# FOLK DANCE DATABASE

This database is the printout of a computer file of folk dances from syllabi that have been taught in California over the past 50 years in various camps or institutes. It contains over 8000 dances with their pronunciations, region or country of origin, record numbers, kind of dance, teachers, when descriptions have been published in Federation publications and where and when they were taught.

The data is as it is in the syllabus and if it is missing, it was also in the original syllabus.

I have done little editing but some obvious typos or errors have been corrected and noted in the comment column.

If the dance is some other teachers or credit given, this is also noted.

The spelling of the dance names show many variations and where possible to cross index them it has been done as noted in the comments.

Some dances have multiple listings where different teachers have taught it at another place, or it may be a different or slightly different dance. Some dances go by different names so that when possible this has been noted.

The "Kind" of dance is general or the starting formation and these abbreviations are used: C=circle (double or single), Col= column, L=line or open circle, FF=face forward, Lgwy=longways or contra, W=women, M=men, P=progressive, Cpl=couple, R=randomly placed, Sq=square, Ind=individual, / =either/or, "V" pos=hands joined and held down in a V, "W" pos=hands joined and held up shoulder level, "T" pos= hands on shoulder of adjacent dancer, Seg=segregated line or lines, Sp=special, Trio=2W+1M.
