### Quad-Adjust® Wire Shelving

see spec sheet **EG01.14**

**PATENTED!**  
(patent #7,992,731)

Each shelf corner fits in collar mounted to split sleeve

patented  
**QuadTruss**  
design

(Patent #5,390,803)

**Patented QuadTruss® Design**

makes shelves up to 25% stronger and provides a retaining ledge for increased strength and product retention.

**FEATURES:**

- Shelves feature special interlocking corners that fit in collars mounted to split sleeves, allowing addition or removal of a shelf without the need to disassemble the entire shelf unit.
- Tapered split sleeves create a positive lock that becomes stronger as the load increases.
- Posts (page 8) are numbered in increments of 1" (25mm) to ensure fast and level assembly.
- Leveling feet are provided to help compensate for uneven floor surfaces.
- Shelves utilize patented QuadTruss® design: the mat wires are sandwiched between two top truss wires, adding significant strength and distributing the entire load without stress and strain on the welds.

**Note:** To create a mobile shelf unit, top and bottom shelves must be standard shelves (page 6).

Quad-Adjust® shelves assembled with posts (see page 8 for posts)

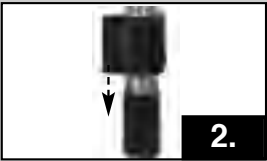

Weight capacities and packaging are the same as that of Wire Shelves (page 6).

 (patent #8,141,724 B2)  
 see product announcement **EG8152M**

shown assembled as a cart  
 (\*bins sold separately)

Assembly — numerically calibrated grooved posts, tapered plastic split sleeves and rail collars combine to make shelving assembly a simple two-step exercise:

- 1) snap the split sleeves onto a post over the number of your choice
- 2) slide a rail collar over the split sleeves. A positive lock between rail bin and post is created without the use of any tools.

BIN-HOLDER RAILS:

- Bin-holder rails are sold as an accessory or purchased with posts as a kit.
- EAGLEbrite® zinc or chrome plated.
- Bins attach to both sides of rail - no tools required.

BIN-HOLDER RAIL CARTS:

- Carts consist of four bin-holder rails and four 63" posts with casters.
- Posts are numbered in increments of 1" (25mm) to ensure fast and level assembly.

**Freight class is 70.0.**

Bin holder rails can also be used on EAGLE Floor-Trak® units

\*For additional information on Floor-Trak® Systems, refer to spec sheet EG01.39 or visit us on-line, [www.eaglegrp.com](http://www.eaglegrp.com).

**Double-Sided Bin-Holder Rails**

see product announcement **EG8152M**

**PATENTED!**  
(patent #8,141,724 B2)

- Bin-holder rails are sold as an accessory or purchased with posts as a kit.
- EAGLEbrite® zinc or chrome plated.
- Bins attach to both sides of rail – no tools required.

**BIN-HOLDER RAILS:**

- Carts consist of four bin-holder rails and four 63" (1600mm) posts with casters.
- Posts are numbered in increments of 1" (25mm) to ensure fast and level assembly.
- Assembly — numerically calibrated grooved posts, tapered plastic split sleeves and rail collars combine to make shelving assembly a simple two-step exercise:
  - 1) snap the split sleeves onto a post over the number of your choice; and
  - 2) slide a rail collar over the split sleeves. A positive lock between rail bin and post is created without the use of any tools.

### Optional MICROGARD®<sup>+</sup> for Hand Sinks!

(See pages 183-192 for applicable hand sinks.)

- MICROGARD® is an antimicrobial agent which contains built-in protection to retard the growth of a broad range of bacteria, mold and mildew on the surface that cause stains, odors and degradation.
- MICROGARD® combines inorganic antimicrobial silver ions with a patented delivery system. The patented delivery system triggers the release of silver ions which react with bacteria in three ways:
  - 1) Suffocates the cell.
  - 2) Stops the cell reproduction system.
  - 3) Stops the cell from growing.
- MICROGARD® is a second line of defense. In keeping with good hygiene practices, clean this product as usual. The protection will not wash out, while organic bactericides may.\*\*
- MICROGARD® is applied onto top and underside of sink deck, backsplash, and inside & outside of sink bowl (excludes faucets, drains, towel/soap dispensers, waste receptacle, skirt, pedal valves, and nail brush holder).

\* MICROGARD® does not protect users or others against bacteria, viruses, germs or other disease organisms. Always clean this product thoroughly after each use.

\*\* Note: To clean, use mild soap and water, rinse, and wipe entire surface dry. Soft non-abrasive cleaners may be used when necessary. Strong abrasive cleaners will scratch and dull the surface.
