

for opening any of the three structures. The operator will be in attendance continuously at the Lewis and Clark River Bridge except when called upon to open either of the other two drawspans. This change is being made because of a steady decrease in requests for openings of the affected drawbridges. This action will relieve the bridge owner of the burden of having persons constantly available to open the draws and still provide for the reasonable needs of navigation.

EFFECTIVE DATE: This regulation becomes effective on October 31, 1991.

FOR FURTHER INFORMATION CONTACT: John E. Mikesell, Chief, Bridge Section, Aids to Navigation and Waterways Management Branch, (Telephone: (206) 553-5864).

SUPPLEMENTARY INFORMATION: On July 15, 1991, the Coast Guard published a proposed rule (53 FR 32151) concerning this amendment. The Commander, Thirteenth Coast Guard District, also published the proposal as a public notice dated July 25, 1991. In each notice interested persons were given until August 29, 1991, to submit comments.

Drafting Information

The drafters of these regulations are Austin Pratt, project officer, and Lieutenant Deborah K. Schram, project attorney.

Discussion of Comments

No objections to the proposed rule change were received.

Economic Assessment and Certification

These regulations are considered to be non-major under Executive Order 12291 on Federal Regulation and nonsignificant under Department of Transportation regulatory policies and procedures (44 CFR 11034; February 26, 1979). The economic impact of this final rule has been found to be so minimal that a full regulatory evaluation is unnecessary. Navigation and marine-related businesses will be minimally affected by the one half hour advance notice for openings because openings can be planned for and scheduled accordingly. Since the economic impact of these regulations is expected to be minimal, the Coast Guard certifies that they will not have a significant economic impact on a substantial number of small entities.

Regulations: In consideration of the foregoing, part 117 of title 33, Code of Federal Regulations is amended as follows:

PART 117—DRAWBRIDGE OPERATIONS REGULATIONS

1. The authority citation for part 117 continues to read as follows:

Authority: 33 U.S.C. 499; 49 CFR 1.46; 33 CFR 1.05-1(g).

2. Section 117.899 is revised to read as follows:

§ 117.899 Youngs Bay and Lewis and Clark River.

(a) The draw of the US101 (New Youngs Bay) highway bridge, mile 0.7, across Youngs Bay at Smith Point, shall open on signal for the passage of vessels if at least one half hour's notice is given to the drawtender at the Lewis and Clark River Bridge by marine radio, telephone, or other suitable means. The opening signal is two prolonged blasts followed by two short blasts.

(b) The draw of the Oregon State (Old Youngs Bay) highway bridge, mile 2.4, across Youngs Bay at the foot of Fifth Street, shall open on signal for the passage of vessels if at least one half hour's notice is given to the drawtender of the Lewis and Clark River Bridge by marine radio, telephone, or other suitable means. The opening signal is two prolonged blasts followed by one short blast.

(c) The draw of the Oregon State highway bridge, mile 1.0, across the Lewis and Clark River, shall open on signal for the passage of vessels if at least one half hour's notice is given by marine radio, telephone, or other suitable means. The opening signal is one prolonged blast followed by four short blasts.

36 CFR Part 327

Shoreline Management Fees at Civil Works Projects

AGENCY: U.S. Army Corps of Engineers, DoD.

ACTION: Deferral of final rule effective date.

SUMMARY: On June 28, 1991, the Corps of Engineers published the Shoreline Management Fee Schedule in the Federal Register (56 FR 29583). This

schedule can not be implemented during Fiscal Year 1992 due to the passage of Public Law 102-104, signed by the President on August 17, 1991. This document defers indefinitely the effective date of that final rule. The administrative charges contained in 36 CFR 327.30, Shoreline Management at Civil Works Projects, published in the Code of Federal Regulations, July 1, 1991 edition, will remain in effect. Any future decisions affecting this will be published in the Federal Register.

DATES: Effective on October 1, 1991.

ADDRESSES: HQUSACE, CECW-ON, Washington, DC 20314-1000.

State Legalization Impact Assistance Grants (SLIAG)

AGENCY: Administration for Children and Families, HHS.

ACTION: Final rule; correction.

SUMMARY: This document corrects a final rule regarding the State Legalization Impact Assistance Grants (SLIAG) program which was published on May 7, 1991. That rule made certain changes to § 402.41(c), but due to an oversight, conforming changes to paragraph (d) of that section were omitted. This document corrects that error.

EFFECTIVE DATE: May 7, 1991.

PART 402—[CORRECTED]

Therefore the following corrections are made to the rule amending 45 CFR part 402 published on May 7, 1991 at page 21238.

