WHY KNOX

Safeguards against threats at all times

Even when your device is off, all your data is encrypted by default. The encryption key is stored in a secure area known as TrustZone in the device chipset

Flexible device management experience

With the Knox platform, over 1,000 APIs are available for apps to leverage granular management and control features of Samsung devices. Samsung has used these APIs to create our IT solutions, and also offers them to developers to enhance their apps with the Knox platform

Across Samsung devices

The Knox platform is currently embedded into most Samsung phones, tablets and wearables, and runs on both Android and Tizen operating systems. Knox platform features are active in your device from the moment you turn it on
