Desk Worksurfaces

SIN 711.8

Square edge profile

Tapered edge profile

Tip: Bullet and conference desk worksurfaces can be installed in either a left- or right-hand orientation in the field. However, when you specify a factory-installed grommet, you must choose either a left- or right-hand orientation, and the work-surface will no longer be non-handed. Left-hand worksurfaces extend to the left and are attached to the right relative to the user. Right-hand orientation is opposite relative to the user.

Standard Includes		Required to Specify

Specifying Conference Top Options

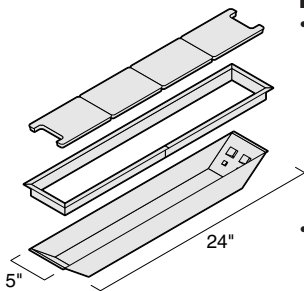

Grommets

▶ See Availability of Conference Top Options, pages F8–F10.

Options	Price	Required to Specify
• One 2½"-round grommet	+\$ 50	Center: Specify <i>with CGRC</i> and select 0835 Black, 9201 Polished Chrome, or 9211 Nickel.
• Two 2½"-round grommets	+\$ 100	Left/Right: Specify <i>with CGRLR</i> and select 0835 Black, 9201 Polished Chrome, or 9211 Nickel.
• Four 2½"-round grommets	+\$ 200	Left/Center/Center/Right: Specify <i>with CGRLCCR</i> and select 0835 Black, 9201 Polished Chrome, or 9211 Nickel.

Power Channels

▶ See Availability of Conference Top Options, pages F8–F10.

Options	Price	Required to Specify
• One power channel —Power channel with four electrical outlets and 6' conduit for hardwiring in the field —Faceplates to accommodate four customer-supplied voice/data receptacles —Two square and two wire access covers: powder-coated wood —Sleeve: paint or metal	+\$ 949	Center: Specify <i>with CPCC</i> and select cover color: 7604 Platinum (default), 7605 Black, or 7621 Snow. Select sleeve color: 0835 Black, 4799 Platinum (default), 8042 Brushed Aluminum, or 9201 Polished Chrome.
• Two power channels —Two power channels each with four electrical outlets and 6' conduit for hardwiring in the field —Faceplates to accommodate eight customer-supplied voice/data receptacles —Four square and four wire access covers: powder-coated wood —Two sleeves: paint or metal	+\$1898	Left/Right: Specify <i>with CPCLR</i> and select cover color: 7604 Platinum (default), 7605 Black, or 7621 Snow. Select sleeve color: 0835 Black, 4799 Platinum (default), 8042 Brushed Aluminum, or 9201 Polished Chrome.

Tip: Power channel conduit must be hardwired in the field.

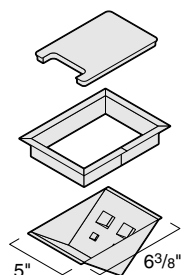

Tip: Power channels cannot be used on tops supported by X-panel bases.

Tip: Power channels cannot be used on 54"D x 120"W oval tops supported by T- or X-flex bases.

Tip: Technology covers are included with power units and power channels. Specify additional covers only if you need a different style or replacements.

Tip: Power channels cannot be used on 60"D x 144"W rectangle, boat, or racetrack tops with cabriole bases.

Power Units

▶ See Availability of Conference Top Options, pages F8–F10.

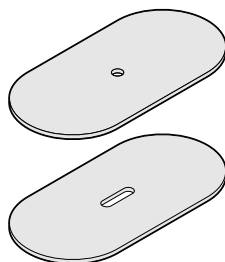

Tip: Power unit conduit must be hardwired in the field.

Tip: Power unit cannot be used on tops supported by T- and X-flex bases, disk bases or cabriole bases.

Tip: Technology covers are included with power units and power channels. Specify additional covers only if you need a different style or replacements.

Extended Corner Shells

with Laminate Worksurface, End Panels, and Back Rails

SIN 711.2

Tip: Additional shell configurations are possible by building them from components.

