User Note Documentation:

The lower part of the Oakland City, CA excel sheet contains the tract ID and total pop counts for Berkeley (Alameda and Contra Costa County).

For the 1930's tract data, we have the data for Baltimore (24510) and Los Angeles (06037), which we hand-entered at the National Archive in Washington DC. However, this data is far less reliable due to the fact that the numbers of each variable "do not" add up to the total pop number (it should be). Other cities are attached that have the same condition.
