Important Safety Instructions — **SAVE THESE INSTRUCTIONS**

Read these instructions carefully and look at the equipment to become familiar with it before trying to install, operate, service or maintain it. The following safety messages may appear throughout this manual or on the equipment to warn of potential hazards or to call attention to information that clarifies or simplifies a procedure.

The addition of this symbol to a “Danger” or “Warning” safety message indicates that an electrical hazard exists which will result in personal injury if the instructions are not followed.

This is the safety alert symbol. It is used to alert you to potential personal injury hazards. Obey all safety messages with this symbol to avoid possible injury or death.

⚠ DANGER

DANGER indicates a hazardous situation which, if not avoided, **will result in death or serious injury.**

Failure to follow these instructions will result in death or serious injury.

⚠ WARNING

WARNING indicates a hazardous situation which, if not avoided, **could result in death or serious injury.**

Failure to follow these instructions can result in death, serious injury, or equipment damage.

⚠ CAUTION

CAUTION indicates a hazardous situation which, if not avoided, **could result in minor or moderate injury.**

Failure to follow these instructions can result in injury or equipment damage.

NOTICE

NOTICE is used to address practices not related to physical injury. The safety alert symbol shall not be used with this type of safety message.

Failure to follow these instructions can result in equipment damage.

Please Note

Electrical equipment should only be installed, operated, serviced, and maintained by qualified personnel. No responsibility is assumed by Schneider Electric for any consequences arising out of the use of this material.

A qualified person is one who has skills and knowledge related to the construction, installation, and operation of electrical equipment and has received safety training to recognize and avoid the hazards involved.

Safety Precautions

! DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

- The product must be installed according to the specifications and requirements as defined by Schneider Electric. It concerns in particular the external and internal protections (upstream circuit breakers, battery circuit breakers, cabling, etc.) and environmental requirements. No responsibility is assumed by Schneider Electric if these requirements are not respected.
- After the UPS system has been electrically wired, do not start up the system. Start-up must only be performed by Schneider Electric.

Failure to follow these instructions will result in death or serious injury.

! DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

The UPS System must be installed according to local and national regulations. Install the UPS according to:

- IEC 60364 (including 60364–4–41 - protection against electric shock, 60364–4–42 - protection against thermal effect, and 60364–4–43 - protection against overcurrent), **or**
- NEC NFPA 70

depending on which one of the standards apply in your local area.

Failure to follow these instructions will result in death or serious injury.

! DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

- Install the UPS system in a temperature controlled area free of conductive contaminants and humidity.
- Install the UPS system on a non-inflammable, level and solid surface (e.g. concrete) that can support the weight of the system.

Failure to follow these instructions will result in death or serious injury.

⚠ DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION OR ARC FLASH

The UPS is not designed for and must therefore not be installed in the following unusual operating environments:

- Damaging fumes
- Explosive mixtures of dust or gases, corrosive gases, or conductive or radiant heat from other sources
- Moisture, abrasive dust, steam or in an excessively damp environment
- Fungus, insects, vermin
- Salt-laden air or contaminated cooling refrigerant
- Pollution degree higher than 2 according to IEC 60664-1
- Exposure to abnormal vibrations, shocks, and tilting
- Exposure to direct sunlight, heat sources, or strong electromagnetic fields

Failure to follow these instructions will result in death or serious injury.

NOTICE

RISK OF OVERHEATING

Respect the space requirements around the UPS system and do not cover the product's ventilation openings when the UPS system is in operation.

Failure to follow these instructions can result in equipment damage.

NOTICE

RISK OF EQUIPMENT DAMAGE

Do not connect the UPS output to regenerative load systems including photovoltaic systems and speed drives.

Failure to follow these instructions can result in equipment damage.

Electrolyte Values for SYBTU1–PLP

	Battery module	String of batteries (Four battery modules)
Electrolyte volume L (gal)	2.78 (0.72)	11.14 (2.87)
Electrolyte weight kg (lbs)	3.72 (8.18)	14.86 (32.73)
Sulfuric acid volume L (gal)	0.89 (0.23)	3.54 (0.91)
Sulfuric acid weight kg (lbs)	1.62 (3.57)	6.48 (14.27)

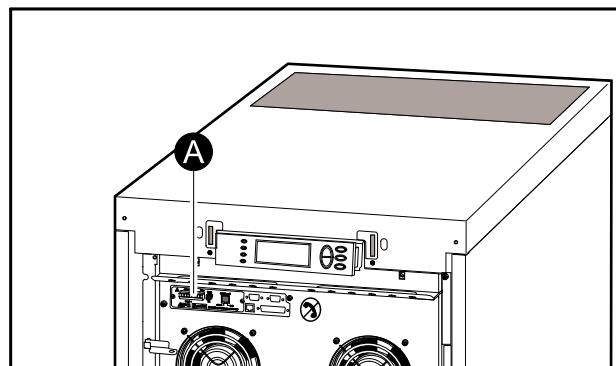

Battery Material Safety Data Sheet

NOTE: For Material Safety Data Sheet (MSDS), go to the Knowledge Base http://schneider-electric.com/sites/corporate/en/support/faq/faq_main.page and type “MSDS” to get the latest MSDS information.

Communication and Management

Network Management Card

The system is equipped with one network management card for remote monitoring and control of an individual UPS by connecting it directly to the network.

