

CONVENTION ON INTERNATIONAL TRADE IN ENDANGERED SPECIES  
OF WILD FAUNA AND FLORA

---

Twenty-second meeting of the Plants Committee  
Tbilisi (Georgia), 19-23 October 2015

Interpretation and Implementation of the Convention

Species trade and conservation

Standard nomenclature [Resolution Conf. 12.11 (Rev. CoP16)]

THE CITES CACTUS CHECKLIST

1. This document has been prepared by the editor of the CITES Cactus Checklist and submitted by the nomenclature specialist of the Plants Committee\*. It includes a draft introduction to the 3<sup>rd</sup> edition of the Checklist and an updated account of *Opuntia* subgenus *Opuntia* and is submitted in relation to agenda point 21.1 and paragraph 3 of that report.

---

\* The geographical designations employed in this document do not imply the expression of any opinion whatsoever on the part of the CITES Secretariat (or the United Nations Environment Programme) concerning the legal status of any country, territory, or area, or concerning the delimitation of its frontiers or boundaries. The responsibility for the contents of the document rests exclusively with its author.

---

## CITES CACTACEAE CHECKLIST Third Edition

### Notes for the CITES Plant Committee

To facilitate comparison with the Second Edition, the first part of the Preamble below is arranged in four numbered paragraphs as in the Preamble to that edition (but in square brackets; English version only). However, it would seem more logical in this edition to place the former paragraphs 5. **How to use this Checklist** and 6. **Conventions employed in Parts I-III** immediately before the alphabetical list (see page 30), also **Part II. Reference data: List of Genera Summary table and Bibliography**. I have deleted para. 7. **Cactaceae controlled by CITES** at the suggestion of Noel McGough as these and the annotations may change and it would be better to let users go direct to current listings CITES website.

### *Preamble*

[1.] **Background** (Noel McGough to suggest updating; as it is 16 years since publication of CCC ed. 2 it might be desirable to provide rather more initial ‘background’?)

[1.1] In the second half of the 20th century the generic classification of the Cactaceae became increasingly unstable following the replacement of the conservative system established by Schumann (1897–99, 1903; 21 genera) by that of Britton & Rose (1919–1923; 124 genera) and further splitting by Backeberg (233 genera) and other mostly amateur authors. In 1984 an attempt to restore a more conservative system was initiated by members of a working party established by the International Organization for Succulent Study (a member of the International Union of Biological Sciences). Subsequently, to assist the implementation of the CITES regulations, the 6th Conference of the Parties (July 1987) called for the development of a nomenclatorial reference for the Cactaceae (CITES Resolution Conf. 6.20) and asked IOS to undertake the work, adopting its ‘consensus’-based approach. Compilation and publication of the first edition of this Checklist was achieved in 1992 as an official project at the Royal Botanic Gardens, Kew, with the collaboration of an international panel of advisers and collaborators. Funding assistance was provided by the CITES Plants Committee and the US Scientific Authority for CITES. The Checklist was widely circulated among amateur enthusiasts and nurserymen, as well as the Scientific Authorities for which it was mainly intended, and along with 2nd edition (1999) may be said to have restored a degree of nomenclatural stability within a framework recognizing less than half the number of genera accepted by Backeberg.

The first edition optimistically anticipated that the Checklist would provide the basis of a new manual of the Cactaceae by 1995 but it was not until the present century that overview treatments (Anderson 2001; Hunt et al. 2006), generated with the collaboration of members of the IOS working party (by then the International Cactaceae Systematics Group), were published. Broadly in line, as regards taxonomy and nomenclature, with the CITES Checklist, these have been widely utilized as the classificatory benchmark for regional, biogeographical, conservation-oriented, molecular systematic and other laboratory studies. The later of the two treatments, the *New Cactus Lexicon* (Hunt et al. 2006) was accompanied by a separate volume of illustrations featuring over 90% of the recognized species and serving as a useful adjunct to the reference data in the text volume. The text volume itself has been undergoing constant revision since its publication and it is planned to make it available electronically in due course.

