In Brief

Naloxone kits mandated for Ontario construction

TORONTO
New legislation will require workplaces that are at risk of a worker opioid overdose, such as construction sites, to have naloxone kits, medication that can temporarily reverse the effects of an opioid overdose and allow time for medical help to arrive.

The Ontario government introduced legislation March 1 in the Working for Workers Act, 2022, that, if passed, would introduce the highest fines in Canada for companies that fail to follow workplace health and safety laws.

Between March 2020 and January 2021 about 2,500 people died from opioid-related causes, states a release, adding of the victims who were employed, 30 per cent were construction workers, by far the most of any industry impacted.

Requiring businesses in high-risk settings to have naloxone kits on hand will help reduce the stigma around opioid abuse, raise awareness about the risks of accidental overdoses and potentially save hundreds of lives a year, the release adds.

Also included in Working for Workers Two are changes to the Occupational Health and Safety Act to increase the maximum fines for businesses that fail to protect their workers.

"While Ontario's workers have been there to support us before and during this horrible pandemic, it's just as important that we are there to support them," said Michael Tibollo, associate minister of mental health and addictions, in a statement. "By ensuring access to life-saving naloxone kits where and when our workers need them, our government is helping to protect more Ontarians struggling with addiction from preventable deaths and taking decisive action to address the challenges of the opioid crisis."

The Daily Commercial News will have more on this story.

BIM's potential is boundless but mind contract language, CI panellists urge

DON WALL
STAFF WRITER

Panellists at a recent Ontario conference on construction risks agreed BIM is a transformative tool that can bring seemingly limitless benefits — but

with its growth comes the need for prudence and rigour from the teams drafting project contracts.

Chief technology officer Brent Mauti of Turner Fleischer Architects, an ardent BIM advocate, compared notes with EllisDon's

chief innovation officer Rosemarie Lipman and Andrea Lee, partner at Glaholt Bowles LLP, during a recent Canadian Institute (CI) session devoted to risks associated with technology. The session was held as part of CI's Managing Risk in Construction Contracts and Projects conference.

For all of BIM's potential to link together project teams, it seems there can be failures incorporating the system into contracts.

Lee deals with complex, multimillion-dollar projects but sometimes when she looks at the contract, expectations for BIM deliverables can be a few short sentences.

"Sometimes you get to the BIM section and it's actually quite short, like it's very high level and it's almost like the parties are just trusting their team to understand the technical aspects just to do it," she explained.

"What if there are new parties brought into the project and they don't have an understanding of what the rules are? I put on my lawyer's hat and think the parties who were actually involved in the project need to get together and put the plan down in writing."

Mauti agreed some project owners insert a minimal BIM clause in the expectation that the BIM team will figure out its role.

"I've seen a small BIM paragraph when I've been brought into a major project... 'You're the BIM guy, implement this,' and you read the 10 or 20 lines that doesn't really say much, and now you've got all these entities coming together to try to figure out how to rationalize the BIM clause buried inside a contract," he said.

See BREAKDOWNS, Pg. 3

Sealing Up the Scout

Waterproofing work continues at the Scout Condos on St. Clair Avenue West in Toronto. The owner is Graywood Developments and the construction manager is 59 Project Management. The work includes one 12 storey building with 269 suites and retail on the ground floor. Amenities will include a family room, dining room and fitness room on the main level and a rooftop lounge. The project was designed by CMV Architects and the interior design is by TACT Design. Consultants are Blackwell Structural Engineers, Trace Engineering Ltd. (electrical) and Strybos Barron King Ltd. (landscape). Subtrades include Orin Contractors Corp. (demolition) and Michael Bros. Excavating.

Bystander intervention training aims to arm people with tools to take action

ANGELA GISMONDI
STAFF WRITER

Do you know what to do when you see something happen that is discriminatory or a form of harassment?

EllisDon, in collaboration with the Canadian Construction

Association (CCA), recently held a virtual bystander intervention training program to raise awareness and provide industry partners with tools to promote inclusivity on construction sites and offices.

"The bystander intervention training program was developed to

equip people with the tools to help in situations where you believe someone is or may be bullied or harassed," explained CCA president Mary Van Buren in an email to the Daily Commercial News.

"These situations can take people by surprise and so it is help-

ful to have an approach to empower each one of us to speak up."

Jennifer Khan, head of inclusive diversity with EllisDon, said the session taught people what they need to know and what to do when a situation like this arises.

