In 1986 a group of riders decided to find a way to make their trail experiences better, and their efforts evolved into Moose Racing. A few trail tools and hard parts soon became the standard for outfitting riders from head to toe in stylish and functional gear. Since then, Moose Racing has evolved into a global giant providing both rider and machine with the largest selection of off-road products on the market.

MIPS® NEW MIPS TECHNOLOGY!

HOW MIPS WORKS

In a helmet with MIPS Brain Protection System (BPS) the shell and the liner are separated by a Low Friction Layer. When a helmet with MIPS BPS is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both affects the brain and increases the risk for minor and severe brain injuries. MIPS BPS has been scientifically proven to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain.

MIPS® NEW MIPS TECHNOLOGY!

HOW MIPS WORKS

In a helmet with MIPS Brain Protection System (BPS) the shell and the liner are separated by a Low Friction Layer. When a helmet with MIPS BPS is subjected to an angled impact, the low friction layer allows the helmet to slide relative to the head. The MIPS BPS is designed to add protection in helmets against the rotational motion. The rotational motion is a combination of rotational energy (angular velocity) and rotational forces (from angular acceleration) that both affects the brain and increases the risk for minor and severe brain injuries. MIPS BPS has been scientifically proven to reduce rotational motion when implemented in a helmet by absorbing and redirecting rotational energies and forces transferred to the brain.

- Venhill Engineering in the UK makes Moose Racing® Stainless Steel Clutch lines to the highest specifications
- Each line is made from top quality PTFE coated hose, wrapped with British made stainless steel, and PVC coated for protection
- Rubber protection boots and extra rigid tubing are used to protect vulnerable areas from heat and impact and to prevent hose flex under compression
- Each line is designed to withstand a minimum of 14,000 PSI
- Installing our stainless lines gives a large performance increase by significantly reducing expansion under pressure, and absorption of water when compared to stock rubber hoses

STAINLESS STEEL BRAIDED BRAKE LINES

\$46⁹⁵ - \$69⁹⁵

- Swivel union ends are the secret to easier fitting, and ensure a kink and stress free installation
- Venhill Engineering in the UK makes Moose Racing® Stainless Steel Brake Lines to the highest specifications
- Each line is made from top quality PTFE coated hose, wrapped with British made stainless steel, and PVC coated for protection and great looks
- Rubber protection boots and extra rigid tubing are used to protect vulnerable areas from heat and impact and to prevent hose flex under compression
- Each line is designed to withstand a minimum of 14,000 PSI
- Installing our stainless lines gives a large performance increase by significantly reducing expansion under pressure, and absorption of water when compared to stock rubber hoses

520 FB-RING CHAIN **\$113.95 - \$132.95**

- Top of the line, strongest, most durable sealed chain we offer
- Fine Blanking (FB), an incredibly precise manufacturing process that yields perfectly cut links
- Tight tolerances make the plate, pin, and bushing union accurate and strong
- Accuracy of the cuts and the use of stronger alloyed steel gives the FB the highest tensile strength rating of nearly 8,000 lbs
- Special sealing rings are chemically treated to gain strength and reduce friction
- The FB treatment allows the O-rings to be impregnated with grease
- FB rings are stronger and more durable than X-rings, with significantly less friction
- Gold links and rollers, silver inner plates, pins and bushings
- Clip-type connecting link included
- CC recommended / average tensile load 450cc & above / 7,937 lbs
- Replacement connecting M link available - retail \$6.95

**CHROMOLY-STEEL
FRONT SPROCKETS**

\$14.⁹⁵ - \$26.⁹⁵

- Machined from impact and wear resistant chromoly steel
- Inner splines broached to provide maximum spline-to-countershaft contact, which helps distribute driveline forces over the largest possible area
- Heat treated, then finished with a nickel coating for corrosion resistance and lubricity
- BE SURE TO CHECK FOR CLEARANCE WHEN ORDERING SIZES LARGER THAN STOCK
- Made in the USA

ALUMINUM REAR SPROCKETS

\$30.⁹⁵ - \$64.⁹⁵

- The 7075 T651 aluminum used for these sprockets receives an extra tempering, which reduces distortion and provides optimal thickness vs typically thinner 7075 T6 sprockets
- 100% machined, no stamping or grinding
- Optimal tooth thickness results in maximum tooth and chain contact
- Most Moose Racing® rear sprockets come anodized in black; some Moose Racing® rear sprockets are available in red, orange, or blue (indicated by footnote)
- Made in the USA