1. On page 21248, second column, in amendatory instruction paragraph 11, in the fifth line of the paragraph, preceding the words "redesignating paragraph (d)(1) as paragraph (d)(1)(i) and revising it," the following instruction is added: " * * * revising the introductory text in paragraph (d), * * * "

2. On page 21248, second column, in the revised text of § 402.41, the asterisks immediately preceding paragraph (d)(1)(i) indicating unchanged introductory text are deleted, and paragraph (d) as set forth in the **Federal Register** on May 7, 1991, is corrected by revising the introductory text to read as follows:

§ 402.41 Application content.

FEDERAL COMMUNICATIONS COMMISSION

47 CFR Parts 73 and 76

[DA 91-1203]

Broadcast Services; Editorial Amendments to the Rules

AGENCY: Federal Communications Commission.

ACTION: Final rule.

SUMMARY: This Order revises 47 CFR parts 73 and 76 to correct certain errors existing in the Commission's Rules.

FOR FURTHER INFORMATION CONTACT:
Rita McDonald, Policy and Rules

Division, Mass Media Bureau (202) 632-5414.

SUPPLEMENTARY INFORMATION:

Order

Adopted: September 26, 1991.
Released: September 27, 1991.
By the Chief, Mass Media Bureau:

1. This Order amends the Commission's Rules to correct minor editorial errors in title 47 of the Code of Federal Regulations. Specifically, the Commission makes changes to 47 CFR parts 73 and 76. This Order makes no substantive changes that impose additional burdens or remove provisions relied upon by licensees or the public. For this reason, we believe that this revision will serve the public interest. This information is corrected as part of the Agency's oversight function.

2. This amendment is implemented by authority delegated by the Commission to the Chief, Mass Media Bureau. Because this amendment only interprets and clarifies the existing language of parts 73 and 76, prior notice of rule making is not required. 47 CFR 1.412(c). For this same reason, this amendment may become effective upon publication in the **Federal Register**. 47 CFR 1.427(b). Because a general notice of proposed rule making is not required, the Regulatory Flexibility Act does not apply.

3. Therefore, *it is ordered*, That pursuant to sections 4, 5, and 303, of the Communications Act of 1934, as amended, and §§ 0.61 and 0.283 of the Commission's Rules, parts 73 and 76 of the FCC Rules and Regulations are amended as set forth below, effective upon publication in the **Federal Register**.

4. For further information on this Order, call Rita S. McDonald, Policy and Rules Division at (202) 632-5414.

50 CFR Part 23

RIN 1018-AA-29

Corrections and Similar Changes to the Appendices of the Convention on International Trade in Endangered Species of Wild Fauna and Flora; Availability of a Reprint of the CITES List

AGENCY: Fish and Wildlife Service, Interior.

ACTION: Final rule; corrections and comparable amendments.

SUMMARY: The Convention on International Trade in Endangered Species of Wild Fauna and Flora (CITES or Convention) regulates international trade in species of animals and plants listed in its appendices I, II, and III. These species for which CITES controls such trade are regularly incorporated into the Code of Federal Regulations (CFR) in title 50, part 23, subpart C. Various technical errors in the October 1, 1990, 50 CFR 23.23 are corrected by this rule. To avoid error, the entire § 23.23(f) with revisions is presented below. A special reprint of the updated CITES list will be available from the U.S. Fish and Wildlife Service (Service). **EFFECTIVE DATE:** This rule is effective October 1, 1991.

ADDRESSES: Please send any correspondence concerning this rule to Chief, Office of Scientific Authority; Arlington Square Building, Room 725; U.S. Fish and Wildlife Service; Washington, DC 20240.

FOR FURTHER INFORMATION CONTACT: Dr. Charles W. Dane, Chief, Office of Scientific Authority, at the above address, telephone 703-358-1708 (or FTS 921-1708); FAX 703-358-2202.

SUPPLEMENTARY INFORMATION:**Background**

This rule makes technical amendments to 50 CFR 23.23 as discussed below (e.g., showing taxa in the correct appendices) besides clear changes not needing discussion (e.g., correction of typographical errors and misspellings, and properly arranging scientific names).

1. Reprint of Integrated Appendices

Copies of a reprint of the CITES appendices with corrections and amendments (prepared by staff of the Offices of Management Authority and Scientific Authority) will be available upon request to the Publications Unit,

Arlington Square Building, Room 725, U.S. Fish and Wildlife Service, Washington, DC 20240.