Devimco breaks ground on Longueuil towers

GROUPE DEVIMCO

Groupe Devimco held an official groundbreaking for its two-tower Sir Charles Condominiums project in Longueuil, Que. on Feb. 22.

LONGUEUIL, QUE.

Groupe Devimco has announced a financial partnership with the Fonds immobilier de solidarite FTQ for the construction of its two-tower Sir Charles Condominiums project in Longueuil, east of Montreal.

The condos represent the first phase of a large multi-purpose project in the vicinity of the downtown and the Longueuil Universite-de-Sherbrooke metro station.

Devimco held an official groundbreaking and the unveiling of a sales office and model condo for the project's initial highrise recently. The project is valued at more than \$800 million and is the largest real estate development to be built in the city of Longueuil to date, stated a release.

In total, the transit-oriented development project will include 1,612 units, with a total area of 1.6 million square feet.

The Sir Charles Condominiums will consist of two high-rises with lower commercial extensions. They will be built on a portion of the existing P2 parking lot, not far from Place

Charles-Lemoyne. The first will feature 336 units on 25 floors. A terrace, a large lounge area with a barbecue area, an outdoor pool and an indoor Nordic spa will be located on the roof.

On the ground floor, there will be a lounge and a gym with a cardio area overlooking the inner courtyard. Occupancy of the first highrise is scheduled for 2024.

"We are pleased to be partnering with the Fonds immobilier de solidarite FTQ, a loyal partner in many of our projects," said Serge Goulet, president of Devimco Immobilier, in a statement.

"The confidence that this important Quebec institution places in us demonstrates the credibility and quality of our mixed-use real estate projects."

In a later phase, Groupe Devimco will be building two more highrises atop a commercial basilaire above the current metro station.

PCA pledges to support Ukrainian refugees coming to Canada

EDMONTON

The Progressive Contractors Association of Canada (PCA) says it's willing to work with Canadian governments to help Ukrainian refugees settle in Canada.

The PCA stated in a release it applauds the the federal government's move to fast-track Ukrainian refugees and calls on the provinces to take all available measures to facilitate their

entry, settlement and employment as quickly as possible.

"We stand with others around the world in condemning Russia's vicious and unprovoked attack on the people of Ukraine," said PCA president Paul de Jong, noting PCA contractors employ many workers of Ukrainian descent.

"We are painfully aware that Ukrainians are being displaced by the cur-

rent conflict, and pledge to make jobs available for those who would like to join PCA members in building Canada and rebuilding their lives.

"We want Ukrainians to know that we support them; we admire their courage and resilience and welcome their skills. We believe the construction industry has a great deal to offer now, and in the future."

GTA condo sales off to a strong start in January

TORONTO

The Greater Toronto Area new-home market experienced a very busy January, the Building Industry and Land Development Association (BILD) announced recently.

There were 2,853 total new-home sales in January, up 18 per cent from January 2021 and 47 per cent above the 10-year average, according to Altus Group statistics. It was the highest number of new homes sold in January in 19 years.

A record 2,274 new condominium apartment units, including units in low, medium and highrise buildings, stacked townhouses and loft units, were sold in January. This was 113 per cent above the 10-year average and more than 40 per cent higher than the previous high in 2017.

Sales of new single-family homes, including detached, linked and semi-detached houses and townhouses (excluding stacked townhouses), with 579 units sold, were down 33 per cent from the 10-year average.

With nine new condominium apartment projects opening in January, condominium apartment remaining inventory increased slightly compared to the previous month, to 8,333 units, but still represented only 2.9 months of inventory based on average sales for the past 12 months.

A balanced market would have nine to 12 months of inventory.

Condominium apartment inventories have fallen to within 1,000 units of the recent lows of 2017 and are half the level compared to the 2011-2016 period, stated the BILD report.

Remaining inventory for single-family homes reached a record low of 550 units in January, about 10 per cent of the level from 2019, before the start of the pandemic, and far below the more than 15,000 units on average for the 2000-2009 period.

Remaining inventory includes units in preconstruction. Benchmark pricing eased somewhat in January for both condominium apartments and single-family homes, BILD reported.

The benchmark price for new condominium apartments was just over \$1.1 million, which was up 12.7 per cent over the last 12 months, and the benchmark price for new single-family homes was \$1.7 million which was up 30 per cent over the last 12 months.