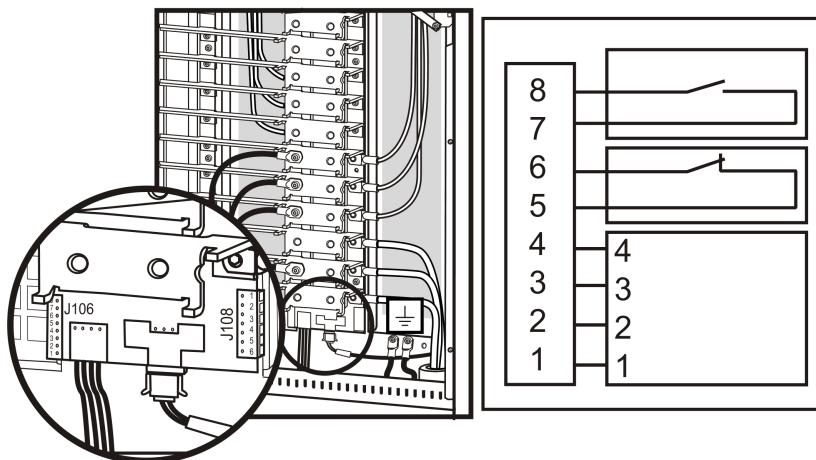

A. Network Management Card

Input and Output Contacts

Pins 7 and 8 are for external charge control. When 7 and 8 are closed, the UPS charges batteries with a pre-defined percentage (0-25-50-75-100%) of the maximum charging power. To be used in generator applications, or if special codes require control of charging.

Pins 5 and 6 are for external maintenance bypass Q3 (auxiliary switch N/C type). When Q3 is closed, signals are fed back to the UPS controller.

Pins 1 to 4 are for battery measurement (only applicable to Schneider Electric modular battery cabinets).

Pin	Description
8	External charging control return
7	External control of charging
6	Q3 active return
5	Q3 active
4	Battery measurement supply ⁶
3	Battery unit quantity ⁶
2	Maximum battery temperature ⁶
1	Battery measurement return ⁶

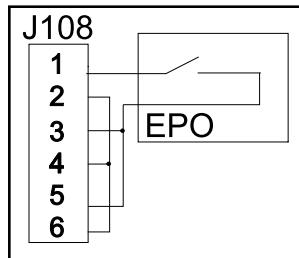

Connect EPO in Single Systems

- Use only 1-1½ mm² copper wire for the connection of the EPO (Emergency Power Off) and other optional equipment.
- The UPS must be connected to either a dry contact or a 24 VDC EPO switch. The external EPO +24 VDC, 1500 mA circuit can be supplied through other vendors.

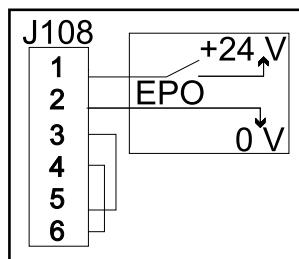

6. To be used with a Schneider Electric modular battery cabinet.

1. Connect the EPO cable using one of the following four wiring configurations:

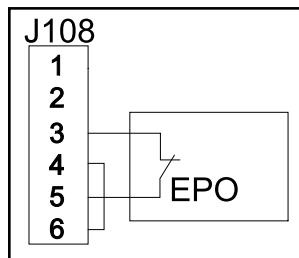

- **Dry Contacts Normally Open:** EPO is activated when pin 1 is connected to pins 3 and 5. Connections: 2-4-6, 3-5, and 1.

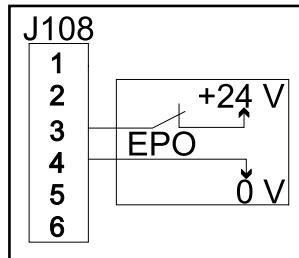

- **+24 V Normally Open:** EPO is activated when an isolated SELV 24 VDC voltage is supplied on pin 1 with reference to pin 2. Connections: 3-5 and 4-6.

- **Dry Contacts Normally Closed:** EPO is activated when a connection from pin 3 to 5 is opened. Connections: 4-6.

- **+24 V Normally Closed:** EPO is activated when a SELV 24 VDC voltage is removed from pin 3 with reference to pin 4.

Connect EPO in Parallel Systems

In parallel systems each UPS unit must have a separate dry contact (voltage free) external to the UPS connected to J108.