2. Changes Based on Scientific Names

After each biennial Meeting of the Conference of the Parties (COP), the CITES Secretariat notifies the Party members about all changes to the appendices. Scientific names of listed animal and plant taxa may need to be changed in part 23, subpart C to reflect just the nomenclature given in the new CITES list. Using the same names prevents confusion to other CITES Parties when they receive permits issued by the United States. Such change in a scientific name does not reflect a revision to the scope of the species' listing, only a change to the name accepted by the CITES Nomenclature Committee and the CITES Secretariat by its use in official notifications. In the revised table below, scientific names previously used are given as synonyms.

The wild water buffalo formerly listed in appendix III (by Nepal) as *Bubalus bubalis* is changed to *Bubalus arnee*. The previously used "*B. bubalis*" is now considered to apply only to the unlisted domesticated water buffalo.

The turtles *Erymnochelys madagascariensis* and *Peltocephalus dumeriliana* were formerly included in the genus *Podocnemis*, which has been in appendix II. At the Fifth Meeting of the Conference of the Parties (COP5), that broad older concept of *Podocnemis* was replaced by newer scientific understanding that these appendix II turtles should be recognized in three genera: *Erymnochelys*, *Peltocephalus*, and the revised *Podocnemis* (as more narrowly understood).

In a February 20, 1990, Federal Register notice (55 FR 5847), additional species of corals were added to the appendices under the Phylum Cnidaria, which is currently considered to be a synonym of Phylum Coelenterata. The new table integrates all the taxa that were listed under both or either phylum.

Some three-toed sloths were previously included as *Bradypus boliviensis* in appendix II, and *Bradypus griseus* in appendix III (listed by Costa Rica). However, the CITES Secretariat's list as nomenclaturally revised has the species *B. variegatus* in appendix II, with *B. boliviensis* and *B. griseus* just as synonyms. The Service has requested further clarification from the Nomenclature Committee and the Secretariat.

The revised table lists six species of *Turbinicarpus* cacti. To include the whole genus, a clear reproposal of *Turbinicarpus* (sometimes now

considered a portion of *Neolloydia*) seems necessary, from evaluation of COP4 documents. The United States plans to submit such an appendix I proposal (56 FR 33894; 7/24/91).

The new table below clarifies that the nine dwarf Malagasy species of *Euphorbia* subgenus *Lacanthia* are listed in appendix I, rather than the subgenus itself (based on a similar evaluation of COP7 documents). The proposed rule (54 FR 51432; 12/15/89) had a colon after the subgenus before listing the nine species, but the final rule omitted the colon (55 FR 5847; 2/20/90).

3. Corrections in Listing Dates

The correct date of listing for the African elephant (*Loxodonta africana*) is February 4, 1977, as originally published in a Federal Register notice of February 22, 1977 (42 FR 10469). The listing date for the northern crested guan (*Penelope purpurascens*) was recorded both as January 1, 1987, and April 13, 1987, (53 FR 19919; 6/1/88); the correct date is April 13, 1987. Rheinard's crested argus (*Rheinartia ocellata*) was originally listed in appendix III on November 13, 1986; at COP6, it was uplisted to appendix I (52 FR 48821; 12/28/87). The date of first listing is used by the United States, and a subsequent date is not recorded in the CFR for a species that has remained but changed status in the appendices [see 50 CFR 23.23(c)]. Therefore, the corrected listing date for this bird is November 13, 1986.

4. Corrections in Status

The leopard cat (*Felis bengalensis bengalensis*) was originally included in appendix I (42 FR 10469; 2/22/77); at COP5, the Chinese population was transferred to appendix II. In the Service's proposed rule (50 FR 24918; 6/14/85), this downlisting was properly reflected; however, in the final rule (50 FR 48212; 11/22/85), all populations were listed as in appendix II. The corrected table below returns all populations of *F. b. bengalensis* to appendix I except the Chinese population, which remains in appendix II.

The four Central and North American subspecies of the jaguarundi (*Felis yagouaroundi*) were originally listed in appendix I, and the rest of the species was in appendix II (42 FR 10469; 2/22/77). At COP6, the appendix I listing was revised by replacing the subspecies with populations for Central and North America. After COP6, the Service properly proposed this change (52 FR 35743; 9/23/87), but the final rule (52 FR 48821; 12/28/87) showed the species in appendix I without indicating

populations or range. The table below indicates that the Central and North American populations are in appendix I, and returns the remaining populations to appendix II.

In the October 1, 1990, 50 CFR 23.23, the term "do" (i.e., ditto) was used to mean 'copy or duplicate as before.' Because of the addition of intervening species, several appendix III listings of birds and mammals of Colombia and India (53 FR 35825; 9/15/88) appeared in the October 1, 1990, 50 CFR 23.23(f) with incorrect country designations or as appendix I listings; the appendix III listings are restored below.

