

Product characteristics

Eco-friendly Material

Adopted full-water foaming system and water-based paint, all the products meet the EU SGS-SVHC standards, VOC content lower than the EU and American standards.

Insect and Mildew Resistance

Low water absorption. Could not get moldy even put in water for long time; Also can effectively prevent the damage of termites and insects to products.

Customizable

Customizing customers' personalized products according to the requirements.

Dimensional Stability

Small thermal expansion and cold contraction, excellent dimensional stability

Durability

Subsequently formed polyurethane and the previously formed waterborne film can be perfectly adhered together without peeling off and discoloration, same life as building.

Profiling Performance

Superb mold technology enables the product surface possessing realistic wood-grained texture.

The Beauty of Urethane

MOISTURE RESISTANT

Urethane millwork's closed cell structure prevents water penetration and absorption.

SPLINTER RESISTANT

Urethane millwork does not splinter like wood. If surface blemishes occur during installation, they can be easily repaired with ordinary plastic wood filler.

INSECT RESISTANT

Urethane millwork provides a practical alternative if you want the look of real wood detailing for your projects, but live in an area that is prone to insect infestation. Urethane Millwork/Wood Considerations.

Urethane Millwork/Wood Considerations

CONSIDERATION	URETHANE MILLWORK	WOOD
Quality/composition	consistent quality; no waste; consistent finish	quality varies; knots and gouges result in waste; blotching, disappearing grain and discoloration can occur
Versatility	all products suitable for interior or exterior application	different grade of material and finish required for outdoor application
Durability	resists warping or splitting; resists weather damage and insect infestation	can warp; susceptible to splitting; susceptible to rotting and insect damage
Labor Savings	requires no sanding, priming or sealing; mouldings easy to install	requires sanding, priming and sealing; intricate mouldings require multiple application process incurring high labor costs
Value	reasonable, stable price; long lasting good looks with low maintenance; increases home/building resale value	market price fluctuates; requires periodic maintenance; may need replacement/refinishing as damage occurs

A close-up photograph of several pieces of white decorative trim, likely for windows or doors. The trim features a classic fluted or beaded design. The pieces are arranged in a way that shows their profile and how they would fit together. The lighting is soft, highlighting the texture and curves of the material.

Window & Door Trim

Choose a style above and add either D, K, T or BT* to the end of the Part#.

*Bottom Trim adds 1" to overall height.
