Berkley Tool is proud to offer the most comprehensive selection of replacement parts and accessories for pipe threading and cutting equipment. Berkley's high quality products are also designed as replacement items that fit products manufactured by the Ridge Tool Company. Precision manufacturing, exacting standards and outstanding customer service combine to make Berkley Tool products the best value available. Compare our quality. Compare our prices. Compare our value. Then call Berkley Tool for performance.

Pipe Cutters (Metal)

These Pipe cutters feature malleable iron frames for durability. Wide rollers help ensure blade tracking. *Rollers can be removed and replaced with blades to speed cutting. All cutters feature replaceable cutter wheels, which can be selected to suit the application. See page 4 for cutter wheel selection chart.

BT-30033*

The BT-30033 is designed to fit the Berkley BT-5020 Power Drive as well as the RIDGID® Model No. 300 and 535.

BT-50000*

The BT-50000 is a hand cutter designed to cut pipe up to 2" diameter.

2-4"

BT-50224

BT-50375

Unit cuts 3/8" threaded rod clean. No additional cleaning after cutting just screw nut on end. Replaceable cutting jaws.

Pipe Cutters (Tubing)

These tubing cutters are made from a high strength alloy; all feature rollers that are grooved which allows close to flare cuts. Some models have an enclosed feed screw which helps prevent clogging. Units are designed to cut soft copper, aluminum, brass and plastic tubing.

BERKLEY #	RIDGE TOOL#	DESCRIPTION	CAPACITY	WEIGHT

Pipe Cutters (Plastic)

All models feature cast aluminum handles and tool steel blades for durability. These cutters are designed for cutting plastic pipe. All models feature ratcheting action to aid cutting, and feature a quick release blade mechanism to return the blade to the start position. Large cutter features long handles to provide extra leverage when cutting large diameter pipe.

Cutter Wheels

Berkley pipe and tubing cutter wheels are made in the USA using the highest quality tool steel. Wheels are then heat treated to exacting standards to ensure durability. Consult the interchange chart on page four, for the cutter wheel to suit your operation/application.

Berkley Pipe Wrench parts are made to Govt. Mil spec. GGG-W-651-E. All components are made from the highest quality materials, machined and heattreated to exacting specifications. These components will interchange with most pipe wrenches in the market.

Pipe Stands

Pipe Stands Material Holding

Berkley's broad line of work holding stands accommodate pipe from 1/2 - 12".

Bench Chain Vise

Heavy-duty ductile steel provides durability. Small footprint allows placement anywhere a secure pipe vise is needed. Hardened replaceable jaws have a five-inch capacity; designed to hold pipe but can also secure irregular shaped objects.

Chain Vise Stand

Tri-Stand vise has folding lower tray for ease of transporting, while providing additional workspace to hold tool, or oil cans within convenient reach. Vise base has integral pipe rest and pipe bending slots and hardened replaceable jaws. Parts interchangeable with competitive style units.

Pipe Stands

These heavy-duty pipe stands feature all steel construction and are available in working heights from 20-50 inches. All jacks have an acme-threaded shaft for precision height adjustment. Safety washer design provides a safety zone to help prevent hand injuries when releasing the lock screw. Stands are available in V-Head and Roller Head styles. Ball bearing transfers are also available to fit V-Heads. All stands are rated at 2000 pound capacity.