CAUTION

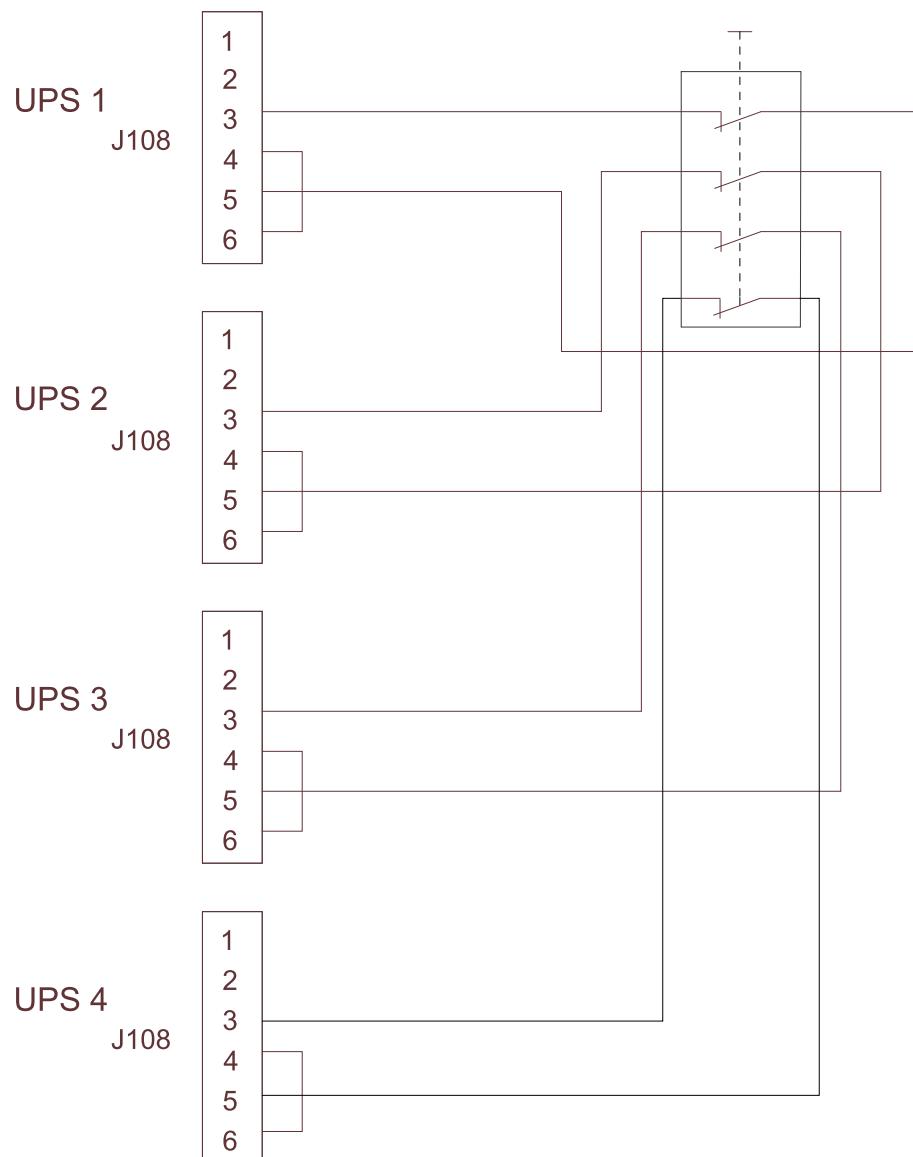

RISK OF ERRATIC UPS BEHAVIOR

For parallel and separate systems with common EPO, each UPS unit must be connected to a separate dry contact external to the UPS, because parallel EPO wiring between more UPS units can result in erratic UPS behavior.

Failure to follow these instructions can result in injury or equipment damage.

Schneider Electric recommends a **Dry Contacts Normally Closed EPO** installation of the UPS units in parallel – shown in the illustration below for four UPSs in parallel. Each UPS is connected to a separate dry contactor.

Dry Contacts Normally Closed EPO installation

Battery Specifications

Type	VRLA
Nominal voltage (VDC)	+/- 192
Float voltage (VDC)	+/- 219
End of discharge voltage (VDC)	+/- 154
Battery current (at full load)	66.5 A at +/-192 V
Maximal current (at end of discharge)	83.2 A at + 154 V
Maximal charging power	10 kVA: 1600 W 15 kVA: 2400 W 20 kVA: 3200 W 30 kVA: 3200 W
Typical recharge time	5 hours
End voltage	1.6-1.75 V/cell (automatic, depending on load)

Recommended Cable Sizes

⚠ DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH

At 100% switch mode load, the neutral must be rated for 200% phase current.

Failure to follow these instructions will result in death or serious injury.

⚠ DANGER

HAZARD OF ELECTRIC SHOCK, EXPLOSION, OR ARC FLASH

All wiring must comply with all applicable national and/or electrical code.

Failure to follow these instructions will result in death or serious injury.

NOTE: The recommended cable sizes are based on an environment with an ambient temperature of 30° C (86° F). Use stranded copper cables.

	10 kVA	15 kVA	20 kVA	30 kVA
Utility/mains input	8 AWG	6 AWG	4 AWG	1 AWG
Static bypass input	8 AWG	6 AWG	4 AWG	1 AWG
DC input	1 AWG	1 AWG	1 AWG	1 AWG
Output	8 AWG	6 AWG	4 AWG	1 AWG

Connection Terminals

Cable size (AWG)	Cable lug type	Crimping tool	Die	Terminal bolt diameter
12	YA12CL2TC38	MD7-34R	W12CVT	6 mm (0.2 in)
8	YA8CL2TC38	MD7-34R	W8CVT	6 mm (0.2 in)
6	YA6CL2TC38	MD7-34R	W6CVT	6 mm (0.2 in)
4	YA4CL2TC38	MD7-34R	W4CVT	6 mm (0.2 in)
1	YA1CL2TC38	MD7-34R	W1CVT	6 mm (0.2 in)

Torque Specifications

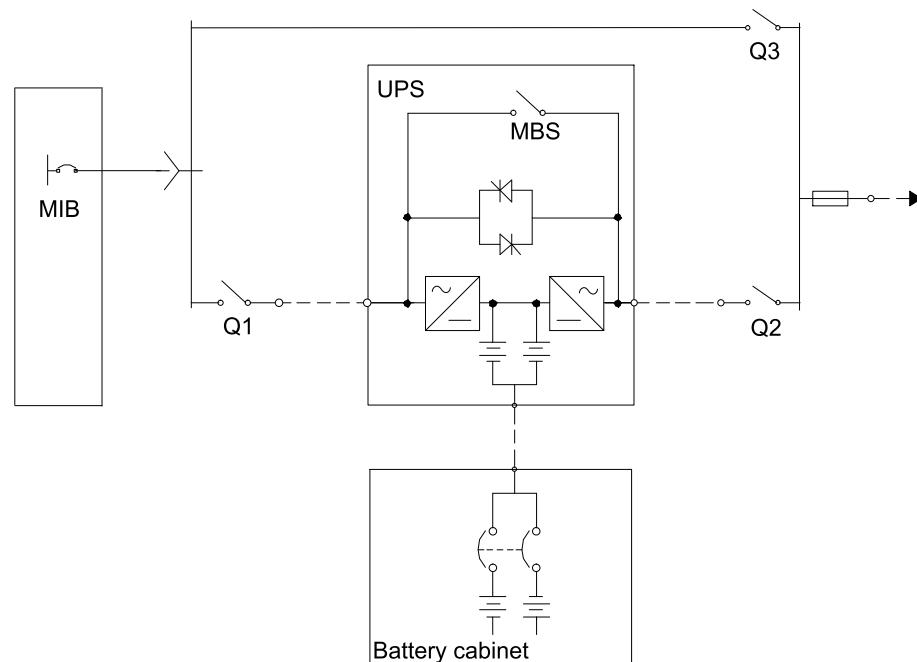

The power wiring should be torqued to 7 Nm (45 lbf-in).

