## 6.5MM BENCH REST MAGNUM

***Even at 300 yds, the 6.5 BRM will break every bone it hits and penetrate completely for a reliable, devastating kill.***

Designed to give big game hunting capacity to our small frame 97D Rifle, the 6.5mm BRM has exceeded all of our desires and expectations. It hits hard, breaks bones, and penetrates completely through big deer-sized game. Accuracy and trajectory make it easy to place your shots out to 300 yds. And, recoil is mild enough that you can use the same big game load to shoot prairie dogs all day long!

***Why is it so good?*** The huge sectional density of the 6.5mm bullet and the superior WHACK of heavy bullets traveling at medium rifle velocities.

***A 140gr bullet from the 6.5mm BRM is technically the same as a 190gr bullet from a 308 Winchester***

... Same sectional density, trajectory, and ~2,400 fps velocity. Zero the 6.5 for 200 yards and aim right on all the way out to 250 yards. At 300 yards, you just put the crosshairs on the backbone of an Antelope and you'll hit dead center-body.

***The 6.5mm BRM cartridge delivers HUGE Sectional Density out to 300 yards and beyond, with phenomenal accuracy and mild recoil.***

- 127-650811 Loaded 6.5mm BRM 140gr (20) \$39
- 127-262 Custom 6.5mm BRM Brass (100) \$89
- 127-261 Custom 6.5mm BRM Reloading Dies \$60
- 129-26332 Hornady 6.5 Bullet A-Max 140 gr. \$29
- 129-397106 Seating Stem for 6.5 A-Max \$9.95

### Available Rifling Twist Rates

The optimum rate of twist for a barrel depends on the particular cartridge, caliber, and bullet weight you are wanting to use. The twist rates we offer are listed below:

17 Cal - 1:9	6.5mm/.264 - 1:8
20 Cal-1:12	.270 Cal - 1:10
.22 RF Cal - 1:16	7mm/.284 - 1:9
.22 CF Cal - 1:7, 1:9, 1:12, 1:14	30 Cal - 1:8, 1:10, 1:12
6mm/.243 - 1:8, 1:10, 1:12	338 Cal - 1:10
25 Cal- 1:10	357 Cal - 1:14

## 97D CUSTOM MADE-TO-ORDER RIFLE & PISTOL CHAMBERINGS

Made to the same specifications as the standard rifle, only you get to choose the options! Made in heavy contour .810" barrel. Base Price is \$1,350. These rifles are made to your specifications, and may take 6-12 months.

### Choose Your:

1. Caliber & Twist (below)
2. Barrel Length 17"-26"
3. Barrel Finish- Factory Blue or Stainless (+60)
4. Receiver Finish- Factory Blue, French Gray (+ \$125)
5. Buttstock Transition- Black, Gold, Silver (anodize)
6. Forend- Standard, Bench Rest (+\$75)
7. Stock- Standard, Ambidextrous (+\$50)
8. Accessories- Engraving, Scope Mounts, Muzzle Brake, Gold Plated Trigger, Scope, Bipod, Swivel Studs, Sling, Ammo, Dies & Brass.

EABCO 6.5mm BRM Cartridges,  
The same sectional density and velocity as the Swedish Mauser with Bench Rest Loading efficiency. Recoil is mild.  
Accuracy is Superb.

One-Shot Performance on Game is Deadly at 300 Yards.

# 97D RIFLEMAN'S RIFLE

We could call it the *Ultimate Deer and Antelope Rifle* if it weren't for the fact that so many of our customers use it for varmint and target shooting, or just plinking at tin cans. Can you imagine that? A deer rifle you can shoot all day without getting a sore shoulder!

The 97D is a small frame single shot rifle that's suitable for big game as well as small game and varmint hunting. It originally evolved from our World Champion long range silhouette pistol action.

The 97D action itself is inherently accurate and simple... no vibration or stress inducing machinery hanging out into the forend. Onto this we fit an EABCO Accuracy Barrel, precision turned and threaded between centers at a rate that keeps stress and flex out. Barrels are snugged and sealed rather than torqued onto the frame... again, to minimize induced stress. Each chamber is individually reamed on-center and individually head spaced. We feel the crown is so critical to accuracy that we leave it until after the gun is finished... our 11 degree target crowns are cut last and left bright. This is our trademark Brite-Crown™ finishing touch (Inset Above).

\*All 97D Rifles must ship to Licensed FFL Dealer.

## 97D STANDARD RIFLES

Our most popular calibers are usually available for immediate delivery. Built in small production runs with a lot of individual attention to details... essentially custom made rifles!

**24" Heavy Contour Barrel**

**French Gray Receiver**

**2-Ring Keylock Magnum Scope Mount**

**Swivel Studs**

- 127-9765 Model 97D 6.5mm BRM Blue \$999
- 127-9723 Model 97D 219 Don Wasp Blue \$999
- 127-9760 Model 97D 6mm BRM Blue \$999
- 127-9730 Model 97D 30-30 Win Blue \$999
- 127-9717 Model 97D 17 HMR Blue \$999
- 127-9765S Model 97D 6.5mm BRM Stnls\* \$1199

Usually these are in stock for immediate delivery. Other times you have to wait a little while for the next batch to be completed. Optional ambidextrous stock can be exchanged for \$50. \*Standard Stainless in 6.5 BRM only.

# E. Arthur Brown Company's Custom and Standard...

## BF PISTOL

We build our Hunting and Competition BF Pistols with equal attention to quality and detail. Every gun is individually fitted and tuned during final assembly.

*There is no finer hunting handgun on the planet.*

**Accuracy and Power at Long Range** - The BF is a small frame gun that feels and points comfortably like a handgun should. From the specially designed target grips to the carefully tuned trigger pull, it is designed for optimum handgun shootability. We use only airgaged, match grade barrels in these guns for best accuracy... Turned, threaded, and chambered on center. Then, finished with an 11° crown. The inherent accuracy of the BF action with this much barrel quality... is superb.

### Standard BF Pistol

Our World Champion long range BF Hunting Handguns are now available in a standard, off the shelf model... Chambered in 6.5mm BRM, 44 Mag and 22LR... These handguns are made with the exact same quality and attention to detail of our Made-to-Order BF Pistols. The only difference is that we standardized them to include our most popular features, and we produce them in batches so they'll be ready to ship when we receive your order. This saves a lot of money so your price is lower. That's right it costs less and delivers faster!

Standard model BF Hunting Handguns have a single shot, falling block action, Herrett target grips and forend, and include our 6-Screw, 3-Ring Keylock™ Magnum scope mount. 6.5mm BRM, 22LR and 44 mag chamberings. (scope not included)

**127-97B44 BF Classic Hunting Pistol 12" 44 Magnum \$699- FFL required**

**127-97B65 BF Classic Hunting Pistol 15" 6.5mm BRM \$699- FFL required**

**127-97B22 BF Classic Hunting Pistol 10 3/4" 22LR \$699 - FFL required**

**Falling Block Action  
Opens without Breaking  
Small Frame Handgun  
Points Naturally  
Superbly Accurate...  
Proven in IHMSA/NRA!**

### Made-To-Order BF Pistol

When you order your BF Hunting Pistol, you can choose from several options: Chamber, barrel length, muzzle brake, finish, scope mounts, engraving, etc. It will be a one-of-a-kind heirloom you can pass on to your kids with pride. Current estimated delivery is 6-12 months. Prices begin with a basic, finished blue gun with no sights at \$999. 50% Non-refundable deposit charged when ordering, balance due before shipping. **Specify Chamber and Barrel length 9-15.**

**127-BFP Made-to-Order BF Pistol Blue, No Sights  
\$999 -FFL required**

*See Page 4 for available  
custom calibers*

### ScopeRib III Sight System™ for Handgun Silhouette

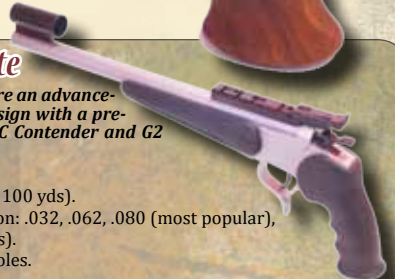

**The ScopeRib III Sights for IHMSA and NRA Handgun Metallic Silhouette are an advancement over our famous ScopeRib I Sight System. Keylock™ scope base design with a precision handgun sight system that fits 10", 10 3/4", 12", 14", and even 15" TC Contender and G2 barrels, and BF Pistols.**

#### Features Include:

- Rear Sight Features 1/2 MOA precision click adjustments (1/2" per click at 100 yds).
  - Sharp, square sight notch in notch widths to suit your vision and application: .032, .062, .080 (most popular), and .100 (Narrow for Taco-Hold, Wider for Creedmoor and Standing Positions).
  - Mounts to factory 4-hole as well as custom 6-hole scope mounting screw holes.
  - Original "Bond" Hooded Front Sight: Adjustable post for width AND height.
- The ScopeRib III Sight System fits TC Contender and G2 barrels as well as BF Pistols. It includes the ScopeRib III rear base with precision adjustable sight AND the Bond hooded front with adjustable post. Order quick detachable See-Thru Rings separately.

**127-080 ScopeRib III Silhouette Sight System \$139.00**

**127-600 Extra Long Taco Hood \$15**

# EABCO Custom

## GUN SMITHING SERVICES

### French Gray Finishing (approx 6 wks)

A soft looking, hard gray-metal finish which is superior to stainless steel in its corrosion resistance, wear ability, and operational "slickness". We prepare the exterior metal surface by blasting with a blend of very fine aluminum oxide and glass bead media. This base surface preparation is actually what causes the deep "French Gray" look after plating is complete. The actual French Gray surface is a two-part metal plating process that bonds to steel at the molecular level. The result is a hermetic seal that protects against corrosion while beautifying the firearm it's applied to. We've done our French Gray Finish on all types of firearms from handguns to long guns. You can have it done all over or two-tone blue/gray!

714-100 Fr. Gray Finish Encore Frame \$125

714-101 Fr. Gray Contender Frame \$125\*

\* On Contenders, we leave the hammer and trigger blue.

714-102 Fr. Gray Fin. T/C Barrel \$125

714-103 Fr. Gray Finish M97D Rifle Receiver \$125

714-104 Fr. Gray Fin. EABCO BF Pistol Receiver \$125

714-105 Fr. Gray Revolver/Auto Pistol \$175\*

714-106 Fr. Gray Fin. Rifle or Shotgun \$225\*

\* There may be additional charges depending on make or model. We will contact you for approval before we proceed.

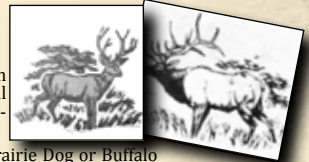

### Action Job (approx 2-3 wks)

You need a nice trigger to shoot your best, but... Mass production doesn't leave time for cleaning up and tuning of trigger mechanisms. Our TC "Action Job" puts the time and skill into tuning up your action to its optimum potential. We grind sear surfaces to mate squarely, polish out seams left by the parts molding process, shim parts that need to return to the same position from shot to shot, adjust spring tensions, and set over travel screws. If you don't already have a trigger over travel screw, we will install one. Results are safe, clean triggers of approximately 2.5-3 lbs. pull.

751-001 TC Encore - G2 Contender Action Job \$75.00

### Etching/Engraving

Customize your gun with engraving. Our engraving is more accurately described as an "etching" process. A stencil is positioned over the steel surface and an electrochemical reaction lifts out the metal under the image. When the stencil is removed, a beautiful impression is left.

**Receiver Side Surfaces** - We offer a choice of Ram's Head, Antelope, Mule Deer, Elk, Prairie Dog or Buffalo etching for receiver sides. We can engrave in two sizes: Large is about an inch in diameter. Small is about 3/8ths inch in diameter (fits the flair flats of an Encore) Price is PER SIDE. Process may require refinishing afterwards. Silver on black imaging is doable on blued guns.

714-005 Engrave Ram's Head \$25

714-006 Engrave Buffalo \$25

714-007 Engrave Elk \$25

714-008 Engrave Deer \$25

714-009 Engrave Antelope \$25

714-010 Engrave Prairie Dog \$25

**Special Barrel Markings** - Commemorate a special event by having a line of text etched into your barrel. Each line of text can be up to 35 letters long.

714-020 Engraved Line of Text \$25

#### General Shop Services and Price List

Regular Shop Rate is \$65/hr

Install Threaded Muzzle Brake \$130/Cut and Re-Crown TC Barrel \$60

Cut and Re-Crown other Barrels... Call

Install Swivel Stud (each) \$15

Drill and Tap Sight Holes... Call

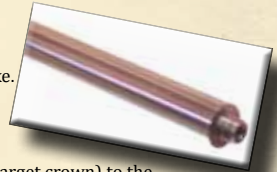

Re-Blueing...see prices for French Gray

Install and Adjust Rifle Basix Trigger Assbly \$65

Scope Install \$25

### Barrel Threading (approx 6-8 wks)

If you have your own muzzle brake, we can thread the muzzle of your barrel to fit your brake. We need to know the thread pitch (i.e. 1/2 x 28, 5/8 x 24, etc) plus the length of the thread. If you send your brake along with your barrel, we'll be happy to install it for you at no additional charge.

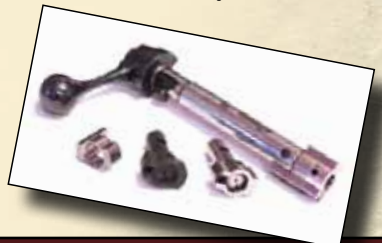

**Service Notes:** This service custom threads and crowns the muzzle of your barrel (our 11° target crown) to the thread spec provided by you. Rebluing or other re-finishing is not included. Also, it does not include a thread protector.

127-CMB Custom Barrel Threading \$130

### Savage Bolt Face Conversion (approx 4-6 wks)

Convert from 458 Mag to 223 and anything in between! We will convert your bolt face and magazine to whatever chamber you want from our selection of EABCO or ER Shaw barrels. All parts included, original parts returned to you.

127-SBF Savage Bolt Face/Bolt Head Conversion \$75

Delivery: Approx. 6-8 wks

# Custom Muzzle Brakes

## SUPERB ACCURACY, FUNCTIONALITY & PERFECT CROWN

*Custom Installation with special care on proper centering and alignment.*

*This is a custom machining and Gunsmithing service... delivery is approximately 6-8 weeks.*

**On-Center Threaded Brakes** - Our muzzle brakes are all threaded on-center with the bore. This assures that the exit hole is aligned with the bullet path and that ignition gases affect the bullet equally on all sides... which is the best condition for accuracy.

**C-T-C 11° Target Crown** - After the muzzle is threaded and before the brake is installed, we cut the crown. Our crowning system aligns the muzzle and the chamber between centers (C-T-C) to assure that a perfect crown is cut. This crown is inspected with a loupe to be sure it is perfect before the muzzle brake is installed. (Be sure to tell us your preferred overall barrel length.)

**No-Stress Mounting** - Our muzzle brake threads are snug with no wobble... again to assure alignment and accuracy. Beyond this, we install them with a zero-torque method to be sure no stress is introduced into the barrel.

**Note: Add \$20 for re-installation of Front Sight holes. Specify Over-All-Length. If not specified, brake adds to barrel length.**

### JP Howitzer/Sherman Tank Muzzle Brake

The JP Howitzer Muzzle Brake is radical looking but is honestly the **most effective muzzle brake we've ever seen**. We say it reduces recoil **up to 100%\*** because in most cases a gun equipped with the JP Brake just stands still during recoil. The double baffle surface area of the JP captures forward moving gases to actually pull the gun forward. This counteracts the rearward motion of recoil or kick. Certainly it converts the heavy kicking magnums into joyful, down range projectors of power! And being able to watch the hits and misses when you're prairie dog shooting, is not only fun but a good marksmanship aid. Without question, the most effective muzzle brake we've ever seen.

\*Please Note: Different guns and different cartridges recoil differently. We once built a 15" Encore in 300 Win Mag with a JP Brake installed and the customer used it to shoot 80 round silhouette matches from the one-handed Creedmoor shooting position. In fact with the JP Brake installed, "Most" centerfire rifles will almost stand still when fired.

However, some particularly vicious recoiling rifles (such as pencil barreled WSMs) will still have some recoil. How much will be relative to the cartridge, rifle, and shooter's sensitivity. As stated above the JP Brake will give "Up To" 100% recoil reduction and without a doubt it is the most effective muzzle brake in the world. But for the customer who might think we're over-promising on this, we have to state that you will still know the gun is going off and you will still feel recoil. We apologize for having to put these "Weasel Words" into this description.

**Fits muzzle diameters from .530-1.000".  
Adds approx. 1.75".  
Recommended for: .224-.45 Calibers**

*"In one word, WOW! They look perfect. After shooting a few rounds through my .300 Win Mag, I could not believe how little recoil was felt. I am very pleased with the (JP) muzzle brake. Several of my friends have also shot it and after feeling how little recoil, are sending more barrels your way. Great job, PF"*

### Brockman Muzzle Brake Ports Open & Close...

**Noise Control** - "Will it hurt my ears when I'm hunting?" All muzzle brakes redirect gas and sound to the sides rather than forward... which makes them all louder than shooting a gun with no muzzle brake. The Brockman Brake has the option of opening and closing the gas ports... Essentially turning the brake on or off without removing it. You can open the ports and enjoy the recoil reduction while working up loads, sighting in, and practicing. Then, just close the ports if you want to go hunting with normal muzzle noise. Same accuracy & sighting.

**Locked-In Precision** - Muzzle Brakes are not like flash suppressors that can be just screwed on and off. Accuracy and recoil reduction require that they have very close and even clearance with the bullet (measured in thousandths). The Brockman Brake is precision threaded and rigidly installed with 11° target crown on center with the bore. Only the outer sleeve moves to open and close ports.

**Shoot Better with Less Recoil** - Pendulum tested to reduce recoil by up to 47%, the Brockman Brake will make any rifle easier to shoot well. You'll shoot better from a rest when your rifle stops jumping around on the bags and you concentrate. You'll shoot better off-hand when you practice with the brake and stop flinching and jerking the trigger.

**\*Physical Requirements** - The brake itself is .875" in diameter and our installation bevels at the rear to transition nicely to your barrel diameter.

**Fits muzzle diameters from .730"-.875"\* Adds approx. 1.75".  
Recommended for: .224-.338 Calibers.**

**013-001 Brockman Brake Blue Installed \$189  
013-002 Brockman Brake F.Gray Installed \$189  
\*Purchase with barrel, or complete gun & take \$10 off!**

***"When you have an E. Arthur Brown Accuracy Barrel  
(with Brockman Brake),  
You don't need a SECOND shot!" -AF***

# Custom Muzzle Brakes

## JP Tactical & Varminter Muzzle Brake

Developed to comply with USPSA Limited Class competition rules, this new JP Tactical (and varmint) muzzle brake draws heavily from the dual baffle design of our JP Howitzer muzzle brake. The idea is that smaller cartridges like .223 Rem don't need as much baffle area and so the size of the brake can be reduced without losing too much baffle effect. See a similar model made for Ruger 10/22 on page 32.

We've been installing these on Encore barrels, Bolt Action rifles, and AR15 variants. **Fits Muzzle Diameter .530-1.000". Adds approx. 2". Recommended for: .224-45 cal.**

**135-TVBS Tactical Varmint Brake Stnls \$199**

**135-TVBB Tactical Varmint Brake Blue \$199**

**\*Purchase with barrel, or complete gun & take \$10 off!**

## Magnum Slimline Muzzle Brake

These brakes feature a large expansion chamber that compresses muzzle gases so they'll accelerate as they exit the ports. No ports on the bottom... no kicked up dust. Recoil is reduced approximately 42-45%... eliminates muzzle rise on chamberings up to 300 Win. Mag.

**Fits muzzle diameters from .655 to .850". Adds approx. 1 1/8". Recommended for: .224-45 calibers.**

**127-SL2 Magnum Slimline Brake Installed \$130**

**127-SL2S Magnum Slimline Brake French Gray Installed \$140**

**\*Purchase with barrel, or complete gun & take \$10 off!**

## OPS Tactical & Varminter Muzzle Brake

### OPS Muzzle Brake for Tactical and Varmint Shooting

Originally developed for the military, the OPS Muzzle Brake is the result of extensive research into muzzle gases and the effects of redirecting them for recoil reduction and accuracy enhancement. Excellent for big game as well as varmint cartridges.

**Recoil Reduction** - The OPS Brake has a unique asymmetrical cupped primary baffle followed by a lateral secondary baffle. This results in recoil reduction of up to 70+% with virtually no "puff" back at the shooter... No Dust Blow Ups!

**Accuracy Enhancement** - The speed of sound changes with temperature so that within the OPS Brake, your bullet travels through an envelope of subsonic gas that enhances stability... **Fits muzzle diameters from .530-.950 inch. Adds approx. 2".**

**Recommended for: 17-44 Calibers**

**127-OPS Stainless OPS Brake Installed \$199**

**\*Purchase with barrel, or complete gun & take \$10 off!**

*One of our EABCO staff, Janelle, with a successful Elk Hunt using the Model 97D in 6.5 BRM.*

*Cindy Borsi poses with her first whitetail, a central Texas 10 pointer, and her beloved custom EABCO Model 97D in 6.5 BRM. Her husband bought her other rifles but she won't use 'em. Nice Shot!*

*Hey gang -Had a good hunt here in my home in northern Nevada this fall - took this nice buck last week with my 7x30 Waters. Range 160 yds, one shot of course! The one I own was purchased used, but have to say you make a fine handgun! Best Regards, Matt Z. (photo on cover)*

# Standard ACCURACY BARRELS™

Off the shelf, quicker delivery of our most popular custom made  
TC Encore® and G2/Contender® Accuracy Barrels™.

*Why* our Accuracy Barrels™...because we offer non-standard chamberings, different barrel lengths, contours and twist rates than what's offered elsewhere--

*But the REAL reason is to achieve a better potential for accuracy than mass production factory barrels... And, this is why we make our own EABCO Accuracy Barrels™. It's not magic... just extra attention to the details that result in superior accuracy...*

**Precision Barrel Blanks** - An EABCO barrel blank is precision gun drilled from the best Chromoly and Stainless steel alloys. Bore dimensions are reamed consistent to airgauge within .0002" (2/10,000ths) of proper bore dimension. These are then Two-Pass button rifled in the various twist rates we offer to suit particular accuracy requirements.