At COP4, the Zimbabwe population of the Nile crocodile (*Crocodylus niloticus*) was downlisted from appendix I to II, pursuant to Resolution Conf. 3.15 on ranching (48 FR 45260; 10/4/83). At COP7, additional populations of Nile crocodiles were downlisted to appendix II, pursuant to that ranching resolution (55 FR 7715; 3/5/90). When 50 CFR 23.23 was revised, the Zimbabwe population was not in the list along with the newly added populations: it is restored below.

Originally, the Dromedary pearly mussel (*Dromus dromas*) was included in appendix I, and the Ozark lamp pearly mussel (*Lampsilis brevicula*) was in appendix II (42 FR 10469; 2/22/77). However, these mussels have been

listed in § 23.23(f) inaccurately; the status for the two species as corrected in the table below reflects their original listings.

This document corrects typographical and other errors, and makes other nonsubstantive technical changes to the October 1, 1990, 50 CFR 23.23. The Department has determined that these changes do not constitute an agency action or rule as defined by 5 U.S.C. 553, and that they therefore do not require preparation of an Environmental Assessment under authority of the National Environmental Policy Act (42 U.S.C. 4321-4347). The Department also has determined for those reasons that Executive Order 12291 and the Regulatory Flexibility Act (5 U.S.C. 601 *et seq.*) do not apply. These actions do not require information collection which would need approval from the Office of Management and Budget under the Paperwork Reduction Act (44 U.S.C. 3501 *et seq.*).

This document was prepared by Drs. Richard M. Mitchell, Bruce MacBryde, and Charles W. Dane, Office of Scientific Authority, and Ms. Maggie Tieger, Office of Management Authority, under the authority of the U.S. Endangered Species Act of 1973, as amended (16 U.S.C. 1531 *et seq.*).

Regulation Promulgation

For the reasons set forth above, the Service amends part 23, subchapter B of chapter I, title 50 of the Code of Federal Regulations as follows:

PART 23—ENDANGERED SPECIES CONVENTION

1. The authority citation for part 23 continues to read as follows:

Pacific Coast Groundfish Fishery

AGENCY: National Marine Fisheries Service (NMFS), NOAA, Commerce.

ACTION: Notice of fishing restrictions, and request for comments.

SUMMARY: NOAA announces a reduction in the trip limit for widow rockfish in the commercial groundfish fishery off Washington, Oregon, and California. This action is authorized by the regulations implementing the Pacific Coast Groundfish Fishery Management Plan. The trip limit is designed to keep landings within the 1991 harvest guideline for this species while extending the fishery as long as possible during the year.

DATES: 0001 hours (local time) September 25, 1991, through 2400 hours (local time) December 31, 1991 unless modified, superseded, or rescinded. Comments will be accepted through October 18, 1991.

FOR FURTHER INFORMATION CONTACT: William L. Robinson, (Northwest Region, NMFS) 206-526-6140, Rodney McInnis (Southwest Region, NMFS) 213-514-6199, or the Pacific Fishery Management Council at 503-221-6352.

SUPPLEMENTARY INFORMATION: Regulations implementing Amendment 4 to the Pacific Coast Groundfish Fishery Management Plan (FMP) were published at 56 FR 736 (January 8, 1991). The amended FMP provides for rapid changes to specific management measures if they have been designated as "routine." Trip landing and frequency limits for widow rockfish are among those management measures that have been previously analyzed, and designated as routine at 50 CFR 663.23(c)(1)(i)(A).

Since January 1, 1991, widow rockfish has been managed by a weekly trip limit of 10,000 pounds and a biweekly trip limit of 20,000 pounds. Only one landing above 3,000 pounds could be made in either a one or two-week period.

At its April 1991 meeting, the Pacific Fishery Management Council (Council) recommended that the Regional

Director, Northwest Region, NMFS (Regional Director), impose a 3,000 pound trip limit (with no limit on the number of landings) on the date that the Council's Groundfish Management Team (GMT) projects necessary to extend the fishery as long as possible in 1991. Notice of the Council's intent to take this action was published at 56 FR 20142 (May 2, 1991) with a request for comments. No comments were received.

The best available scientific information provided by the GMT on September 9, 1991, indicates that 4,933 metric tons (mt) of widow rockfish were landed through August 17, 1991. Less than 1,000 mt are projected to be taken between August 17 and September 24, 1991, constituting less than 15 percent of the 1991 harvest guideline of 7,000 mt. Therefore, to extend the season as long as possible without exceeding the harvest guideline, the commercial weekly trip limit for widow rockfish is reduced from 10,000 pounds to 3,000 pounds and the commercial biweekly trip option is abolished. This modification becomes effective on September 25, 1991. This date enables completion of the previous two-week period for fishermen using the biweekly option.