Breakdowns occur when expectations are not conveyed clearly in contracts

Continued from Pg. 1

Essentially, Mauti explained, BIM is made up of two components, 3D model objects and a structured database. At its best, in the early stages BIM can ensure design information is co-ordinated and reflects the stakeholders' vision of the project; during the construction stage it allows collaboration and "clash detection"; and during handover it can deliver rich data that is an asset for the full lifecycle of the project.

"Nothing gets lost, nothing has to be translated or is misunderstood," said Mauti.

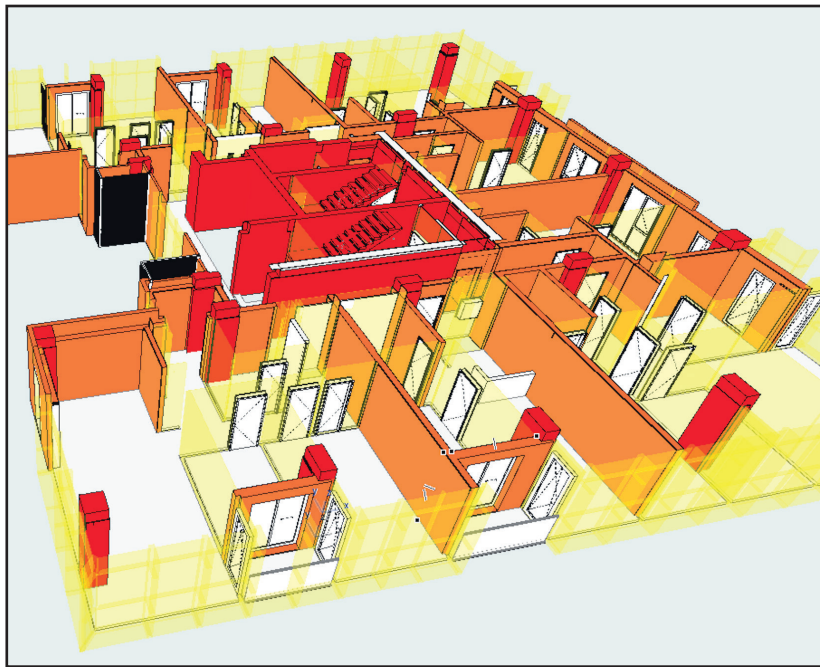

BIM is ideal within an integrated project delivery process, Mauti added.

"There is no finger-pointing, all the walls are broken down," he said, recalling how with one alliance project in Australia, "We were all collaborative and it was really a beautiful world."

Breakdowns occur when there is failure to provide for parties' expectations in the contract, the panellists said. The use of boilerplate BIM requirements that are not fully agreed upon by the parties may result in the delivery of more than is actually required for the project. Use of vague wording such as "must provide BIM" can result in misalignment between stakeholders.

Or the BIM team can stray too far from the owner's intentions, Lipman said.

"With every project there needs to be a way to enforce the BIM process," she said. "We've seen some of them where the plan isn't followed

GRAPHISOFT

At a recent Canadian Institute conference, BIM was praised as a tool that enables architects, engineers, constructors, owners and operators to work together, building synergy between data contributions and project modeling. Pictured: Archicad 25 from Graphisoft.

from the design phase forward and then it's too difficult to catch up, so the digital can't catch up to the physical. It's too much work. The project is too complex."

To minimize disputes in a project using BIM, the two lawyers outlined, there should be clear requirements that are appropriate for the project in the prime contract; those requirements must be dropped down in the appropriate subcontracts and consulting agreements, with clear deliverables; upfront planning is essential, with a clear work breakdown

structure that all project stakeholders follow; and stakeholders must validate and verify model co-ordination and progress throughout the project.

"In situations where there's not clear requirements, you're managing and co-ordinating information that some is going to be in 2D, some is going to be in 3D, and there's not going to be alignment between the two," said Lipman. "I think it's really important to start with the prime contract and then it all waterfalls down."

EllisDon, CCA partner to provide participants with a voice to speak up in difficult situations

Continued from Pg. 1

"We're trying to change the culture by giving people tools to take action," said Khan. "That's exactly what bystander intervention is all about.

"They give you five different options that you can use to your preference in your own environment that is safe for you to intervene when you see harassment and discrimination happen."

The 90-minute training session was led by New York City-based Hollaback, a non-profit organization that raises awareness about how to combat workplace harassment.

"We partnered with them to be able to offer this session but then we had this realization...EllisDon is one part of the construction puzzle, so even though EllisDon might know what to do when something happens, in order for us to really change the industry everybody needs to know," said Khan.