**One at a Time Barrel Making** - True, center-to-center barrel turning at a rate that minimizes stress while keeping the bore in the middle. True, center-to-center chamber reaming insures centering and linear alignment of the chamber with the bore. Each chamber's headspace is checked and confirmed with gauges. True, center-to-center 11° target crown, applied after finishing, insures that bullets exit the barrel with perfectly even gas pressure.

**Chambers with Accuracy Potential** - Cartridges that work well within the TC Encore's capability to handle pressure, bolt thrust, and extraction. It stands to reason that cartridges which operate on the outer edge of a gun's capability will have less accuracy potential than cartridges that operate closer to the gun's sweet spot. The TC Encore® has superb potential for accuracy with the cartridges we chamber. We do not offer heavy magnums.

Finished With A Britecrown™**

*Good Afternoon. Just wanted to drop you a line and say thanks for making an excellent product. I purchased a 6.5 BRM accuracy barrel for my Encore along with dies and brass. Morgan my 16 year old daughter decided that she wanted to go with me on my annual Bear hunting trip to Canada. My dilemma was that I didn't really have a rifle that I felt she would be comfortable shooting. As we were looking in my gun safe she spied the 6.5 BRM barrel and said "what's that one", I told her we would go out and shoot it that weekend to see how she liked it. Well to make a long story short she shot it better than expected, attached is the picture of her with the 250# black bear that she shot @ 70 yards using 140 grain Amax from that 6.5 BRM. I was very impressed with the power of this caliber; the bear only went 20 yards before expiring WOW. Since this was my Encore and she seemed to like it so much I was forced to purchase another barrel for her and will be giving it to her for Christmas (only this one will be attached to a G2 frame). Oh and buy the way, she used the Encore again Saturday and made an awesome 100 yard shot on her first deer. Thanks again, Tom P.*

*The 6.5 BRM Contender pistol barrel has 19 rounds (break in) through it and already out to 200 yards with fire forming the brass. No real load development either, using 34.5 grains RL15, CCI 200 primers, and Hornady 100 grain A-Max bullet, with your R-P 6.5 BRM brass, COL 2.750. The tight neck works great without neck turning, and no pressure signs. Great fun even in the wind here in southern New Mexico. The barrel break-in instructions are perfect, knew what you were talking about in 10 rounds. I'll be ordering a 97 pistol in about 3 weeks, same caliber, recoil isn't bothering my wrist at all. Thank you again, Steve*

New Calibers Added!

Standard Encore® Accuracy Barrels™  
26" Length, Heavy .810" (Pro Hunter) Contour

Off the shelf, quicker delivery of our most popular custom made Encore® Accuracy Barrels™.

By doing these barrels in a standard configuration, we save on machinery set-ups and cut our costs. These are the same quality and attention to detail as our built-to-order accuracy barrels... Just lower in price and available off-the shelf with little or no waiting! \*Fits Factory Encore Heavy Rifle Forends and Pro Hunter rifle forends.

G2 Contender Accuracy Barrels fit the TC Contender and G2 Contender frames. Made with special attention to detail, precision, and the materials necessary to enhance accuracy. Finished in Factory Blue. \*Fits the standard G2 Contender Rifle forends or old style bull forends.

Details of Each Particular Chambering - We've applied an accuracy rational that makes sense. Chambers are minimum SAAMI spec... they fit standard ammo but fit closely so as to align well with the bore... Here's more:

- 204 Ruger** - Made with either 1:9 or 1:12 rifling twist to suit your preference.
- .223 Remington** - Also a 1:12 twist. We're figuring nobody is deer hunting with this one so we made it to shoot best with varmint weight bullets of 40-50 grains. Our favorite factory loaded ammo is Winchester 45 grain JHP.
- .243 Winchester** - Here we've opted for a faster 1:8 twist. Most standard .243s are done in a 1:10 twist that is not optimum for the most common factory loaded ammunition, which is 100 grain bullets. Our 1:8 twist makes factory ammo shoot very accurate.
- 6mm BR Norma** - The 6BR was THE Benchrest favorite until 6mm PPC came along. But now, Benchrest competitions are going to longer distances, and there is a resurgence in popularity of the 6mm BR using the heavier 100-105 gr. bullets and renamed to "6mm BR Norma".
- Our 6mm BR Norma barrels are throated for these long, heavy bullets and are made in a 1:8 rifling twist especially to suit 100-105 gr match bullets. Really a fun, heavy hitting tack-driver.
- 6.5mm BRM** - We do this one optimized for the BRM cartridge philosophy... heavy 140 grain bullets in a 1:8 twist that arrive on target with superb accuracy, very little recoil, and deadly impact.
- 6.5x47 Lapua** - This exceptional 6.5mm cartridge won the

- 2007 NBRSA Nationals and set records doing it. Similar to 260 Remington only with a sharper 30 degree shoulder and small rifle primer... 1:8 twist, as preferred by Benchrest competitors.
- 6.5x55 Swedish Mauser** - The cartridge that popularized 6.5mm in the USA and inspired our own Bench Rest Magnums (BRMs). It is still about the most near perfect big game cartridge ever made. We cut our chambers to minimum SAAMI specs and our barrels to 1:8 twist rifling... Optimal for the high BC, heavy sectional density 140 grain 6.5mm bullets. Mild recoiling but deadly on big game.
- 260 Remington** - We apply the same heavy 140 grain bullet and 1:8 twist formula on this one. Basically a 6.5mm version of the .308 win cartridge case. Gives excellent efficiency of loading and the desired med-high velocity with heavy 140 grain bullets. We have Lapua 260 brass...page 58
- 280 Remington** - Basically a 7mm version of the 30-06 cartridge case, the 280 Remington gives efficient, med-high velocity performance with heavy 160 grain 7mm bullets. Having less recoil than 7mm Mag, the 280 Rem is easier to shoot well... It has been very popular as a made-to-order barrel. Done in 1:9 twist.
- .308 Winchester** - We do this one in 1:10 twist which is capable of accuracy with bullets from 150-180gr. So, this barrel will work great for deer sized game and can handle elk by simply moving up to a tougher, heavier bullet.
- .308 1:12 Twist Barrels** - In response to requests we've received from benchrest shooters, these 1:12 twist barrels are especially suited to the mid range 150-155gr bullets favored by match shooters.

See our custom brass, dies and ammo...page 61

\*NOTE: Heavy fits factory HEAVY forends & Pro Hunter forends\*

*I shot this 160 class 10 point on October 17 while hunting at Briarwood Sporting Club in Bellefontaine, Ohio. Once again the 6.5 BRM performed flawless. This buck weighed 236# live weight and he only went 20 yards after the shot. The guide that was with me could not believe how when I hit this huge deer how the 6.5 BRM made him just buckle. The bullet went entirely through the buck and left nothing but devastation in its path. Please feel free to use my picture and story in any of your advertising. Another great hunt with amazing results from your barrel and cartridge.*

*Best Regards, Dan McCarthy*

G2 Contender Accuracy Barrels fit the TC Contender and G2 Contender frames. Manufactured by E. Arthur Brown Company with special attention to detail, precision, and the materials necessary to enhance accuracy.

**See page 10 for more details on our barrel making process.**

### Available Rifling Twist Rates

The optimum rate of twist for a barrel depends on the particular cartridge, caliber, and bullet weight you are wanting to use.

We offer the following twist rates:

- 17 RF/CF cal - 1:9
- 20 cal-1:12
- .22 RF cal - 1:16
- .22 CF cal - 1:7, 1:9, 1:12\*, 1:14
- 6mm/.243 - 1:8, 1:10, 1:12
- 25 cal - 1:10
- 6.5mm/.264 - 1:8
- .270 cal - 1:10
- 7mm/.284 - 1:9
- 30 cal - 1:8, 1:10, 1:12
- 338 cal - 1:10
- 35/357 cal - 1:14
- 44 cal - 1:16
- 45 cal - 1:14

### How to Order:

1. **Select your caliber**
2. **Select your contour- Standard, Heavy, Bull**
3. **Select your finish- Factory Blue, Matte Blue or Stainless**
4. **Select the length & Twist Rate**
5. **Add extras..package deals on custom features like a Keylock™ scope mount, muzzle brake, action job, custom stocks, etc.**

Made by EABCO and finished with no sights but drilled and tapped for standard Encore® scope mounts. You get a higher quality barrel, in a much wider selection of chamberings, lengths, contours, and finishes. See page 10 for more details on our barrel making process. **Approx. delivery 4-5 months. \$100 Deposit.**

## Choate Encore® M-4 Tactical Stock

**Compact and Collapsible... With Adjustable Length of Pull**

A solid, military grade M-4 pistol grip and buttstock for the T/C Encore® and Pro Hunter. Over molded metal construction is rigid and tough. Attaches to your Encore® with a single grip bolt. This stock can adjust your length of pull from 12¾-16" (Great for young or small shooters as well as large or tall shooters). Two O-Ring sealed storage compartments can carry extra cartridges, batteries, survival gear, etc. Shock absorbing rubber recoil pad is checkered. A sling loop, slot, and swivel stud provide three different options for carrying.

**317-090128 Choate Encore® M-4 Tactical Stock \$134**

# Encore & Muzzleloader Accessories

## HINGE PINS FOR THE ENCORE

The original TC Encore barrel hinge pin rotates and drifts from side to side freely every time you open and close the action. This creates a potential for the lock-up to be slightly different with each shot. And, anything that is different from one shot to the next can change the point of impact. **Our Encore® Hinge Pins lock the position of the hinge pin so the action is exactly the same from one shot to the next!**

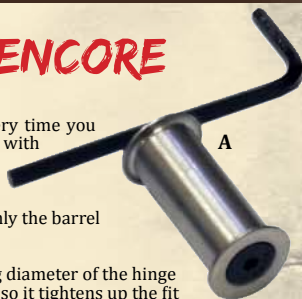

A. Our original Accuracy Locker Hinge Pin also locks the hinge pin to the frame so that only the barrel moves when you open the action. Very popular... We've sold thousands of these!

B. The TC Encore® Adjustable Hinge Pin actually tightens out any looseness in the fitting diameter of the hinge pin in the barrel to frame connection. It has a flange on one end and a collet on the other so it tightens up the fit and doesn't move side to side. This pin locks to the frame and does not pivot with the barrel.

Both of these pins have the potential to improve your accuracy.

**A: 017-0511 Encore® Accuracy Locker Hinge Pin \$39**

**B: 207-7010 Encore® Adjustable Hinge Pin \$21**

## VariFlame II Large Rifle Primer Conversion for Muzzle Loaders

*Switch to Large Rifle Cartridge Primers for Better Accuracy and Less Fouling*

The new VariFlame II Primer Conversion for muzzle loaders converts your muzzle loader from 209 shotgun primers to Large Rifle cartridge primers. The new system uses stainless steel primer holders with a rim the size of 22 Hornet... Making it easy to re-prime with any hand-held priming tool (like reloaders use). These VariFlame II primer holders are re-usable forever (almost)... They're steel-strong and won't deform even with hot loads. De-cap or remove used primers with a punch (or even a nail). Re-prime with the Lee Auto-Prime and #7 (22 Hornet) shellholder.

**Why Convert from 209 Primers?** ACCURACY! 209 primers have enough pressure to disrupt a load before it ignites. Inconsistencies like that will degrade your accuracy potential. FOULING! 209 primers are cruddy foulers of your bore and breech plug. Fouling is bad for accuracy and in the breech plug it can degrade the reliability of ignition. Large Rifle Primers have a hot enough flame to ignite all powder, without upsetting your load and with less fouling. There's better accuracy potential with Large Rifle Primers!

**017-600 VariFlame II Primer Conversion - 10 VFII Holders \$19.95**

**017-610 VariFlame II Primer Conversion Kit \$59.95\***

*\*Kit includes modified Encore Breech Plug + 10 VFII Holders (Standard Encore & Omega Only)*

**127-VFII VFII Breech Plug Modification \$19.95\***

*\*Order breech plug separately, or send yours in to be modified*

**Breech Plugs you can order to be modified:**

**207-7523 ProHunter Quick-Release Breech Plug \$40**

**207-7763 Encore & Omega 209x50 Breech Plug \$14**

Available for Most Muzzle Loaders - If your muzzle loader has a breech plug and uses 209 shotgun primers, we can convert it to VariFlame large rifle primer ignition. Or, order a new breech plug and we can modify it to accept the VariFlame II primer holders. Holders work on standard Encore Muzzleloaders unless modified. Works with Blackhorn 209, Triple Seven and other Black Powder Substitutes.

# PeepRib® Muzzleloader Sight System

*Now Available for MANY Muzzleloaders*

**O**ur PeepRib® Aperture Sight for TC Encore® has gotten so popular, we have expanded to fit many more Muzzleloaders!

It combines a precision aperture sight with a scope mounting base. You can position a riflescope on and off your gun without upsetting your aperture sight! It's great for using a scope to fine tune your handload accuracy and you can just remove the scope when hunting regulations don't allow it. The PeepRib® Aperture Sight itself is precision adjustable for windage and elevation and comes standard with a special High Definition Aperture for the clearest possible sight picture. An aperture sight (aka peep sight), mounted as close to your eye as possible, removes a huge amount of aiming error by simply increasing the sight radius (the distance between front and rear sights). Also, aiming error from rear sight light reflection is virtually eliminated with an aperture sight... so that the angle of the sun will not change your point of impact. Finally, the aperture itself improves the focus of your sight picture by funneling the light through a hole (like a camera).

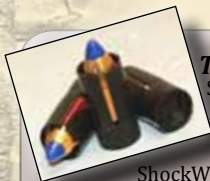

- 127-812 Original PeepRib Sight \$59**  
*(fits Encore®, Omega, Pro Hunter, Triumph, Endeavor & ProHunterXT)*
- 127-813 PeepRib Sight for CVA \$59**  
*(fits CVA, Optima, Kodiak, Accura & Wolf)*
- 127-814 Keylock™ CVA Scope Mount Base Black \$39.95**  
*(fits CVA, Optima, Kodiak, Accura & Wolf)*
- 127-815 PeepRib Sight for Traditions \$59**  
*(fits Traditions, Vortex & Pursuit)*

- Recommended Accessories...**
- 23-10042 Keylock™ Rings Pair Black \$24.95
  - 110-002 Merit Adjustable Aperture \$44.95
  - 716-63304 Williams WGRS Peep Sight \$34
  - 127-S97M Brown 97D 4-12x40mm Matte Scope \$159

## Merit Aperture: Adjustable Peep-Hole System

Open or Iron sights can be nearly as accurate as telescopic sights... if you can see them clearly. **How Does the Merit work?** Exactly like a camera aperture or the pupil of your eye. Using no lens, the Merit adjusts the size of its hole or aperture you're looking through, changing the amount of light admitted and lengthening or shortening the "focal length". You can see your sight picture sharpen up as you turn the adjustment ring. With practice you will be able to aim more precisely! Styles for Rifle and Handgun Shooters - The Merit Eyeglass Attachment sticks to your eyeglass lens with a suction cup and helps you focus rifle as well as handgun sights. The Merit/Williams Aperture replaces the peep aperture in Williams aperture style rifle sights. Experience pinpoint accuracy with iron sights.

1. 110-002 Merit/Williams Aperture \$44.95
2. 716-63304 WGRS Encore/Omega Peep \$34
3. 110-010 Merit Eyeglass Attachment \$54.95

## Thompson Center Shock Wave Bullets

Superb Accuracy in 209x50 Muzzleloaders - Top Rated in the Lynch Video. (p. 74)

If you're looking for tack driver accuracy in your 209x50 muzzle loader, the TC ShockWave Sabots are a superb combination. These ShockWave bullets deliver maximum shock and energy into the vitals of deer sized game. And with proper loading technique, they're capable of Stunning Accuracy!

**Yellow Tip (YT) Shock Wave** - It will expand and even fragment when it gets into the chest cavity of deer, doing tremendous damage.

**Blue Tip (BT) Shockwave** - Bonded Core expands but holds together for deep penetration in tough skinned game... Big deer, elk, bear, etc.

**Super Glide (SG) Shockwave** - Yellow sabot is special slick plastic for easy loading. Available in regular or bonded core Shock Wave bullets.

# CONCEALED CARRY

**Personally selected holsters, accessories, and custom gunsmithing for legal Concealed Carry.**

The decision to take a course and get your Concealed Carry Permit is the beginning of a journey. You will begin to develop skills, techniques, preferences, and even philosophies of life (for example, no more victim mentality). This department of E. Arthur Brown Company has been set up to address your effectiveness and ultimate success in your Concealed Carry journey...

**Comfort and Convenience** - In order to be effective, your concealed carry system has to be comfortable and convenient for you to put on and wear every day.

**Accuracy and Reliability** - Making it easier for you to shoot well... A better trigger, easier to see sights, a more comfortable grip, etc.

*Check our website for new products being added weekly!*

## Trigger Tune for Ruger SR9 | SR9C | SR40 | SR40C | Glock Gen 1-4 Rocket Trigger Bar Reset Eliminates Trigger Over Travel for Better Accuracy!

Trigger "over-travel" is the distance the trigger continues to move after the shot goes off. It causes the gun to move while it's firing, and this degrades your accuracy. When there's over-travel, right handed shooters will tend to shoot to the left (and left handers vice versa). The Rocket trigger bar reset has an over travel tab that stops the trigger from moving after the shot goes off. This reduces gun movement and greatly improves your accuracy potential.

**Some Fitting Required** - Installing the Rocket requires dis-assembly and reassembly of the Ruger SR fire control mechanism... several times. You'll be shortening the over-travel tab (TCT) on the Rocket a little each time and then re-assembling to test the function. When you get it just short enough to allow the striker to release and the trigger to reset, you're done.

**We have videos of the installation process on our Ghost Trigger Page.**

**No Modifications to Your Original Gun** - You will be fitting the Rocket trigger bar reset in place of your factory trigger bar reset. The Rocket is the only part being modified and there are no mods to the rest of your gun. In fact, you can restore your Ruger SR to original by just removing the Rocket and putting the factory trigger bar reset back in your gun.

**951-RKTR Trigger Tune for Ruger SR9, SR9C, SR40, SR40C \$24.95**

**951-RKTG Trigger Tune for Glock Pistols Gen 1-4 \$22.95**

## Glock Spring Kit Fits Gen 1-4 Pistols

Springs can affect trigger pull, function, and reliability in both positive and negative ways. On the other hand, this Glock Spring Kit allows you to experiment without modifying your original factory springs... You can find the best combination for you and your pistol. This kit has the most popular replacements:

**4 lb Firing Pin Spring** - This is a lighter spring than factory and can give a little lighter trigger pull. It can also cause misfires from light firing pin strikes so, it's recommended for sport but not personal defense.

**6 lb Firing Pin Spring** - This is a heavier spring than factory and can give better reliability (positive primer strikes), especially on 45's and 10mms that have a heavier firing pin. It CAN make your trigger a little heavier, but is recommended for the best reliability on personal defense pistols.

**6 lb. Trigger Spring** - This is a heavier spring than factory that can reduce the trigger pull weight... Because it pulls the trigger to the rear with more power.

**Reduced Power Safety Plunger Spring** - Use of this spring reduces overall trigger pull weight and it has no effect on reliability.

**951-GCSCK Glock Custom Spring Kit \$9.95**

### Barrel Fitting Requirements

Our Savage Accuracy Barrels fit all centerfire Savage bolt actions except short mags (WSMs) and Target Action. The barrel contour is varmint hunter weight, 26" long and tapering to just under .800" at the muzzle. Chromoly steel, blue finish. Remember to order a barrel that matches your existing bolt face, or you can order our Bolt Face Conversion (see below). If you need to ask about this, please call.

*"I got to see a guy shooting one of your barrels you had made, it also was a [Savage] 26" varmint contour 1:8 twist 243 caliber. It outshot any 243 I ever have seen. It was very impressive, hope this one shoots as well. Looking forward to ordering more products, scopes, mounts and black powder products etc. Your ladies are so very helpful when ordering. Thanks again!"*

It's easy to upgrade your Savage bolt action rifle to an EABCO Accuracy Barrel... In most cases we'll have your rifle finished within 1-2 weeks here at our shop.

**Precision Barrel Blanks** - An EABCO barrel blank is precision gun drilled from the best Chromoly steel alloys. Bore dimensions are reamed consistent to airgauge within .0002 (2/10,000ths) of proper bore dimension. These are then Two-Pass button rifled in the various twist rates we offer to suit particular accuracy requirements.

**One-at-a-Time Barrel Making** - True, center-to-center barrel turning at a rate that minimizes stress while keeping the bore in the middle. True, center-to-center chamber reaming insures centering and linear alignment of the chamber with the bore. True, center-to-center 11° target crown, applied after finishing, insures that bullets exit the barrel with perfectly even gas pressure. And during installation, each chamber's headspace is set correctly with precise headspace gauges.

**Special Accuracy Barrels** - Our .223 Remington is set up with 1:12 twist to give best accuracy with varmint bullets from 40-55 gr weight. Our .243 Win is a 1:8 twist so it will shoot off-the-shelf 100 gr ammo with superb accuracy. Same with our 6mm BR... 1:8 twist and throated for 100-105 gr. long distance bullets. 260 Remington shoots a 6.5mm bullet. Our barrels have a 1:8 twist for the most popular 140 gr bullets. And finally, our 308 Win barrel has a 1:12 twist... which is the preferred twist rate of match shooters and their favorite 150-155gr bullets.

**Coming Soon!**  
**EABCO Savage Stocks for the Detachable Mag and Head Space Gauges.**  
**These are still in the design phase, but watch our website for these soon!**

## Bolt Face Conversion

Convert from 458 Mag to 223 and anything in between! We will convert your bolt face and magazine to whatever chamber you want from our selection of EABCO or ER Shaw barrels. All parts included, original parts returned to you. Allow 4-6 weeks for this service.