[1.2] Arrangements for the preparation of a new edition.... [as before, updated]

[1.3] The new edition follows the general plan of the previous editions but the lists of genera and bibliography that formerly followed the main alphabetical listing of ‘Names in Current Usage’ are now appended to this preamble. The alphabetical listing of names of species, sub-species and synonyms that follows is now a summary of the c. 4500 entries of names and synonyms in the *New Cactus Lexicon*, to which they are linked by a 5-digit record number to the [projected] searchable pdf version of the *Lexicon* text volume. The list also includes the relevant page/plate numbers of the illustrations in the hardback *Lexicon* illustrations volume. The list of accepted taxa with synonymy etc formerly included in Part II of the Checklist will be superfluous as the data it comprises will be available for download from the *New Cactus Lexicon* text volume, but the listing of accepted taxa by countries that formed Part III in previous editions concludes the new Checklist, as before.

### [2.] Computer aspects

Under this heading, details were given in the Preamble to the first edition of the Checklist of the hardware and software used in its preparation. An index of Cactaceae names was initially compiled in a ‘flat’ dBase III table from various reference works including *Index Kewensis* and additional entries sourced from the IOS publication *Repertorium Plantarum Succulentarum* or by the compiler and members of the panel of advisers. More recently, the IPNI website has been accessed on a regular basis for checking citations.

### [3.] Compilation procedures

[3.1] **Origination.** So far as possible, it is the aim of the *CITES Cactaceae Checklist* to reflect a consensus of informed current opinion on the classification and nomenclature to be employed. From 1984 onwards, meetings of the informal Working Party established under the auspices of the International Organization for Succulent Plant Study (IOS) were held at regular intervals, usually annually, to discuss research in progress on the Cactaceae and its bearing on the classification of the family. Reports of these meetings were published in the IOS Bulletin (1984–94), Bradleya (1986), Cactaceae Consensus Initiatives (1996–99). In 2000, the Working Party was renamed the International Cactaceae Systematics Group (ICSG) and its Bulletin ‘Cactaceae Systematics Initiatives’, where further meetings leading to the publication of the *New Cactus Lexicon* and the projected second edition have been reported.

For previous editions of this Checklist, numerous professional and amateur cactologists, acknowledged in the second edition as an international panel of advisers, were consulted during the compilation and revision of the list of taxa. For the second edition synonymized lists for individual countries were submitted to the principal specialists on the cactus flora of those countries.

Revision of the Checklist for this third edition has gone hand-in-hand with revision and updating of the original text of the *New Cactus Lexicon*. Apart from minor corrections and amendments, it has been mainly literature-based, supplemented by published and as yet unpublished results of fieldwork by the compiler and members of ICSG and others.

#### [3.2] *List of genera and generic synonyms*

This has been brought up to date in the light of changes in the generic list adopted in *New Cactus Lexicon* or further proposed below. The Bibliography has been extended to include various regional and taxonomic overviews that have become available since the first edition as well molecular systematic and other papers that potentially influence classification.

**[3.3] Cactaceae names in current usage**

[3.3.1–3]. The scope of the list of names in the first edition was explained in the Preamble to that edition (pp. 10–11). The list does not attempt to include all cactus names ever published at specific and subspecific (now approaching 15,000). It does attempt to include all names encountered as the *accepted* name of a taxon anywhere in the selected ('benchmark') bibliography. This 'current usage' requirement, effectively excludes many archaic synonyms and disused or inadmissible names that would otherwise clutter the list.

[3.3.4] The inclusion of names at subspecific rank in the second edition was a major change from the first. In recent times, however, the rank of subspecies has been increasingly proposed by collectors for variants cultivated from a single introduction. Names of subspecies (and the autonyms they generate) are not listed, however, if (a) the species as a whole is not an accepted taxon (unless the named subspecies is referred to a different species) or (b) division of the species at subspecific rank does not appear to be justified.

[3.3.5.] Synonymy at the species/subspecies level has been brought into line with changes in the generic list, current standard works and the views of reviewers. Where it has not been possible to resolve differences of opinion, the compiler has made a personal judgment. Combinations in genera not currently recognized or in conflict with current views on generic synonymy are not listed.

[3.3.6.] CITES Appendix I listings have been brought into line with changes formally approved by Conferences of the Parties (*see table, next page*).

[3.3.7.] In the first edition, **conservation ratings** according to the old IUCN categories were included in some of the country lists. For most countries these have yet to be reassessed according to the new IUCN Conservation Categories and for this reason they have been deleted throughout.

**[4.2] Disclaimer**

It must be stressed that the Checklist does not necessarily represent the views of reviewers, of the International Organization for Succulent Plant Study, its Executive Board or any individual contributor. The compiler accepts sole responsibility for the content of the Checklist and the taxonomic opinions implied, but gratefully acknowledges the invaluable assistance of the advisers and collaborators listed above and on p. 6.