It drew more than 700 participants from various sectors and organizations.

"People want safe and respectful workplaces — places where they are welcomed, happy to be a part of and contribute to," said Van Buren. "This training is useful for people of all levels and experience to be part of the solution and make some positive change in the industry."

One of the key takeaways from the session were the 5 Ds of bystander intervention, which are different methods that can be used to support someone who is being harassed, emphasize that harassment is not OK and demonstrate to others that they have the power to make the community safer as well.

The 5 Ds are:

- **Distract** — say something to change the subject, diffuse the situation;
- **Delay** — turn to the person who has been treated inappropriately and say something in support or speak

with them after to check in and see if they're OK;

- **Delegate** — advise another person so they can take the appropriate action;

- **Document** — write down what you heard/saw and share it with the person or another person in authority; and

- **Direct** — address the situation in the moment.

"Each person no doubt took away an important tip," said Van Buren. "For example, sometimes it's the little things, like shaking your head 'no,' that shows support to the person being disrespected. The other takeaway is that you can approach each situation differently, empowering you to move to an upstander rather than a bystander."

For too long the industry has accepted various forms of harassment and discrimination for various reasons, Khan said.

"Whether it's because they experienced it, they've seen people before them experience it, they think that it's funny, they think that it's not a big deal or they don't have the education to know that it's not right," she explained. "We wanted to draw that line to say, 'this is acceptable behaviour and this is not.' Now there are hundreds of people that you work with that will know what to do and will not only call out bad behaviour but will actually take action."

EllisDon collaborated with the CCA and other partners to customize the session and the scenarios used.

"We came up with eight different scenarios that we would ask people's opinion on," Khan said. "Some of the responses that we got back in our feedback survey was this has been needed for so long.

"Ninety-eight per cent of survey respondents indicated that they have a better sense of what disrespectful behaviour looks like and 97 per cent said they would know how to safely intervene next time they see harassment happen."

Contractors must be ready for Ontario's 'Open Period'

Ready. Set. Go. It's "Open Period" for labour representation in Ontario.

From March 1 to April 30 employees can decide the fate of their representation for the next three years. Will they continue with their current union? Will they attempt to decertify their union? Or will a union attempt to displace a current one?

Most common within the ICI construction sectors are decertification applications, Diane Laranja, partner and labour law specialist with Filion Wakely Thorup Angeletti LLP, told the Daily Commercial News. There could be several reasons.

"A unionized employee may wish to negotiate directly with their employer without the involvement of a union or without the administration of a collective agreement. They may not be satisfied with the wages, benefits, working conditions and representation, or they may not be satisfied with the level of control they have over the negotiation process."

It's a period of uncertainty for workers, unions and employers.

"Whether it's an application to decertify or to switch from one union to another, the outcome affects not only the terms and conditions of employment but also employees' access to work," says Laranja. "The outcome also affects what work the employer can bid on or perform."

There are specific rules governing how a decertification begins and is carried out. Timelines are tight and governed by the application date.

At the outset, it's strictly a matter between workers and unions, not employers.

"An employer has no lawful ability to commence a displacement or termination application," says Sahil Shoor and Tushnar Anandasagar of Gowling WLG.

Although only one employee's name appears on the decertification application, Laranja explains the application must be accompanied by signed and dated evidence naming the employees expressing their wish to no longer be represented by that union.

If the Ontario Labour Relations Board (OLRB) determines at least 40 per cent support decertification, a vote will be held within five business days of the application filing date.

However, within two days of receiving the application, Laranja says the employer must file a list of employees by name in order to assist the OLRB in determining which employees are within the bargaining unit and therefore eligible to vote.

"The union has an opportunity to challenge the list in case someone has not been identified and should be includ-

ed. It's very important to ensure that those who participate in the vote are properly included within the bargaining unit.

"For example, there should not be a situation where painters participate in a vote involving construction labourers' work. Employees not at work that day for whatever reason, even those employed for a long period and very loyal to the union, won't count."

Legal Notes
John Bleasby

Subcontractors and management are likewise excluded.

It makes the date of application strategically important as well, says Laranja.

"An employee seeking to decertify will be very intentional about what day they file the application."

Although employer conduct and communication is otherwise greatly restricted, they may intervene within the two-day window to make proposals concerning the conduct of the vote, say Shoor and Anandasagar.

Voting at numerous sites or a central site may each carry certain advantages for the employer, while also ensuring all those qualified can cast votes. There is also an obligation to post certain notices in the workplace.