127-SBF Savage Bolt Face/Bolt Head Conversion \$75

# Savage

## Choate Ultimate Sniper for Savage 10/110 Series

*Fits Savage Short Action (SA) 10/11/12/14/16 and Long Action(LA) 110/111/116*

See "Fitting Information" Below - Choate Ultimate Sniper Gun Stocks are like no other rifle stocks ever made. The unique appearance catches your attention but it is much more than a sales gimmick. The internal construction is a combination of bench rest precision and battlefield durability...

External Features..The wedge shaped forend is for push-pull elevation adjustment when shooting from a rest. The slots in the forend are for barrel cooling. Embedded in the wedge is a rail for attaching bipods, swivels, etc. The narrow part between the forend and the receiver is stippled for grip. It's the balance point for one-hand carrying of your rifle. The nearly vertical pistol grip is the most comfortable grip position for prone (laying down) and bench rest shooting. The removable cheek rest comes in two different heights (included) and they have three mounting positions... so you can set up the stock to align your eye perfectly with your scope. On the bottom of the butt almost directly opposite of the cheek rest is an adjustable butt pod... It screws in or out to adjust elevation up and down. The butt pad is removable and accepts spacers to adjust your length of pull. Sling swivels are mounted on both sides of the forend and butt for flexibility when carrying or steadying your rifle with a sling. Finally, the skeletonized butt allows a two hand hold when the forend is rested. (Note: This stock does NOT fit any models with bolt release in the trigger guard.)

- 317-220601 Ultimate Sniper Stock Long Action 5.062" \$189
- 317-250605 Ultimate Sniper Stock SA Staggerfeed 4.27" \$189
- 317-220615 Ultimate Sniper Stock SA Centerfeed 4.410" \$189
- 317-220625 Ultimate Sniper Stock SA Centerfeed- LH \$189

**Fits-All Barrel Channel -**  
 Since "free floating" of the barrel is preferred on all bolt actions, Choate has set these stocks up to fit any barrel including the widest diameter bull barrels. Skinny barrels will have a wide gap between the barrel and the forend but they will shoot accurately from this stock.  
 These stocks fits the Savage long actions (hole spacing of 5.062") or short actions with or without accu-trigger. Short Actions choose the 4.27" screw spacing if you have a staggerfeed magazine (mag box stays with receiver when removing action). Choose the 4.41" screw spacing if you have the centerfeed magazine (mag stays with stock when removing action). Choose the Detach Mag if you have a new detachable mag rifle (spacing is 4.41")

## Savage Barrel Nut Wrench

Designed for Savage 10 /110 series bolt action rifles. Also fits for models 12, 16, etc.

**Totally Stainless...** So that Scratches and Dings Won't Rust.

**Two Wrench Heads-Fits Old Style & New Barrel Nuts.**

**Two Square Holes** for 1/2" Socket End Breaker Bar...

**127-SV90 Savage Barrel Nut Wrench \$39.00**

- 209-52004 Camo CF Laminated Stock \$169
- 209-52003 Brown CF Laminated Stock \$169

## Savage Thumbhole Varmint Stock

*Pillar Bedded Short Action 10/12/14/16*

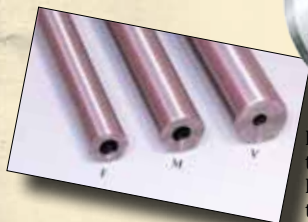

Designed for accuracy in structure as well as shootability, this graceful riflestock fits modern short action Savage Rifles. "Modern" Center Feed (CF) magazine and stock screw spacing of 4.41". Fits rifles with or without the Accu-Trigger. (Older Stagger Feed magazine rifles with 4.27" screw spacing will NOT fit this stock).

Stocks come with bedding pillars included and installed. Pillar bedding gives the most rigid, accuracy enhancing connection to riflestocks on bolt action rifles. Use your original trigger guard and mounting screws, as these are not included. Swivel studs included.

Stock Channelled to Fit 12FV .800" Barrel Contour. Camo pictured at top of page.

# Savage®

**Factory Contour**- tapers to .570" at the muzzle.  
**Magnum Contour**- tapers to .695" at the muzzle.  
**Varmint Contour**- tapers to .865" at the muzzle.

The barrel nut system for attaching the barrel on Savage® rifles works very well for do-it-yourself barrel changes. And this Replacement Barrel kit from E. R. Shaw has just about everything you need to do a good job of it in your shop.

**Kit includes:** barrel, barrel nut wrench, head space gauges, instructions, and bore paste/oil for break-in and cleaning.

**Barrel Fitting Requirements:** E. R. Shaw Re-Barrel kits fit Savage 10/110, 11/111, 12/112, 14/114, and the 16/116 short/long action receivers. They also fit the Stevens Model 200 version of this action.

They do NOT fit the WSM nor Target actions.

\*Be sure to choose a barrel that matches your bolt face.

## Choate Tactical Custom Savage Stock

This stock begins with some of the same features of the Choate Tactical stock: It has a full length bedding block, a rail on the bottom of the forend to attach a bipod, and sling swivels on both sides. From there, this Tactical Custom Package Savage stock adds a custom machined aluminum cheek piece of 6061 T6 with a .750 inch vertical height adjustment and a 3-way aluminum butt plate of 6061 T6. That can add up to 1.25 additional length of pull as well as horizontal adjustment of one inch up or down. A comfortable rubber butt pad finishes the butt plate nicely. Adjustment on the cheek piece is made with a rosette type knob. Adjustments to the 3-way butt plate are made with a 5/32 allen wrench. See barrel fitting requirements on page 23.

317-260601 Custom Stock SA Detachable Mag 4.41" \$429

317-260602 Custom Stock SA Centerfeed 4.41" \$429

317-260612 Custom Stock SA Staggerfeed 4.27" \$429

317-260614 Custom Stock Long Action 5.062" \$429

## SAVAGE TRIGGERS

### BY RIFLE BASIS

**Savage Trigger #1** - Adjusts from 1-3 lbs and fits

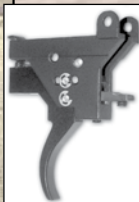

models 10, 11, 12, 110, 16, 111, 112, 114 and 116. Long/short actions, left or right handed. This trigger will replace the standard trigger or the AccuTrigger™ and also fits Savage/Stevens Model 200 rifles. Set screws adjust take-up, over travel, weight of pull, and safety engagement.

**010-SAV1 Savage #1 Trigger Replacement Black \$84**

**010-SAV1-S Savage #1 Trigger Replacement Silver \$84**

**Savage Trigger #2** - Adjusts from 4 oz to 3 lbs and fits models 10, 11, 12, 110, 16, 111, 112, 114 and 116. Long/short actions, left or right handed. This advanced trigger replaces standard as well as AccuTriggers™ and also fits Savage/Stevens Model 200 rifles. Set screws adjust take-up, over travel, and weight of pull.

*Comes with CD-ROM Video*

**010-SAV2 Savage #2 Advanced Replacement Trigger \$146**

**010-SAV2-S Savage #2 Advanced Silver Trigger \$146**

**Savage Sear "R"** - Adjusts from 10 oz to 1.5 lbs. Replacement sear for Savage bolt action rimfire rifles and pistols. Fits models 501, 502, and 503, Mark I and II, Model 93 (.22, .22 Magnum, and New .17 HMR)

**010-SAVR Savage "R" Rimfire Trigger Sear \$84**

## SAVAGE TRIGGERS

### BY TIMNEY TRIGGERS

Savage 10/111 Series: Fits Rifles made after 1977 (Non-AccuTrigger), Adjustable from 1.5-4 lbs.

**112-631 Blue \$95**

**112-635 Nickel \$105**

## BASES FOR YOUR SAVAGE

### EABCO *Savage Base*

Our new Savage Tactical Varmint One Piece Scope Mount fits Savage Rifles with rounded front and rear receiver tops.

Precision machined from bar stock, these mounts have several advantages...

- **Picatinny Precision**
- **Enhanced Receiver Rigidity**
- **Perfect One-Piece-Base Alignment**
- **Reasonable Price!**

Fits Savage dual-round models, NOT the round/flat style. One-Piece Savage base, available in both short-action or long action. Silver or Black.

**127-908 EABCO Savage SA Scope Base Black \$59**

**127-909 EABCO Savage SA Scope Base Silver \$59**

**127-910 EABCO Savage LA Scope Base Black \$59**

**127-911 EABCO Savage LA Scope Base Silver \$59**

### Warne *Two-Piece Savage Bases*

"Pre-AccuTrigger" means the receiver is FLAT at the rear and round at the front. "AccuTrigger" means the receiver is ROUND at the rear and round at the front. These are two piece bases that will fit either long or short action. But you need to look at the top of your receiver to be sure whether it is flat or round on top and order the right set of bases.

**134-M902-902M Savage AccuTrigger Matte \$19.95**

**134-M902-902S Savage AccuTrigger Silver \$22.95**

**134-M902-936M Savage Pre-AccuTrigger Matte \$19.95**

**134-M902-936S Savage Pre-AccuTrigger Silver \$22.95**

### Warne *Tactical Scope Bases*

**134-M666M Short Action Accutrigger Rifles \$81**

**134-M667M Long Action Accutrigger Rifles \$81**

**134-M668M Short Action Original Rifles \$81**

**134-M669M Long Action Original Rifles \$81**

*Rings, see page 51*

## Choate Tactical Savage Stock

### Bedded, Free Floated, with Adjustable Spacer System

The Tactical stock has a full length bedding block (see cutaway below), adjustable butt spacer system to adjust the length of pull, a rail and sliding swivel on bottom of forend to attach a bipod, and sling swivels on both sides. See barrel fitting requirements on page 23.

**317-250601 Savage Stock SA Detachable Mag 4.41" \$199**

**317-250602 Savage Stock SA Centerfeed 4.41" \$199**

**317-250612 Savage Stock SA Staggerfeed 4.27" \$199**

**317-250614 Savage Stock Long Action 5.062" \$199**

**317-250603 Savage Stock SA Detachable Mag 4.41" LH \$199**

 Win 70 MOA 112-402S Nickel \$119

You have to have a good trigger pull if you want to shoot with the best accuracy. Unfortunately, mass production rifles don't come with triggers capable of top accuracy.

In order for a trigger to have the lightest, cleanest, and most consistent pull, everything needs to be fit closer, straighter and tighter. Instead of trying to tune or repair a mass production factory trigger, Timney Replaces It!

A Timney Trigger system is built so the sear surfaces mate squarely. Sears are sharper, straighter, and hardened so they'll stay that way. And the parts are fit so that there's no wobble or "play". As a result, the sear surfaces mate exactly the same every time you cock your gun. This type of consistency allows a Timney Trigger to be adjusted with much more refinement for an exact pull weight, take-up, break, and over travel. You will shoot better when you replace your trigger with a Timney.

Download the Timney Instructions online at [eabco.com](http://eabco.com).

## LASERGRIPS®

Lasergrips® feature an instinctive activation front strap switch for the Ruger Mark II and Mark

III pistols. The hard polymer side panels are fused with the durable rubber activation strap that aligns automatically with your fingers and turns on naturally when you grip your pistol. Whether you use your Ruger for plinking, hunting or professional purposes, Lasergrips® provide a higher level of accuracy and faster target acquisition. And, they fit into most Ruger Mk II and Mk III holsters just like factory grips.

016-LG-403 Laser Grips Sights MK II, MK III \$249

023-26610 Rem Oil Teflon Lubricant - 4oz. can \$4.99 (recommended to maximize your Clip Loader ammo feed.)

**005-MSL Mag Speed Loader \$16.95**

**Volquartsen**  
CUSTOM

**RUGER MK II, MKIII & 22/45 GRIPS**

**Volquartsen Laminated Target Grips for Ruger MK III:** feature thumbrest, heelrest and finger grooves. Designed to give the shooter a relaxed, steadier hold. CNC machined from laminated wood. Includes extended bolt release, extended magazine release and four allen head screws. Available in several colors...Brown, Gray or Brown/Gray.  
 Serious Bullseye Competitors and target shooters know that the slightest change in grip position can change your point of impact even when your sights and aiming eye are aligned the same from shot to shot. The purpose of these Target Grips is to position your hand in as close to the same place every time you pick up your gun... Improving your accuracy potential!

**Volquartsen Aluminum Grips for Ruger 22/45:** Now you can replace your factory 22/45 grips with precision machined and anodized grips from Volquartsen! Available in several colors: Silver, Black, Red, Blue, and OD Green. These aren't "modified 1911" panels... They specifically designed for your 22/45 for a perfect fit and an improved "feel". Remember, these grips only fit the 22/45s with replaceable grip panels.

140-VC3AG-B	Aluminum Grips - 22/45 - Black	\$59
140-VC3AG-S	Aluminum Grips - 22/45 - Silver	\$59
140-VC3AG-R	Aluminum Grips - 22/45 - Red	\$59
140-VC3AG-Blue	Aluminum Grips - 22/45 - Blue	\$59
140-VC3AG-G	Aluminum Grips - 22/45 - OD Green	\$59

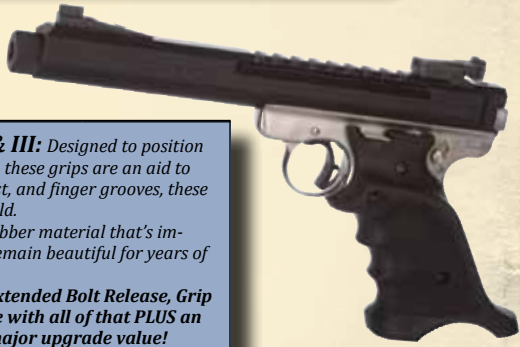

**Volquartsen Volthane Grips for Ruger II & III:** Designed to position your hand exactly the same everytime you grip the pistol, these grips are an aid to accuracy and consistency. Featuring a thumbrest, heelrest, and finger grooves, these grips allow for a relaxed, natural pointing, repeatable hold.

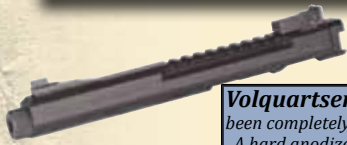

The Volthane material itself is a comfortable, molded rubber material that's impervious to sweat and moisture. It won't warp and will remain beautiful for years of shooting.

**Bonus Accessories -** The Mk II grips come with the Extended Bolt Release, Grip Screws, Washers and Allen Wrench. Mk III grips come with all of that PLUS an Extended Magazine Release... Yes, these grips are a major upgrade value!

140-VC2RG-R	Volthane Grip - Right Hand - MK II	\$39.95
140-VC2RG-L	Volthane Grip - Left Hand - MK II	\$39.95
140-VC3RG	Volthane Grip - Right Hand - MK III	\$49.95

**Volthane Grips shown above with Volquartsen LLV Barreled Upper.**

**Volquartsen LLV Barreled Upper for Ruger MK II & III:** The LLV Barreled Upper has been completely redesigned for 2012... Better balance, more versatility, and even better accuracy!

A hard anodized CNC machined billet receiver is the foundation of the lightweight LLV setup. The complete barreled receiver (aka Upper) weighs under 15 oz! The receiver and barrel shroud are precision machined as one piece from aluminum alloy. An integral Picatinny Rail is machined into top of the receiver. It is then fitted with a 6" precision stainless steel barrel that has been machine honed and lapped. The barrel has been contoured to reduce weight without sacrificing accuracy. The barrel features 1/2 x 28 threads on the muzzle end for adding a compensator or suppressor and comes standard with a thread protector. (Target sights are available at extra cost.) \*Requires FFL, cannot ship to CA\*  
 The Volquartsen LLV Upper will transform your Ruger Mk II or Mk III into a whole new pistol...

140-VC2LLV-B	LLV Barreled Upper Ruger, MK II, III - no sights	\$299
140-VC2LLV-TS-B	LLV Barreled Upper-Ruger MK II, III - WITH sights	\$374

## RUGER MK II, MKIII & 22/45 FRAMES

140-VC3PR-TS-B

Rail Mount System with Target Sights. Pictured on barrel, barrel not included. Features a mil-spec Picatinny style rail on both top and bottom for an efficient double mounting option for optic or other accessories. CNC machined from billed aluminum, attaches easily to MKII, III or 22/45 models with 5.5" bull barrels. \$235

### Accurizing Kits (listed above)

#### MK II, III & 22/45

Complete drop-in kits provide a crisp, clean 2.25 lb trigger pull (pull may vary slightly due to factory frame variances). The kit includes an extended bolt release, target hammer, target sear, target trigger w/ overtravel screw, return trigger plunger spring and polished plunger. No stoning required.

140-VC3ME

140-VC3ME

## Coco Bolo Grips

Ruger Mk II/III and 22/45 Pistols

Exotic Coco Bolo Wood with Beautiful Checkering

Improve your grip and enhance the beauty of your Ruger Mk .22 Pistol with a new set of Coco Bolo grips. Available in Right Hand Thumbrest as well as Ambidextrous versions, these grips simply replace the removable grips that came on your gun. Does Not Fit Mk I Pistols.

- 006-AM45 Coco Bolo Grips Ambidextrous 22/45 \$36
- 006-AMIII Coco Bolo Grips Ambidextrous Mk II, III \$36
- 006-TR45 Coco Bolo Grips w/thumbrest 22/45 \$36
- 006-TRIII Coco Bolo Grips w/thumbrest Mk II, III \$36

# Ruger 10/22 Barrels,

*A-I*

Pictured: Burgundy Laminated Stock

**A. EABCO 10/22 Accuracy Barrel** with 1:16 twist, threaded end (with protector), 18" length, .920" diameter. *Details to the right.*

- 127-180 Standard Blue Finish \$169
- 127-182 Fast-Twist 1:9 Blue \$169
- 127-184 Stainless Fluted \$219

**B. Laminated 10/22 Thumbhole Stock** with raised cheek piece. Inletted to fit 10/22s with .920" diameter barrel. Easy installation. Package price of \$145 applies with purchase of any 10/22 barrel. Right hand only. Available in red (below), burgundy (above), gray, brown, camo and blue (right). **\$155**

**C. Timney 10/22 Trigger Guard Assembly** is a complete replacement for the factory standard trigger module. Includes Timney Trigger mechanism plus lever action magazine release. Pre-assembled and adjusted to approx. 2.5 lbs. Available in Black, Yellow, Green, Blue and Red. *Details on page 38.* **\$209**

**D. Tactical Muzzle Break** fits our EABCO Accuracy barrels and Tactical Solutions 10/22 barrels on page 12-13. Features a unique combination of lateral and forward porting to stabilize muzzle. Great for watching your hits on varmints as well as fast target acquisition during rapid fire competition. Available in matte black (005-103) or silver (005-106). **\$37**

**E. Lever Action Mag Release** helps your mags literally fall out when you pull, and pop back in with similar ease. Replaces original Ruger® 10/22 magazine release. Available in Black (shown above) or Olive Drab (below). **\$34**

**F. Tactical Scope Base** available in standard or 15 MOA versions. Standard gives a solid, straight and accurate mount. 15 MOA puts 15 minutes of angle (inclination) into your mount, enhancing the elevation adjustment of your scope so that you can zero your 10/22 for longer distance shooting. 15 MOA are negligible at short distances, you'll still be able to shoot normally. We recommend our Keylock™ or Warne® rings (not included). **\$29**

**G. Keylock™ Scope Mount & Rings** feature 4-screw ring tops, steel interlocking cross-bolt and clamp firmly with oversized allen screws. Page 39 for our new Keylock 10/22 Mounts!

**H. Oversized Bolt Handle** **\$49** replaces your factory bolt handle assembly. Easier to grip and looks nicer too! Adds no weight, because it is hollow.

**I. Swivel Stud** for bipod. Available to order, or we can install for you. Screws into the stock. **\$3.95/\$15** Install charge per stud.

**J. Bipod, Harris S-Type and Podloc.** Conveniently attaches to your swivel stud. *See page 54-55.*

## Exotic 10/22 Muzzle Weight

*(pictured above)*

The JP Tactical II Centerfire Muzzle Brake serves as an attention grabbing muzzle weight. Must be installed by EABCO on our EABCO 10/22 Threaded Accuracy™ Barrels (above). See p. 8-9 for more details on the JP Tactical (135-TVBB) brake. Delivery: Approx. 6-8 wks

- 135-920B JP Tactical II Muzzle Brake Blue \$159
- 135-920S JP Tactical II Muzzle Brake Silver \$159

# Stocks & Accessories

## A. EABCO 10/22 Accuracy Barrels \$169

Threaded Ends (w/protectors) for Muzzle Brakes!

Our EABCO Threaded Accuracy Barrels for the Ruger 10/22 are pre-threaded to fit the popular Tactical Solutions 10/22 Muzzle Brake. A custom thread protector is included so that your Accuracy Barrel will look beautiful with or without a muzzle brake installed.

**Accuracy Features** - An EABCO barrel blank is precision gun drilled from the best Chromoly and Stainless steel alloys. Bore dimensions are reamed consistent to airgauge within .0002" (2/10,000ths) of proper bore dimension. These are then Two-Pass button rifled in our standard 1:16 or subsonic 1:9 twist rates.

True, center-to-center barrel contouring at a rate that minimizes stress while keeping the bore in the middle. True, center-to-center chamber reaming insures centering and linear alignment of the chamber with the bore.

True, center-to-center chamfer style crown to insure accuracy while protecting the crown from damage when cleaned from the muzzle end.

18" length, .920" diameter non-tapered, and threaded 1/2x28 TPI at the muzzle.

127-180 Standard Blue \$169 | 127-182 Fast-Twist 1:9 Blue \$169 | 127-184 Stainless Fluted \$219

## B. Laminated 10/22 Thumbhole Stocks \$155

Buy it with a 10/22 barrel and pay only \$145

Fits 10/22s with .920" barrel diameter. Easy Installation!