Tip: If shell with modesty panel in place of back rail is required, specify modesty panel separately.

Tip: All laminate surfaces have a solid color default PVC edge.

▶ See Color Coordination List, page G200.

Standard Includes

- Worksurface: laminate
- Bullnose edge profile on user's side: vinyl (PVC) black only
- Scallop grommets with cable-management insert: black only
- Two full-depth end panels: laminate
- Back rails: laminate
- Wire manager: black plastic only
- Grommets in end panels: black plastic only
- Leveling glides: black only
- Attachment hardware
- One corner end panel support: laminate

Required to Specify

- 1 Style number
- 2 Laminate color number for shell
- 3 Options, if selected (see below)
- ▶ See *Surface Materials*, page G198.

Specifying Relevant Wiring and Cabling

► For more detailed product information, see the *Relevant Systems Furniture Specification Guide* or consult your Steelcase dealer.

Common modular power components are available in various wiring schematics to accommodate a wide range of branch circuit configurations and power needs. The eight-wire system is available in four circuit 3+1, four circuit 2+2, and three circuit with separate neutrals. These choices are supported with a system ground and an isolated ground.

All components in an electrical distribution system must use the same wiring schematic. Components are color coded and keyed to make it impossible to connect mismatched parts.

All electrical components are listed by Underwriters Laboratory (UL) and certified by the Canadian Standards Association (CSA).

All Steelcase electrical systems are designed in compliance with the National Electrical Code (NEC) and Canadian Electrical Code (CEC) to function as a multi-wire branch circuit. Installations should be made in accordance with the NEC or CEC provisions for multi-wire branch circuits.

Local electrical codes vary. Consult a qualified electrical contractor or engineer for the proper installation of electrical equipment.

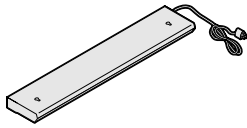

Chicago and some other locations require installations to be hardwired.

Surface Materials

Surface Materials	G198
Color Coordination List	G200
Open Line Laminate Edge Coordination Matrix	G201
Wood Grain Directions	G202

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders and the Surface Materials Tool Box.

Surface Materials Binders

- include:
- Surface Materials Reference Manual
 - A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Surface Materials Tool Box (S8150) provides 3" x 3" samples of the following surface materials:

- Vertical surface fabrics
- Seating upholstery
- Wood veneer
- Paint
- Laminate

Full-Fill Wood Finishes

This medium gloss wood finish completely fills the grain texture, yet allows the grain pattern to be seen. The wood has a lustrous, satiny look and it is smooth to the touch. This finish is available on the wood work surface or top only.

Full-fill wood choices

- 3414 Natural Cherry
- 3424 Medium Cherry
- 3534 Winter on Maple
- 3544 Blonde on Maple
- 3564 Linseed on Maple
- 3574 Amber on Maple
- 3634 Medium Oak
- 3644 Natural Oak
- 3714 Natural Walnut
- 3724 Dark Mahogany on Walnut
- 3744 Autumn Walnut
- 3774 Medium Mahogany on Walnut
- 3794 Black Walnut

Open-Pore Wood Finishes

This medium gloss finish leaves the wood grain texture visible to the eye and distinguishable to the touch.

Open-pore wood choices

- 3412 Natural Cherry
- 3422 Medium Cherry
- 3562 Linseed on Maple
- 3572 Amber on Maple
- 3582 Winter on Maple
- 3592 Blonde on Maple
- 3632 Medium Oak
- 3642 Natural Oak
- 3712 Natural Walnut
- 3722 Dark Mahogany on Walnut
- 3742 Autumn Walnut
- 3772 Medium Mahogany on Walnut
- 3792 Black Walnut

Customiz stain

Customiz stain is a service that allows you to create your own stain color on standard veneers. Customiz stain color is available on all product lines that offer wood veneer.