But that's about it.

"If an employer plays any role whatsoever in instigating, encouraging or assisting employees in a decertification application, the OLRB will dismiss the decertification application and may find that the employer has committed an unfair labour practice," says Laranja.

Even casual comments made by supervisory staff matter.

"The employer must defend themselves against statements alleged to have been made or conduct alleged to have been done."

Successful decertification requires a minimum 50 per cent of ballots cast.

Rumours heard over coffee or around worksites can often give employers advance warning of any potential decertification or raiding applications. Given the high stakes and timelines, professional legal advice should be sought immediately in order to properly prepare.

This Request for Proposals (the RFP) is an invitation by the Town of Bradford West Gwillimbury (the Town) to prospective proponents to submit proposals for the Renovation of 177 Church St., as further described in Section A of the RFP Particulars (Appendix D) (the Deliverables). In late 2020, the Town acquired the former Bradford Elementary School property. A 28,600 sq. ft. single-storey building situated on approximately three acres. The original building dates back to the 1950s with several additions. Town Council has approved the creation of a Community Hub with a vision to include social support services, skills development centre, not-for-profit offices, commercial kitchen, flex-use community space, meeting rooms, and other amenities. The Town seeks a qualified contractor to undertake the renovations and additions described in the tender specifications and associated drawings. Documents can be obtained at: <https://townofbwg.bidsandtenders.ca> Question Deadline: Feb 18, 2022 4:00:00 PM (EST)

RFQ CONTRACTOR - ACCESSIBILITY RENOVATIONS AT MERIDIAN HALL

\$5,000,000 est

TORONTO, Toronto, ON

1 Front St E, Toronto, M5E 1B2

TENDERS DUE, 08-Mar-22 at 12:00 PM ET. Solicitation #: 2022-021E

Owner: TO Live, 1 Front Street East, Toronto ON M5E 1B2 416-368-6161

Con Admin: TO Live, Ronak Gandhi, 1 Front Street East, Toronto ON M5E 1B2 416-368-6161 x8284

Repro: Biddingo, 1210 Sheppard Ave, East, Suite 305, North York ON M2K 1E3

Request for Supplier Pre-qualifications to establish a Roster of General Contractors for Accessibility Renovations at Meridian Hall. The focus of this renovation is to provide enhanced accessibility through the replacement of existing Washrooms, Travel paths, and supporting systems. The work will start in the spring of 2022 and be scheduled for completion by the winter of 2022. The areas will span all 5 floors of the venue and be completed during its regular operational times. The contractor should be capable of managing multiple trades in multiple work areas in an operational environment in order to be successful in this project. The project will consist of +/- 6 sets of new accessible/ Uni-sex washrooms, New accessible kitchen along with chair lifts and other elevating devices. The work will be constructed in multiple eras of construction from the 1960s to the early 2000s and the constructor shall possess a team that's familiar with construction types of these eras and their hazards. TO Live Project range for this program is: 3 Million - 5 Million CAD. Please note that this amount is only an approximation and does not reflect the total amount that will be paid to any Prequalified Supplier. This amount is for information only and should not form the basis of any submission. Question Deadline 03/03/2022 12:00:00 PM

Con Admin: Township of Clearview, Dan Perreault, 217 Gideon St, Stayner ON L0M 1S0 705-428-6230 x230 Fax: 705-428-0288

The Township of Clearview desires to retain the services of a design consultant and contractor team to provide a new combined firehall and public works building on the property of 5212 County Road 9 in New Lowell, Clearview, Ontario. This Request for Proposal is issued by the Township of Clearview (Township). The Township desires to retain the services of a design consultant and contractor team (Proponent) to provide a new combined firehall and public works building on their property at 5212 County Road 9, New Lowell, Ontario, to be known as the New Lowell Joint Operations Centre. This project also includes demolition and removal of existing structures on site. The project is to be

delivered in the design build procurement method, with construction happening in 2022. Please refer to the detailed scope of work and available drawings and reports contained within the appendices for more information. The purpose of the Design-Build Proposal process is to enable the Township to select a qualified Design-Builder responding to the Request for Proposal (RFP) requirements and achieving the highest overall score in the evaluation for the Design-Build implementation of the above-captioned project. ters for the Town's Transit System. The project will involve the Proponent (supplier / manufacturer) of the transit shelter providing the Town with a proposal for their product and the associated price to supply and install the transit shelter and related accessories. Multiple products with associated pricing may be presented within the proposal. It is to be understood that the supplier / manufacturer, in submitting their proposal, may be interviewed with regard to their proposal, by the Town staff selection committee, so that the Town of Wasaga Beach can make an informed decision as the selected transit shelter as this will be the basis for continuity of future installation of transit shelters moving forward. Construction of the concrete pads will be completed by Public Works staff prior to delivery of the shelters. Documents can be obtained at: <https://wasagabeach.bidsandtenders.ca> Question Deadline: Fri Mar 25, 2022 2:00:00 PM (EDT)