- A. 209-11003 Brown \$155
- B. 209-11004 Camo \$155
- C. 209-11007 Blue \$155
- D. 209-11002 Gray \$155
- E. 209-11001 Red \$155
- F. 209-11005 Burgundy \$155

Check out our new Keylock™  
10/22 Scope Mount on page 39

# Ruger 10/22 Stocks & Barrels

## M1 Carbine 10/22 Replica Stock

for the Ruger 10/22 with optional Sling, Oiler, and Military Style Sights. Convert your Ruger 10/22 to an M1 Carbine 10/22 Tribute Gun, also well suited to the Liberty Training Rifle and Applesed Project. Includes buttstock, handguard, barrel band with front sling swivel. Sling & Oiler ordered separately. Drop-in fit stock requires no gunsmithing skills for installation. Use with standard factory sights or military style sights (below). Note: Fits standard 10/22 Carbine barrel, not .920 heavy barrels. These are great for the Project Applesed Marksmanship Events! Curious about them, call us!

133-1022 M1 Replica 10/22 Stock \$129

130-48S M1 Carbine Sling with Oiler \$19

138-100 TechSights 100 for Ruger 10/22 \$59

138-200 TechSights 200 for Ruger 10/22 \$69

138-201 IRAS Insert Ready Aperture System \$15  
(for 200 Series Tech Sights)

138-202 .920 Barrel adaptor for front sight \$15

331-011 Dummy Stick Mag \$19

## Choate Telescoping M4 Tactical Stock for the Ruger 10/22

A fully adjustable telescoping M4 style buttstock with pistol grip and hand guard... Made from metal and plastic just like original M4 stocks. In fact, the collapsible telescoping buttstock is a real M4 mechanism adapted to fit the Ruger 10/22. Length of Pull (LOP) adjusts from 12 1/4 to 15 1/2 inches in approximately 3/4" increments. Your 10/22 can now fit shooters of all sizes!

**Apple Seed/Liberty Rifle** - The Choate M4 10/22 buttstock aligns your eye with factory iron sights as well as the Tech Sights precision peep system. The pistol grip, buttstock, and handguard create a profile that simulates the military M4 almost perfectly. And the sling mounting positions are the same as an M4, too. This stock is a great way to turn your Ruger 10/22 into an inexpensive M4 simulator and save money by shooting 22 LR rimfire ammo.

**What's Included/What it Fits** - The buttstock, pistol grip, and forend are one piece and include the handguard that attaches separately. This stock fits standard factory tapered barrels (does not fit .920 diameter barrels). Screws, barrel band, and misc hardware for attaching to your Ruger 10/22 are included. Not Included: Sling, Tech Sights, magazines.

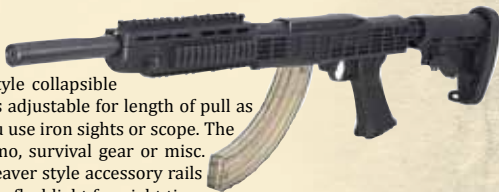

317-070152 Choate Collapsible M4 Tactical 10/22 Stock \$129

## Fusion 10/22 Rifle Stock

*Fusion for your original factory tapered barrel.*

*IntraFuse for your .920" heavy barrel.*

Both Fusion & IntraFuse 10/22 stocks feature a military style collapsible buttstock and pistol grip... But that's not all! The buttstock is adjustable for length of pull as well as cheek position. So you'll be lined up right whether you use iron sights or scope. The pistol grip has a trapdoor compartment for emergency ammo, survival gear or misc. personal items. At the front of the Fusion stock, there are Weaver style accessory rails top and bottom (the bottom one has a cover over it). Mount a flashlight for night time rat shootin'. Mount a red dot scope for fast, "Scout scope" style sighting. You can even mount a laser sight if you like. Yes, the Fusion 10/22 Stock has a lot of fun built into it. Install it on your Ruger and it's like having a totally different gun! Has front swivel stud capability using M4 adaptor.

036-63160 Fusion 10/22 Stock for factory contour barrel \$87

036-63161 IntraFuse 10/22 Stock for .920" barrel \$109

719-M4BP Forend Bipod Adaptor \$34

## Volquartsen Carbon Fiber 10/22 Tension Barrels

**Threaded, Tension Tuned Match Grade Barrels w/Optional Muzzle Brake**

The Volquartsen approach to making a lighter weight barrel for the Ruger 10/22 is unique... They use a tensioning system to enhance the accuracy and cooling characteristics. The stainless steel core of these barrels is referred to as "THM" for Taper Honed Match barrel and chamber. The bore and chamber dimensions vary no more than .0001" from breech to muzzle... That's 1/10,000th of an inch. "Taper Honed" refers to the polish of the bore and the improved transition from the chamber to the bore. Dimensions are confirmed by digital measurements.

The "core" of these barrels is a small diameter match grade barrel. Now, as diameters get smaller, the potential for vibration increases. So, Volquartsen reduces vibration by TENSIONING the core within a light weight carbon fiber sleeve. The result is a lighter barrel with the same stiffness and vibration deadening as a heavy match barrel... Quite a unique system.

**Forward Blow Compensator (above); Stabilization Accuracy Module (left).**

## Volquartsen Ruger 10/22 Trigger Guard Assembly

The Trigger Guard 2000 is a complete CNC machined trigger guard equipped with precision EDM parts. It features an internal pretravel adjustment that is set at the factory in order to greatly reduce pretravel usually found on the factory trigger guard. This new match trigger guard is CNC machined from a solid billet of high strength aircraft aluminum. The hammer, sear and disconnector are precision wire EDM cut from A2 hardened tool steel with tolerances being held to +/- .0002" assuring every trigger let off to be extremely consistent. The CNC machined trigger is hard black anodized and equipped with an overtravel adjustment screw. The trigger is reset internally to eliminate any dragging or inconsistencies caused by a conventional trigger plunger. The TG2000 comes with custom Volquartsen springs. An automatic bolt release and an extended magazine release are also included. This trigger guard assembly is machined to give a superb, crisp trigger that will provide years of enjoyment to the shooter who demands the very best.

Item Number	Description	Price
140-VCTP-1-10-B	TG2000 10/22 Trigger Guard Assembly - Black	\$229
140-VCTP-1-10-S	TG2000 10/22 Trigger Guard Assembly - Silver	\$229

## Green Mountain Ruger® 10/22 Barrels

Green Mountain 10/22 Barrels are high grade target barrels with tight fitting bore/groove dimensions and close fitting target-style chambers. Available in three twist rates:

**1:16 Twist** - 20" fluted .920 dia. bull barrels with target chambers. Best for standard and hi velocity ammo.

**1:9 Twist** - Special Purpose Barrels. 20" fluted .920 dia. bull barrels with target chambers. Best

suited for Subsonic ammo like Aguila Subsonic and 60gr Super Sniper. **1:18 Twist** -

Special Purpose Barrels. 20" fluted .920 dia. bull barrels. Stinger stabilizes

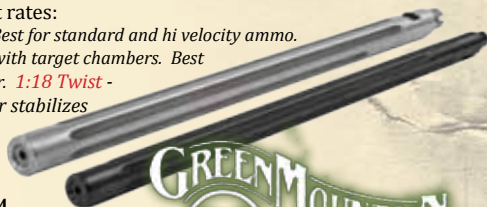

light hyper velocity 22LR ammo.

035-901522- Blue Fluted 10/22 .920"x20" 1:16 Twist \$129

035-901523- Stainless Fluted 10/22 .920"x20" 1:16 Twist \$144

035-901600- Blue Fluted SubSonic 10/22 .920"x20" 1:9 Twist \$129

035-901610-Blue Fluted Stinger 10/22 .920"x20" 1:18 Twist \$149

### Airgaged Barrels Bentz-Style Target Chambers Match-Target Crowns

Excellent barrels with extreme accuracy potential when replacing your Ruger® 10/22® Barrel. **18" Length, .920" diameter.** Available in Factory Blue or Helical Fluted Stainless. Helical style is "Top-Of-The-Line" with E. R. Shaw's patented "helical" style fluting and match grade stainless steel on a match grade bore and Bentz chamber dimensions with the target crown.

040-RB01 Factory Blue 10/22 Barrel \$99

040-RB02 Helical Fluted Stainless 10/22 Barrel \$179

## COOLING FINNS AND A THREADED MUZZLE PAY TRIBUTE TO A CLASSIC STYLE

### STANDARD CONTOUR THREADED END COOLING FIN

New "Finned" replacement barrels from Tactical Innovations for Ruger 10/22 are reminiscent of the cooling finned barrels you'd see on the old Thompson Sub Machine Guns. Same contour as standard Ruger factory barrels, fit the standard factory stock. Threaded to 1/2x28 and fitted with a nearly invisible thread protector... So you can mount a muzzle brake if you like. Length is 16½", all stainless steel... Beautiful!

039-30013 Finned 10/22 Tommy Gun Barrel Blue \$144

039-30014 Finned 10/22 Tommy Gun Barrel Stainless \$149

039-80132 Heavy Duty Adjstble 10/22 Bolt Spring \$3.50

039-30171 Clipped 10/22 Bolt Spring Guide Rod \$9.99

039-30135 Rear Charging Ruger 10/22 Receiver \$199

039-80144 Allen Head Stnls 10/22 Stock Screw \$4.99

039-00204 Adjustable 10/22 V-Block Black \$18

039-00205 Adjustable 10/22 V-Block Stainless \$18

## FOR YOUR RUGER® 10/22 BARRELS & ACCESSORIES

Our Tactical Solutions barrels and accessories for the Ruger 10/22 offer superb accuracy along with a unique style threaded muzzle utility. Combined with our EABCO camo laminated silhouette thumbhole stock and other accessories, they will turn your Ruger 10/22 into a whole new firearm, customized to your personal taste!

**Tactical 22LR Barrels-** A premium Chromoly bore sleeved in .920 diameter aluminum and fluted. This gives heavy barrel stiffness with reduced weight, but it retains a nice balance for aiming and shooting off-hand. The muzzle features an 11 degree target crown and has a threaded end (TE) for our removeable muzzle brakes. Threads are 1/2x28 TPI. A screw-on thread protector covers the threads when you want to hunt or shoot without the muzzle brake.

**005-001 Tactical 10/22 Barrel 16.5" Olive Drab, Fluted, Threaded End \$229 (below)**

**005-002 Tactical 10/22 Barrel 16.5" Matte Black, Fluted Threaded End \$229**

**Tactical Muzzle Brakes-** Fit the Tactical 22LR barrels described above and our EABCO 10/22 Accuracy Barrels. These brakes feature a unique combination of lateral and forward porting that stabilizes the muzzle.

**005-103 Tactical 10/22 Muzzle Brake Matte \$34**

**005-106 Tactical 10/22 Muzzle Brake Silver \$37**

**Lever Action Mag Release-** 10/22 Magazines will laterally fall out when you pull this lever action! They pop back in with similar ease. The Tactical lever replaces the original Ruger 10/22 magazine release.

**005-102 Tactical 10/22 Lever Mag Release Olive Drab \$34**

**005-101 Tactical 10/22 Lever Mag Release Matte Black \$34**

**Tactical V-Block-** Tactical V-Block is designed to wedge the barrel upward at the same time as it is tightened into the receiver. This reduces the downward tightening force and prevents barrel sag significantly. **005-107 Tactical V-Block \$19**

**Tactical Standard or 15 MOA Scope Base-** Standard model is for those who like the Tactical base, but don't want the 15 MOA inclination. Solid and straight, it gives a good and accurate base for mounting your scope. The 15 MOA scope base puts 15 minutes of angle (inclination) into your scope mount for longer distance shooting. Precision machined to meet Mil Spec Picatinny (Weaver style) dimensions. Finish: matte black. Four screws included. We recommend our Keylock™ or Warne rings on page 50-51.

**005-104 Tactical 15 MOA Scope Base \$29**

**005-105 Tactical Scope Base \$29**

### Universal Magazine Loader

Loader loads ammo into several brands of magazines. Compatible with Champion 10/22 magazines, Black Dog 10/22 magazines, and Ruger Factory 10/22 magazines. Can load up to 50 rounds at a time quick and accurately. Portable for in the field.

**103-40430 Universal Ruger® 10/22® Magazine Loader \$27**

### Hot Lips™ Magazine Loader

Load your Hot Lips™ or Steel Lips™ magazines in seconds! Dump a 50 rnd box of .22 LR ammo into the hopper, insert a magazine, and just crank until it's full! Recommended only for Hot Lips™ and Steel Lips™ in-line magazines.

**200-24211 Hot Lips™ Magazine Loader \$28**

# Ruger 10/22

## Ruger 10/22 Trigger Guard Assembly

A complete replacement for the factory standard plastic or metal trigger guard module. It contains a precise Timney Trigger mechanism, PLUS a lever action magazine release. The Timney 10/22 Trigger system is a single-stage, pre-assembled, tuned and adjusted group that comes with complete, photo illustrated instructions. All trigger sear surfaces are EDM cut, Teflon-Nickel coated, and deliver an exceptionally smooth, crisp, single-stage, drop-in trigger. This is a "Trigger Group"... Pre-assembled and adjusted. Pull weight is approximately 2.5 lbs. See all our Timney Triggers on page 26.

## X-Ring Replacement Receiver for Ruger 10/22

### Includes Hardened Steel Bolt, Double Spring System, Integral Scope Mount

The X-Ring from Tactical Solutions. A precision machined rimfire receiver that fits everything that fits the Ruger 10/22 receiver. Use the X-Ring to replace your factory 10/22 Receiver, OR... Use it to build a completely new gun by combining it with 10/22 accessories! (Recommended trigger guard assemblies: Ruger and Volquartsen).

**Special Features** -Machined from a solid block of 6061 T6 Billet, the X-Ring is held to extremely tight tolerances. The unique X-Ring Bolt has two recoil springs and guide rods... This gives an even tension to the bolt (factory 10/22 bolts have one off-center spring and rod on the side of the bolt).

**Integral Scope Mount and More** - Picatinny/Weaver scope mounting base, a rear buffer pin, and a rear cleaning rod access hole. **Includes Custom Bolt and Bolt Handle. Trigger group is not included.**

\*Receivers must be shipped to an FFL Dealer

005-XR145102 X-Ring Receiver Matte Black \$369

005-XR145204 X-Ring Receiver OD Green \$369

005-XR178111 X-Ring Receiver Silver \$369

## REAR CHARGING RUGER 10/22 RECEIVER

### Features AR Style Rear Charging Handle

Possibly the most ingenious idea we've seen for the Ruger 10/22 is the "Rear Charging" 10/22 Receiver. It "Charges" or racks the bolt the same way an AR15 does. It's a completely new receiver housing that uses your original bolt and trigger guard assembly. After racking the rear T-shaped charging handle backwards and letting it spring forward to chamber a round, it locks forward and stays

there as you fire (It doesn't cycle backwards with each shot). As you shoot, the bolt cycles back and forth but the rear charging handle doesn't move and there's no bolt handle cycling on the side either... It's like a different firearm.

**How it Works** - The Rear Charging 10/22 Receiver works with your original bolt and trigger guard assembly. It comes with a special replacement Bolt Spring Guide Rod Assembly that replaces your original Bolt Handle assembly. Simply disassemble your original receiver and reassemble into the new receiver.

**Integrated Scope Mount and More** - In addition to the rear charging feature, this 10/22 receiver also has an integral Picatinny/Weaver scope mounting base, a rear buffer pin, and a rear cleaning rod access hole. **Must Ship to Your Local FFL Dealer. Cannot ship to CA.**

039-30135 Rear Charging Ruger 10/22 Receiver \$199

### Keylock 2-Ring Scope Mount for Ruger 10/22

#### Complete with Precision Weaver/Picatinny Base and Rings

This is a complete scope mounting system for your Ruger 10/22. It includes our NEW Precision Machined Weaver/Picatinny base and two of our Keylock Magnum Rings. The rings fit standard one inch diameter scope tubes.

127-425 Keylock 2-Ring Scope Mount for Ruger 10/22 - Black \$49

127-430 Keylock 2-Ring Scope Mount for Ruger 10/22 - Silver \$49

127-817 Keylock Scope Base for Ruger 10/22 - Black \$29

127-818 Keylock Scope Base for Ruger 10/22- Silver \$29

\*Keylock 1" Rings available separately on page 51.

### Ruger 10/22 Embroidered Gun Case

A padded black cordura 10/22 gun case with red trim, webbing handles, and Ruger 10/22 embroidery. Interior measures 39.5" x 8.25". Fits factory Ruger 10/22 rifles as well as M1 Carbine Tribute 10/22 rifles. DOES NOT FIT rifles with our 10/22 silhouette thumbhole stocks.

If your 10/22 is decked out with a scope and thumbhole silhouette stock, we recommend the Scopetector Gun Case, page 53.

045-275 Ruger 10/22 Gun Case \$19.95

### M1 Carbine Replica Gun Case

#### Original or Fleece Lined

An M1 Carbine Replica Canvas Gun Case

that fits the Ruger 10/22, M1 Carbine, and other rifles of similar dimensions (fits rifles up to 36" long). Available in the original canvas as was used in WWII and Korea.

Also available in a fleece lined version that still looks authentic but gives

better padding and protection. Well suited to the Liberty Training Rifle and Applesed Project.

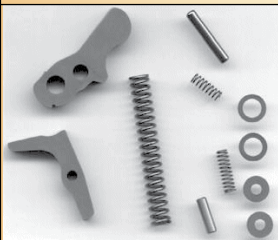

130-400 Unlined M1 Carbine Canvas Gun Case \$29

130-40L Fleece lined M1 Carbine Canvas Gun Case \$39

**Tune up your action...** to enhance your accuracy as well as your ability to shoot well... Your marksmanship. Every little bit helps. Improve your lock time with a Hammer kit and Titanium Firing Pin. Improve your trigger performance with a Competition Sear Kit. Upgrade your bolt to just pull and release with the Rack and Roll Bolt Release. If you're mechanically inclined, you can install these yourself but we recommend our package deal installation service. Get our action tune components installed by EABCO for only \$40.

The 10/22® Hammer Tune Kit produces a lighter trigger pull with a faster lock time. The sear engagement surfaces are precision ground and vapor honed. The kit includes a new hammer, extra power hammer spring, two .004" shims and a new trigger return spring. The 10/22® Competition Sear Kit lightens the trigger pull and smooths the trigger return. Hand stoned engagement surfaces. Includes a new sear, extra power sear spring, and two .004" trigger shims. This Hammer and Sear package produces a trigger pull of 2.75 lbs +/- 4 oz.

713-001 Hammer Tune Kit \$31.95

713-002 Competition Sear Kit \$29.95

713-003 Hammer/Sear Pkg \$54.95

713-105 Titanium Firing Pin \$32

713-303 Titanium 10/22 Sharp Claw Extractor \$9.99

Have them installed for \$40 (127-RP1)

181-005 R&R Bolt Release \$12.95

127-169 Accuracy Firing Pin \$19

We're now offering a more precisely machined firing pin with a full sized impact face... approximately 3 times the surface area of the factory firing pin.

713-105 Titanium Firing Pin \$32

127-RP1 Installation \$40

### 10/22 Barrel Pusher Tool

Designed to easily remove factory and aftermarket barrels from the receivers of Ruger® 10/22® rifles.

The 10/22® Barrel Pusher works with all available calibers including 17HMR, 17HM2, 22LR and 22WMR. The tool removes the tightest barrel with no exertion and with no danger of marring or scratching the receiver.

316-BPT \$42

# Ruger 10/22

# Mags & Clips

## Black Dog™ 10/22 Drum - 50 Round Mag

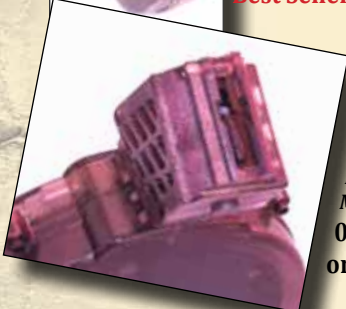

**Quality First, Price Second** - Black Dog took the point of view of, "What would it take to make it work right, regardless of the cost?" It ended up costing a little more, but it works... It Really Works!

**Reliable Feed** - Unlike other high capacity mags, the Drum spreads out the spring tension resulting in reliable feed for all 50 rounds of shooting.

**Easy to Load** - No Magazine Loader Required. Simply press the slots to compress the magazine follower as you insert rounds of ammo. **Easy to Clean.**

**NOTE: CANNOT SHIP 50-ROUND CLIPS TO CA, CO, MA, MD, NJ, NY, HI, IL, OH, Washington DC, Denver**

**Best Seller! 005-50D Black Dog 10/22 Drum Mag-50 Round \$59**

## Black Dog™ 10/22 25 Round Mag

Made from glass filled polycarbonate for extra stiffness and surface hardness. Refined feed lips are shaped nearly identical to factory 10/22 magazines and give reliable feed in Ruger 10/22 firearms.

**NOTE: CANNOT SHIP 25-ROUND CLIPS TO CA, CO, MA, MD, NJ, NY, HI, IL, Washington DC, Denver**

**005-501 Black Dog 10/22 25 Round Mag \$19 or 2/\$36**

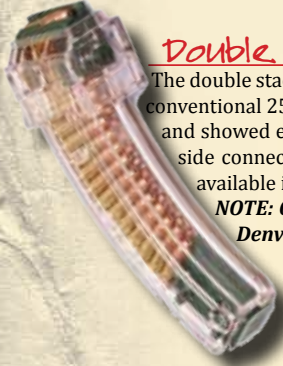

## Tactical Innovations® Adjustable 25

Having feed problems with your Ruger 10/22? Try this! Four adjustment screws at the top four corners. These screws are touch points where the magazine contacts your 10/22 receiver. By screwing these screws outward, you can custom fit the magazine for your rifle. You can remove the wiggle. You can set a better angle for feed. You can set the clearance with the bolt as well as the ejector engagement.

All of these factors play a role in how reliable your magazine feeds. The TI25 Mag lets you fine tune them. **NOTE: CANNOT SHIP 25-ROUND CLIPS TO CA, CO, MA, MD, NJ, NY, HI, IL, Washington DC, Denver**

**Best Seller! 039-TI25 Adjustable 10/22 Mag 25 Round Clip \$34**

## Double Stacker 30 Round Mag

The double stack system fits more ammo into a smaller space. More compact than conventional 25 round 10/22 mags, these double stackers have been tested in-house and showed excellent reliability in both feed and function. 'Jungle Clip' configuration-side connectors that snap together. Easy to clean with removable bottom panel. Now available in the standard plastic head or the new steel head option.

