ACKNOWLEDGEMENTS

The Studbook Keeper wishes to thank all the people and organizations that have assisted in the compilation of the Studbook, in particular Becky Johnston for entering the studbook data and processing studbook reports. In addition, the Studbook Keeper wishes to thank Lars Versteegen, Laurie Bingaman-Lackey and Karin Schwartz for their ongoing assistance in data cleanup and connecting previously unknown Species360 links with the Cheetah Studbook data. The Studbook Keeper also wishes to thank Laura Allen for the cover drawing of three of the Cheetah Conservation Fund's released males – Elwood, Cyclone and Kamin.

The Studbook Keeper also wishes to thank the donors of the Cheetah Conservation Fund (CCF) Namibia, USA and UK for their financial support that covers the majority of the costs involved in compiling and publishing of the Studbook.

SECTION A

INTRODUCTION

The Studbook

The International Cheetah Studbook has the purpose of registering all cheetah in the world held in both zoological and private facilities and providing information about existing animals by publishing the studbook contents thus creating the preconditions for selecting breeding animals.

The 2019 studbook data includes all cheetahs known to be alive as of 31 December 2019. The International Studbook has added captive animals around the world. It includes wild-caught and captive-born animals, which were alive in 1980 and after, as well as founders with live offspring from 1980.

The data on the following pages has been computerized using the International Species Information System's (Species360) Sparks Studbook Program. The information was compiled from various sources; bi-annual questionnaire sent to all facilities holding cheetah; International Species Information System (Species360); and importantly, personal communications. Excellent cooperation has been obtained from many facilities, and it is hoped that the data are accurate and complete. The Cheetah Studbook Keeper make entries based on reported evidence and must assume that all information received from breeders is correct. Owners and holders of cheetahs are urged to check the studbook for accuracy and if there are any discrepancies, the studbook keeper would appreciate notification.

Registration Procedures

The following are procedures used by the studbook keeper for registering new animals into the studbook and guidelines for the holding institution, owners, breeders, and animal dealers. These guidelines are necessary conditions to achieve the best possible procedures for reporting new acquisitions, additions to inventories (births and imports), and deletions (transfers out of inventories and deaths).

Registration

To register an animal, the studbook keeper is supplied with information about the sex, name, date and place of birth, and all previous owners and dates of transfer of ownership. If the parents are known, please include name, studbook number, date of birth and origins of both dam and sire. Also, if the animal has produced any offspring, please give sex, date of birth, mate, and description for all cubs born.

The end of the studbook year is 31 December every year. Bi-annual questionnaires will be sent to all the facilities for completion and returned to the studbook keeper, or if the facility is part of the Zoological Information Management System (ZIMS), a taxon report can be run through the program. These bi-annual reports of all changes in animals during the year must be sent to the studbook keeper by 31 July (for the period of 1 January – 30 June) and 31 January (for the period from 1 July – 31 December).

Once all this information has been gathered, the studbook keeper will issue it a consecutively assigned "studbook number" in the International Cheetah Studbook.

Cheetahs caught in the wild will be assigned a studbook number by the studbook keeper.

Cheetahs born in captivity will be assigned, by the studbook keeper, a breeder number in addition to their studbook number.

The breeder number includes a set of initials that correspond to an abbreviation of the facility name followed by a number. The breeder numbers are assigned by the studbook keeper according to the sequence of births in that breeding facility. All cheetahs born at the facilities are continuously registered, including stillborn and deceased. Numbering in a litter starts with the males and ends with animals of unknown sex.

The studbook and house name are the same unless otherwise recorded by the breeder.

Starting with the 2011 births, studbook cards have been converted to digital format.

Additions to Inventory

The studbook keeper must be kept informed of all additions, births, or transfers in (requested within one month).

For animals caught in the wild, documents must be sent to the studbook keeper indicating date and place of capture, supplier, and dates of arrival, including an estimated date of birth and the parents.

For animals born in your facility, report to the studbook keeper the complete litter including stillborn and deceased young; indicate the date of birth and the parents.

Deletions from Inventory

The studbook keeper must be kept informed of any deletions – transfers out of facilities and deaths (requested within one month).

If registered cheetahs are sold or transferred, the change of ownership be reported to the studbook keeper (including full address details).

Please inform the studbook keeper and any animal's death with the appropriate information, date, place and cause of death, necropsy report, and disposition of carcass.

Studbook Format

Order of listing: All cheetahs are listed in order of their studbook number.

Dates: Dating system used for birth date, transfers and death date is day, month, and year.

Studbook Number: Starting with number 1, these numbers were assigned sequentially in chronological order in the North American Regional Cheetah Studbook. Since some changes in dates occurred since the first Volume in 1983, the changes were left where they are already numbered. Within each year, studbook numbers were assigned as the studbook keeper was notified of births or acquisitions and, therefore, are not necessarily listed in chronological order.

Starting with studbook number 611, the International Cheetah Studbook is in chronological order with new international additions, however, some additions have been reported late, and therefore these additions are an exception to the chronology. As changes have been made, the changes were left where they were already numbered. (It is strongly recommended to tattoo all animals in the inner thigh with their studbook number. Please notify the studbook keeper as animals are tattooed.)

Sex: M for male; F for female; U for unknown.

Name: The names of the animals are left up to the breeders and owners.

Breeder Number: The breeder number includes a set of initials that correspond to an abbreviation of the facility where the animal was born, followed by a number which is the individual's number in sequence of births in that breeding facility. The breeder number is assigned by the Studbook Keeper. (See Breeder Facility abbreviations at the end of this section).

Date of Birth: Each animal's birth date; "Y" after birth date indicates estimated birth date.

Sire and Dam: The studbook numbers of the parents are listed if the parents are known, otherwise listed as "WILD" if the animal was wild-born, or "UNK" if unknown, or "MULT" if there is unknown possible multiple selections. When known, the multiple selections are listed in section K.

House Number: The number used by holding facility to register the animal with Species360 (The International Species Information System, c/o 5600 Eagan Woods Dr, Eagan, MN 22121 USA), or the individual number used by individual facility.

Location: The Institution holding the individual as of the date specified and not necessarily the owner. In most cases, institutions are listed by the city where the institution is located, followed by country. An institutional list is available in section D.

Since: Arrival date to the facility holding the individual animal or death date.

Status: Indicates Capture, Birth, Transfer, and Death and relates this transaction of the individual animal to the date in the "since" column.

Tattoo: Indicates the individual's tattoo number or the microchip number. It is strongly recommended to tattoo all animals in the inner thigh with their studbook number. Please notify the studbook keeper as animals are tattooed.

Comments: Includes cause(s) of death reported through necropsies or causes listed on returned studbook cards; "Living Status Unknown" for living or death status which is not known or confirmed; "Assumed Dead" for animals that are believed not to be living and confirmation is not available; "Same As" identifies animals that have been registered twice. Other comments are encouraged and will be included.

Table 5: Breeding Facility Abbreviations

Breeder Abbreviation	Facility, Country (Sparks mnemonic)
AA	Africa Alive, England (KESSINGLA)
ABQ	Albuquerque Biological Park, USA (ABQBIOPK)
AKI	Akiyoshidai Safari Land, Japan (MITO CHO)
ALB	Al Bustan Zool. Center, United Arab Emirates (ALBUSTAN)