The Town of Wasaga Beach is soliciting tenders from qualified contractors for the construction of Joanne Crescent located along Ramblewood Drive between Dowlwood Drive and Rodrium Road. The tendered work generally consists of: Installation of erosion and sediment control measures. Clearing and grubbing of existing trees and brush within the limits of grading and construction, prior to April 15th 2022. Removal of existing asphalt and concrete curb and gutter for future connections. Removals of existing blow off valves and excavation to locate and connect to existing watermain, storm sewer and sanitary sewer. Installation of watermain, storm sewer and sanitary sewer including dewatering and back-filling operations. Installation of residential sanitary and watermain services for the undeveloped residential lots along Joanne Crescent. Installation of road crossing conduits for utility lines and street lighting lines. Preparation of road subgrade and placement and compaction of granulars. Installation of concrete curb and gutter. Concrete sidewalk and boulevard construction. Placement of asphalt on Joanne Crescent. Site restoration work including topsoil, seed and cover or sod for boulevards and disturbed areas within the construction area. Documents are available at: <https://wasagabeach.bidsandtenders.ca/>

Construction start 28-Mar-22; Completion by 30-Sep-22;

Bids to Role: Owner; Bid Bond \$100,000.00; Performance Bond 100%; Payment Bond Required; M & L Bond 100%;

RFQ CONTRACTORS - DECOMMISSIONING OF THE MERRITT STREET TUNNEL \$200,000 est

OSHAWA, Durham, ON

Merritt St, Oshawa, L1H 1A6

TENDERS DUE, 14-Mar-22 at 2:00 PM ET. Solicitation #: RFPQ-1092-2022

Owner: Regional Municipality of Durham, 605 Rossland Rd E, Whitby ON L1N 0B8 905-668-7711 Fax: 905-666-6210

Con Admin: Regional Municipality of Durham, Jason Murray, 605 Rossland Rd E, Whitby ON L1N 0B8 905-668-7711 Fax: 905-666-6210

Prequalification of contractors for the decommissioning of the Merritt Street tunnel. Regional Municipality of Durham (Region) is intending to retain the services of an experienced, specialized construction firm to safely abandon a steel tunnel liner near Merritt Street, under Highway 401, in the City of Oshawa. The Region's primary objective is to safely abandon the existing tunnel liner by filling the liner and any potential void space surrounding the liner with grout. The goal outcome of this project is to minimize the risk of any future voids below Highway 401 from impacting the operation and use of the highway. The site is located on Highway 401 between Simcoe Street South (Regional Road 2) and Ritson Road South (Regional Road 16) in the City of Oshawa. The depth of the liner below the highway pavement varies from 2 metres to 3 metres. Refer to Figure 1 for the location. The key milestones in the proposed construction schedule are as follows: 1. Contractor Prequalification Complete - March 2022 2. Tender Award - June 2022 3. Construction Commencement - August 2022 4. Construction Completion - October 2022 Documents can be obtained at: <https://durham.bidsandtenders.ca> Question Deadline: Mon Mar 7, 2022 5:00:00 PM (EST)

Construction start 01-Aug-22; Completion by 31-Oct-22;

Owner requires that all interested parties sign a Non-Discloser Agreement (NDA) in order to access the plans and specs for this project. Modernize existing service and freight elevators at MUMC. The project scope is to modernize existing freight elevator cars located at MUMC as per the specifications detailed herein under Appendix D (RFP Particulars), Section A (Deliverables). HHSC will provide an optional site visit for those proponents wishing to see the elevator cars in more detail at the MUMC site. The date of the site visit is detailed in section 1.4 RFP Timetable. A maximum of one (1) representative from the proponent's office shall attend the site visit to help maintain proper social distancing guidelines. Subcontractors cannot attend on behalf of a proponent. Proponents are encouraged to arrive 15-30 minutes early prior to the scheduled start time to screen at the front entrance door of the hospital. The purpose of the site visit is not to answer questions regarding the nature of the work of the RFP. Such questions shall be submitted to the RFP Contact, and written clarification and additional information will be issued in the form of an Addenda to all proponents via Bidding. Proponent's wishing to attend are to notify the RFP Contact by Tuesday February 15, 2022, 3:00PM EST, providing a name and contact phone number of the attendee. The City of Thorold invites applicants to review the attached RFPQ for Contractor prequalification for the rehabilitation and adaptive re-use upgrades to the Municipal Operations Centre. Details and Scope of work are included within the document.