A one-time formulation fee of \$400 U.S. per color, per customer processing fee will apply. The fee covers the cost of formulating the Customiz finish and applies regardless of whether or not an order for product is placed. Please refer to the "Customiz Stain" option price column in your specification guide for the unit upcharge.

Customiz stains take 10 days to formulate. Consult the *Surface Materials Reference Manual* for more information. Custom veneers are also available and must be quoted by special engineering. Customiz stain on custom veneers take two to four weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Open Line Laminate (OLL)

This service allows you to order non-standard laminate at an additional processing fee of \$60 U.S. per worksurface or storage product, plus the cost of the laminate.

Edge color for the Open Line laminate on worksurfaces or storage products must be determined by the dealer and customer before orders can be entered. Specify appropriate 2K finish number.
Tip: Standard or Accent laminates being used in the Open Line Laminate program to obtain a different edge detail will be charged the Open Line laminate upcharge; however, no additional charges for the laminate will be applied.

Laminate Approval and Material Requirements

To confirm whether a particular laminate has already been tested for use on a specific Steelcase product or to determine material square foot requirements:

- Visit www.steelcase.com
- Click on "Knowledge & Design"
- Select "Customer's Own Material"

For additional information, refer to the *Steelcase Surface Materials Reference Manual*.

Tip: Plastic components may not be available in all colors above.

► See page G200 for an overview of the plastic colors that are available for each component.

Vertical Surface Fabric

Classics Collection

Surface materials in the Classics Collection are timeless. These materials should be available for a minimum of 10 years from the date the material is introduced into the Classics Collection. The Classics Collection includes the following fabrics in Price Groups 1 through 3:

Price Group 1

- Abacus
- Acadia
- Bariolage
- Belgrade
- BellaRose
- Boccie
- Cornice
- Embrasure

Price Group 2

- Amiranté
- Ashanti
- Ashanti Reverse
- Bouquet
- Cordial
- Firenze
- Firenze Reverse
- Fresco
- Milano
- Racquets
- Regatta
- Roulette
- Wilshire

Price Group 3

- Martinique

Designtex Graded-In Program

All Designtex Graded-In fabrics are now supported just like standard fabrics when ordered on Steelcase furniture. The Designtex Graded-In Program also includes the Environmental Impact Collection, which offers sustainable textiles in affordable price groups. For additional information and fabric samples, contact your local Designtex sales representative at 1.800.221.1540.

Designtex fabrics are graded into Steelcase Price Groups 1 through 3:

Price Group 1

Moors (Environmental Impact Collection)

Price Group 2

Acres
Bracken (Environmental Impact Collection)
Brunswick
Cut to the Chase
Gimlet
Niche
Senecal
Solitaire
Streams (Environmental Impact Collection)

Price Group 3

Dalmatian
Foxtrot
Lotto
Meringue
No Deposit No Return
Pick-Up Sticks
Rain (Environmental Impact Collection)
Sea Breeze (Environmental Impact Collection)
Six Pack
Sumo
That Straw Stuff
▶ See the *Surface Materials Reference Manual* for a listing of fabric colors.

Price Group COM (Customer's Own Material)

Fabric Approval and Yardage

To confirm whether a particular COM material has already been tested for use on a specific Steelcase product or to determine actual yardage requirements:

- Visit www.steelcase.com
- Click on "Tools & Insights"
- Select "Customer's Own Material"

For additional information regarding Customer's Own Material, call 1.888.STEELCASE.

Color Coordination List

Relevant Color Coordination List

Vinyl (PVC) edge trim color for all Relevant worksurfaces and grommets is determined by the worksurface color you select. The edge color is a default and cannot be specified.

All laminates, except woodgrain laminates, will have solid color PVC edging.

Woodgrain laminates will have woodgrain PVC edges and the grain of the edges will be horizontal. The woodgrain edge color will match the laminate color.

