The D2220sb Storage Blade delivers direct attached storage for c-Class Gen8 blade servers, with support for up to twelve SFF SAS hard disk drives or SAS/SATA SSDs or SATA Midline hard drives. The enclosure backplane provides a PCI Express connection to the adjacent c-Class server blade

- Simplified Infrastructure and Management at Extreme Scale in the Data Center**

In the past adding a server meant more devices—power, I/O devices, network controllers, device drivers—to be managed, powered, and cooled. HP Moonshot introduces a new level of sharing by integrating resources across the platform which means you can scale farther, faster than before.

- Enables New Tiers of Hosted Services**

The HP ProLiant Moonshot Cartridge aligns specific architectures with the right workload to provide an optimally tuned solution. Hosting companies can deploy an architecture for the actual workloads, removing inefficiencies in density, energy, and cost to allow for more competitive offerings.

How are you going to scale out to petabytes with your current infrastructure? Big data, largely unstructured such as messages, images, readings from sensors, and GPS signals from cell phones, are growing at an exponential rate. The HP ProLiant SL4540 Gen8 Server solves the traditional structured database problems when dealing with big data. Implementing a scale-out infrastructure

HP ProLiant SL4540 Gen8 Server

Standard features

- Designed To Support a Range of Storage Capacity per Node with Scalable Performance and Throughput**

With the HP ProLiant SL4540 Gen8 Server you have a choice of three flexible compute nodes (featuring the Intel® Xeon® E5-2400 product family) contained in a 4.3U form factor chassis that allows for shared cooling, power and management, as opposed to siloed architectures using individual chassis.

- Scale in Capacity and Performance at Lower Cost**

The 4.3U form factor chassis of the SL4540 Gen8 is capable of storing up to 240TB. With nine chassis in a 42U rack, it can achieve unprecedented server storage capacities of up to 2.16PB.

- Scale Confidently with Built-In Intelligence and Automation of the HP ProLiant Gen8 Servers**

HP Smart Array technology innovations include Predictive Rebuild to reduce downtime exposure, improved data retention with Flash Backed Write Cache (FBWC) and increased data protection with advanced data mirroring.