The City is seeking to retain a General construction Contractor for rehabilitation and adaptive re-use upgrades to the Municipal Operation Center located at 1543 Beaverdams Rd, Thorold, ON L2V 1N6 (the "Project") as outlined in Section 3 Scope of Work. The Project is critical to ensure the long-term operations of the City. Contractors have the opportunity to join the pre-Qualified list for the Project. Only Contractors that are prequalified through this Pre-Qualification process will be invited to submit a bid for the Project. It is anticipated that the subsequent Request for Proposal will be issued in March 2022 with construction starting in May 2022. The Request for Proposal will be issued through Bidding. This RFPQ outlines the scope of required work, respondent responsibilities, prequalification requirements, selection criteria, and related terms and conditions. During the RFP phase a complete tender package will be issued to prequalified Contractors with the award criteria. To be added to the pre-Qualified list respondents must obtain a minimum evaluated overall score of 70% and a minimum evaluated score of 30% in each evaluated criterion; explained in Section 3.0 of this RFPQ.

The Owner is interested in constructing a new Water
 Resource Recovery Facility (WRRF) at 9682 Wel-
 lington Road 52, Erin, ON N0B 1T0. The project
 involves the construction of the new treatment
 plant along with outfall and forcemain between the
 two. - A new 7.172 ML/d wastewater treat-
 ment plant complete with septage receivals and
 screening, headworks, primary treatment, sec-
 ondary treatment, tertiary treatment, UV disin-
 fection, solids handling and winter solids storage.
 - Effluent or treated water pumping station and
 forcemain to discharge treated water to outfall
 located approx. 2.5 km away from treatment
 plant. - Construction of outfall located on the
 West Credit River between 10th Line and Winston
 Churchill Boulevard. Town contact for questions:
procurement@erin.ca Questions in relation to this
 RFT shall be submitted through the Bidding Sys-
 tem. Deadline for all questions regarding this RFT
 is February 8, 2022 at 2:00 PM EST.

St. Mark's Church is a historic church which has been unoccupied since the 1990's. Phase 1 Exterior Restoration was undertaken to restore the exterior of the church and install base electrical, water and heating to the building in 2017. The Phase 2 Restoration of St. Mark's Church includes : a) Building a new addition to the west of the church to include bathrooms, a kitchen, storage and a new entrance b) Restoration of selected features of the existing church c) Associated interior finishes d) Associated Structural, Mechanical & Electrical work e) Civil services (storm + sanitary), and f) Landscape improvements inclusive of storm water management, hardscaping, landscaping and plantings and driveway entrance from Hunter Street west. The following is a list of contractors that the City of Hamilton has pre-qualified under a separate procurement process specifically for heritage conservation work ("Heritage Contractor"): - Clifford Restoration - Collaborative Structures - Colonial Building Restoration - DJ McRae Contractors - Heritage Grade Architectural Restoration - Heritage Restoration - Limen Group Construction - Phoenix Restoration - Robertson Restoration - Roof Tile Management - Ultimate Construction Any heritage work, including: - Heritage masonry repairs - Millwork installation and conservation in the church, to be detailed in the specifications - Window and door scope of work in the church - Plaster repairs in the church - Woodwork finishing shall be carried out by a Heritage Contractor. Therefore, Pre-qualified Applicants resulting from this RFPQ shall: a) Be a general contractor and subcontract all heritage work to a Heritage Contractor; or b) Be a Heritage Contractor. The value of this Project is estimated to be between \$2.7 million and \$3.7 million. Question Deadline: Tue Mar 22, 2022 12:00:00 PM (EDT) Documents are available at: <https://hamilton.bidsandtenders.ca/>