Fuses and Breakers

NOTE: For installations with a Schneider Electric maintenance bypass panel, refer to the installation manual provided with the maintenance bypass panel for wiring diagrams.

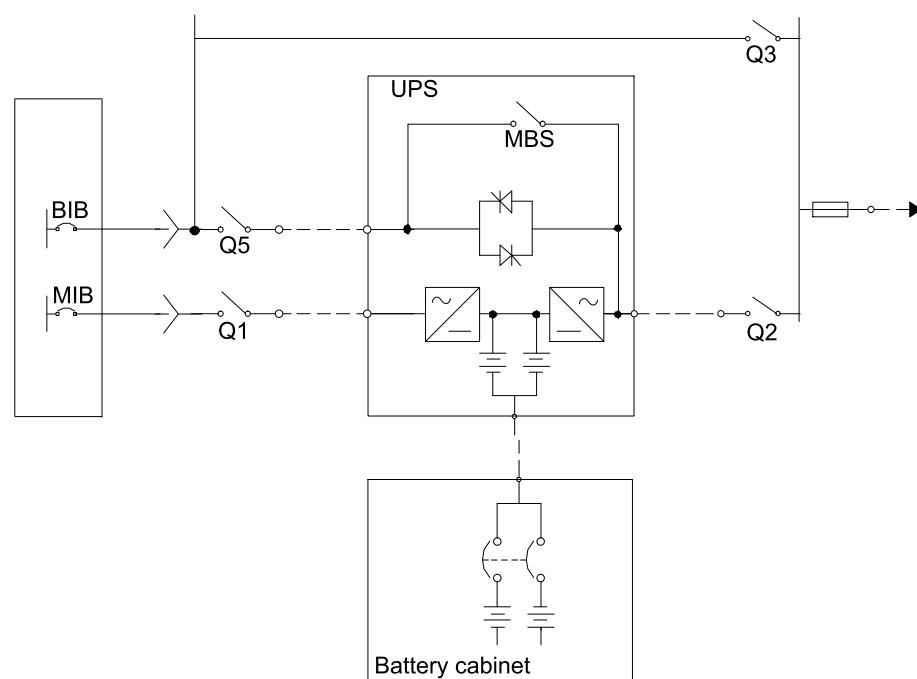

Single Utility/Mains System

- Q1: Utility/mains input
- Q2: UPS output
- Q3: Manual bypass
- MBS: Mechanical bypass switch

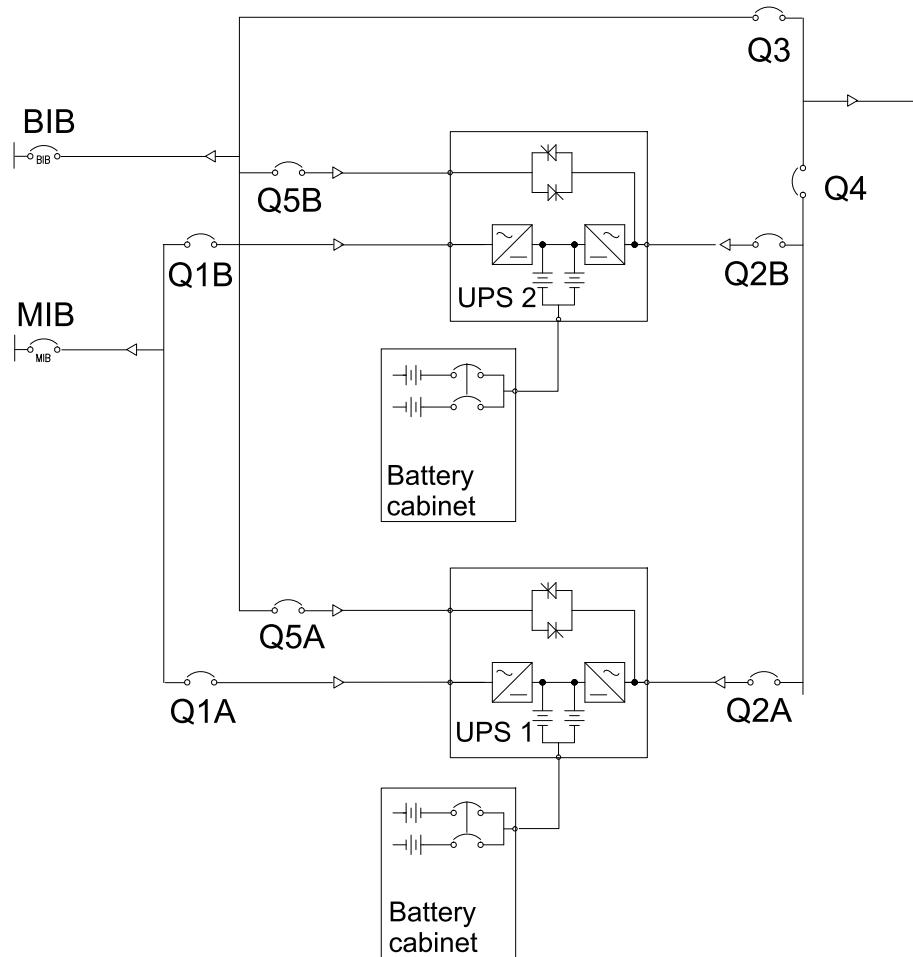

Dual Utility/Mains System

- Q1: Utility/mains input
- Q2: UPS output
- Q3: Manual bypass
- Q5: Static bypass input
- MBS: Mechanical bypass switch

Parallel System

- Q1: Utility/mains input
- Q2: UPS output
- Q3: Manual bypass
- Q4: System output
- Q5: Static bypass input

Fuse and Breaker Sizes in Single Systems

	10 kVA	15 kVA	20 kVA	30 kVA
Input Q1 (A)	35	60	80	110
Bypass Q5 (A)	35	60	80	110
Output Q2 (A)	35	60	80	110
Manual bypass Q3 (A)	35	60	80	110

