem c-Class delivers an easy to manage embedded Fibre Channel switch with 8 Gbps performance. The Brocade 8Gb SAN Switch hot-plugs into the back of the HP BladeSystem c-Class Enclosure. The integrated design frees up rack space, enables shared power and cooling, and reduces cabling and small form-factor pluggables. Enhanced

The Cisco MDS 8Gb Fabric Switch for HP BladeSystem c-Class delivers an embedded option for HP BladeSystem c-Class customers deploying storage area networks in their enterprise. The integrated design frees up rack space, enables a reduction of components, and utilizes shared power and cooling within the BladeSystem enclosure resulting in space and cost savings. The Cisco MDS 8Gb

Cisco MDS 8Gb Fabric Switch for HP BladeSystem c-Class

Standard features

- Outstanding Performance and Flexibility**

The Cisco MDS 8Gb Fabric Switch hot-plugs into the back of the HP BladeSystem c-Class enclosure, freeing up rack space. Interconnect internal to the BladeSystem reduces cabling, SFPs and associated costs. Shared power and cooling resources further reduces cost and additional points of failure.

- Powerful Enterprise Features**

Dynamic and growing businesses require the flexibility to manage their investment wisely. Designed to scale as business needs dictate with the option of a 12-port model and a 12-port upgrade license.

- Broad Management Capabilities**

Individual ports can be configured with short or long-range SFP+ optics for connectivity of up to 10 kilometers.

- Availability features: Hot Plug, non-disruptive software upgrades
- Media type technology: Small Form-Factor Pluggable Plus (SFP+) and Small Form-Factor Pluggable optical transceivers
- Aggregate switch bandwidth: 384 Gbps; Maximum, depending on model
- Port speed: 8 Gbps Fibre Channel
- Number of ports: 12 - 24 Fibre Channel; Range, depending on model
- Software (optional): Cisco Fabric Manager Server for HP BladeSystem c-Class (optional), Cisco Enterprise Package for HP BladeSystem c-Class (optional), Cisco FMS Enterprise Package Bundle for HP BladeSystem c-Class
- Encryption capability: No
- Protocol supported: Fibre Channel
- Management features: Cisco MDS 9000 Family Command Line Interface (CLI), Cisco Fabric Manager, Cisco Fabric Manager Server (optional), Cisco Enterprise Package (optional)
- Models available: Factory-configured 12-port and 24-port models

The HP 6Gb SAS BL Switch for HP BladeSystem c-Class enclosures is an integral part of HP direct connect SAS storage, enabling a shared SAS storage solution. The SAS architecture combines a P711m, P712m (with cache module) or P721m Smart Array in each server and 6Gb/s SAS BL switches connected to supported HP storage enclosures for SAS storage. The 6 Gb/s SAS BL Switch

HP 6Gb SAS Switch for HP BladeSystem c-Class

Standard features

- More External Storage for c-Class Enclosures**
 Enables servers within the c-Class BladeSystem enclosure to share storage on an P2000 G3 SAS array system, without the need for an external SAN infrastructure. Increases storage utilization, flexibility, and enables full virtualization without a SAN.
- Simplified Management**
 Centralizes control and reduces storage management cost. Management tools and software included in the price.
- Highly Available, Cost-effective External Storage**
 Redundant SAS switches are active, if one fails the second takes over the entire workload.
- Availability features:** Redundant 6Gb/s SAS BL Switches offer high availability path failover
- Media type technology:** LFF and SFF Hot Pluggable SAS or SATA HDDs
- Aggregate switch bandwidth:** 6 Gbps
- Port speed:** 6 Gbps SAS
- Number of ports:** (16) SAS; (8) Mini-SAS; SAS connections are 2x and mini-SAS connections are 4x, per switch
- Protocol supported:** Serial Attached SCSI (SAS)
- Management features:** Common switch management for shared and zoned SAS storage; HP Systems Insight Manager; Onboard Administrator support
- Models available:** 6 Gb/s SAS Switch Single or Dual Pack
- BladeSystem supported:** Yes, please reference the QuickSpecs for details
- Upgradability:** Configure as single or redundant pair of switches

HP Reference Information Storage System - это полностью интегрированная, легко масштабируемая ИЛМ-платформа архивирования контента крупных предприятий, предназначенную для управления информацией (IM).