SUPPLY AND INSTALLATION OF PIPE SUB-DRAINS \$200,000 est

MIDDLESEX CENTRE, Middlesex, ON

Multiple Locations, Middlesex Centre, NOL 1E0

TENDERS DUE, 09-Mar-22 at 12:00 PM ET. Solicitation #: M-E-22

Owner: County of Middlesex, 399 Ridout St N, London ON N6A 2P1 519-434-7321 Fax: 519-434-0638

Scope of Work: The work includes supplying all labour, equipment and materials to install heavy wall plastic tile shoulder drains on both sides of the roads at locations designated by the County. Outlet pipes will be installed by the County. Specifications for Supply and Installation of Pipe Sub-drains: - The sub-drain shall be 100 mm (4") diameter perforated plastic tubing of a minimum weight of 175 grams/ft. - The tile shall be installed by plowing to a minimum depth of 500 mm at a location 1.0 m. from proposed edge of pavement or as set by the County. Minimum grades shall be 0.25% and grades shall be set using a laser where pavement grades are flat. - These roads will be resurfaced after the drains are installed.

However, effort must be made by the contractor to avoid damaging existing pavement. Any excessive damage caused by the contractor during sub drain installation shall be re-instated prior to final paving. - Low points in the grade are to be marked by the Contractor. - The County will be responsible for restoring the gravel shoulder - It is agreed by the Contractor that in case the work is not completed by the completion dates specified, the balance of the remaining work is cancelled and there will be no payment made to the contractor for any work not completed including the supply or restocking of materials. TORONTO, Toronto, ON

BID RESULTS

How to use the Post-Bid Reports

The Post-Bid Reports section of Daily Commercial News include Bid Results, Awards and projects Under Construction. Projects located throughout Ontario are reported.

Bid Results

The Daily Commercial News Bid Results section includes reports on projects announcing results after the receipt of tenders. Reports include the names and bid prices of low bidders, and the name of the successful contractor.

Starts

The Daily Commercial News Starts section includes reports from building permits. Look for jobs you have been following or new jobs in your area of interest.

Regions included:

Central Ontario

Includes census divisions of Durham, York, Toronto, Peel, Halton, Dufferin, and Simcoe

Building Reports can also be found by using CCPI online at <https://app.constructconnect.com/search>. Need Help? Contact 1-800-959-0502.

Eastern Ontario

Includes census divisions of Northumberland, Prince Edward, Dundas-Stormont-Glengarry, Prescott-Russell, Lanark, Leeds-Grenville, Frontenac, Lennox-Addington, Hastings, Peterborough, Kawartha Lakes, Haliburton, Renfrew, Muskoka, Nipissing, Parry Sound, and Ottawa

Western Ontario

Includes census divisions of Niagara, Hamilton, Waterloo, Haldimand-Norfolk, Brant, Oxford, Perth, Elgin, Chatham-Kent, Essex, Lambton, Middlesex, Huron, Grey-Bruce, and Wellington

Northern Ontario

Includes census divisions of Kenora, Rainy River, Thunder Bay, Cochrane, Algoma, Sudbury, Timiskaming, and Manitoulin

The building reports on the following pages are compiled by ConstructConnect's team of researchers. Project Inquiry Line: 1-800-387-0213.

Visit www.dcnonl.com/certificates-and-notices to search all Certificates of Substantial Performance, Certificates of Completion of Subcontract, Notices of Intention to Register a Condominium, Notices of Non-Payment of Holdback, and Notices of Termination.

NOTICE: Effective July 1, 2018, amendments to the Construction Act are reflected in the Certificates and Notices section of Daily Commercial News. These amendments required minor changes to the forms for Certificate of Substantial Performance (now called Form 9), Certificate of Completion of Subcontract (now called Form 10), and Notice of Intention to Register a Condominium (now called Form 11). The amendments also required publishing of two new notices: Notice of Non-Payment of Holdback using Form 6, and Notice of Termination using Form 8. To learn more about the amendments, visit www.dcnonl.com/construction-act.

Visit www.dcnonl.com/submit-manual to download Forms 6, 8, 9, 10 and 11.

To publish certificates and notices, email dcncertificates@constructconnect.com or fax 1-800-947-7966. For more information call 905-752-5482.

Those placing notices are responsible for ensuring Daily Commercial News receives, by fax or otherwise, all necessary information and for reviewing Daily Commercial News upon publication for any errors or omissions and advising Daily Commercial News at once. Daily Commercial News will make good any errors or omissions attributable to it in the next available issue, but will otherwise bear no liability whatsoever for any failure to publish any notice, however caused and even if arising from Daily Commercial News' own negligence.