Fuse and Breaker Sizes in Parallel Systems

Q3 and Q4 in Parallel Capacity Systems

Units in parallel	10 kVA	15 kVA	20 kVA	30 kVA
2 (A)	70	110	150	225
3 (A)	110	175	225	350
4 (A)	150	225	300	450

Q3 and Q4 in Redundant Parallel Systems (n+1)

Units in parallel	10 kVA	15 kVA	20 kVA	30 kVA
2 (A)	35	60	80	110
3 (A)	70	110	150	225
4 (A)	110	175	225	350

Minimum Breaker Settings 208 V

		800% overload bypass operation	150% overload normal/battery operation	125% overload normal/battery operation	Continuously
	Duration	500 ms	60 s	10 min	
10 kVA	Input (A)	-7	-	-	34
	Bypass (A)	223	-	-	31
	Output (A)	223	42	35	31
15 kVA	Input (A)	-7	-	-	51
	Bypass (A)	333	-	-	46
	Output (A)	333	63 A	52	46
20 kVA	Input (A)	-7	-	-	68
	Bypass (A)	444	-	-	62
	Output (A)	444	84	70	62
30 kVA	Input (A)	-7	-	-	99
	Bypass (A)	667	-	-	92
	Output (A)	667	125	105	92

7. For single mains systems, use the higher value of input and static bypass

Physical

Clearance

NOTE: Clearance dimensions are published for airflow and service access only. Consult with the local safety codes and standards for additional requirements in your local area.