HP Integrated Archive Platform

Standard features

- Совместимые операционные системы: Система RISS содержит серверы ProLiant, управляемые ОС Linux и Windows, но в большинстве ситуаций эти серверы невидимы для клиента. Серверы шлюза электронной почты (см. ниже), связанные с решением HP StorageWorks Reference Information Manager (RIM) for Messaging, которое поддерживает среды обмена сообщениями Exchange и Notes. Другие продукты RIM также имеют агенты, работающие на серверах клиентов (RIM для файлов, RIM для баз данных и File Migration Agent). Дополнительные сведения о поддержке ОС и приложений можно получить в кратких спецификациях конкретных продуктов RIM.
- Свойство: Полностью интегрированная, легко масштабируемая ИЛМ-платформа архивирования для крупных предприятий: Grid-архитектура допускает наращивание от сотен до сотен тысяч пользователей с объёмом архивов в сотни терабайт; Интеграция индексирования контента и возможностей поиска обеспечивает быстрый поиск и извлечение от 100 до 100 млн. документов; Функции удалённого копирования поддерживают решения обеспечения высокой доступности / аварийного восстановления
- Свойство: Активирует решения для обеспечения совместимости и повышает производительность основного приложения: Возможности архивации для соблюдения правовых норм с защитой от атак и назначением периодов хранения могут обеспечить соответствие законодательным и юридическим требованиям госучреждений и бизнеса; Выборочное или высокопроизводительное архивирование обеспечивает автоматическую миграцию неактивных данных в свободное основное хранилище и повышает производительность основного приложения
- Свойство: Снижение затрат, высокая производительность, ёмкость, возможности поддержки: Снижение требований к основному хранилищу, сокращение окон резервного копирования и соответствующих затрат на сетевую инфраструктуру; Стандартизованная серверная платформа расширяет возможности поддержки и управления; Решение Universal Smartcell улучшает защиту инвестиций, позволяя клиенту покупать максимум обновлений и поддерживать предыдущие версии RISS; Universal Smartcell значительно снижает стоимость хранения
- Предварительные условия по аппаратному обеспечению: HP StorageWorks Reference Information Storage System совместима со всеми серверами HP, использующими любые из перечисленных операционных систем и приложений: RISS поддерживает среды обмена сообщениями Exchange и Notes с использованием программных пакетов RIM for Messaging, доступных в HP (RIM for Messaging -Exchange RIM for Messaging - Notes, RIM for Compliance)

The HP StorageWorks Reference Information Storage System (RISS) is an active-archiving solution that minimizes storage costs and offers unprecedented end user accessibility by transforming data into useful information.

Компоненты HP StorageWorks RISS

Standard features

- Свойство: Reduces storage infrastructure costs: 3x to 5x reduction in storage costs by using advanced block single instancing capabilities; Reduces environmental (power, space, and cooling) by up to 35%; Appliance-like simplicity, but with enterprise class features and management; Automatic migration of inactive data frees primary storage; Significantly reduces backup and network infrastructure costs; Provides investment protection through HP Storage Grid architecture
- Свойство: Delivers industry leading ILM Platform for reference information: Search billions of documents or records in seconds; Massively scalable to hundreds of TB per system; Enables end users to search and retrieve information without IT intervention; Supports email, file, and database data types; Integrated with wide range of application partners through industry standard interfaces and protocols
- Свойство: Addresses Compliance and Legal Discovery Requirements: Mitigates Regulatory and legal risks and supports corporate governance initiatives; Secure capture of business records with date and time stamping of all objects; Non-tamperable and retention managed; Secure, highly available, and disaster protected

HP StorageWorks Medical Archive Solution Components use computing grid-based software to implement an Information Lifecycle Management (ILM) solution for secure and reliable storage and transmission of medical imaging data.

New! Компоненты решения HP Medical Archive Solution

Standard features

- Свойство: Single fast-access grid based solution for long term archival of medical images: The Medical Archiving solution uses intelligent Information Lifecycle Management to automate and optimize information storage in the right place, on the right media, at the right time and at the right cost; Uses ILM policies to Align storage costs with value of the data; Policy driven migration and data replication based on value of data and retrieval performance requirements.
- Свойство: Strengthen Business continuity: Fault Tolerant, self-healing resilient architecture; No single points of failure; Dual data protection via RAID-5 and mirroring configuration available for soft-error correction and hard-error protection for each storage subsystem; Policy driven data replication to distribute data across the archive grid to control geographic location and number of replicas for desired level of redundancy.
- Свойство: Hardware Obsolescence Protection Strategy: Replace, refresh and upgrade the underlying storage hardware without service interruptions; Automatic data migration without downtime and performance reduction; Flexible scalability allows user to "pay-as-you-go" upgrades to take advantage of the decreasing storage costs and increasing processing power and ride the technology storage curve.

