EasySmart DGS-1100 Series (10/100/1000)

An ideal entry level managed solution for micro and small businesses.

- Loopback protection to help prevent network loops
- VLAN support to segment the network into logical groups
- Quality of Service (QoS) support to help manage network congestion
- Simple management with built-in WebGUI

Models: DGS-1100-08, DGS-1100-16, DGS-1100-24

DGS-1100 Series

WebSmart DES-1210 Series (10/100) and DGS-1210 Series (10/100/1000)

WebSmart switches are a great way to prioritize bandwidth and increase performance in a small network.

- All the same features as the DGS-1100 EasySmart series Plus:
- PoE Support to power devices like IP Cameras, VoIP Phones and PoE Access Points
- Asymmetric VLAN to route between VLANs without a Layer 3 device
- SFP slots to connect switches/devices via Fiber
- Better QoS, security and user management

Models: DES-1210-28, DES-1210-28P, DES-1210-52, DGS-1210-10P, DGS-1210-20, DGS-1210-28, DGS-1210-28P, DGS-1210-52

DES/DGS-1210 Series

SmartPro DGS-1500 Series (10/100/1000)

SmartPro switches are ideal choice as a part of an Small business network core

- All the Same features as the DGS-1210 Websmart series Plus:
- Full PoE/PoE+ support to power devices like IP Cameras, VoIP Phones and PoE Access Points
- Static routing to connect different networks
- Single IP Management to manage up to 32 switches anywhere on the network with 1 IP address

Models: DGS-1500-20, DGS-1500-28, DGS-1500-28P, DGS-1500-52

DGS-1500 Series

SWITCHES

STORAGE

L2 Managed DES-3200 Series (10/100)

DES-3200 Series act as departmental access layer switches connecting LAN clients.

- All the Same features as the DES-1210 Websmart series Plus:
- Full command line interface (CLI) for management
- Single IP Management to manage up to 32 switches anywhere on the network with 1 IP address
- Better QoS, security and user management

Models: DES-3200-28, DES-3200-28P, DES-3200-52, DES-3200-52P

DES-3200 Series

L2 Managed DGS-3120 Series (10/100/1000)

The DGS-3120 series stackable switches can be used in a secure SMB core or the edge of an enterprise network.

- All the Same features as the DGS-1500 Smartpro series Plus:
- Full command line interface (CLI) for management
- 10GB Physical Stacking up to 6 units to add a resilient backbone for throughput and management
- Redundant power supply support to decrease network downtime
- Enhanced QoS, Authentication, Authorization and Accounting (AAA) features

Models: DGS-3120-24PC/SI, DGS-3120-24TC/SI, DGS-3120-48PC/SI, DGS-3120-48TC/SI

DGS-3120 Series

L2+ Managed DGS-3420 Series (10/100/1000)

The DGS-3420 Series are to be used as departmental access layer switches or aggregation switches to form a multilevel network backbone with centralized high-speed servers.

- All the Same features as the DGS-3120 L2 Managed Series Plus:
- Static Routing and Dynamic RIP routing for IPv4 and IPv6 networks
- 10GB SFP+ Support for Stacking and/or uplink into Server equipment
- 10GB Physical stacking up to 12 units
- Faster switching performance

Models: DGS-3420-28PC, DGS-3420-28SC, DGS-3420-28TC, DGS-3420-52P, DGS-3420-52T

DGS-3420 Series

L3 Managed DGS-3620 Series (10/100/1000)

The DGS-3620 Series are designed to be used in the network core, offering full layer 3 features and 10Gb connectivity.

- All the Same features as the DGS-3420 L2+ Managed Series Plus:
- Dynamic OSPF Routing for IPv4 and IPv6 Networks
- PIM-SM/DM to Manage Multicast traffic
- Other Enhanced features like BGP, DVMRP, IGMPv1/2/3

Models: DGS-3620-28PC/SI, DGS-3620-28SC/SI, DGS-3620-28TC/SI, DGS-3620-52P/SI, DGS-3620-52T/SI

DGS-3620 Series