Typical System Arrangements

Single System 10-30 kVA 208 V

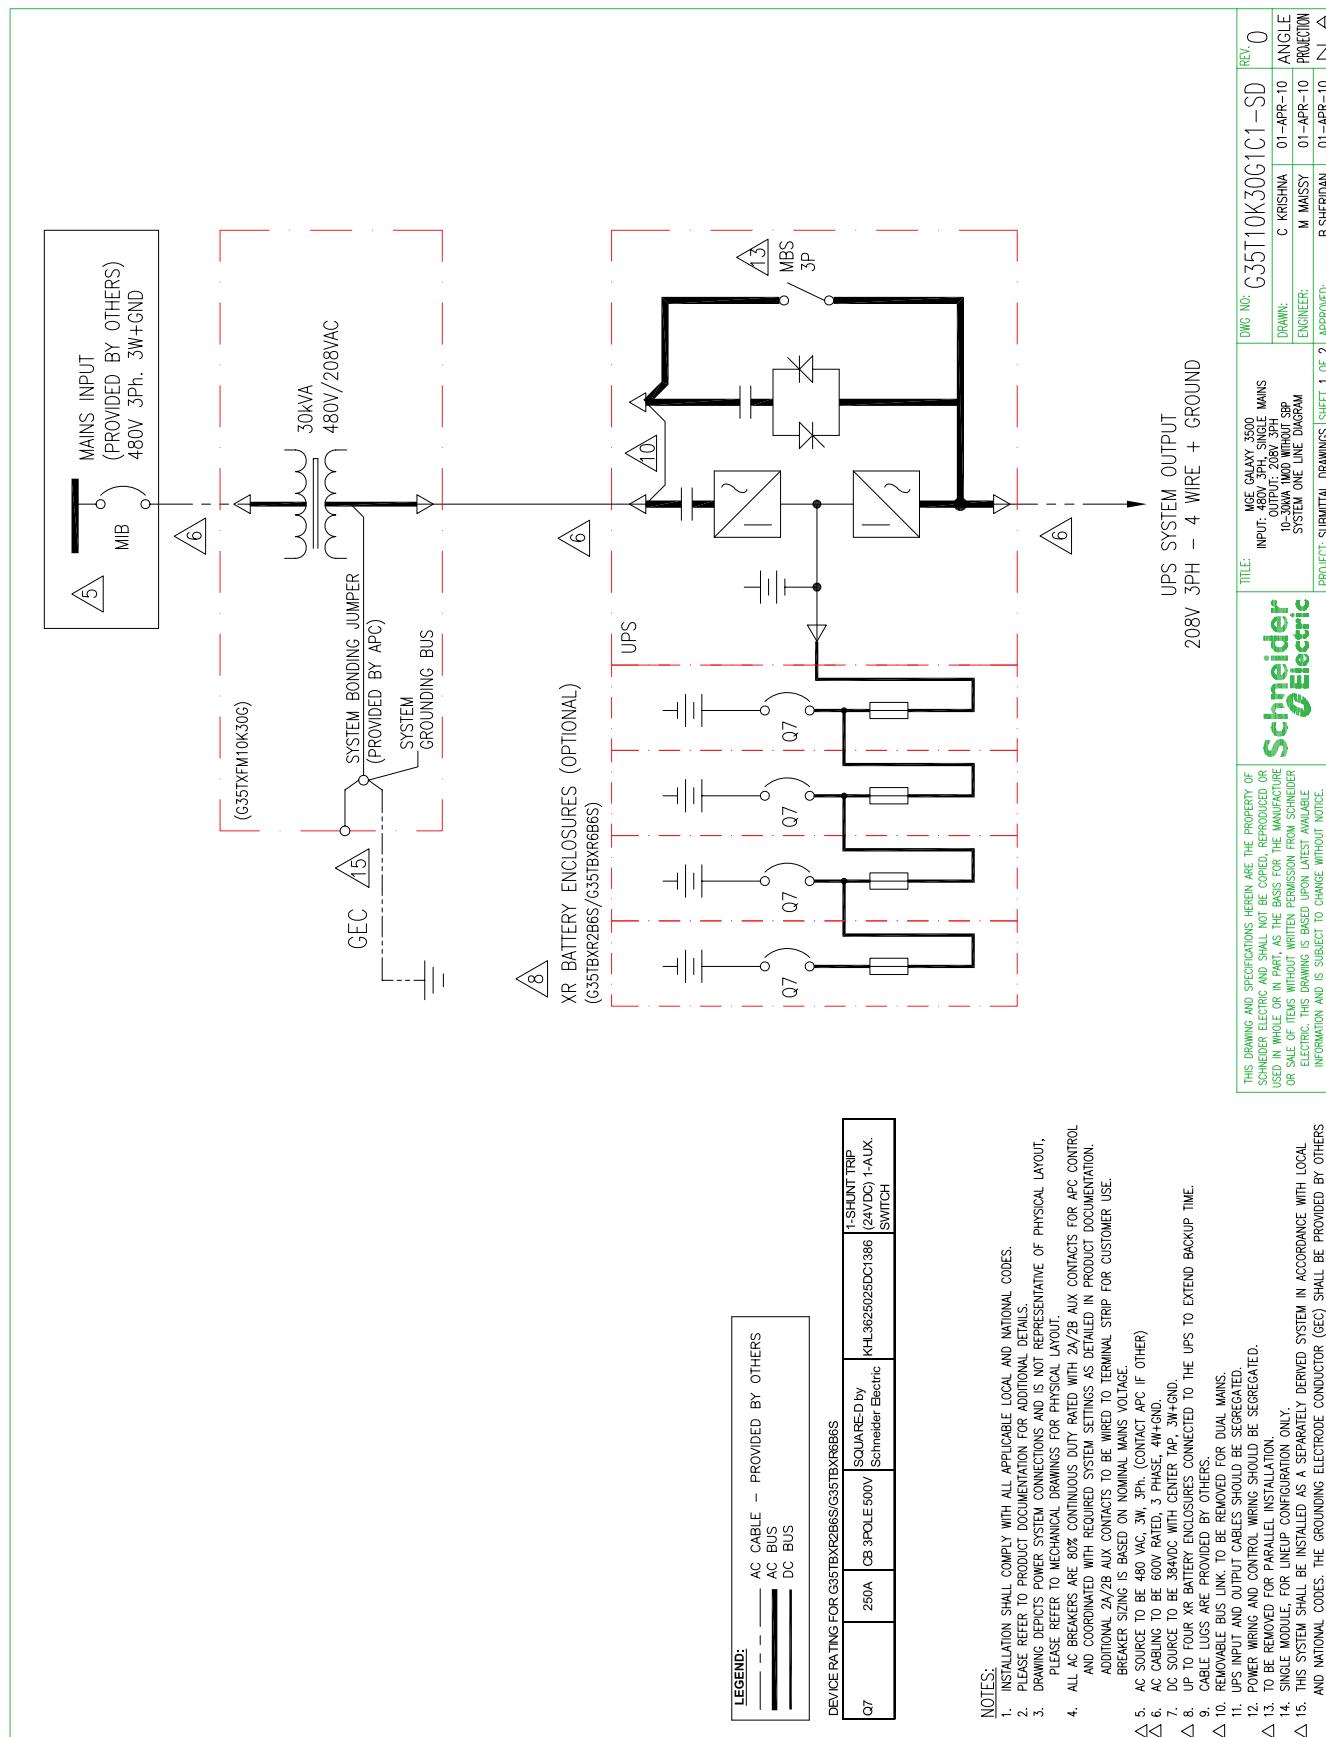

DEVICE RATING OR G35-BXRBB6S/G35-BXR2B6S	Q7	250A CB 3POLE 50V	SQUARED BY Schneider Electric	K-H.3625025DC1386	1-SHUNT TRIP 12VDC 1-AUX SWITCH
--	----	-------------------	-------------------------------	-------------------	---------------------------------

NOTES:

1. INSTALLATION SHALL COMPLY WITH ALL APPLICABLE LOCAL AND NATIONAL CODES.
2. PLEASE REFER TO PRODUCT DOCUMENTATION FOR ADDITIONAL DETAILS.
3. DRAWING DEPICTS POWER SYSTEM CONNECTIONS AND IS NOT REPRESENTATIVE OF PHYSICAL LAYOUT. PLEASE REFER TO MECHANICAL DRAWINGS FOR PHYSICAL LAYOUT.
4. ALL AC BREAKERS ARE 80% CONTINUOUS DUTY RATED WITH 2A/2B AUX CONTACTS AS DETAILED IN PRODUCT DOCUMENTATION. AND COORDINATED WITH REQUIRED SYSTEM SETTINGS AS DETAILED IN PRODUCT DOCUMENTATION. ADDITIONAL 2A/2B AUX CONTACTS TO BE WIRED TO TERMINAL STRIP FOR CUSTOMER USE.
5. BREAKER SWING IS BASED ON NOMINAL MAINS VOLTAGE. AC SOURCE TO BE 208VAC, 4W. WIRE CONNECTED. 3φ CONTACT APC IF OTHER.
6. AC CABLING TO BE 600V RATED, 3 PHASE, 4W+GND.
7. DC SOURCE TO BE 384VDC WITH CENTER TAP, 3W+GND.
8. UP TO FOUR XR BATTERY ENCLOSURES CONNECTED TO THE UPS TO EXTEND BACKUP TIME.
9. CABLE LUGS ARE PROVIDED BY OTHERS.
10. REMOVABLE BUS LINK TO BE REMOVED FOR DUAL MAINS.
11. UPS INPUT AND OUTPUT CABLES SHOULD BE SEGREGATED.
12. POWER WIRING AND CONTROL WIRING SHOULD BE SEGREGATED.
13. TO BE REMOVED FOR PARALLEL INSTALLATION.
14. SINGLE MODULE, FOR LINEUP CONFIGURATION ONLY.

