Cisco ONE for Access Switching is a solution designed to:
- More efficiently manage a large switching infrastructure
- Reduce expenses by simplifying network deployment and management
- Centralize network access policies across wired and wireless networks
- Easily manage wired, wireless, and VPN users and devices
- Improve the energy efficiency of your connected devices

Cisco ONE™ Software helps customers purchase the right software capabilities to address their business needs. It helps deliver reduced complexity, simplified buying, and the peace of mind that today's software investments will last into the future. These products offer a greater value to customers with more features at "better together" pricing.