HP StorageWorks Reference Information Manager for Databases, an ILM solution manages accelerating data growth for enterprises with large database applications that is designed to improve application performance and meet compliance.

ПО HP Database Archiving

Standard features

- Совместимые операционные системы: HP-UX (PA-RISC) 11i v1, 11i v2; HP-UX (HP Integrity) 11i v2; Red Hat ES 3.0 Linux (HP Integrity); Red Hat ES 3.0 Linux (x86); SOLARIS 9, 10; AIX 5.2
- Свойство: Improves database application manageability: Significantly improves application performance; Reduces backup time and recovery windows; Reduces the impact of downtime due to application migration & upgrade
- Свойство: Lowers TCO of managing database applications: Uses ILM & tier-storage approach for efficiently managing database applications; Significantly reduces excessive infrastructure upgrades to maintain sustainable service levels; Efficient utilization of existing infrastructure to reduce incremental hardware and storage expenditure
- Свойство: Reduces risks of regulatory compliance failure: Automates data retention policies; Sustained long-term compliance without excessive infrastructure expenditure; Eliminates risks & exposure of non-compliance with a better controlled information and access
- Предварительные условия по аппаратному обеспечению: База данных Oracle; База данных Sybase; Приложения, работающие с базами данных Oracle или Sybase; Для предоставляемых HP пакетов приложений: Oracle, PSFT

The HP Reference Information Manager (RIM) for Messaging is an Email archiving application that reduces the cost of Email storage and helps address compliance needs. RIM for Messaging fully integrates with Microsoft Outlook and Lotus Notes.

ПО HP Email Archiving для Exchange

Standard features

- Совместимые операционные системы: Microsoft® Windows® 2000; Microsoft® Windows® XP
- Свойство: Поддержка автономных пользователей в MS Exchange: Модуль кэширования записей позволяет автономным пользователям получить доступ к архивным сообщениям в MS Exchange. Возможность конфигурирования модуля пользователем
- Предварительные условия по аппаратному обеспечению: Решение RIM for Messaging специально разработано для подключения приложения к системе HP Reference Information Storage System (RISS); RIM for Messaging HE поддерживается любым другим аппаратным обеспечением; Для решения HP RIM for Messaging требуется шлюз HP RISS Archiving Gateway. Для сред MS Exchange используется A7977A HP RISS Gateway for Exchange Archiving, для сред Lotus Domino используется A7978A HP RISS Gateway for Domino Archiving. Для смешанных сред используются оба эти решения; NSS Sizer Tool (вкладка ILM) автоматически выполнит настройку решения RISS+RIM с правильным количеством шлюзов

Standard Models	Part number	wc	lp

HP RIM Selective Exchange 500 User LTU	T3564A	NA	N/A

A new entry to the HP Information Lifecycle Management (ILM) family of products, HP FMA is an automated solution designed to help simplify Windows-based file, web and application server administration in small business to enterprise environments.

ПО HP File Archiving

Standard features

- Совместимые операционные системы: Microsoft® Windows® 2000 Server с пакетом обновлений Service Pack 4 или выше; Microsoft® Windows® Server 2003 с пакетом обновлений Service Pack 1 или выше; Microsoft® Windows® Storage Server 2003 с пакетом обновлений Service Pack 1 или выше; поддерживаемые серверные платформы: сервер на процессорах Intel IA32 или AMD 32-бита
- Поддерживаемые устройства хранения данных: Платформа архивации RISS: Поддерживаемые версии RISS: 1.6, 1.6.1, 1.5.0.4 и 1.5.0.3, поддержка MS Office 2007; систем NAS на основе CIFS: системы NAS, на которых можно запускать указанные выше поддерживаемые ОС, поддерживаются FMA
- Свойство: Высокая скорость резервного копирования и восстановления данных – HP FMA позволяет осуществлять миграцию редко используемых файлов в экономичное вспомогательное хранилище. Редко используемый файл остаётся в виде указателя пути к перемещённым данным и небольшого фрагмента оригинального файла. Уменьшение объёма управляемых данных в основном хранилище позволяет повысить скорость резервного копирования и восстановления данных в основном хранилище
- Свойство: Удобные политики для хранения часто используемых файлов в высокопроизводительном хранилище и миграции редко используемых файлов в более экономичное хранилище: Удобство планирования заданий миграции; Перемещение файлов в архив на основе их возраста или имеющихся на них "водяных знаков"
- Свойство: Гибкие возможности архивации благодаря поддержке архивации в HP StorageWorks Reference Information Storage System (HP RISS), HP StorageWorks File System Extender (HP FSE) или тома, совместимые с CIFS
- Свойство: Удобство управления – HP FMA обеспечивает упрощение операций резервного копирования и управления инфраструктурой, необходимых для защиты крупных сред файловых серверов, веб-серверов и серверов приложений
- Свойство: Высокая скорость резервного копирования и восстановления данных
- Свойство: Гибкость бизнеса – HP FMA предоставляет клиентам возможность повторного развёртывания хранилища и ресурсов управления хранением благодаря возможности перемещения статичных файлов за пределы системы
- Свойство: Консолидация хранилища – благодаря HP FMA становится возможной консолидация файловых серверов, веб-серверов и серверов приложений за счёт перемещения редко используемых данных во вспомогательное хранилище
- Свойство: Снижение расходов на хранение и управление хранилищем – автоматическая миграция статичных данных на более экономичные уровни хранения на основе бизнес-политик и требований качества обслуживания и уменьшение количества файлов в основном хранилище

