MDS 9148S
10/12/2014

INTRO

The **new Cisco MDS 9148S** is a new 16G Fibre Channel SAN switch for **small and medium businesses**. This switch is powerful, flexible - with up to 48 autosensing line-rate 16G Fibre Channel ports - and has enterprise-class features in a compact one–rack unit form factor. With an **attractive price**, the Cisco MDS 9148S brings the power of **16G Fibre Channel** to a new level of value.

USE CASES

The Cisco MDS 9148S can be used as the foundation for **small, standalone SANs** or as an edge switch in **larger core-edge SAN infrastructures**.

- Single-Switch SAN Deployments

The MDS 9148S is designed to address the needs of small and medium-sized businesses, helping them deploy **cost-effective and scalable high-performance SANs**. It is also ideal for branch offices and departments in large enterprises.

- Data Center Core-Edge Deployments

The Cisco MDS 9148S is **fully compatible** with the MDS Director Multilayer Switches (9500/9700) and MDS 9100/9200 Series Multilayer Switches for transparent, end-to-end service delivery in large **data center core-edge** deployments.

HIGHLIGHTS

The Cisco MDS 9148S 16G Multilayer Fabric Switch is the next generation of the **highly reliable, flexible, and low-cost** Cisco MDS 9100 series. It combines high performance with exceptional flexibility and cost effectiveness. This powerful, compact one rack-unit switch scales from **12 to 48 line-rate 16 Gbps Fibre Channel ports**.

Cisco MDS 9148S gives customers the enhanced benefits of high performance, **pay-as-you-grow flexibility** and a compelling economic value.