Laminate Color	Default PVC Color

Wood Grain Directions

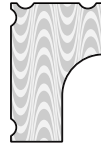

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

Lock and Keying

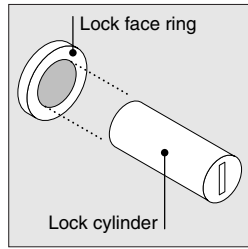

G204

Relevant

Lock and Keying

Relevant

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

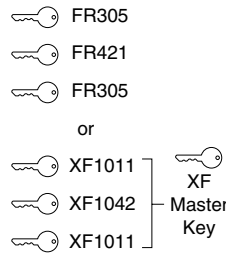

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture units will have the same key

number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.
▶ See below.

Key Random

Required to Specify

Master key random +\$20 Specify with master key random.

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Tip: For products with optional lock colors, make sure to specify the color for both the lock and lock face ring.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.

Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.

Tip: Designate the quantity per key number in your specification.

▶ See example at right.

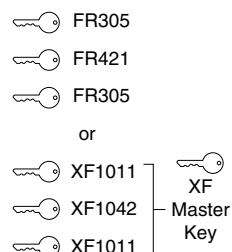

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

Example of a typical lock cylinder specification is shown below:

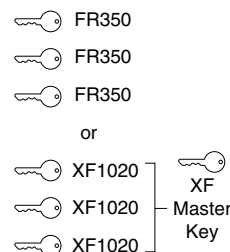

10	LOCK9201FR	FR320
5	LOCK9201FR	FR350
15	LOCK9201XF	XF1100
30	Total

Panel-Mounted Worksurface Supports

for Use with Answer, Kick, and Pathways Technology Wall Panels

Panel-Mounted Worksurface
Supports for Use with
Answer, Kick, and Pathways
Technology Wall Panels

SIN 711.8

Cantilevers

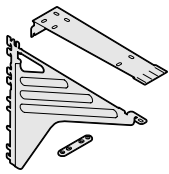

Standard Includes	Required to Specify
<ul style="list-style-type: none"> • Cantilever: paint • Tie plate • Attachment hardware 	Style number

Specification Information

Style Number	Price

On-Module Cantilever

UCANT	\$ 85

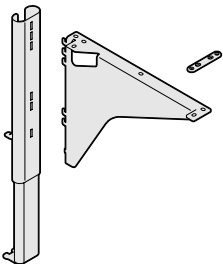

Tip: Answer panel junctions can accommodate only one cantilever at a seam.

Tip: 30" deep straight and transition worksurfaces require additional support along the front edge, such as a pedestal, post leg, or side support brackets.

Off-Module Cantilever (For Pathways Technology Wall Panel only)

UCANTOM	\$125

Tip: Pathways Technology Wall panel must be specified with a functional off-module rail and a segmented skin 12" above base.

Panel-Mounted Worksurface Supports, continued
for Use with Answer, Kick, and Pathways Technology Wall Panels

SIN 711.8

Side Support Brackets

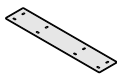

Tip: Side support bracket includes a pair of handed brackets, only one of which is required for rear corner support of panel-mounted corner worksurfaces. Specify one for every two corner worksurfaces in on-module applications. Order an additional supply for off-module fin wall applications.

Standard Includes	Required to Specify
<ul style="list-style-type: none"> • Pair of handed side support brackets: black paint only • Attachment hardware 	Style number

Specification Information

Style Number	Price
USSBR	\$30

Support Plate

Tip: Support plate can also be used in freestanding and Montage applications.

Standard Includes	Required to Specify
<ul style="list-style-type: none"> • Support plate: black paint only • Attachment hardware 	Style number

Specification Information

Surface Materials

This listing includes all the surface material choices that are available for the products in this specification guide.

Resources

For more information about surface materials and the categories they fall into, refer to the following resources:

Additional surface materials specification tools are available to assist you in the specification process—the Surface Materials Binders and the Surface Materials Tool Box.