HP Identity Driven Manager (IDM), a plug-in to HP PCM+, dynamically provisions network security and performance settings based on user, device, location, time, and endpoint posture. Identity Driven Manager provides network administrators with the ability to centrally define and apply policy-based network access rights that allow the network to automatically adapt to the needs of

HP Identity Driven Manager Software Series

Standard features

- Performance**

Traffic prioritization: can be automatically applied for each session based on user, device, location, and time of day, allowing appropriate prioritization of network traffic

- Security**

Policy-based network access rights: network access policies specifying network security and performance are defined based on the user, time, location, device, and endpoint posture and then dynamically enforced at the edge of the network, where users and devices connect

- Integration**

HP network management solutions: HP PCM Plus: IDM is delivered on the HP PCM+ Secure Domain Architecture, which delivers increased scalability and security. HP Network Immunity Manager: IDM delivers enhanced integration with HP Network Immunity Manager, which monitors the network for threats and applies policy-based mitigations to offending endpoints or users; IDM and NIM work together to provide consistent and effective network security.

- Ease of use**

Simple Network Access Control: Self-registration: reduces administration effort by enabling end users to add themselves to the access control database; user's access is validated via an Active Directory; no additional software is required on end-user systems. Auto-allow groups: devices such as IP phones, printers, and certain uncontrolled devices can be given network access and segregated by device type.

- Warranty and support**

Electronic and telephone support: limited electronic and telephone support is available from HP; refer to www.hp.com/networking/warranty for details on the support provided and the period during which support is available

Standard Models	Part number	wc	lp
HP IMC Basic WLAN Manager Software Platform with 50 Access Points E-LTU	JG590AAE	NA	\$5,844

Warranty

HP Intelligent Management Center (IMC) Branch Intelligent Management System (BIMS) uses an intelligent component-based architecture to provide powerful support for service operations, delivering high reliability, scalability, flexibility and IP investment returns. Based on the TR-069 protocol, IMC BIMS offers resource, configuration, service, alarm, group, and privilege

HP Intelligent Management Center Branch Intelligent Management Software

Standard features

• Management

Managing dynamic IP devices: BIMS uses serial number rather than IP to identify a device

• Security

More secure: BIMS can use HTTPS to communicate with or transfer files to the device, it is more secure than TFTP, FTP or Telnet.

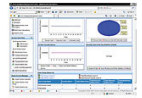

• Configuration

Easily upgrade device configurations in batches: BIMS automates batch update or upgrade on configuration files and operating system software image for network devices; this is especially convenient when numerous similarly-configured devices need to update their configuration. BIMS automates the many time-consuming steps required to upgrade while reducing the error-prone complexities of the upgrade process.

Standard features

- **Management**

Reduced VPN setup and management time: The HP IPsec VPN Manager (IVM) module provides autodiscovery, automatic performance to monitor thresholds, and a creation wizard to reduce IPsec VPN creation and management. Wizards help administrators quickly deploy IPsec VPN networks. The wizard is useful for simplifying the creation of even complicated VPN networks, reducing configuration load and decreasing maintenance costs.