Options

Hardware Options

Maintenance Bypass Cabinets

- Maintenance bypass cabinet 10-15 kVA 208 V floor-mounted (G35TSBP10K15F)
- Maintenance bypass cabinet 20-30 kVA 208 V floor-mounted (G35TSBP20K30F)
- Maintenance bypass cabinet 10-30 kVA 208 V floor-mounted with 42 position distribution panel (G35TSBP10K30F-DP)
- Maintenance bypass panel 10-30 kVA 208V wall-mounted with 42 position distribution panel (SBPSU10K30FC1M1-WP)
- Maintenance bypass panel 10-15 kVA 208 V wall-mounted (SBPSU10K15F-WP)
- Maintenance bypass panel 20-30 kVA 208 V wall-mounted (SBPSU20K30F-WP)
- Parallel maintenance bypass cabinet, up to 3 units 10-15 kVA 208 V floor-mounted (G35TSBPAR10K15F)
- Parallel maintenance bypass cabinet, up to 3 units 20-30 kVA 208 V floor-mounted (G35TSBPAR20K30F)

Modular Battery Cabinets

- Modular battery cabinet, with MCCB, with 2 battery modules expandable to 6 (G35TBXR2B6)
- Modular battery cabinet, with MCCB, with 6 battery modules (G35TBXR6B6)
- Modular battery cabinet with 2 battery modules expandable to 6 (G35TXR2B6)
- Modular battery cabinet with 6 battery modules (G35TXR6B6)
- Modular battery cabinet, with MCCB, with no battery modules expandable to 6 (G35TEFBXR6)

Input Transformers

- Input transformer 480/208 V 10-30 kVA floor-mounted (G35TXXFM10K30G)
- Input transformer 208/208 V 10-30 kVA floor-mounted (G35TXXFM10K30F)
- Input transformer MCCB 480/208 V 10-30 kVA floor-mounted (G35TSBPXF10K30F)
- Input transformer MCCB 208/208 V 10-30 kVA floor-mounted (G35TSBPXF10K30G)

Sensors

- Temperature sensor (AP9335T)
- Temperature and humidity sensor (AP9335TH)

Parallel Communication Kits

- Parallel communication kit (SUVTOPT009)
- Parallel communications kit, including Installation (SUVTOPT009S)

Modular Battery Modules

- Modular battery module (SYBT4)
- High performance modular battery module (SYBTH4)

Mounting Kits

- Seismic kit, 523 mm (20 in) wide UPS cabinet (G35TOPT008)
- Baying kit, 523 mm (20 in) wide UPS cabinet to modular battery cabinet (G35TOPT005)
- Baying kit, modular battery cabinet to modular battery cabinet (G35TOPT006)
- Parallel operation baying kit (G35TOPT011)

Management Cards

- SMARTSLOT EXPANSION CHASSIS (AP9600)
- SmartSlot triple chassis black (AP9604BLK)
- Modbus/Jbus interface card (AP9622)
- UPS network management card 2 (AP9630)
- UPS network management card 2 with environmental monitoring (AP9631)

Filters

- Dust filter replacement kit for 351 mm (14 in) narrow UPS cabinet (G35TOPT1)
- Dust filter replacement kit for 523 mm (20 in) wide UPS cabinet (G35TOPT2)

Accessories

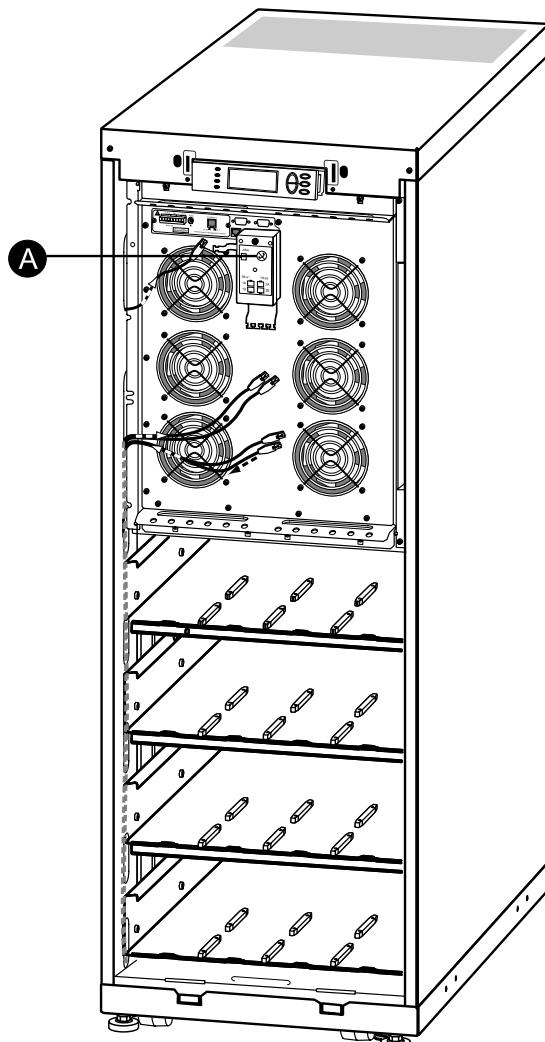

- Conduit box for 351 mm (14 in) narrow UPS cabinet (SUVTOPT001)
- Conduit box for 523 mm (20 in) wide UPS cabinet (SUVTOPT002)
- Battery lock kit for 1 battery module (SUVTOPT003)
- Parallel maintenance bypass kit (SUVTOPT010)
- Subfeed distribution 208 V, (5) L21-20 & (1) 50A HW output (SUVTOPT104)
- Subfeed distribution 208 V, (5) L21-20 & (1) 63A HW output (SUVTOPT105)

Configuration Options

- Dual mains input
- Automatic internal bypass
- Modular batteries
- Modular power modules
- Generator compatible
- Parallel up to four units for capacity and redundancy
- IP51 for industrial environments
- High Performance Battery module
- Up to four modular battery cabinets
- Parallel maintenance bypass panel – floor mount
- Single unit maintenance bypass – wall mount and floor mount to single unit maintenance bypass
- Transformer cabinets

Parallel Capabilities

- Up to four UPS units paralleled for capacity
- Up to four UPS units paralleled for redundancy (n+1)
- Communication between parallel units via the parallel communication box

A. Parallel communication box

Limited Factory Warranty

One-Year Factory Warranty

The limited warranty provided by Schneider Electric in this Statement of Limited Factory Warranty applies only to products you purchase for your commercial or industrial use in the ordinary course of your business.