**Table / Tableau / Cuadro 1.** Taxa controlled by the provisions of CITES Appendix I under their currently accepted names or any of their synonyms. Taxons soumis aux dispositions de l'Annexe I – noms actuellement acceptés ou synonymes. Taxa reglamentados por las disposiciones del Apéndice I de la CITES, según sus nombres aceptados normalmente o cualquiera de sus sinónimos.

- Ariocarpus** spp. (syn. *Neogomesia*, *Roseocactus*)
- Astrophytum asterias** (syn. *Echinocactus asterias*)
- Aztekium ritteri**
- Coryphantha werdermannii** (syn. *Mammillaria werdermannii*; *Coryphantha densispina*)
- Discocactus** spp.
- Disocactus macdougallii** (syn. *Lobeira macdougallii*, *Nopalxochia macdougallii*)
- Echinocereus ferreirianus** ssp. **lindsayi** (syn. *E. lindsayi*)
- Echinocereus schmollii** (syn. *Cereus schmollii*, *Wilcoxia schmollii*)
- Escobaria minima** (syn. *Coryphantha nelliae*, *Escobaria nelliae*)
- Escobaria sneedii** (syn. *Coryphantha sneedii*, *Escobaria sneedii* ssp. *leei*)
- Mammillaria pectinifera** (syn. *Solisia pectinata*)
- Mammillaria solisioides**
- Melocactus conoideus**
- Melocactus deinacanthus**
- Melocactus glaucescens**
- Melocactus paucispinus**
- Obregonia denegrii**
- Pachycereus militaris** (syn. *Backebergia militaris*, *Cephalocereus militaris*, *Mitrocereus militaris*, *Pachycereus chrysomallus*)
- Pediocactus bradyi** (syn. *Pediocactus bradyi* ssp. *despainii*, *P. bradyi* ssp. *winkleri*, *P. despainii*, *P. winkleri*)
- Pediocactus knowltonii**
- Pediocactus paradinei**
- Pediocactus peeblesianus** (syn. *P. peeblesianus* var. *fickeisenii*, *Navajoa peeblesiana*, *Toumeya peeblesiana*, *Utahia peeblesiana*)
- Pediocactus sileri** (syn. *Echinocactus sileri*, *Utahia sileri*)
- Pelecyphora** spp. (syn. *Encephalocarpus*)
- Sclerocactus brevihamatus** ssp. **tobuschii** (syn. *Ancistrocactus tobuschii*, *Ferocactus tobuschii*)
- Sclerocactus erectocentrus** (syn. *Echinomastus erectocentrus*, *Neolloydia erectocentra*, *Echinomastus acunensis*, *E. krausei*)
- Sclerocactus glaucus** (syn. *Ferocactus glaucus*, *S. brevispinus*, *S. wetlandicus*, *S. wetlandicus* ssp. *ilseae*)
- Sclerocactus mariposensis** (syn. *Echinocactus mariposensis*, *Echinomastus mariposensis*, *Neolloydia mariposensis*)
- Sclerocactus mesae-verdae** (syn. *Coloradoa mesae-verdae*, *Echinocactus mesae-verdae*, *Ferocactus mesae-verdae*, *Pediocactus mesae-verdae*)
- Sclerocactus papyracanthus** (syn. *Echinocactus papyracanthus*, *Mammillaria papyracantha*, *Pediocactus papyracanthus*, *Toumeya papyracantha*)
- Sclerocactus pubispinus** (syn. *Echinocactus pubispinus*, *Ferocactus pubispinus*)
- Sclerocactus wrightiae** (syn. *Pediocactus wrightiae*)
- Strombocactus** spp.
- Turbinicarpus** spp. (syn. *Gymnocalyx*, *Normanbokea*, *Rapicactus*)
- Uebelmannia** spp.

**Proposed changes in classification from the previous edition**  
(provisional version; August 2015)

### Changes in subfamilies Opuntioideae and Pereskioideae

The re-division of *Opuntia* already mentioned is the principal change in the catalogue of genera for this new edition of the Checklist ('CCC3' for short), compared with its predecessor, and is detailed along with other proposed changes at generic level below.