- Browser supported: Microsoft Internet Explorer 6.0 or later; Firefox 3.0
- System requirements, recommended: 3.0 GHz Intel® Xeon® or Intel® Core™2 Duo processor or equivalent; 4 GB RAM; 200 GB; 1000 MB
- Minimum system requirements: 2.0 GHz Intel® Pentium® III or equivalent; 2 GB RAM; 20 GB; 10/100 MB

Standard Models	Part number	wc	lp
HP IMC IPsec VPN Manager Software Module with 25-node E-LTU	JG144AAE	NA	\$3,409

Warranty

Providing reliable, private connections is a good way to maximize the value of your network. Virtual private networks (VPNs) enable you to use the Internet as a medium for secure data exchanges. But they must maintain minimum service levels and improve network resource utility to enable delivery of bandwidth-intensive applications such as streaming multimedia. Established

HP Intelligent Management Center MPLS VPN Manager Software

Standard features

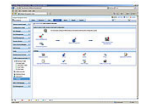

- Management**

MPLS VPN resource management: the MPLS VPN Manager (MVM) provides an easy way to add VPN resources such as provider edges (PEs), customer edges (CEs), and VPNs. PEs and CEs can be imported from the basic network resources, while VPNs can be either manually added or automatically discovered.

Standard Models	Part number	wc	lp
HP IMC MPLS VPN Software Module with 50-node E-LTU	JF410AAE	NA	\$23,351

Warranty

HP IMC Network Traffic Analyzer (NTA) Software Module is a graphical network-monitoring tool that provides network administrators with real-time information about users and applications consuming network bandwidth. A reliable solution for enterprise and campus network traffic analysis, it defends the network against virus attacks and applies varying levels of bandwidth

HP Intelligent Management Center Network Traffic Analyzer Software

Standard features

- Additional information**

Network-wide surveillance: The Network Traffic Analysis (NTA) module for IMC provides visibility of complex multilayer switched and routed environments, delivering the rapid identification and resolution of any threat to the network; this information allows administrators to enforce security policies, identify suspicious behavior quickly, respond to security threats, provide quality of service, account for network usage, and reduce network costs.

- Browser supported: Microsoft Internet Explorer 6.0 or later; Firefox 3.0
- System requirements, recommended: 3.0 GHz Intel® Xeon® or Intel® Core™2 Duo processor or equivalent; 8 GB RAM; 600 GB; 1000 MB
- Minimum system requirements: 3.0 GHz Intel® Pentium® III or equivalent; 4 GB RAM; 150 GB; 10/100 MB

Please refer to the following Warranty Codes to see what HP warranty coverage is valid to the product you are interested in

Warranty code	Warranty period	Service location	Service level	Response time	Installation included	Upgrade Eligibility (Note 2)	Applicable note(s)
3C	90 Days	HP	Replacement		No	No	4,6,16
3U	90 Days	HP	Replacement		No	No	4,6,16
4G	1 Year	On Site		Next Day	No	No	1
4M	1 Year	On Site		Next Day	No	Yes	1
4U	1 Year	HP/Dealer	Exchange		No	Yes	7
54	1 Year	On Site	Hardware + Phone-in Assistance	Next Day	No	Yes	1,36
5L	1 Year	On Site		4 Hours	Yes	Yes	1,31
5R	1 Year	On Site		4 Hours	No	Yes	1
60	90 Days	HP/Dealer	Replacement		No	Yes	16
7P	3 Years	On Site		Next Day	Yes	Yes	1
7Q	3 Years	On Site		Next Day	No	Yes	1
9R	Lifetime	HP/Dealer	Exchange	Next Day	No	Yes	7
NA	No warranty is provided for this product.						

1) Responses are based on local standard business days and working hours. Unless otherwise stated, all responses are measured from the time the Customer calls until HP has either established a mutually acceptable time for support to be performed, or HP has begun to provide On Site support or remote diagnostics. See paragraph 6 entitled "Response Times" for more terms and conditions about response times within HP travel zones.

4) Warranty service is limited to repair or replacement of defective Software media or materials only.

6) HP does not support products manufactured by another company and distributed by Hewlett-Packard. The original product manufacturer provides support. Software warranty services from HP are limited to replacement of defective Software media or materials. Customer should contact and/or register with the product manufacturer to receive any additional warranty and support coverage information that may be available.

7) Unit Exchange warranty may return to the Customer a repaired exchange unit or their original product repaired to HP standards.

16) The item is warranted against manufacturing defects in material or workmanship only.

31) Site preparation service included with installation.

36) Phone-In Assistance (PIA). Software telephone support provides access to HP technical resources for the period specified in the Product documentation commencing on the date of delivery to the original end-user. Examples may include: advice on proper installation, setting up Software configuration parameters, Software features, solutions to known problems, and information on the interpretation of Product technical documentation. See Product documentation for more details on what is and what is not included.