Surface Materials Binders

- Surface Materials Reference Manual
- A complete set of swatch cards for hard surfaces, vertical surface fabrics, and seating upholstery

Surface Materials

Tool Box (S8150) provides 3" x 3" samples of the following surface materials:

- Vertical surface fabrics
- Seating upholstery
- Wood veneer
- Paint
- Laminate

Wood

Steelcase carefully selects veneer and solid wood or consistent color and grain structure. Wood is a natural material and variations will occur in color, grain and texture. These variations are part of the inherent natural beauty of wood and are not considered defects.

All wood products will darken with age and exposure to ultraviolet light. This is especially apparent with cherry and maple veneer. We recommend that desk accessories be rearranged periodically to insure even aging of wood surfaces.

Veneers are flat cut and are matched for proper balance and consistency.

Open-pore finish is a medium-gloss finish that leaves the wood grain texture visible to the eye and distinguishable to the touch.

Open-pore wood color choices

- 3412 Natural Cherry
- 3422 Medium Cherry
- 3562 Linseed on Maple
- 3572 Amber on Maple
- 3582 Winter on Maple
- 3592 Blonde on Maple
- 3632 Medium Oak
- 3642 Natural Oak
- 3712 Natural Walnut
- 3722 Dark Mahogany on Walnut
- 3742 Autumn Walnut
- 3772 Medium Mahogany on Walnut
- 3792 Black Walnut

Full-fill finish is a medium-gloss finish that completely fills the grain and has a lustrous, satin look and feel. This finish is available on worksurfaces and hedge row tops only.

Full-fill wood color choices

- 3414 Natural Cherry
- 3424 Medium Cherry
- 3534 Winter on Maple
- 3544 Blonde on Maple
- 3564 Linseed on Maple
- 3574 Amber on Maple
- 3634 Medium Oak
- 3644 Natural Oak
- 3714 Natural Walnut
- 3724 Dark Mahogany on Walnut
- 3744 Autumn Walnut
- 3774 Medium Mahogany on Walnut
- 3794 Black Walnut

Customiz stain is a service that allows you to create your own stain color on standard veneers. Customiz stain color is available on all product lines that offer wood veneer.

A one-time formulation fee of \$400 U.S. per color, per customer processing fee will apply. The fee covers the cost of formulating the Customiz finish and applies regardless of whether or not an order for product is placed. Please refer to the "Customiz Stain" option price column in your specification guide for the unit upcharge.

Customiz stain takes 10 days to formulate. Consult the Surface Materials Reference Manual for more information. Custom veneers are also available and must be quoted by specials engineering. Customiz stain on custom veneers take two to four weeks to formulate.

Requirements and information on ordering a Customiz stain color are found in the *Surface Materials Reference Manual*.

Wood Grain Directions

The appearance of wood veneer may change slightly depending on the angle from which it is viewed. This natural phenomenon is called polarization, and it can be seen on natural veneer, and to a lesser extent on composite veneer. Polarization is often noticed on worksurfaces installed at a 90-degree angle with each other. Please refer to the following illustrations for an understanding of grain direction on your installation.

