

## High quality with low investment

Pro-Tech **ezRIP** combination module/wireset sensor

There's now an easy and beneficial solution for implementing respiratory inductance plethysmography (RIP) into your sleep lab.

### A sensible solution

In today's challenging times, ezRIP effort modules provide a financially sound solution for incorporating RIP technology into your sleep facility. ezRIP is ideal when incorporating RIP technology into your sleep lab for the first time or replacing an existing RIP module. The module operates with our zRIP DuraBelt effort sensor belts. ezRIP is another quality offering in a comprehensive portfolio of Pro-Tech sensors.

### What to know about ezRIP

- Low initial RIP investment
- Minimizes bedside module congestion
- Easy configurability – the driver module clips directly onto the zRIP DuraBelt and legacy zRIP belt
- Non-replaceable batteries
- One-year warranty

**PHILIPS**

**RESPIRONICS**

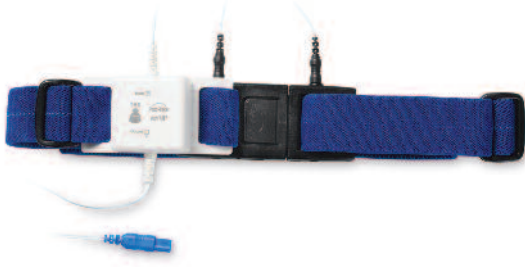

sense and simplicity

## Streamlined and simple

By plugging the ezRIP wireset into the belt effort sensor and the PSG headbox, the cumbersome driver module is kept out of the way. Technicians can enjoy the simplicity of the streamlined wire configuration while patients can enjoy the movement and freedom that comes with minimal RIP equipment being used in the study.

ezRIP compared to our current zRIP module		
	ezRIP module	zRIP module
<b>Performance</b>	Operates with our zRIP DuraBelt	Operates with our zRIP DuraBelt
<b>Warranty</b>	One year (ezRIP module and zRIP DuraBelt)	One year (zRIP module and zRIP DuraBelt)
<b>Battery</b>	Non-replaceable battery	Replaceable AAA batteries
<b>Bedside use</b>	Connects into the zRIP DuraBelt	Sits on the nightstand, or attaches to the side of the PSG headbox

Description	Part #

- Call your local Philips Respirationics sales representative
- Email us at: [sleepdx@philips.com](mailto:sleepdx@philips.com)

## One website for all of your diagnostic needs

- Visit [www.philips.com/sleepdx](http://www.philips.com/sleepdx)
- Use our helpful Pro-Tech sensor product selector guide on our website to find out which sensor is compatible with your PSG system

All of our products are backed by our market-leading service and support. Philips Respirationics has been recognized by sleep professionals as the most "recommended" diagnostic supplier in the U.S.\*

## We service all your sensor needs

Make sure you're getting high-quality performance sensors from a market leader. Our innovative Pro-Tech sensors detect a variety of sleep parameters and meet important accreditation standards. You can collect the data your studies require with confidence.

## Respiratory effort sensors

zRIP DuraBelt inductive respiratory effort sensors

## Pressure transducers

PTAF2 airflow pressure transducer

## Airflow sensors

Cannulas – Pro-Flow, Pro-Flow Plus, and MultiPurpose are all high-performance cannulas that meet a variety of patients' needs

## Thermal airflow

Thermal airflow sensors are available in disposable and reusable versions, and are compatible with major PSG systems

## Cannula accessories

Pro-Wrap tape – leaves no sticky residue when combining a cannula and thermal sensor