HIGH PERFORMANCE 4-STROKE PISTON KITS BY CP PISTONS

\$4.95 - \$394.95

- Moose Racing® pistons feature x-style forgings and fully boxed-style (race pistons) forgings for ultimate strength, minimizing friction, durability, power, and weight reduction
- We are proud to offer our Pro Race Piston kits for select models
- The Pro Race Piston increases the durability by reducing the stresses in the pin bore area
- The Pro Race Piston allows the pin to flex while removing stress from the area
- Full radius dome designs maximize quench while eliminating hot spots that promote detonation
- Internal bracing maximizes durability while decreasing friction in the pin assembly
- Fully-boxed style (race pistons) forgings come standard with skirt coating which reduces friction, which in turn reduces heat. These are called out in the application chart
- Our race piston kits include a DLC pin. This technology has been proven and used because of its high resistance to abrasive wear, which extends the service life and reliability under extreme conditions
- Each Moose Racing® piston kit includes a high performance piston, wrist pin, rings, circlips, and a top end gasket kit
- Replacement parts available
- BE SURE TO USE RACE FUEL WITH SOME APPLICATIONS (CALLED OUT IN CHART)
- Made in the USA

RADIATOR CAPS

\$23.95 - \$28.95

- Replacement cap is the least expensive and easiest way to solve or troubleshoot your liquid cooled bike/ATV radiator problems
- Upgrading to a high pressure 1.6 bar, 1.8 bar or 2.1 bar from the stock radiator cap is the simplest and least expensive way to avoid over-boiling your engine
- Raising your cooling system's maximum operating pressure increases your coolant's boiling point, allowing you to ride harder and longer
- Black finished cap
- Universal fit for most Japanese models
- High temperature corrosion resistant silicone seals

MOOSE RACING® MUD RADIATOR COVERS

\$37⁹⁵

- Designed to protect your radiator from clogging up with mud in inclement conditions.
- Easy to install with elastic straps that wrap around the radiator core housing.
- Made of silicone so that mud will not stick to radiator causing restriction of air into cooling fins.
- Used by many GP and US MX Factory race teams around the world.

MEASURING FOR EXHAUST SPRING LENGTH

1. Exhaust springs should be measured when they are off the vehicle. Wear eye protection when removing
2. The length measurement should be taken from inside hook to opposite end inside of hook
3. For correct fit, an exhaust spring should not be extended more than 20% of its free length

*SPARK ARRESTOR REPACKS
WHEN CHOOSING A REPACK KIT FOR A SPARK ARRESTOR SILENCER, SUBTRACT 5.5" FROM THE LENGTH OF THE MUFFLER BODY FOR THE ACTUAL PACKABLE LENGTH AND ORDER BASED ON THAT LENGTH. EXAMPLE: A FMF TURBINE CORE 2 WITH A 14" LONG BODY WILL HAVE AN 8.5" PACKABLE LENGTH. ORDER THE NEXT LONGEST LENGTH. USE THIS RULE FOR PRO CIRCUIT ALSO.

**CUT TO LENGTH UNIVERSAL PILLOWS
PART NUMBERS PROVIDED ABOVE ARE DESIGNED TO PACK ALL MUFFLERS WITH CORE DIAMETERS BETWEEN 1.75" - 2.25" AND SHELL CIRCUMFERENCES BETWEEN 12" AND 13.5". MEASURE THE DISTANCE AROUND THE OUTSIDE OF THE MUFFLER'S SHELL TO DETERMINE ITS CIRCUMFERENCE.

WHEEL SPACER FRONT OEM STYLE

- Replace or upgrade OEM wheel spacers with these durable parts
- Water and dirt grind between wheel bearing seals and soft OEM aluminum wheel spacers, which creates grooves and allows for bearing contamination
- Moose Racing® wheel spacers feature hardened steel contact surfaces. This makes for a tight seal that will last for years and keep your bearings fresh
- Our spacers are made from either anodized aluminum with a press fit - hardened steel shell, or solid - hardened and ground bearing steel, depending on application
- Upgrade to Moose Racing® wheel spacers when you replace damaged wheel bearings, or before you have to