**NOTE: CANNOT SHIP 30-ROUND CLIPS TO CA, CO, MA, MD, NJ, NY, HI, IL, OH, Washington DC, Denver**

**103-40425 Double Stacker 30 Round Mag Clear \$20.65**

**103-40629 Steel Head 30 Round Double Stacker \$32**

## Dummy Stick for your M1 Carbine 10/22

Attach to the base of the standard Ruger factory 10 round magazines (not included, order separately). They're just for looks... They don't add any magazine capacity. But, they sure give an authentic "Stick" magazine look.

**331-011 Dummy Stick Magazine \$19**

Front View

## Ruger® Factory 10/22® 10 Round Mags

These original Ruger factory magazines feed regular .22LR and 17HM2 ammunition. And, you can always tell how many cartridges are inside because of the clear plastic housing.

**015-90223 Ruger® Clear 10/22 10 Round Magazine \$16**

**015-90005 Ruger® Black 10/22 10 Round Magazine \$16**

## TriMag clip connector

**TriMag Clip Connects 3 factory mags into one!**

Turn your standard 10 round Ruger 10/22 magazines into 3-Mag high-capacity field units with this new TriMag 10/22 magazine Connector. The TriMag clip connects together three factory Ruger 10/22 magazines (order above) into one "jungle clip" type unit. It's a very neat approach to high capacity magazine utility. Magazines not included.

**027-101 TriMag 10/22 Mag Connector \$9.95**

## Ruger® Factory 10/22 25 Round Mags

This genuine Ruger® factory magazine with Ruger® logo has been tested and has proven to feed as reliably as the standard BX-1 10-round Ruger® rotary magazine. BX-25 magazines will work with any factory original Ruger® 10/22® rifle, SR-22® rifle, and 22 Charger pistol.

**NOTE: CANNOT SHIP 25-ROUND CLIPS TO CA, CO, MA, MD, NJ, NY, HI, IL, Washington DC, Denver**

**015-90361 Ruger® Black 10/22® 25 Round Magazine \$24**

## Hot Lips™ & Steel Lips™ Magazines

**25 Round Banana Mags: Connect 2 or 3 side-by side!**

The famous Hot-Lips 25 Round Mags for the Ruger 10/22 are back! Use 'em one at a time or connect them side by side with the connector buttons. Feeds well with standard 22 Long Rifle ammo. Steel Lips™ models are just a little extra durable. Fill these magazines faster with our Magazine Speed Loader. (See pg. 37) **NOTE: CANNOT SHIP 25-ROUND CLIPS TO CA, CO, MA, MD, NJ, NY, HI, IL, Washington DC, Denver**

**200-40005 Hot Lips™ 25 Round 10/22 Magazine Clear \$19.95\***

**200-40010 Hot Lips™ 25 Round 10/22 Mag Smoke \$19.95\***

**(\*Hot Lips 25 Round Mags- order qty. 2+ and pay only \$19 each)**

**200-24101 Steel Lips™ 25 Magazine Clear \$29**

**200-24102 Steel Lips™ 25 Magazine Smoke \$29**

**Steel Lips™ 10 Round Mags: Connect 2 or 3 side-by side!**

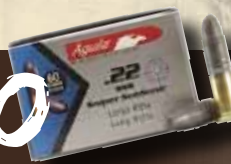

Precision cast and ground Stainless Steel headers and 10, 20, and 30 round clipped together capability have made the Steel Lips 10/22 magazine very popular with competition shooters. Each magazine holds 10 rounds of .22 LR ammo.

**200-SL10CL Steel Lips™ 10/22 Magazine Clear \$16.95**

**SEE PAGE 37 FOR MAGAZINE LOADERS!**

# 22 LR AMMO

Item Number	Description	Grains	Qty	Price	Price/500
037-320	Aguila Interceptor- At 1,470 fps, it is 220 fps faster than standard 40gr. It's almost into the hyper velocity category!	40gr	50 rnds	\$5.69	\$54.90

By placing an order with E. Arthur Brown Company, Inc (EABCO) I certify that I understand that EABCO does not warrant that I may legally purchase or possess air guns, muzzleloading firearms, knives, or ammunition. In accordance with Federal, State, and Local laws, I have determined the items I'm purchasing are not prohibited in my jurisdiction, I certify that I am an adult and under no legal disability to make this purchase. And, I accept responsibility for safety for any and all items I purchase from E. Arthur Brown Company

**Returns** - Manufacturers do not allow us to offer free trials. Any purchase that you've mounted, installed, used, damaged, scratched, or soiled in any way is not returnable to EABCO for refund. Ammunition, ammunition components, gun stocks, and scopes that have been mounted are non-returnable for any reason. Do Not Send Defective Scopes to EABCO. Scope warrantee service is performed by the scope manufacturer.

**10 Day Examination Period (no use or installation)** - We want you to be happy with your purchase... If, within 10 days of receiving a non-custom catalog item you decide not to keep it, you can return it for a refund or credit of the purchase price less shipping. All returns must be in brand new, unblemished condition with original packaging and documentation. Sales are final after the 10 day period. All returns must have a RMA #, please call 320-834-3000 to get RMA #. Non-Catalog Items ordered especially for you are not returnable.

**Catalog Items Which Included Free Installation** - Items which have been permanently modified by being installed are not returnable.

**Custom Work** - Guns, barrels, finishing, engraving, or other custom shop work which has been specially ordered by you and made especially for you are guaranteed to function properly and have accuracy for one year (12 months) beginning at the shipping date. Prices do not include working up accurate handloads, teaching proper handload procedures, or test firing groups at the shooting range. If you require Accuracy Proof Testing, we can provide this service at a charge of \$65 per hour. For a period of one (1) year after the shipping date, EABCO will replace or repair defective custom work at no charge. You pay only the shipping costs. This excludes damage caused by rough handling or misuse. Modifications done by non-EABCO gunsmiths will void this guarantee. Repairs to items modified by non-EABCO gunsmiths will be performed at our regular \$65/hour shop rate.

**EABCO Shipping**  
**Handguns Minimum \$60**  
**Rifles & Barreled Actions Minimum \$25**  
**Shipping charges depend on your zip code and package weight. Please call for accurate shipping options.**  
**Shipping to Continental USA**  
**Ask us for Shipping to AK & HI**

**Questions or Order Inquiries:**  
**Call 320-834-3000**  
**Email: [status@eabco.com](mailto:status@eabco.com)**

**Office hours: 8:30-5:00 CST - Monday-Friday.**

**Ordering Guns** - New gun orders must be shipped to a Federal Firearms Licensed dealer (FFL). You can place the order directly with us and pay us directly, but it will be shipped to an FFL. If your dealer would prefer to place the order and pay directly, you can still talk to us directly to get all of the details straight before sending in your order.

**Sending In Guns for Upgrade or Service** - You can send your gun directly to us for upgrade or service and we can ship it directly back to you. Insure it for replacement cost. **Handguns require Next Day Air Shipping.** Deactivated handguns such as Contender or Encore frames with no barrel or Ruger Single Action revolvers with no cylinder can be shipped by ground.

**Barrels** - You can order barrels directly without an FFL and you can ship them in for custom work directly without an FFL. Insure for replacement cost.

# BROWN 97D RIFLESCOPE

4-12x40mm Parallax Adjustable

### Recommended Accessories

- 021-7072 Lens Pen Cleaning System Black \$8.95
- 127-P97M Polarized Lens Filter \$24.95
- 200-FE20 Flip-Open Lens Cover #20 \$7.50
- 200-F034 Flip-Open Lens Cover #34 \$7.50
- 23-10042 1" Keylock™ Rings \$24.95

The Brown 4-12x40mm 97D Rifle Scope has been years in development... See the complete story at [www.eabco.com](http://www.eabco.com). We believe that 4-12x40mm PA is the Ultimate Rifleman's Optic. This is because 4-12x40mm variable magnification is not over powered for close-in woods hunting, yet offers more than enough magnification and brightness for open range hunting. It makes for a reasonable size and weight (comparable to the very common 3-9x scopes). And the 4-12x40mm Parallax Adjustment (PA) can dial out optical aiming error the same as large, high powered benchrest competition scopes. For more technical information on riflescopes, see our Free Rifle Scope Report at [www.eabco.com](http://www.eabco.com).

**Basic Qualities** - The Brown 97D 4-12x40mm Rifle Scope is strong on basics... Top quality crystal glass lenses, 100% fully multi-coated inside and out to give the clearest, brightest, edge-to-edge distortion free image. Dead-Nutz repeatable and positive "click" windage and elevation adjustments of 1/4 inch per click. Universally popular and reliable Medium Fine Plex style reticle, fog-proof, waterproof, and shockproof... and backed by our Limited Lifetime Warranty!

**Premium Qualities** - We added low profile target knobs with screw-on covers to allow accurate, fingertip adjustments in the field or at the range. We added a Fast Focus eyepiece so you can keep your reticle focused crystal clear by just turning the eyepiece. And, we are throwing in a FREE 3" screw-on sunshade to reduce glare and glint. Free Shipping!

# APV RIFLESOPES

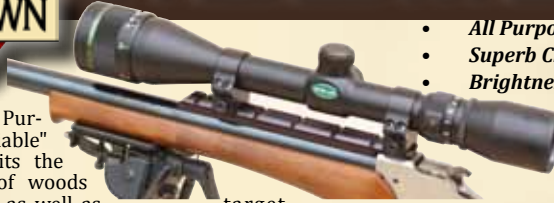

**MUELLER**

- All Purpose Variable
- Superb Clarity
- Brightness & Repeatability

**FREE SUNSHADE!**

Mueller's "All Purpose Variable" (APV) riflescope fits the all-around needs of woods and plains hunters as well as target shooters. The 4.5-14X magnification suits almost all hunting situations. The adjustable 40mm objective dials out all parallax aiming error, and the 1/4 MOA windage and elevation adjustments have clean, definite, and repeatable click settings. Optically, the APV gives excellent edge-to-edge clarity and brightness because the glass is top quality and fully multi-coated throughout. The 40mm objective is perfect for light gathering in the 4.5-14X magnification range. And target shooters will appreciate the repeatability of the windage and elevation settings. Hunters will appreciate the consistent point of impact regardless of the magnification setting.

The Mueller APV features a medium fine plex style reticle to give fast target acquisition with fine detail aiming at the crosshair. Tactical Version has a mildot reticle. The parallax adjustment goes all the way down to 10 yards so you can use this scope at rimfire as well as centerfire distances. The one piece tube construction is nitrogen purged, waterproof, fogproof, and shockproof.

## MUELLER ILLUMINATING RED-DOT

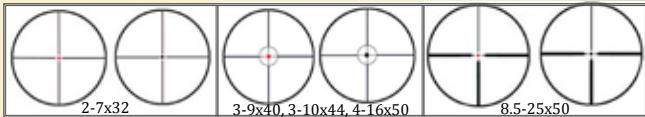

- ILLUMINATING RED DOTS
- SPEED FOCUS EYE PIECE
- GERMAN COATED LENS

Mueller may be the best high quality scope bargain, feature for feature, in the world. Optically, they're made with the best *Japanese glass, fully multi-coated with German lens coatings, and Lifetime Warranty.* But the feature they're most famous for are their unique reticles with Illuminated Red Dots. Pictured below, the dots are red when illuminated and black when the illumination is turned off. The crosshairs are always black.

Functionally, the Mueller has very fine adjustments with repeatable clicks and comes with dust covered target knobs. The 2-7X model features a circle dot reticle with the circle covering 15" at 40 yards and the dot covering an inch at 100 yards. The 3-9X, 4-10X, and 4-16X models have a German #4 post reticle with light 1/8th MOA center dot. The 8.5-25X model has a very fine target style crosshairs with a 1/16th MOA center dot.

Item Number	Description	Dot Size 100 Yds	Adj. Per Click	FOV 100 yds	Brightness Settings	Length (in.)	Weight (oz)	Eye Relief	Price

### 029-T41650 Mueller 4-16x50 AO Tactical Mildot \$219

Based on the proven optics of the Mueller 4-16x50mm scope, this model has a true Mildot range-finding reticle with illumination capability. Use the Mildots to determine the distance to your target without moving your eye from your sight picture. The center crosshair illuminates for low light use. Comes with free sunshade.

### 029-T852544 Mueller 8.5-25x44 AO Tactical Mildot \$164

Superb glass and coatings inherent to Mueller riflescopes. Mildot Range Finding Reticle - A well proven range finding device that lets you accurately estimate distances while aiming through your rifle scope... never take your eye off the game you're aiming at. Low Range Adjustable Objective allows you to dial out parallax error not only for long range shots but also close up. It's adjustable from 15 yards to infinity... making this scope equally superb for rimfire 22 as well as long range centerfire rifle shooting. Comes with free sunshade.

# JPOINT RED-DOT SIGHT, MOUNTS & ACCESSORIES

Less than an inch high and barely 1 inch wide by 1.6 inch long, these amazing JPoint sights provide a bright, red dot aiming system that's as accurate as it is small. Improved electronics and optics result in a brighter, clearer dot. Very tough... Proven in combat by soldiers in Iraq and Afghanistan!

The JPoint sight adjusts for windage and elevation with an advanced, two-screw system. It's powered by the widely available CR2032 battery. Mount the JPoint to your firearm with one of several available mounting adaptors listed here.

# BUSHNELL SCOPES

Bushnell's Trophy XLT line of rifle and pistol scopes are a terrific value. Fully multicoated X-tra Light Transmission (XLT) optics give 91% light transmission for the low light dusk and dawn shooting opportunities you don't want to miss.

Building on the original Trophy design, the Trophy XLT's have extremely rigid, one-piece tube construction that integrates the turret saddle for strength and rigidity. These scopes are tough and the adjustments are repeatable:

**Fully multicoated optics • 91% light transmission • Free BC Lens Covers • 100% waterproof, fogproof, and shockproof • Dry Nitrogen filled • Fast Focus Eyepiece • One piece tube construction • 1/4 MOA fingertip windage and elevation adjustments.**

**DOA™ 250 Muzzle Loading Reticle - This Trophy XLT scope is equipped with the Bushnell DOA 250 style ballistic reticle... Design especially for muzzle loaders**

**203-733960BP Trophy XLT 3-9x40 250 DOA™ Muzzle Loading Riflescope \$149**

**203-734120 Bushnell XLT 4-12x40 Multi-X Riflescope \$165**

**203-734120B Bushnell Trophy XLT 4-12x40 600 DOA Centerfire Riflescope \$195**

## **MULTI-X RETICLE-- 91% LIGHT TRANSMISSION -- FLIP OPEN CAPS INCLUDED**

**Superb Eye Relief-** The Bushnell 2-6X variables give the full scope field of view at full arm extension... even at the maximum 6X setting! 2X eye relief is also superb.

**Zero-Able Adjustments -** 1/4 MOA click adjustments with finger tabs that can be zeroed. Fully sealed so you can leave the caps off and make adjustments with your fingers.

**Other Features -** Coated, sealed, fogproof and comes with Butler Creek Flip-Open covers. Limited Lifetime Warranty.

**203-732633 Trophy XLT 2-6X32mm Handgun Scope Matte \$187**

**203-732633S Trophy XLT 2-6X32mm Handgun Scope Silver \$187**

## Steel Scope Mounts with Alignment, Rigidity, and Strength...

### WARNE RINGS

**Warne Rings:** Quick Detach and Standard, both styles have a straight and rigid design. QDs keep zero mounted on/off. Tactical rings are made to 1913 mil-spec Picatinny (Weaver Style) dimensions. They feature a stainless steel recoil lug, three torx style fasteners on top and a multi-tool clamping nut that works with a 65 in/lb torque wrench but, also fits a slotted screw driver, wrench, or pliers in an emergency. The Quick Detach system always returns to zero when removed and re-installed. Available in 1" or 30mm.

QUICK-DETACH

**Alignment** - Manufactured by a well-proven and consistent forming process, Warne rings and bases are exactly the same from one production run to the next. Proper alignment is natural when parts are identical. And it results in less scope tension and better shooting accuracy.

**Rigidity** - The design, material, and mass of Warne mounts combine to make a mount that's as close to zero flex as is scientifically possible. This rigidity protects your scope while it enhances your shooting.

**Strength** - Four screws and a wide surface area hold your scope into each Warne ring. Also on each ring, there's a stainless steel recoil key that fits (like a glove) into a slot on the mounting base. Finally, the base(s) are mounted with tempered steel Torx® screws. Warne mounts are STRONG.

# E. Arthur Brown Company's custom

## KEYLOCK™ MAGNUM SCOPE MOUNTS

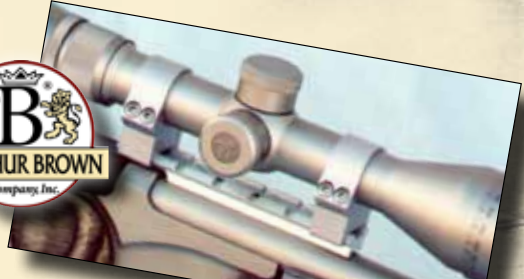

### Basic Fundamentals of our Custom Keylock™ Magnum Scope Mounts...

1. **A Scope Mount MUST be straight.** We do a lot of 3-Ring installs and out-of-line rings really show up under those circumstances. Experience has shown us that extruded rings and bases offer the straightest scope mounting solution. Extruded parts come out of the same die and they can't help but be in-line with each other. Our preferred rings, Keylock™ are extruded for straightness.

2. **A Scope Base MUST be rigid.** A base that shifts is not only bad for accuracy, but it is also bad for your scope. Our bases attach with SIX SCREWS (TC Contender, Encore, BF and M97D). They do not flex, shift or come off. Installation (drill and tap, Loctite) is free if you send in your barrel or gun with your complete scope mount order.

3. **Scope Rings MUST hold tight.** Our Keylock™ rings have an over-round ring top that cinches tight around the full circumference of the scope tube with FOUR screws per ring top. The rings clamp firmly to the scope base with oversized allen screws and a steel slot based locking bolt. Two Keylock™ Rings will hold a scope better than 3-4 conventional rings!

4. **A Scope Should Be Well Supported.** Optics should not be flex stressed. An extra long rifle scope may leave long sections of scope tube unsupported during recoil. A hunting handgun can slam terrific recoil into a pistol scope. In both cases, the addition of a 3rd ring to the mounting gives better support to your scope and enhances scope life and accuracy.

Black	Silver	Type	Fits	Price
127-504	127-504S	2 Ring	Contender/BF/97D	\$60

## RUGER #1 SLIP OVER™ SCOPE MOUNT

### Slip-Over Scope Mount for Ruger #1 Weaver/Picatinny Style Base Slips Over Ruger No. 1 Rib

Our new "Slip-Over" Ruger #1 scope mount solves the problem of aligning an after market scope base on a contoured barrel... It uses the factory pre-aligned rib as an alignment shim! Now you can have a precisely aligned Weaver/Picatinny style scope base on your Ruger Number One!

**Installation is Easy** - Remove the screws from the original rib. It will stay in place with the recoil pins. Slip the Slip-Over Mount onto the rib. Install our replacement allen head screws. Getting an aftermarket scope mount to align properly when mounted on a contour barrel has always been a challenge. Every one of them is a potential hand fitting job... But not with the Slip-Over! The machining is precise. The craftsmanship and finish are exceptional. And, the design is ingenious.

127-816 Ruger #1 Slip-Over™ Scope Mount- Weaver/Picatinny Style \$59

### Hicks #1 Accurizer

This original design is now manufactured by EABCO. The Hicks Accurizer installs on the Forend/Mainspring hanger and adjusts tension against the barrel. This allows the shooter to fine tune the barrel harmonics of any Ruger #1 and find the accuracy sweet spot.

Results can be dramatic depending upon the pre-existing harmonics and accuracy potential of your particular gun. Installation requires inletting space in the forend. You can do it yourself carefully with a Dremel and sanding drum (instructions are included). However, we offer this service for only \$65 when you send in your rifle with your order.

127-701 Hicks #1 Accurizer \$59.95

127-702 Installation of Hicks Accurizer \$65

### Moulds #1 & #3 Speed Lock Hammer

Trigger control and fast lock time are two huge components of accurate shooting. Replace your heavy, slow factory hammer with a Moulds Speed Hammer or Competition Hammer. Moulds Speed Lock Hammer approx. weight 400 grains. Competition Hammer weighs approx. 330 grains. Improves accuracy and minimizes vibration. Features a red "cocked" indicator. Gunsmith installation recommended. Fits Ruger #1 & #3 only.

578-103 Moulds #1, #3 Speed Lock Hammer \$59

127-703 Installation charge on Moulds#1 \$65

### Kepplinger #1 Set Trigger

A nice, light "Set" trigger and standard hunting trigger all in one. The "Set" position occurs by pushing the trigger forward. Pull weight from the "Set" position is screw adjustable from 1-3 lbs. Pull weight from unset position depends on original sear/hammer relationship. No machining is required. Beautifully crafted and finished in Austria.

495-001 Kepplinger #1 Set Trigger \$249

127-704 Install Kepplinger (reg. \$50) \$40

# Cases & Holsters

## Scopetector® II Gun Cases

Excellent Camo Rifle & Shotgun Scopetector® II Gun Cases actually fit! Fits rifles up to 46".

### A. 200-40746 Scopetector II Rifle Case Blk/Realtree AP \$49 (above)

Built in pocket, EVA foam reinforcement, LED light, muzzle guard tip, EVA riveted comfort handles, floats gun 12+ lbs.

### B. 131-20652 Shotgun Mossy Oak Case \$49

## Bandolier Scoped Handgun

Holsters are designed to be worn cross-draw style. Holster comes with a padded shoulder strap and additional waist belt. Bandoliers come with a removable flap... you can use it or remove it to suit your needs. Available in black (shown) or camo. Other sizes available online at [www.eabco.com](http://www.eabco.com).

#13 - Scoped 14-16 inch barrel single shots (T/C and BF), 10 inch barrel XP-100, and 9½-10¾ in barrel single and DA revolvers.