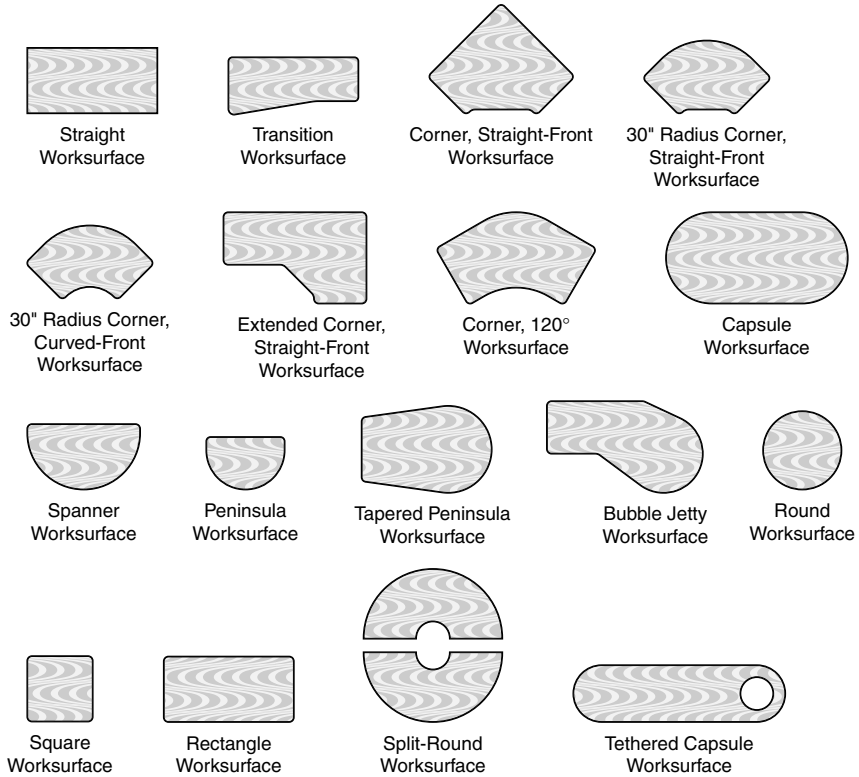

Unison Systems Worksurfaces

Wood Grain Directions, continued

Unison Leg Matrix

	Cabby Leg (with alignment tab) ▶ Specifying, page H85	Unison E-Leg (with alignment tab) ▶ Specifying, page H84	Post Leg Family (with alignment tab) ▶ See <i>Answer Solutions Specification Guide</i>	Post Leg Family (without alignment tab) ▶ Specifying, page H48
Unison Freestanding Worksurfaces	Recommended as the best aesthetic.	Recommended as a higher end complementary aesthetic to the post leg family.	Recommended as a lower priced alternative to the Cabby and E-legs. Double post C-leg cannot be used in shared applications.	Not recommended. (Freestanding Worksurfaces do not have pilot holes for these legs—use version with alignment tab.)
Unison Systems Worksurfaces	Can be used in limited applications as an alternative to a traditional column in order to blend seamlessly with adjacent Freestanding Worksurfaces. Alignment slots are included on the following Systems shapes: jetty, bubble jetty, visitor, linking, bullet peninsula, and angled peninsula worksurfaces.	Same as cabby leg.	Not recommended—use post legs without alignment tabs.	The recommended solution to use Systems Worksurfaces in freestanding applications.

Lock and Keying

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

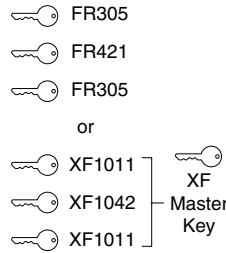

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike.

Tip: Random keying can mean that different furniture

units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.
▶ See below.

Key Random

Required to Specify

Master key random	+\$20	Specify with master key random.
--------------------------	-------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify "plug" when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.
Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

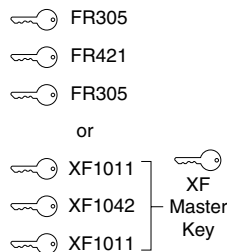

Key specific means that you can specify any key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). This option can be used to key all the furniture units in a workstation or department the same.
Tip: Designate the quantity per key number in your specification.
▶ See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from FR305 to FR454 (Master keying numbers: XF1001 to XF1150).

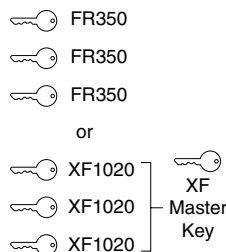

Example of a typical lock cylinder specification is shown below:

10	LOCK9201FR	FR320
5	LOCK9201FR	FR350
15	LOCK9201XF	XF1100
30	Total	
1	877102003SR	standard lock tool
1	877102002SR	master lock tool

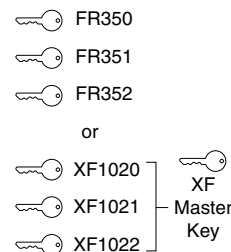

Key Random

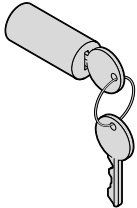

Key Specific

Key Consecutive

Field-Installed Lock Cylinders

Tip: Lock price is included in price of furniture with locks.