Terms of Warranty

Schneider Electric warrants that the product shall be free from defects in materials and workmanship for a period of one year from the date of product start-up when start-up is performed by Schneider Electric-authorized service personnel and occurs within six months of the Schneider Electric shipment date. This warranty covers repairing or replacing any defective parts including on-site labor and travel. In the event that the product fails to meet the foregoing warranty criteria, the warranty covers repairing or replacing defective parts at the sole discretion of Schneider Electric for a period of one year from the shipment date. For Schneider Electric cooling solutions, this warranty does not cover circuit breaker resetting, loss of refrigerant, consumables, or preventive maintenance items. Repair or replacement of a defective product or part thereof does not extend the original warranty period. Any parts furnished under this warranty may be new or factory-remanufactured.

Non-transferable Warranty

This warranty is extended to the first person, firm, association or corporation (herein referred to by "You" or "Your") for whom the Schneider Electric product specified herein has been purchased. This warranty is not transferable or assignable without the prior written permission of Schneider Electric.

Assignment of Warranties

Schneider Electric will assign you any warranties which are made by manufacturers and suppliers of components of the Schneider Electric product and which are assignable. Any such warranties are assigned "AS IS" and Schneider Electric makes no representation as to the effectiveness or extent of such warranties, assumes no responsibility for any matters which may be warranted by such manufacturers or suppliers and extends no coverage under this Warranty to such components.

Drawings, Descriptions

Schneider Electric warrants for the warranty period and on the terms of the warranty set forth herein that the Schneider Electric product will substantially conform to the descriptions contained in the Schneider Electric Official Published Specifications or any of the drawings certified and agreed to by contract with Schneider Electric if applicable thereto ("Specifications"). It is understood that the Specifications are not warranties of performance and not warranties of fitness for a particular purpose.

Exclusions

Schneider Electric shall not be liable under the warranty if its testing and examination disclose that the alleged defect in the product does not exist or was

caused by end user or any third person misuse, negligence, improper installation or testing. Further, Schneider Electric shall not be liable under the warranty for unauthorized attempts to repair or modify wrong or inadequate electrical voltage or connection, inappropriate on-site operation conditions, corrosive atmosphere, repair, installation, start-up by non-Schneider Electric designated personnel, a change in location or operating use, exposure to the elements, Acts of God, fire, theft, or installation contrary to Schneider Electric recommendations or specifications or in any event if the Schneider Electric serial number has been altered, defaced, or removed, or any other cause beyond the range of the intended use.

THERE ARE NO WARRANTIES, EXPRESS OR IMPLIED, BY OPERATION OF LAW OR OTHERWISE, OF PRODUCTS SOLD, SERVICED OR FURNISHED UNDER THIS AGREEMENT OR IN CONNECTION HEREWITH. SCHNEIDER ELECTRIC DISCLAIMS ALL IMPLIED WARRANTIES OF MERCHANTABILITY, SATISFACTION AND FITNESS FOR A PARTICULAR PURPOSE. SCHNEIDER ELECTRIC EXPRESS WARRANTIES WILL NOT BE ENLARGED, DIMINISHED, OR AFFECTED BY AND NO OBLIGATION OR LIABILITY WILL ARISE OUT OF, SCHNEIDER ELECTRIC RENDERING OF TECHNICAL OR OTHER ADVICE OR SERVICE IN CONNECTION WITH THE PRODUCTS. THE FOREGOING WARRANTIES AND REMEDIES ARE EXCLUSIVE AND IN LIEU OF ALL OTHER WARRANTIES AND REMEDIES. THE WARRANTIES SET FORTH ABOVE CONSTITUTE SCHNEIDER ELECTRIC SOLE LIABILITY AND PURCHASER'S EXCLUSIVE REMEDY FOR ANY BREACH OF SUCH WARRANTIES. SCHNEIDER ELECTRIC WARRANTIES RUN ONLY TO PURCHASER AND ARE NOT EXTENDED TO ANY THIRD PARTIES.

IN NO EVENT SHALL SCHNEIDER ELECTRIC, ITS OFFICERS, DIRECTORS, AFFILIATES OR EMPLOYEES BE LIABLE FOR ANY FORM OF INDIRECT, SPECIAL, CONSEQUENTIAL OR PUNITIVE DAMAGES, ARISING OUT OF THE USE, SERVICE OR INSTALLATION, OF THE PRODUCTS, WHETHER SUCH DAMAGES ARISE IN CONTRACT OR TORT, IRRESPECTIVE OF FAULT, NEGLIGENCE OR STRICT LIABILITY OR WHETHER SCHNEIDER ELECTRIC HAS BEEN ADVISED IN ADVANCE OF THE POSSIBILITY OF SUCH DAMAGES, SPECIFICALLY, SCHNEIDER ELECTRIC IS NOT LIABLE FOR ANY COSTS, SUCH AS LOST PROFITS OR REVENUE, LOSS OF EQUIPMENT, LOSS OF USE OF EQUIPMENT, LOSS OF SOFTWARE, LOSS OF DATA, COSTS OF SUBSTITUTANTS, CLAIMS BY THIRD PARTIES, OR OTHERWISE.

NO SALESMAN, EMPLOYEE OR AGENT OF SCHNEIDER ELECTRIC IS AUTHORIZED TO ADD TO OR VARY THE TERMS OF THIS WARRANTY. WARRANTY TERMS MAY BE MODIFIED, IF AT ALL, ONLY IN WRITING SIGNED BY AN SCHNEIDER ELECTRIC OFFICER AND LEGAL DEPARTMENT.

Warranty Claims

Customers with warranty claims issues may access the SCHNEIDER ELECTRIC worldwide customer support network through the SCHNEIDER ELECTRIC web site: <http://www.schneider-electric.com>. Select your country from the country selection pull-down menu. Open the Support tab at the top of the web page to obtain contact information for customer support in your region.