200-94136 Bandolier #13 RH Camo \$49.95

200-95131 Bandolier #13 RH Black \$49.95

See other sizes online at [eabco.com](http://eabco.com)

## Cordura Holster

Designed for large pistols like the Contender and Encore®. Construction consists of thick waterproof foam padding, sandwiched between an outer shell of Cordura Nylon and an inner shell of nonabrasive nylon. Cordura Nylon is ten times more scuff resistant than leather. Open top style, may be worn as shoulder holsters or on the belt. Right hand only.

207-9544 Fits 12-15" Contdr or Encore w/ Iron Sights \$62

207-9546 Fits 12 -15" Contender or Encore w/ Scope \$62

### A. 207-7472 Standard 15" Pistol Case \$34.95

Holds scoped pistol plus additional pocket for scoped pistol barrel. TC logo. Green with black accent.

### C. 207-7404 Attache Pistol Case \$46

Holds a scoped pistol and has two pockets to hold additional scoped pistol barrels. Fits Thompson Center pistol barrels 10-16 1/4". Embellished with TC logo. Green.

### D. 207-7481 Pistol Case w/Extra Pouch \$50

Specifically designed to fit the Encore® handgun with scope. Side pouch holds one extra scoped pistol barrel. Embellished with TC logo. Black.

### E. 207-7478 Rifle Case w. Extra Barrel Pouch \$61

### F. 207-7412 Rifle Barrel Accessory Case \$35

Encore® Rifle Case w/ Extra Barrel Pouch is a full length soft case to accommodate the TC Encore® rifle with our without scope. Side pouch holds one extra Encore® barrel scoped or not. Great for taking your Encore® system to the range or the next big hunt! Rugged construction and thoroughly padded to provide excellent protection. Embellished with the Thompson Center logo. Black.

# BIPODS & ACCESSORIES

## HARRIS BIPOD SYSTEM

**The Original bipod System designed for a totally solid hold.** The Harris Bipod system goes with you and is ready for action when you are. It attaches to your forend using a swivel stud (you can still use your sling). Once attached, the bipod folds out of the way for easy carrying or transport. Just unfold it when you're ready to use it. The legs extend to various lengths independently to accommodate uneven terrain and establish a comfortable, level hold.

**Available in Original and Swivel** (tilts side to side to eliminate canting) to fit you perfectly. The Swivel model has adjustable friction to stay where you tilt it.

**Also available with notches** (designated stopping points along the legs to lock into position). The 6-9" BR models are popular with single shot handguns and bench level rifle shooters. **The 9-13" models are the overall most popular hunting rifle models.** "H" Model has two-piece extendable legs, like shorter models. The "25" Models have three-piece telescoping legs.

Model 97D Rifle, p. 4-5, Harris Bipod

## Bipod Pod-Loc & S-Lever™

REPLACE THE FRICTION TENSION KNOB FOR BETTER CONTROL AND LEVERAGE

The Harris "S", and Caldwell XLA pivot type bipods allow you to tilt or cant your rifle side to side to level your crosshairs. It's a great system. However, the friction tensioning knob is hard to adjust with your fingers. The Pod-Loc™ Tension Lever and the "S"-Lever™ replaces the friction tension knob to give you much better control and leverage. Pictured right is the standard Harris S-type bipod.

The Pod-Loc™ and "S" Lever™ can also be released and re-positioned after you've adjusted it. The Pod-Loc™ installs easily on all "S" type Harris bipods (sorry it does NOT fit our clone bipods). The "S"-Lever™ #920 fits Harris and Caldwell XLA swivel models. Easy to Install - Photo instructions are included.

**127-920 "S" Lever™ for Harris "S" Type & Caldwell XLA Pivot models \$12.95**

**012-001 Pod-Loc™ Tension Lever for Harris "S" Type \$24**

**012-001P Pod-Loc™ Tension Lever \$20 (when ordered with any Harris bipod!)**

## Scope-EZE Cheek Rest

Buttstocks that were originally supplied with iron sight guns often are too low where your cheek rests to allow proper alignment of your eye to your scope. And often, even cheek rest equipped stocks don't position the eye just right for every shape and size of the human face. Our new Scope-EZE cheek rests come in heights from 1/4 inch to 1-1/8th inch. Made from extra dense polymer foam rubber with a peel-off adhesive backing that creates a permanent installation. Make that stock work with your new scope!

**204-750 Scope-EZE 1/4-3/4" Taper \$35**

**204-900 Scope-EZE 5/8ths-1" Taper \$37**

**204-925 Scope-EZE 7/8ths-1-1/4th" Taper \$42**

**204-950 Scope-EZE 1-1/8th-1-1/2" Taper \$47**

## Accu-Riser Cheek Rest

Standard Rifle Stocks are Cheeked for Iron Sites... Too Low for Scope Sighting

Strap or Screw-On Fit, Adjustable Height. Positions your aiming eye higher for alignment with scope sights. Molded hard rubber cheek rest with two risers, 1/2" and 1" in height. Finished in flexible walnut, camo, or black to match most stock finishes closely. Attaches with 2 screws or velcro strap.

**114-6000B Black \$29**

**114-6000W Walnut \$29 114-6000C Camo \$29**

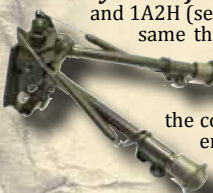

Item Number	Length	Pivot	Notches	Price
201-247142	6-9"	Pivot	Notches	\$47
201-379852	6-9"	Fixed	Notches	\$34
201-571429	9-13"	Pivot	Notches	\$49
201-403215	9-13"	Fixed	Notches	\$37
201-701417	13-23"	Pivot	Notches	\$49
201-591336	13-23"	Fixed	Notches	\$39
201-335235	14-30"	Pivot/Tilt	No	\$59
201-457855	8.75-12"	Pivot/Tilt	No	\$42

Available with pivoting or fixed base. "Notched" legs snap lock at full length or can be locked at each notch position in between. Just like the original Harris bipods, these XLA bipods attach to the swivel stud on your forend. \*Compatible with S-Lever #127-920. The Prone (8.75-12") & Sitting (14-30") Model Bipods feature adjustable height, 18 degree adjustable tilt and 20 degree swivel left or right.

**Champion bipods look and function almost identically to the famous Harris Bipod models.**

1A2L and 1A2H (see Harris Bipods). The metal looks the same thickness. They weigh the same. They fold out of the way the same. The legs adjust and lock their length the same. There are some differences in the cosmetics of the screw heads, but otherwise they seem like the same thing.

Item Number	Length	Pivot / Swivel	Notches	Price
103-40855S	6-9"	Pivot	No	\$49
103-40854	6-9"	Fixed	No	\$39
103-40853	9-13"	Fixed	No	\$39
103-40856S	9-13"	Pivot	No	\$49
103-40852	13.5-23	Fixed	No	\$39
103-40857S	13.5-23	Pivot	No	\$49

**Adjustable Butt-Pods**

**720-ABP Original Adjustable Butt-Pod \$49**

Attaches to your rear swivel and screws up and down to adjust elevation while shooting from a bipod. The adjustment is so fine and rock solid! Watch your crosshairs move onto the target as you screw the Butt-Pod up or down. This will spoil you!

**720-BT04 Locking Adjustable Butt-Pod \$64**

Just like the original, but the locking allows you to set the tension of the adjustment, giving an even steadier hold.

**720-BT04QK Quick-Knob Adjustable Butt-Pod \$87**

Our most popular model, the quick-knob adjustable butt-pod but features a disengage button to quickly slide up and down the threads for rough positioning, re-engage the threads for fine positioning. Very quick and convenient.

**Do not have a SWIVEL STUD? You may need a bipod adaptor...**

If you have a standard swivel stud on a forend, all of the bipods should attach with no additional hardware. Below are adaptors for special situations.

- 721-2- Flat Flange Adaptor \$7.95**- Allows mounting on hollow plastic forends. Works on Endeavor/Pro Hunter XT & Pro Hunter
- 721-2A- Round Flange Adaptor \$7.95** - works well on Ruger M77 RP MK II plastic stock and others.
- 721-2R- Radiused Flange BP Adaptor \$7.95** - Allows mounting on wood forends under tubular magazines or gas tubes.
- 721-3- Remington 4, 74, 7400 Adaptor \$16.95** - Fits Remington semi-auto models 4, 74, and 7400 and provides mounting stud for Bipod.
- 721-4- Universal Barrel Clamp \$19.95** - Clamps to rifle barrels up to .812" dia and provides mounting stud for bipod.
- 721-5- AR15 Adaptor \$9.95** - Fits Colt AR15 round handguard without alteration. Provides mounting stud for bipod.
- 721-6- European Rail Adaptor \$7.95**- For European sized (~3/8") rail.
- 721-6A- USA Rail Adaptor \$7.95** - For USA sized (~5/16") rail.
- 721-7A- Angled Shim Spacer \$3.95**- For thin forends and schnabels.
- 721-8- Remington XP 100 Stud \$7.95** - For plastic stocks. Includes 7A spacer. Requires drilling. (not pictured)
- 721-9- Flat Bottom Adaptor \$22** - Allows mounting Harris bipod to most flat bottom forends.
- 721-14- Ruger Mini 14 Adaptor \$19.95** - Fits Mini 30 and Mini 14 standard and ranch but not series 180 or folding stock version. Provides mounting stud for bipod.
- 719-M4BP Forend Harris BP Adaptor \$34**- M4 military rifle, AR15 style.

# Original BULLS BAG shooting Rest

Shooting well from a sand bag rest isn't as easy as it's cracked up to be. There's always an element of shooter induced tension as you pull or push to get the crosshairs on the bullseye. You don't realize it until you shoot and the recoil moves your hold in whatever direction you were applying tension. The Bulls Bag Shooting Rest solves this dilemma.

**Here's How it Works:** Four tubes filled with sand, connected in the middle lengthwise. You cradle your rifle or single shot hand-gun between the top two tubes and then spread the bottom two tubes. This squeezes the top two bags against your gun. The benefit is a weight transfer to your gun, deadening recoil. Your hold is steadied. Groups are tighter. Shots are more accurate.

**Pro-Series Model:** Gives a higher gun rest position with longer legs (lower bags) for more squeezing leverage.

**Bulls Bags are made of Cordura with a Suede lined gun bed. All bags (excluding tan/suede) come with strap.**

950-1701

950-1501

950-16012

The 16000 Series Field bags are made with an exclusive no-slip, rubberized rest material that holds guns firmly in place without damaging finishes. The "Squeeze-Rest" action of a Bulls Bag actually transfers the bag weight to your firearm... Guns hold still during aiming and firing...

Enhancing accuracy and reducing recoil!

Uncle Bud's Bulls Bags are shipped UNFILLED... Large, oversized fill spouts accept many types of fill material. We recommend clean sand because it is heavy and gives the full Bulls Bag advantage of weight-to-gun transfer. But, you can fill your Bulls Bag with lighter material like rice, bird seed, millet, etc... To make it easier to carry in the field. All Bulls Bags are made to the same design of the original Uncle Bud's Bulls Bags... Made by Uncle Bud's.

- 950-1001 Field Bulls Bag 9.5" Tan/Suede \$41
- 950-1501 Field Bulls Bag 9.5" Camo/Suede \$48
- 950-1701 Field Bulls Bag 9.5" Black/Suede \$48
- 950-1005 Bench Bulls Bag 15.5" Tan/Suede \$48
- 950-1505 Bench Bulls Bag 15.5" Camo/Suede \$58
- 950-1705 Bench Bulls Bag 15.5" Black/Suede \$56
- 950-1801 Pro-Series Bulls Bag Camo/Suede \$69
- 950-16012 10" Field Bulls Bag Black \$29
- 950-16014 10" Field Bulls Bag Camo \$29
- 950-16022 15" Bench Bulls Bag Blck \$39
- 950-16024 15" Bench Bulls Bag Camo \$39

**\*\*Bags shipped without sand for shipping economy.**

# BARNES®

## OPTIMIZED FOR YOUR TARGET™

Barnes Triple Shock Copper X-Bullets Barnes Bullets are most famous for their solid copper "X-Bullets" that ultimately became refined into the modern "TSX"... Triple Shock X-Bullets. These bullets are widely known for their accuracy, consistent expansion on impact, and solid, weight retention...

(There can be no jacket separation when there is no jacket to separate). The "Triple Shock" name refers to the

grooves that are cut into the bearing surface... These are not crimping cannellures but rather an essential part of the all-copper design that reduces barrel fouling, reduces pressure, and enhances accuracy.

In more recent years, Barnes has developed a long range version of the Triple Shock by incorporating a streamlined polymer tip over the hollow point. These "Tipped Triple Shock" X-Bullets (TTSX) have a boosted Ballistic Coefficient that improves performance at extreme distances... A flatter trajectory for shots beyond 500 yards.

Complete penetration and razor sharp expansion combine to make the TSX and TTSX bullets deadly effective on game. (Watch the Video online and You'll Be Amazed...)

Barnes Varmint Grenades Bullets Barnes research into frangible bullets for police and military applications resulted in the technology they now use to produce the wildly popular Varmint Grenade Bullets. These bullets combine a composite frangible core with a hollow cavity and consistent copper jacket...

*The result is a very accurate bullet that pretty much disintegrates inside predators, minimizing pelt damage.*

### Barnes Reloading Manual #4

Barnes All-Copper TSX-Bullets have some unique hand loading characteristics. And, you can skip a lot of trial and error by reading about them in this excellent Barnes-Specific Reloading Manual.

315-BRM4 Barnes Reloading Manual #4 \$29.95

### Barnes CR-10 Copper Remover & Bore Cleaner

Barnes' specially formulated CR-10 bore cleaning solvent effectively removes copper and powder fouling. This aggressive bore cleaner quickly loosens and lifts heavy copper deposits left by jacketed bullets as they pass through the bore. Leaves rifling clean for better accuracy and longer barrel life. CR-10 bore cleaner is non-corrosive and won't harm barrels.

315-CR10 Copper Remover/Bore Cleaner 8oz. \$9.99  
315-CR2 Copper Remover/Bore Cleaner 2oz. \$2.95

# Match-Grade Brass

Made from the finest raw materials formulated by the World's top brass mills, Lapua brass features just the right hardness, firmness, and molecular grain structure for optimum performance. By combining this material with tight dimensional tolerances and uniform case volumes, Lapua has won over the confidence of World Champion shooters. At the American Bench Rest Championships, 17 of the 20 top 13.5 Class shooters used Lapua brass. And, the top twenty 10.5 class shooters shot Lapua brass unanimously! (Note: This is Cartridge Brass - Not Loaded Ammo)

# Scenar Bullets

Holder of the still unbeaten, still unmatched World Record perfect score of 600 points out of 600 points in HUIT competition, the Lapua "Scenar" bullet is an extreme accuracy bullet at an affordable EABCO price. These bullets commonly shoot 5-shot groups as small as 1/2" at 300 meters... Excellent for Target and Varmint!

**Consistency and Efficiency.** The two main things that contribute to the accuracy of a bullet. Lapua Scenars are subject to quality control standards that insure uniformity of wall thickness and core integrity as well as bullet to bullet weight. This means they launch at more consistent velocities and are well balanced for the high velocity spin they'll take on from the rifling. The boat tail, long bearing surface, gentle ogive, and hollow point produce extremely good flying efficiency... Lapua Scenar bullets have high ballistic coefficients so they'll fly further and flatter than less efficient bullet designs. See below for BCs and Recommended Twist Rates!

Long range 6mm Scenars in 90 and 105 grain have astounding ballistic coefficients of .420 and .530! Try the 90 gr. in any 6mm/.243 with a 1:10 rifling twist (SAAMI for .243 Winchester is 1:10). Try the 105 gr in any 6mm/.243 with a 1:8 rifling twist (EABCO Standard .243 Encore Accuracy Barrel has a 1:8 twist!)

Order VihtaVuori Powder Online at [www.eabco.com](http://www.eabco.com) or call 800-950-9088

We ship your VihtaVuori powder order direct from the main warehouse in Wisconsin. Powder orders are usually shipped within 7-10 days of receiving your order. Call or see web for more details.

Orders must be placed for 6 lbs. or more in 2 lb. increments (6, 8, 10 lbs, etc). Feel free to mix powder types to achieve these minimums.

# Lapua Rifle Ammo

Centerfire Ammunition at Excellent Prices

Lapua Ammunition is made from Lapua components. That's the first reason why it is so accurate. The second reason is because Lapua is so good at manufacturing. We've been supplying Lapua brass, Lapua bullets, and VihtaVuori powder to accuracy loving handloaders for years. Now this accuracy potential is available to non-handloaders.

This Lapua factory manufactured ammunition is actually used by competitors to win major championships. That's a pretty huge endorsement because those champions want to win... And they usually won't trust anything but their own hand loads. You can read more about Lapua ammunition in the 13 page Lapua Ammo PDF online at [www.eabco.com](http://www.eabco.com).

**Attention: Please check your local and state laws before ordering ammunition. Federal law requires that you be at least 21 years of age to purchase Handgun and Rifle Ammunition. For Safety reasons ammunition is Not Returnable.**

## Managed Recoil

Remington's "Managed Recoil" ammunition has been selling so well that Federal has jumped on the bandwagon with their own "Fusion Lite" ammo line. The success of this approach is not surprising to us at EABCO because we've been encouraging mild recoil ammo for years. Why? **Accurate shot placement is more deadly than magnum velocity!** A cartridge that you are comfortable shooting is a cartridge you will enjoy shooting and practicing with... you'll make great shots with it.

What about trajectory? The truth is, pretty much any bottle necked cartridge with a pointed bullet can place shots accurately at 250-300 yards. Even flat or round noses are often good to 200yds and beyond.

### Remington Managed Recoil

# BERGER BULLETS

Berger Bullets are not just for competition target shooters. They make Match Grade bullets for hunters and varmint shooters too. The secret to Berger Bullets accuracy is the exclusive J4 bullet jacket. These jackets have a wall thickness that's consistent to within .0003"... That's 3/10,000ths of an inch. This is a big part of Berger Bullets overall consistency and why they're able to achieve "Match Grade" accuracy from hunting and varmint bullets as well as target bullets. Another term you'll see here is "VLD". VLD means Very Low Drag... Bullets with high ballistic coefficient so they will fly with flatter trajectory and less wind deflection (see the videos- [www.eabco.com](http://www.eabco.com)).

### Berger Match Hunting Bullets Boxes of 100

Number	Description	Price
208-24527	Hunting .243/6mm 95 gr VLD	\$31
208-24528	Hunting .243/6mm 105 gr VLD	\$31

208-33106	Target .338 cal 300 gr Tactical Hybrid OTM	\$35

**Berger Match Varmint Bullets** - Designed specifically for the varmint hunter. The slightly larger opening in the nose allows the bullet to expand instantly creating the highest possible opportunity for an explosive, one shot kill. The J4 Precision Jacket that we use has a thinner wall at the nose to assist in rapid expansion while it also has a base that is thick enough for high velocity cartridges. Berger uses the same high-grade materials and techniques to make varmint bullets so you can expect the same tight groups you get from our target bullets.

**Berger Match Hunting Bullets** - The VLD design incorporates a sharp nose that allows the bullet to penetrate up to 3 inches before it starts to expand. This delayed expansion results in a wound channel that is deep inside the vital area of any big game. After the bullet starts to expand it will shed 80% to 90% of its weight into the surrounding tissue traveling as deep as 18 inches. This results in a massive wound cavity that creates the greatest possible amount of tissue damage and hemorrhaging within the vital area (organs). This massive and extensive wound cavity result in the animal dropping fast.

**Berger Match Target Bullets** - Actually, ALL Berger Bullets are Match Grade, which means that they use the highest quality copper and lead available. The copper is made into the J4 Precision Jacket, which is recognized around the world as the bullet jacket with the best concentricity available (see above). All J4 Precision Jackets and bullets are made on one set of dies to insure that all of the bullets in each box are as consistent as possible, BECAUSE...

**Consistency is the key to  
ULTIMATE Accuracy.**

# EABCO Brass, Ammo & Dies

**W**e got into making custom brass when we introduced the 7mm US cartridge. Since 7mm US is derived from the .219 Donaldson Wasp, it's only natural to also make the .219DW, 7-30 Waters and 30 Herrett. .375 Winchester we make up for our .375 Winchester Match as well as standard .375 Winchester guns. All of our brass is made from 30-30 Winchester bulk brass. It is formed and trimmed to length. You should expect to full length size it and some minor trimming might be in order. 7-30 and .375 and the BRMs are a little shorter than spec as we widen out

the original 30-30 enough that it draws brass from the length. But, they are completely functional and accurate at the length provided.

Bench Rest Magnum Brass and Dies - These cartridges were developed to give big game hunting performance to small frame firearms like the T/C Contender, EABCO BF Pistol, and EABCO Model 97D Rifle. The BR Magnum philosophy is described in detail in our free technical reports and page 4.

Also Bench Rest Magnum load data is available...

**127-650811 Loaded 6.5 BRM 140 gr. Ammo(20) \$39**

**127-650812 Loaded 6mm BRM 90 gr. Ammo (20) \$39**

**127-30H---30 Herrett Brass \$89/100** - Originally developed by Steve Herrett of Herretts Grips, the 30 Herrett is one of the first bottleneck hunting cartridges designed specifically for the short barrels of single shot handguns. Very efficient and accurate. Our brass is made from brand new Winchester 30-30 brass formed and shortened to 30 Herrett cartridge dimensions.

**127-219---.219 and 6mm Donaldson Wasp Brass \$89/100** - Originally derived from .219 Zipper, the .219 Donaldson Wasp was developed by Harvey Donaldson. It is often credited with being the "Godfather of Bench Rest Cartridges" because the case capacity and 30 degree shoulder have been carried over to the modern "BR" cartridges. Our brass is formed in four steps from brand new Remington 30-30 cases and then cut to length. This brass can also be formed into 6mm Wasp by full length sizing in a 6mm Wasp sizing die.

**6mm PPC and 22 PPC Brass** - (See Lapua brass) These two cartridges have dominated international bench rest shooting on brass formed from Lapua 220 Russian. Both 6mm and 22 PPC are made by full length sizing the Lapua 220 Russian brass in the 6 or 22 PPC sizing die. After that, you load and fire-form to fill out the shoulder of the case. Lapua is consistent brass that shoots accurately.