Tip: For replacement lock cylinders, refer to Service Parts.

Standard Includes Required to Specify

- Lock cylinder: 9250 Ember Chrome
 - Two keys
- 1 Style number
2 Options, if selected (see below)

Options Price Required to Specify

Options	Price	Required to Specify
Key specific	No cost	Select key number from FR305–FR454.
Key consecutive	No cost	Specify <i>key consecutive</i> and select beginning key number from FR305–FR454.
Master key random	+\$20 each	Specify <i>master key random</i> .
Master key specific	+\$20 each	Specify key number from XF1001–XF1150.
Master key consecutive	+\$20 each	Specify <i>master key consecutive</i> and select beginning key number from XF1001–XF1150.

Lock and Keying

Walden

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

Two types of locks are available—the standard keying system (NC series) and the master keying system (MK series). All the locks in the MK series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from NC161 to NC231 (Master keying numbers: MK551 to MK600). All locks within a unit will be keyed alike.
Tip: Random keying can mean that different furniture

units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders.
▶ See below.

Key Random

-  NC305
 -  NC421
 -  NC305
 - or
 -  MK581
 -  MK596
 -  MK581
- } MK Master Key

Required to Specify

Master key random	+\$20	Specify with master key random.
--------------------------	-------	---------------------------------

Field-Installed Keying

Field-installed locks are only available on products that include factory-installed lock mechanisms.

Specify “plug” when specifying furniture, and the product will ship with a plastic plug in place of the lock cylinder.

Front-removable lock cylinders must be specified separately. You must also order a special lock tool to install or remove lock cylinders in the field.
Tip: Lock tools are reusable. You do not need to order additional lock tools with every furniture order.

Lock cylinders will be shipped separately so that you can install the locks when you are ready.

Three keying choices are available for field installation—random (standard), specific, and consecutive. All three are also available with master keying, which means that all locks can be opened with a single master key.

Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from NC161 to NC231 (Master keying numbers: MK551 to MK600).
Tip: Random keying can mean that different furniture units will have the same key number. If you must have all locks keyed differently, you should specify key specific or key consecutive lock cylinders.

Key specific means that you can specify any key number from NC161 to NC231 (Master keying numbers: MK551 to MK600). This option can be used to key all the furniture units in a workstation or department the same.
Tip: Designate the quantity per key number in your specification.
▶ See example at right.

Key consecutive means that you can specify lock numbers in a consecutive order to ensure that no two locks have the same key number until the key sequence repeats. You must select a beginning key number from NC161 to NC231 (Master keying numbers: MK551 to MK600).

Example of a typical lock cylinder specification is shown below:

Tip: You can change lock cylinders in the field by using the appropriate lock tool.

Lock and Keying

Arbor, Impact, Convenc, and Unison

All locking products are standard with factory-installed, keyed-random locks. Consecutive, specific, and random keying are available as field-installed options.

Locks consist of a factory- or field-installed lock cylinder and a factory-installed lock face ring.

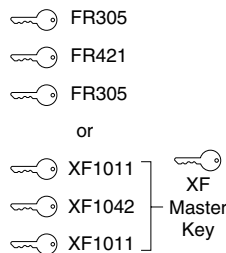

Two types of locks are available—the standard keying system (FR series) and the master keying system (XF series). All the locks in the XF series can be opened with a single master key.

Factory-Installed Keying

Factory-installed locks are always key random (standard) or master key random (option). Key random means that the locks will be assigned arbitrarily at the factory with key numbers ranging from FR305 to FR454 (Master keying numbers: XF1001 to XF1150). All locks within a unit will be keyed alike. *Tip: Random keying can mean that different furniture*

units will have the same key number. If you must have all locks keyed differently, you should specify field-installed, key specific or key consecutive lock cylinders. ▶ See below.