In essence, the 're-division' of *Opuntia*, the principal genus of Cactaceae subfamily Opuntioideae, in the light of the molecular systematic study by Wallace & Dickie (2002), and supported by vote of a meeting at the IOS Congress of 2002, was the acceptance as genera of various component groups already recognized and named at generic or infrageneric rank in more conservative treatments. In the first and second editions of the CITES Cactaceae Checklist, the subfamily Opuntioideae was represented by five groups at generic rank: *Opuntia*, *Pereskia*, *Pterocactus*, *Quiabentia* and *Tacinga*. The eleven genera segregated from *Opuntia* in 2002 were *Austrocylindropuntia*, *Brasiliopuntia*, *Consolea*, *Cumulopuntia*, *Cylindropuntia*, *Grusonia*, *Maihueniopsis*, *Miqueliopuntia*, *Nopalea*, *Tephrocactus*, *Tunilla* (bringing the total genera to 16). Subsequently, on molecular evidence, *Corynopuntia* was segregated from *Cylindropuntia* (but more recently included in *Grusonia*); *Nopalea* has been returned to *Opuntia* and a new monotypic genus *Punotia* proposed to avoid paraphyly in *Austrocylindropuntia*, so the net total remains at 16,

The subfamily Pereskioideae contains two genera only, *Pereskia* (17 spp.) and *Maihuenia* 2 spp.). Following molecular evidence, the division of *Pereskia* into two genera has been proposed but is not followed in the Checklist, where the lower rank of subgenus is preferred.

### Changes in subfamily Cactoideae

Many of the molecular systematic studies published since CCC2 propose, favour or imply recognition of additional clade-based genera, to the point, in this subfamily, where a further period of nomenclatural instability is likely if wholesale changes are made without independent confirmation and critical discussion of the results, and in many cases wider sampling of taxa and markers. In any case, molecular evidence, by itself, does not dictate the rank at which taxa should be recognized, but the option of uniting genera to avoid paraphyly or utilizing conventional infrageneric ranks, as an alternative to splitting, is an option that has rarely been considered up to now. In the hope that a more conservative approach may prevail, serving the interests of nomenclatural stability, few 'substantive' changes will be made in this edition to the CCC2 list of genera in this subfamily:

#### *Acanthocalycium* (see 'Alternative' names, next page)

This small genus allied to *Echinopsis* was provisionally accepted in CCC2 but not in the *New Cactus Lexicon*. It was excluded from *Echinopsis* s.l. by Schlumpberger & Renner (2012) and grouped in a clade with the diverse monotypic genera *Denmoza* and *Setiechinopsis*. This places *Acanthocalycium* on a footing comparable with that of other small putative genera or subgenera that will continue to be listed under *Echinopsis* pending general acceptance of Schlumpberger & Renner's proposals.

**Borzicactus** Riccobono, Boll. R. Ort. Palermo 8: 261 (1909). Type: *B. ventimigliae* Riccobono. The IOS Working Party's decision to include this genus in *Cleistocactus* is now regarded an error, their similar pollination syndrome of the genera being a case of convergence mistaken for close affinity. The reinstated genus includes *Loxanthocereus* and *Seticereus* (already merged with *Borzicactus* by Kimnach 1960).

- Cephalocleistocactus** Ritter, Succulenta 1959: 108 (1959). Type: *C. chrysocephalus* Ritter. Taxa: 0+1. Distr.: Bolivia. → Cleistocactus. Provisionally accepted in CCC2 but not supported by Schlumpberger & Renner's data, being 'nested' in their CLEISTOCACTUS clade.
- Cintia** Knize & Riha, Kaktusy 31(2): 35–39 (1996). Type: *C. knizei* Riha. Taxa: 1. Distr.: Bolivia. → Rebutia [subg. Weingartia]. A monotypic genus provisionally accepted in CCC2 but not supported by Ritz et al. (2007).
- Lymanbensonia** Kimnach, Cact. Succ. J. (US) 56: 101 (1984). Type: *L. micrantha* (Vaupel) Kimnach. Reinstated by Korotkova et al. (2011) for three species hitherto included in *Pfeiffera*: *P. micrantha* (type), *P. crenata* and *P. brevispina*, plus the previously misclassified *Lepismium incachacanum*.
- Pfeiffera** Salm-Dyck, Cact. Hort. Dyck. 1844: 40 (1845). Type: *P. cereiformis* Salm-Dyck (~ *P. ianthothele* [Monville] Weber). Included in *Lepismium* in previous editions, but molecular evidence has subsequently shown that the two genera are not closely related, and that *Pfeiffera* is closer to *Corycactus* etc than to the Rhipsalideae (see Nyffeler 2000/CSI 10: 10–11). Species referable to *Lymanbensonia* are now excluded. Group status for the former genus *Acanthorhipsalis* is no longer necessary (Korotkova et al. 2011).
- Yavia** Piltz, Kakt. u.a. Sukk. 52(3): 57–62 (2001). Type: *Y. cryptocarpa* Kiesling & Piltz. Taxa 1. Distr.: Argentina. Referred to tribe Notocacteae (Nyffeler & Eggli (2010)).