**127-730---7-30 Waters Brass \$89/100** - Originally developed (by Ken Waters) as a faster and flatter shooting flat nose cartridge for Winchester lever action rifles, the 7-30 Waters has gained wider popularity among handloaders who shoot spitzer bullets in single shots. Our 7-30 Waters is made from brand new Winchester 30-30 brass with a full body and the shoulder in the correct position.

**127-7US---7mm Ultimate Silhouette Brass \$89/100** - Originally developed as a rimmed handgun metallic silhouette cartridge for IHMSA competition in our BF Pistols. The 7mm US is the Bench Rest .219 Donaldson Wasp necked up to 7mm. Our 7mm US Brass is made from brand new 30-30 Winchester 30-30 brass. This brass can also be formed to 6.5mm US or 375 Herrett by just full length sizing in their respective sizing dies.

**127-375---375 Winchester Brass \$89/100** - Originally developed as a "Big Bore" cartridge for 30-30 style lever action rifles, the 375 Winchester has proven itself very versatile in single shot handguns and rifles. The availability of original ".375 Win" headstamped brass has been disappointing however. We make our 375 Winchester brass from readily available brand new Winchester 30-30 brass. Reload life depends on the pressure of your loads and the looseness of your chamber. Our BF Pistols and Model 97 Rifles are chambered to fit this brass and high performance rounds get plenty of reloads.

**127-650811---Loaded 6.5mm BRM 140 gr. Ammo \$39/20** - Custom loaded 6.5mm BRM ammo, 20 rounds in a re-usable plastic carrying case. EABCO Custom 6.5mm BRM Brass, loaded with VihtaVuori powder, Benchrest Primer, and Amax match grade hunting bullet. Yes... The best components yield the best accuracy. This ammunition fits and fires in the Model 97D Rifle as well as Custom TC Encore® Accuracy Barrels. Shoot all you want... We'll make more!

**127-650812---Loaded 6mm BRM 90 gr. Ammo \$39/20** - Custom loaded 6mm BRM ammo, 20 rounds in a re-usable plastic carrying case. EABCO Custom 6mm BRM Brass, loaded with VihtaVuori powder, Benchrest Primer, and Lapua Scenar match grade hunting bullet. Yes... The best components yield the best accuracy. This load went 4 for 4 on antelope from 200-400 yds in 2010. This ammunition fits and fires in the Model 97D Rifle as well as Custom TC Encore® Accuracy Barrels.

**Attention: Please check your local and state laws before ordering ammunition. Federal law requires that you be at least 21 years of age to purchase Handgun and Rifle Ammunition. For Safety reasons ammunition is Not Returnable.**

# Competition Dies

**Competition & Bushing Dies**- Premium Die Sets for those reloaders who want to select the neck diameter after sizing. Bushings are sold separately. Competition Bushings and Seating dies feature alignment sleeves and micrometer adjustment stems. Bushings are available to size necks from .185-.365" in .001" increments.

**Category I, II, III**- Category I is the most popular and Category III is least popular. Call for Category III listed calibers.

# FORSTER PRODUCTS

## Reloading Dies & Accessories

**Forster Bench Rest 2-Die Sets: Full Length Sizer and Straight Line Bench Rest Seater Dies**

Innovative advantages of Forster "Bench Rest" 2-Die sets produce the best "glove fit" ammo with the straightest possible bullet seating. The Forster Full Length Resizing Die has an E-Z Out expander ball that can be adjusted upward to just below the die neck. This gives superior mechanical advantage for the neck expansion stroke. This system also has a Co-Ax washer system to correct any misalignment and prevent the neck from being pulled off center.

The Forster Bench Rest seater die is specifically fit to the chamber. It fully aligns the bullet and the cartridge before the bullet is pressed into the cartridge neck. The alignment chamber fits the entire cartridge case... Forster was the first, and is still the best straight line Bench Rest seating die on the market.

**Straighter full length sizing and straighter bullet seating...  
These are the ingredients for loading accurate ammunition.**

### Forster's Original Case Trimmer and Trimmer Kit

The Original, Forster Case Trimmer works for most calibers with bullet diameters from .171" to .459". It is actually a fine miniature lathe with a superior shell holder design based on a Brown & Sharpe type collet. Collets #1 through #4 fit our Original Case Trimmer and hold the rims of most rifle and pistol calibers within that range.

The "Trimmer Kit" includes collets 1, 2 & 3 and pilots 22, 24, 25, 27, 28 & 30. The "Kit" is the most economical way to get into case trimming for most cartridges. Additional pilots and collets can be ordered separately.

## THE ROCK BENCHREST & BAGS

Pictured with medium bag (included), the Rock is of heavy, 5½ lbs of cast iron, steel, and aluminum construction and features level-able foot adjustments, a bubble level, extra wide (and stable) stance, wide, 1" diameter steel center post with adjustment wheel. There's even a forend stop for consistent repositioning of your rifle for each shot. The wide cradle accepts a variety of bags (sold below). Top quality features at a fair price! The rear bag positions your buttstock solidly while adjusting elevation by sliding it forward or back. The front bags fit the Rock™ cradle and come in three sizes for wide, medium, and narrow Sporter forends.

- 201-383774 The Rock Rest \$74 (free medium bag)
- 201-391981 Narrow Bag \$12
- 201-174122 Medium Bag \$12
- 201-489585 Wide Bag \$12
- 201-226645 Rear Bag \$22

Wide, Narrow, Medium

**032-902 Deluxe 3-Die Sets \$35/set-** These sets consist of a full length sizing die, the Lee Collet neck sizing die, a bullet seating die, and a free shell holder. Available for the following cartridges: 22 Hornet, 222 Remington, 223 Remington, 22/250, 220 Swift, 243 Winchester, 6.5X55 Swedish Mauser, 25/06, 270 Winchester, 7mm Rem Mag, 308 Winchester, 30/06, 300 Win Mag, 30/30 Winchester, 303 British

**032-901 Lee Precision Reloading Pacesetter Dies \$30-\$32/set**  
Excellent quality basic reloading die sets for hand loading most popular cartridges. Dies for the most popular cartridges include a Lee Factory Crimp Die along with a full length sizing die, bullet seater die, and shell holder... These are considered 3-Die Sets. Some

sets do not include a free Factory Crimp Die. Those are considered 2-die sets. The overall basic Pacesetter 2-die set includes a full length resizing die, a bullet seater die that also crimps, and a free shellholder.

**Call for caliber item number!**

032-901

## Accelerator Type Sabots for .30 Caliber Cartridges

Now you can handload your 30 caliber handgun or rifle to shoot hyper-velocity .224 caliber bullets! Fit the .224 bullets into our Sabots with the Sabot Bullet Seater die. Then load the sabots as you would any .308 caliber bullet. The Bullet seater die is required for consistent seating of bullets into the sabots... accuracy requires consistency! Shoot to 3,500 fps in a 30-30... 4,200 fps in a 30-06. Free Load Data included.

**Neck Flaring Die** - Protect the base of sabots when seating them into your case mouths... you'll get the best possible accuracy! Not required, but it makes it easier to seat your sabots without damaging bases. Order this flaring die separately below.

**077-SABKIT Sabot Loader's Starter Kit \$19.90 (Includes 100 sabots & bullet seater)**

077-90798 Sabot Neck Flaring Die \$14.95

077-SAB .224/.30 Sabots (100) \$9.95

## BERRY'S HIGH CAPACITY BRASS TUMBLERS & KITS

*Berry's Model 400 Vibratory Tumbler is similar to much more expensive industrial grade parts and deburring tumblers.* The shape and construction quality of the vortex bowl as well as the power and reliability of the electric motor... These are the parts that other 'Hobbyist Priced' tumblers simply can't match.

- 301-96555 Model 400 Tumbler \$49
- 301-439185 Brass Tumbler Kit #1 \$64
- 301-995454 Brass Tumbler Kit #2 \$79
- 301-547869 Rotary Sifter/Separator \$24
- 301-119282 Pan Sifter/Separator \$4.95
- 127-CCG Corn Cob Tumbling Media 6 lb \$12
- 301-356231 Brass Polish 8 oz \$8.95

**Kit #2 includes: Tumbler, Corn Cob Media, Brass Polish and Rotary Sifter/Separator.**

**Huge Tumbling Capacity** - The Berry's Model 400 tumbles up to 1,000 pieces of 9mm brass, 600 of 45 ACP, 450 of .223 Remington, & 250 of 30-06.

**Vortex Bowl Type Vibratory Tumblers** - A Vibratory Vortex bowl is quite an advancement over the old fashion "Tumblers" that simply rotated parts and media in a drum. These Berry's Vibratory Vortex Tumblers use both vibration and bowl shape to produce a cleaning action that both tumbles and vibrates at the same time. Looking into the bowl you see a whirling donut of corncob and brass. Old fashioned tumblers simply lift and drop the brass and media over and over. These vibratory vortex tumblers clean and polish much faster because of the dual action, faster rotation, and constant contact with corncob polishing media. **THREE YEAR WARRANTY** on tumbler motor.

**Kit #1 includes: Tumbler, Corn Cob Media, Brass Polish, Pan Sifter and Media Bucket.**

### Digital Reloading Scale

Our electronic scale weighs up to 1500 grains of powder or bullet weight and is accurate to .1 grain. It features a stainless steel weighing tray, a backlit digital display, and push button zeroing. We include anti-shock pad and four (4) free anti-static weighing dishes for gun powder. Scale measures 3" X 4¾" with the tray measuring 2½" X 3½". The stainless steel weighing tray has a spill-proof lip and is protected by a detachable hard cover. Shipped pre-calibrated, but we include a 50 gram calibration weight just in case. Scale weighs grains, grams, ounces, troy ounces, carats, pounds, and even pennyweights. Runs on three (3) AAA Batteries (Included) - No AC - 5 Year Warranty

**Includes:**

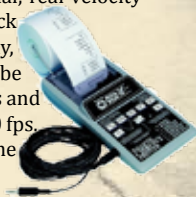

- 775 or 1500 grain scale
- Stainless weighing tray
- Detachable hard cover
- Four (4) anti-static weighing dishes
- Anti-shock pad
- 50 gram calibration weight
- 3 AAA Batteries

- 011-JSX Electronic Powder Scale 775 grain \$29
- 011-JS100X Electronic Powder Scale 1500 grain \$32

**The Chrony measures Bullet Velocity...** It's a simple number that opens up a world of possibilities for rifle shooters. Knowing your actual, real velocity lets you calculate your actual, real trajectory. Use your Chrony to check the consistency of hand loads and/or factory ammunition. (Usually, ammo with the most consistent velocity from one shot to the next will be the most accurate). The Shooting Chrony includes all of the electronics and sky screens for reading velocities from 30 feet per second (fps) to 7000 fps. Just set it up on a tripod or bench 10 feet in front of you and fire thru the center of the V rods and sky screens. Made of 20 gauge steel.

**Standard models:** Reads-out directly on the Chrony.

**Master models:** Reads-out onto a separate unit that sits with you on your shooting bench (see above). All models measure velocity equally well.

**F-1 and F-1 Master Chrony** - Gives numbered shot velocities, velocity stays on display until you shoot again, has a jack for the Chrony printer, and upgrades to any of the more sophisticated Chrony models. For using ballistic software like Sierra Infinity V & V6, all you need is to measure your velocity and average it out with a calculator. The F-1 is the simplest and least expensive chronograph that gets that job done.

**Alpha and Alpha Master Chrony** - All of the F-1 features PLUS 2-32 shot memory (one string). Alpha Chrony calculates high, low, average, extreme spread, and standard deviation. Retrieves and even edits individual shots and stats from memory.

**Beta and Beta Master Chrony** - All of the Alpha features PLUS 60 shot memory (6 strings) with stats for each string. Has retrievable memory after powering down. **\*We recommend you also buy Infinity V6 Ballistic Software (see page 75).**

**Chrony LED Lamp** - Use with all Chrony models for any light condition! Comes ready to use. Includes 16" Wire-Rods, 120/240 VAC adaptor. Optional battery pack sold separately.

**Indoor Light Fixture** - Use with all Chrony models. Plugs into 120v current. Comes ready to use with 6ft. cables, diffusers and wire rods.

- 221-TF1 Chrony F-1 Chronograph \$80
- 221-TF1M Chrony F-1 Master Chronograph \$99
- 221-TFA Chrony Alpha Chronograph \$99
- 221-TFAM Chrony Alpha Master Chronograph \$116
- 221-TFB Chrony Beta Chronograph \$107
- 221-TFBM Chrony Beta Master Chronograph \$128

- 221-CBP Chrony Ballistic Printer \$80
- 221-CCC Chrony Carrying Case (chrony only) \$29
- 221-CPC Chrony Printer & Chrony Carrying Case \$32
- 221-ILF Indoor Light Fixture \$46
- 221-LED Chrony LED Lamp \$99
- 221-BBP CLL Battery Pack for LED Lamp \$109
- 221-CBS Chrony Ballistics II Software \$63

**THE LEAD SLED DFT SHOOTING REST** combines recoil absorption with a steady rest and precision adjustments for windage and elevation. The dual trays are for sand or shot bags to add weight and mass to the rest. The rear Buttstock support transfers recoil to the heavy rest instead of your shoulder. The front bag incorporates wheel adjustable elevation with screw adjustable windage to get you exactly on target. And the dual frame (DFT) allows you to adjust the length of the rest to fit any rifle.

These stout bags are designed to be placed in the shot tray of your Lead Sled or Lead Sled DFT and conveniently hold a 25 lb bag of lead shot. The durable handles make toting lead shot to the range a snap!

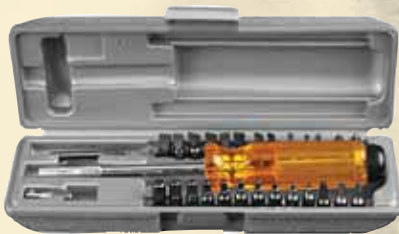

- 201-336647 Caldwell Lead Sled DFT Shooting Rest \$190
- 201-428334 Lead Shot Carrier Bag \$12
- 201-533117 Lead Shot Carrier 4-Pack \$30

## Gunsmith Screwdrivers

Wheeler Gunsmith Screwdrivers have bits made from S2 tool steel that's hardened to 56-58 Rockwell "C". This means they'll break before they'll bend, twist or round off. And, they're specially ground to fit gun screws properly. This means you can work on your guns without damaging or messing up your screw heads. Available in three different sets to suit the needs of tinkers, serious hobbyists, and professional smiths. These are fine tools you will be proud to own as well as use to work on your guns.

### **201-664507 Wheeler Space Saver Set \$14.00**

**26 Bits, Magnetic hollow handle to carry bits along. Bits Include:**

Phillips, hex, and torx bits, a 2" long #2 Phillips bit which is ideal for recoil pad installation, and a hex-to-square conversion bit which allows you to use 1/4" square drive sockets and other attachments.

### **201-776737 Wheeler Basic-72 Piece Set \$59.00**

Wheeler's engineers measured the screws on over one hundred modern and antique firearms to make sure that this set has bits for every situation.

Includes 54 Hollow-ground flat bits, two each of the very thinnest bits, which means you'll never be stuck in the middle of a job. There is a complete selection of Phillips, Allen, and Torx bits to cover scope rings, bases, recoil pads, etc. The bits range from .120"x.020" to .360"x.070". Also included, two handles made from comfortable overmolded plastic: regular & extra slim for those "close quarters". Set comes in durable custom box that's ready for the bench or your range kit.

### **201-562194 Wheeler Professional-89 Piece Set \$89.00**

**Everything in the 72-piece set PLUS these bits:** Weaver/Ruger Scope Ring Clamp Bit, Redfield Windage Screw Bit, Leupold Windage Screw Bit, Mauser Stock Bolt Bit, Millet Rear Sight Adjustment Bit, 1911 Grip Screw Bushing Driver, Ruger/Colt SA Base Pin Latch Nut Bit, M1/M14/M1A Rear Sight Bit, .062", .093" & .118" Pin Punch, Rem M870/1100/1187 Trigger Plate Pin Punch, 2 inch #2 Phillips Bit, Glock Replacement Front Sight Screw Bit, S&W Rebound Spring Compressor Tool.

## KA-BAR® USMC Fighting Knife

### **Original 12" Black Bladed US Marine Corp WWII Issue Knife**

These modern production KA-BAR® knives are made to the same specifications as the original. Blades are high carbon 1095 steel tempered to HRC 56-58 so they'll hold an edge while maintaining tensile strength. Handles are shaped from oval, stacked leather segments for a comfortable, non-slip grip. Pommels are made from a powdered metal process and hand guards are carbon steel. All of the metal surfaces are finished in powder coat matte black to give corrosion protection and eliminate glare.

**725-212178 Original USMC KA-BAR Knife \$59**

**725-212505 Mini KA-BAR Knife \$59**

## Stick-On Reading Bifocals

Add close focus reading lenses to your glasses and see clearly up close! Flexible lenses stick to eyeglasses, sunglasses, shooting glasses, safety glasses,... you name it! They're easily removable without damaging your eyeglass lenses. And you can position them wherever you want... even trim them to a special size or shape.

**Check online for availability and pricing!**

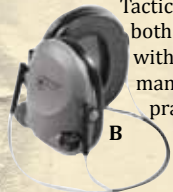

# Hearing and Vision Protectors

**A- 028-97044 Peltor Tactical 6 Muffs \$69 Sale Price \$59**

**B- 028-97043 Peltor Tactical 6 Behind-the-Head \$69 Sale Price \$59**

Each Ear has On/Off Volume Adjustment to Amplify Hearing while Blocking Noise! These Tactical 6 hearing protectors are uniquely designed to give shooters the best of both worlds: Protection from dangerous impulse noise such as gunfire, along with the distortion free amplification of low level sounds such as range commands and conversation... not to mention rattle snake noises (are you listening prairie dog hunters?). The electronics are designed to limit amplified sounds to 82dBA. Distortion-free amplification of low level sounds up to 19dB. Try the standard or the Behind-the-Head model! Requires 4AAA batteries (not included)

**C- 028-97070 Peltor Youth Muffs \$18.95**

The Junior earmuff is specifically designed for children, women and smaller head users. The smaller headband provides a better fit and thus more reliable attenuation. With liquid/gel filled cushions these are comfortable for extended wear.

**D- 028-97451 Peltor Tactical Sport Muffs \$99.95**

Tacticle sport uses electronics that respond at lightning speed and protect your hearing from loud impulse noises. Amplifying ambient sound so you can hear better, it gently activates and cuts off loud noises. With a jack for your cell phone, MP3 player or dog tracker, and auto shut off, these muffs are perfect for a day at the range or in the field. Includes orange covers.

## Shooting Glasses

*So, what is the difference between ballistic high velocity testing and the testing that is normally done in accordance with the industrial standard?*

*Our glasses pass a test of 640 ft per second impact speed compared to the industrial standard of 150 ft per second impact speed.*

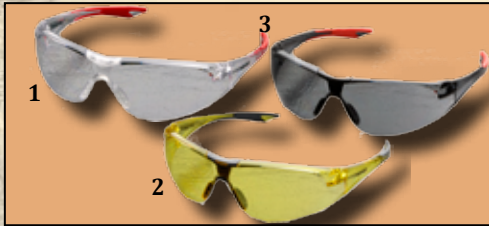

**Comfortable light weight fit**

**99% UV Protection**

**Ballistic Vo rated**

**Meets ANSI Z87+ high velocity requirements**

**CE certified and complies with EN-166 requirements**

**Avion Style- Hard coated polycarbonate lens, rubber temple tips and nose bridge.**

1. 814-SG18C Avion- Clear Lens Shooting Glasses \$9.95
2. 814-SG18A Avion- Amber Lens Shooting Glasses \$9.95
3. 814-SG18G Avion- Gray Lens Shooting Glasses \$9.95

**XTS™ Style- Hard Coated Polycarbonate lens. Glossy Red Frame (#4) or Polarized Lens with graphite frame (#5)**

4. 814-SG24M XTS- Mirror Lens Shooting Glasses \$9.95
5. 814-SG24PL XTS-Polarized Lens Shooting Glasses \$29.95

**Chica Style- 99% UV protection, Tortoise brown frame.**

6. 814-SG42BR Chica Womens Brown Lens Shooting Glasses \$9.95

**Sonoma Style- Light weight frame, hard coated polycarbonate lens, rubber temple tips and nose bridge.**

7. 814-SG350C Sonoma Clear Lens Shooting Glasses \$9.95
8. 814-SG350M Sonoma Mirror Lens Shooting Glasses \$9.95
9. 814-SG350PL Sonoma Polarized Gray Lens Shooting Glasses \$29.95

**Go-Specs Style- Goggle/Glasses combo design**

10. 814-SG45CAF Go-Specs, Foam lined w/Strap Clear \$9.95

**Ranger Style- Clear polycarbonate lens and matching temples. Not hi velocity rated but meets ANSI requirements.**

11. 814-RSG10C Ranger Clear Lens \$5.95

# Socks, Mugs & More...

## EABCO Logo Travel Mug

The perfect travel mug for your next outing. Bring it with to the range or work to keep your beverage hot. Sleek 16-oz stainless steel tumbler features black accent and lid. Double-wall insulation helps maintain beverage temperature. Screw-on lid with thumb slide-closure and interior plastic liner.

127-4356 EABCO Stainless Travel Mug \$8.95

*“This is the second order I have received from EABCO and I felt that I had to congratulate your company for your terrific service. If your company has what I’m looking for I will certainly go to you first.” -Phil H.*

## Shoot-N-C Target Bulls

Many of you have asked about the colorful targets we’re always showing when we picture groups. They’re actually a stick-on 3” bulls-eye that’s made to show a bright outer edge to bullet holes. It makes seeing your hits alot easier at 100 yards. You can stick them on plain paper, regular targets, or cardboard. There is only one brand of the stick-on bulls..Shoot-N-C (3”). Order yours today.

004-34315 Shoot-N-C 3” 36 Targets \$6.00  
004-34375 Shoot-N-C 3” 240 Targets \$17.50

## US Army Socks

**CUSHION SOLE- STRETCH  
MIL-S-48K & AMENDMENTS**

High quality US Army socks, made to rigid military specifications. Color is olive drab. Woven 50% wool, 30% cotton, and 20% nylon, they have thick soles and breathable tops. Great for hunting or other cold weather occupations. Top quality Mil Spec socks. Each pair has the original "US Army" yellow and black wrap around label.

078-1213M US Army Socks, Medium \$3.50

078-1213L US Army Socks, Large \$3.50

078-1213XL US Army Socks, X-Large \$3.50

## ANGORA WOOL SOCKS

Made from 80% Merino wool, 15% angora wool and 5% nylon. Angora wool is the soft and cuddly fur that is shorn (shaved) from show rabbits. It is the lightest natural fiber known to man! And because the fibers are hollow, Angora wool is 8 times warmer than sheep wool. The smooth Angora fiber is comfortable to wear next to the skin, but can actually be TOO WARM, unless it is properly blended with another fiber. Our Angora Wool socks are made of a special blend of Angora rabbit and premium Merino sheep wool. The resulting feel, warmth, and wicking make them comfortable for daily wear as well as outdoor activities! Warm, dry feet with comfortable socks! Size reference in Mens'. Priced per pair.

### Classic Angora Wool Socks

- 812-800T Angora Sock M (6-9) Twist \$15
- 812-802T Angora Sock L (9-12) Twist \$15
- 812-804T Angora Sock XL (13-15) Twist \$15

- 715-38ST .38/.357 Caliber \$1.75

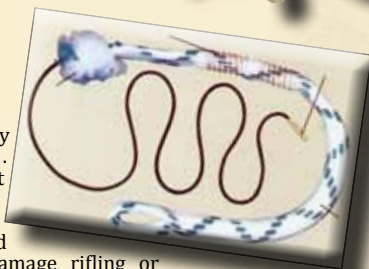

201-749245 12 pc. Jag Set w/case \$14.95

# BORE SNAKE

The Bore Snake™ is an all-in-one bore cleaning tool that pulls through your barrel and cleans within seconds. A weighted brass drop-through cord easily slips through the barrel to get the Bore Snake™ started. Grab the end and pull the rest through. The "business end" of the Bore Snake™ has a large surface area (160x more floss than a whole patch) impregnated with bronze brushes and floss. One pass with the Bore Snake™ equals several passes with conventional patches, brushes and jags.

No assembly required. Lightweight and compact with no exposed metal to damage rifling or crown surfaces. Use with or without gun cleaning solvent. Wash and dry to restore to like-new condition.

## Bore Snake™ for Rifles

- 755-24010 Bore Snake 17 Cal Rifle \$13.79
- 755-24011 Bore Snake .22, .223, 5.56mm-Centerfire & Rimfire \$13.79
- 755-24012 Bore Snake .243, 6mm Rifle \$13.79
- 755-24013 Bore Snake .257-.264 Cal. Rifle \$13.79
- 755-24014 Bore Snake 270/7mm Rifle \$13.79
- 755-24015 Bore Snake 30 Cal Rifle \$13.79
- 755-24016 Bore Snk 8mm, .32 cal Rifle \$13.79
- 755-24017 Bore Snk .338, 340 Cal Rifle \$13.79
- 755-24018 Bore Snk .357-.375 Cal Rifle \$13.79
- 755-24019 Bore Snake .458 Cal Rifle \$13.79
- 755-24020 Bore Snake .50-.54 Cal Rifle \$13.79
- 755-24025 Bore Snake .204 Cal Rife \$13.79

## Bore Snake™ for Pistols/Revolvers

- 755-24000 Bore Snake .22 Cal Pistol \$12.79
- 755-24001 Bore Snake .30/.32 Cal Pstl \$12.79
- 755-24002 Bore Snake 380, 9mm,.38, .357 \$12.79
- 755-24003 Bore Snake 40/41 Cal Pstl \$12.79
- 755-24004 Bore Snake 44/45 Cal Pstl \$12.79

## Bore Snake™ for Shotguns

- 755-24031 Bore Snake .410 Ga. \$14.79
- 755-24032 Bore Snake 28 Ga. Shotgun \$14.79
- 755-24033 Bore Snake 20 Ga. Shotgun \$14.79
- 755-24034 Bore Snake 16 Ga. Shotgun \$14.79
- 755-24035 Bore Snake 12 Ga. Shotgun \$14.79
- 755-24036 Bore Snake 10 Ga. Shotgun \$14.79

# Gun Cleaning

**CLENZOIL™**  
WORLDWIDE

**Clenzoil™ is a high quality one-step cleaner, lubricant, and rust preventive for all firearms.**

It provides a thin, non-greasy coating that prevents rust and lubricates all moving parts. We recommend it in two scenarios: First as a lubricant and protectant after regular cleaning of your firearms... (it works great as a bore treatment after cleaning with Wipe-Out™ because Clenzoil severely retards lead and copper fouling.) Second, as an all-around cleaner, lube, and protectant when you're out in the hunting fields... A bottle of Clenzoil and a BoreSnake™ are all you need for a field cleaning kit!

**003-001 Clenzoil Cleaner and Lube 8 oz. \$12.95**

A non-embedding abrasive compound that works kind of like hand lapping, but it's much easier and totally safe for your bore. The abrasive is a rare earth substance that is softer than steel but harder than copper. Here's how it works...

You wrap a cotton patch around a bronze bore brush that's one size smaller than your bore. Saturate the patch with USP Cleaning oil and run it through your bore to pre-moisten the barrel fowling. Then, wrap a fresh patch around the brush and apply USP Bore Paste to it. This patch is run back and forth through the barrel 10-12 times. Finally, run through a clean patch with the USP cleaning oil and follow that with a dry patch to finish up. Use USP Oil or Clenzoil for storage.

**Kit includes: 2 oz tube of bore paste and 1 oz bottle of cleaning oil.**

**009-USP Bore Paste/Oil Kit \$10.99**

A neat rust protectant and cleaner. Wipe it on exterior surfaces and it dries to a thin "gel" layer that protects while giving a clean, deep look to metal finishes. For gun cleaning, you can use RustePrufe much like you'd use Hoppe's bore solvent... a very good all around gun care product. The applicator kit has a jar and a Chamois cloth applicator. Or buy RustPrufe in 2 oz.

Bottles and apply w/ a patch.

**136-RPK RustePrufe Kit \$6.95**

**136-RP2 RustePrufe (2 oz) \$4.50**

Excellent light copper removing solvent that works without abrasives or harsh chemicals. Just moisten a patch and push it through your gun barrel with a tight fitting jag. It'll turn blue when there's copper fouling. Repeat this until new patches don't show blue anymore.

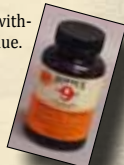

**008-2937 Butch's Bore Shine 4 oz. \$6.95**

**008-2941 Butch's Bore Shine 16 oz. \$19.95**

Use Hoppe's #9 for just basic, reliable gun cleaning without damaging guns. Dissolves lead and copper residue.

**721-902 Hoppe's #9 (2 oz.) \$3.50**

**721-904 Hoppe's #9 (4 oz.) \$6.50**

Touch up major to minor... especially nice for blacking worn edges... And jimmied up screw heads. It'll make your gun look and feel like new again!

**440-002 44/40 Gun Blue 2 oz \$10.95**

A really neat way to put a durable finish on steel and aluminum. Spray on, let dry, then bake in your oven for about 1/2 hour. The resulting finish is consistent looking, hard wearing, and solvent resistant. Gloss or matte black, and matte clear... 6 oz. spray cans.

**046-801 Matte Black Lacquer \$15.95**

**046-802 Gloss Black Lacquer \$15.95**

**046-803 Matte Clear Lacquer \$15.95**

**001-002 J-B Bore Cleaner (2oz) \$10.95**

Apply dry neck lube to case necks. Simply dip the cartridge case neck into the ceramic media. The media consists of high density ceramic spheres that are pre-charged with Imperial Dry Neck Lube. This can be used with all cartridge cases including 17 cal.

**722-07900 Application Media with Imperial Dry Neck Lube \$7.00**

TetraGun® Fluoropolymer Gun Lube fills and seals microscopic low spots. May increase velocities while reducing fouling. Lubricant is good for everything; grease is best for levers, trigger surfaces, sliding blocks; spray is a good refresh treatment.

**303-302B1 TetraGun® Lubricant Oil 1 oz. bottle \$3.99**

**303-304 TetraGun® Lubricant Oil 8 oz. bottle \$10.99**

**303-005 TetraGun® Grease 1 oz. tube \$4.99**

**303-202 TetraGun® SLC Spray 8 oz. can \$7.99**

## Removes Heavy Copper Fouling in Minutes, Restores Accuracy to Rifles

- 014-D612 KG-12 Copper Remover 4 oz. \$9.50
- 014-D604 KG-4 Gun Oil 2 oz. \$5.50
- 014-D603 KG-3 Solvent/Degreaser 19 oz. \$8.50
- 014-D602 KG-2 Bore Polish 4 oz. \$11.50
- 014-D601 KG-1 Carbon Remover 4 oz \$5.50
- 014-PKG KG 1,2,3,4 & 12 Pkg Deal \$35.00

### Harmless to Stainless or Blue Steel Gun Barrels

KG contains no ammonia and will not harm gun barrel steel. Developed for military use, cleaning Howitzer barrels, it is extremely aggressive on copper. Since nickel plating usually has a copper under layer, we recommend you DO NOT use KG-12 on any nickel plated surface, or get it on any nickel plated surface by accident.

### KG-12 Copper Remover for Rifles -

Quickly Removes Heavy Copper Fouling from Rifle Bore... (Restores Accuracy to 204 Ruger, 22-250 and all others.)

Copper fouling destroys accuracy in high velocity rifles. New barrels that haven't been broken in can be over-fouled with copper in as little as the first 10 shots... before a new rifle owner has even had a chance to finish sighting in, much less shoot groups. Extremely high velocity cartridges like 204 Ruger or 22-250 are notorious for copper fouling. Experienced 204 Ruger shooters and long range prairie dog hunters are known to clean the copper from their barrels every 20-50 shots to keep them accurate. Wipe Out Foam has been the most effective, yet gentle cleaner but it can take 1-12 hours of soaking to get out the copper when it gets especially heavy. Our new KG12 will remove HEAVY copper fouling in as little as 15-30 minutes! It's a great tool for maintaining accuracy as well as barrel break-in.

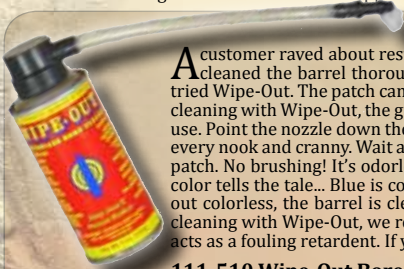

### KG-12 Copper Removal -

First of all, KG12 is totally aggressive on copper. Second, it Contains No Ammonia. It is a water based chemical that will not harm rifle barrel steels. (Use Caution around Nickel Plating - see below ). Third, apply KG-12 with a bore brush so you'll get a sufficient and complete wetting of the bore... don't let it evaporate, keep it wet for 5-15 minutes. Afterward, push a close fitting jag and patch through the bore and then inspect with a flashlight. Simply look into the muzzle and see if there are still some copper streaks. If there's still copper, repeat the process. When there's no more copper, flush with a couple patches of KG3 and follow with a patch of KG4 gun oil.

### KG Barrel Break-In Procedure -

Usually barrel break-in procedures are to fire one or more shots, clean the barrel, fire one or more shots, clean the barrel, and so on until the polishing action of the fired bullets has worn-in the bore surfaces. However, the key ingredient of breaking in a barrel is a clean, un-coppered bore so the fired bullets can wear directly against bare steel as they travel down the bore. High velocity cartridges that foul the bore fast can make breaking in go slow by simply requiring so much waiting time to clean out the copper between shots. We've found that KG12 reduces the cleaning time to 15-30 minutes for even the heaviest copper fouling. And if you add KG-2 bore polish, you can increase the bore polishing effectiveness of each fired break-in shot. Fire a shot, clean with KG-12, swab with KG-2, and fire another shot. Repeat for 5-10 shots. Do not over do it on the KG-2... just swab enough to coat the inside barrel surfaces... we use a patch wrapped around a smaller caliber brush.

Remember, a certain amount of copper fouling is normal. Breaking in a barrel increases the number of accurate shots you can take before having to clean out excessive copper fouling. KG12 is exceptional at removing any and all copper.

A customer raved about restoring a favorite gun to accuracy with Wipe-Out Foaming Bore Cleaner. He had cleaned the barrel thoroughly with brushes and solvents and it still wouldn't shoot accurately. Then he tried Wipe-Out. The patch came out bright blue... which means lots of copper was embedded in his bore. After cleaning with Wipe-Out, the gun became accurate just like when it was new. Wipe-Out is different, but easy to use. Point the nozzle down the bore and squirt. The barrel instantly fills with expanding foam that penetrates every nook and cranny. Wait an hour and then just Wipe-Out the bore with a cleaning rod, tight fitting jag, and patch. No brushing! It's odorless, yet dissolves copper, carbon, brass, bronze, and powder fouling. The patch color tells the tale... Blue is copper fouling. Gray/black is carbon and powder fouling. When the patch comes out colorless, the barrel is clean! No acid and no ammonia, Wipe-Out is gentle on rifle barrel steels... After cleaning with Wipe-Out, we recommend treating the bore with a good gun oil such as Clenzoil™... which also acts as a fouling retardant. If you like accuracy, you have to try Wipe-Out™... The 5 oz. can lasts a LONG time.

111-510 Wipe-Out Bore Foam \$12.99

111-007 Wipe-Out Foam Applicator Spout \$2.50

### Foamless Concentrated Wipe-Out Chemical Removes Copper Fouling from the Rifle Bore

Patch-Out is Wipe-Out Bore Foam in a non-foaming liquid concentrate. It removes copper fouling even faster and more effectively because it is concentrated. You are probably familiar with our original Wipe-Out™ Bore Foam... Famous for its ability to safely dissolve copper fouling from your rifle barrel with a brushless foaming application method. It works SO well but can take an hour or longer. Well, the Wipe-Out foaming system consists of the active chemical plus the foaming agent... Patch-Out is straight chemical with no foaming agent... It is undiluted concentrate! Also try the Wipe-Out Accelerator, speeds up Patch-Out Liquid and Wipe-Out Foam.

111-810 Patch-Out Liquid Bore Cleaner 8 oz \$12.99

111-800 Wipe Out Accelerator 8 oz \$8.99

## Videos, Software and Books

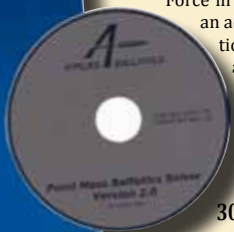

### Applied Ballistics for Long Range Shooting

Bryan Litz - Plain English Explanations and Techniques for Rifle Shooters  
578 Pages that explain the important elements of exterior ballistics in a practical way that can be understood and applied by shooters. Chapters include: The Ballistic Coefficient, Gravity Drop, Uphill/Downhill Shooting, Wind Deflection, Gyroscopic (Spin) Drift, The Coriolis Effect, Using Ballistics Programs, Getting Control of Sights, and Bullet Stability... Plus performance analysis for both long range hunting and target shooting applications. Includes a CD w/Ballistics Software!

New for 2nd Edition - Includes additional information in almost every chapter with nearly double the information on wind deflection. Plus a completely NEW chapter on Extended Long Range shooting (into the transonic). And finally, the appendix of measured BC data has grown from 175 to 225 bullets.

About the Author: An aerospace engineer who spent 6 years working for the US Air Force in air-to-air missile design, modeling, and simulation... Bryan has been an active and successful competitive rifle shooter for years. He was US National Palma Champion in 2008, firing member of the winning US Team at the 2008 Spirit of America International Rifle Match, and National Record Holder for the NRA Iron Sight Midrange Course (450-39X). In 2008, he became Chief Ballistician for Berger Bullets, and now is the author of this outstanding reference for shooters, reloaders, and accuracy enthusiasts. Watch His Video at our Reloading Page.

300-2562 Applied Ballistics 2nd Edition w/Ballistics CD \$49.95

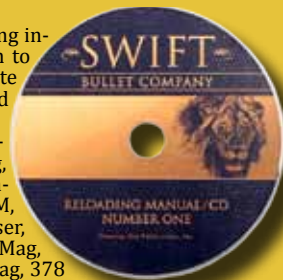

### Swift Bullets Handloading Manual on CD

Beautifully illustrated and sensibly organized with over 400 pages of loading information, ballistic data, and advice specially suited to hunting. In addition to load data for Swift Bullets, this CD format hand loading manual has complete instructions for reloading... It's an excellent instruction manual for new hand loaders, and valuable reference for those with experience.

Load Data - Includes 257 Roberts, 25-06, 257 Weatherby Mag, 260 Remington, 6.5x55 Swede, 264 Win Mag, 270 Win, 270 WSM, 270 Weatherby Mag, 7mm-08, 7x57 Mauser, 280 Remington, 7mm SAUM, 7mm Mag, 7mm Weatherby Mag, 7mm STW, 7mm Ultramag, 308 Win, 30-06, 300 SAUM, 300 WSM, 300 Mag, 300 Weatherby Mag, 300 Ultramag, 30-378 Weatherby, 8x57 Mauser, 8mm Mag, 338 Win Mag, 340 Weatherby Mag, 338 Ultramag, 338 Lapua Mag, 358 Win, 35 Whelen, 358 Norma Mag, 9.3x62, 9.3x64, 375 H&H, 375 Ultramag, 378 Weatherby Mag, 444 Marlin, 45-70, 458 Win Mag, 460 Weatherby Mag, and 470 Nitro 7

105-SM1 Swift Bullets Loading Manual CD \$19.95

### Maximizin' Your Muzzleloader Videos

Smash Hit Video now has a sequel! We introduced Russell Lynch, a Nationally Distinguished Shooter and USMC Scout Sniper, and his "Maximizin' Your Muzzleloader" DVD and it was an overwhelming success. And for good reason: It answers precisely and clearly, how to make your muzzleloader shoot with consistently good accuracy. Now you can get his second video, "Precision Fire Inlines."

**Video #1 Maximizin' Your Muzzleloader** was produced using

a stock TC Encore 209x50 muzzleloader. It directly addresses which powders work best, loose powder vs. pellets, and accurate charges. It directly addresses which bullets work best, conical vs. sabot vs. Powerbelt™, etc. It shows you cleaning techniques and tools that are best for accuracy. And it gives practical marksmanship tips from Russell's extensive experience as a USMC Sniper and hunter.

**034-001 Maximizin' Your Muzzleloader DVD \$16.95**

**Video #2 Precision Fire Inlines** was produced using a stock TC Omega 209x50 muzzleloader but with the intent of updating and expanding on the Encore® information from Video #1. 2-Hour DVD.

**034-002 Precision Fire Inlines DVD \$16.95**

## P.O. Ackley Handbooks for Reloaders - Volumn II

Rare Books Now Back In Print (at least for now)... Order Yours Today!

P. O. Ackley was the gunsmith and wildcat cartridge designer behind the "Ackley Improved" cartridges you've heard so much about. These handbooks contain articles and load data that explain the designs of Parker O. Ackley as well as the tests he did and other influences upon his thinking. We sold hundreds of these books before they went out of print. Then recently we found some more and bought out the entire supply! So here they are again...

**P. O. Ackley Volume I with Charts** - Not available at this time. Watch our website, hopefully we'll get it again!

**P. O. Ackley Volume II \$19** - This book contains articles on the strength of military actions, causes for blowups, gun shot wounds, testing wildcat cartridges, case life, bullet energy, recoil and burn rates "quickness" of gun powders... Plus load data for cartridges from .14 Jones through 460 Weatherby.

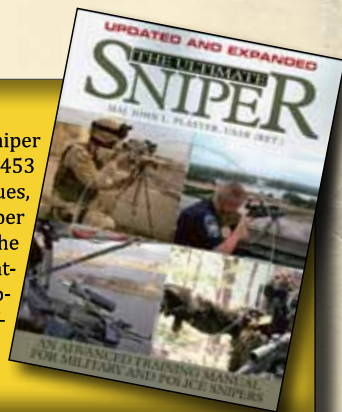

You will enjoy reading and referring to these books for the rest of your life.

## 129-PO2 PO Ackley Handbook Volume II \$19

## Ultimate Sniper Manual

Written as a training manual for military and police snipers, The Ultimate Sniper is also an excellent read for hunters and varmint shooters. It's an extensive 453 page 8.5 X 11 Volume that explains bullets & ballistics, riflescope techniques, range and wind estimation, stalking and movement, basic and advanced sniper marksmanship techniques, camouflage, and more. Of special interest is the section on using Mil Dot reticle riflescopes in range finding and compensating for movement, wind, and shot angle. Extensively illustrated with photographs, drawings, charts, and graphs, this book is a "must have" for all self-respecting riflemen!

**800-7041 The Ultimate Sniper Manual \$45!**

## VihtaVuori Reloading Manual 4th Edition

Complete How-To Manual Teaches Reloading and Gives Full Load Data. VihtaVuori 4th Edition Reloading Manual: The VihtaVuori manual includes load data and ballistics for most popular rifle and pistol cartridges using Lapua brass and bullets loaded with VihtaVuori gun powders. A complete reloading reference, it also has extensive explanation of powder characteristics, bullets, and brass, complete How-to Hand Load instructions, and unit of measure conversions. A brief history of Lapua rounds this excellent manual into a fun reading experience, too... 283 pages, hardcover. (Note: This manual includes load data for 6.5x47 Lapua and 6.5-284 Norma).

**810-VVMAN VihtaVuori Reloading Manual \$37.95**

## Sierra Infinity Six Ballistic Software

Calculates trajectory & windrift for all distances. Calculates energy, momentum & velocity. Calculates Point Blank Range, Up and Down Hill Trajectories and much more. Compatible with all bullets, and easy to use. Suite version includes complete handgun and rifle reloading data on CD.

**220-0601 Sierra Infinity V6 Ballistic Software CD \$36**

**220-0602 Sierra Infinity V6 Suite with load data CD \$59**