#### 'Alternative names'

To draw attention to proposed or potential changes in the catalogue of genera, without accepting them for the purpose of this edition of the Checklist (CCC3), ***bold italic*** print will also be used to indicate 'alternative' generic names proposed or reinstated by authors in the light of molecular or other evidence as well as provisionally accepted species etc. This convention will apply to about 25 generic names, mostly reinstated by Arias et al. (2005 etc; A+, A+T] for endemic Mexican genera, by Schlumpberger & Renner (2012; S+R] in Tribe Trichocereeae, or accepted by contributors to the treatment of the Cactaceae in volume 4 of the *Flora of North America* (2003; FNA), but not in the *New Cactus Lexicon* (NCL).

In the CCC3 alphabetical list and the updated version of the NCL text, names of recognized species referable to 'alternative' genera will be indicated by a two-letter abbreviation accompanying the currently preferred name.

Also in the CCC3 alphabetical list, where transfers of species from one recognized genus to another have been proposed on the basis of molecular evidence, and have been accepted in one or more regional or overview treatments, as for instance in the case of *Peniocereus* species transferred to *Acanthocereus* and *Stenocereus* species to *Pachycereus*, these will be indicated by the 'equivalent' symbol (≡).

Entries for taxa now with 'alternative' names, and other names whose status has changed since the first edition of the New Cactus Lexicon (2006) include page/no. references to the illustrations in the original 'Atlas' volume and the 'Illustrations' reprint (2013).

- Acanthocalycium** Backeberg in Backeberg & Knuth, Kaktus ABC, 224, 412 (1936). Type: *Echinocactus spiniflorus* Schumann. Distr.: Argentina. ~ *Echinopsis* [Ac] (see previous page)
- Ancistrocactus** Britton & Rose, Cact. 4: 3 (1923). Type: *Echinocactus megarhizus* Rose. ~ *Sclerocactus* [An]. Accepted by FNA as distinct from *Sclerocactus* but closer to *Ferocactus* (B+W); included in the FEROCACTUS clade by V+. → *Sclerocactus* [An]
- Aporocactus** Lemaire, Illustr. Hort. 7: Misc. 67 (1860). Type: *A. flagelliformis* (Linnaeus) Lemaire. ~ *Disocactus* [Ap]. Included in *Disocactus* by Barthlott (1991/Brdl. 9: 87) but

- excluded by A+T; a revision of *Disocactus* is in preparation. → *Disocactus* [Ap]
- Aylostera** Spegazzini, An. Soc. Cient. Argent. 96: 75 (1923). Type: *Echinopsis pseudominuscula* Spegazzini. ~ *Rebutia* subg. *Aylostera* (Speg.) Buining & Donald, Sukkulantenkunde 7/8 : 98, 101 (1963). [Ay]. One of three clades distinguished in *Rebutia* by Ritz et al. (2007).
- Backebergia** Bravo, An. Inst. Biol. Mex. 24: 230 (1953). Type: *Pilocereus chrysomallus* Lemaire. ~ *Pachycereus* [Ba]. Excluded from *Pachycereus* (and *Lophocereus*) by A+T
- Chamaecereus** Britton & Rose, Cact. 3: 48 (1922). Type: *Cereus silvestrii* Spegazzini. ~ → *Echinopsis* [Ch]. Excluded from *Echinopsis* and *Lobivia* by S+R.
- Cochemia** (K. Brandegee) Walton, Cactus Journal 2: 50 (1899). Type: *Mammillaria halei* K. Brandegee. ~ *Mammillaria* [Co]. Nested in the MAMMILLARIA clade (V+). Its present sub-generic position and circumscription is retained pending a consensus favouring either a broader or a narrower circumscription of the ‘parent’ genus.
- Corynopuntia** F. Knuth in Backeberg & Knuth, Kaktus ABC, 114, 410 (1936). Type: *Opuntia clavata* Engelmann. ~ *Grusonia* [Cr]. Accepted in NCL, following Griffith (2002/Hasl. 86–93), but included in *Grusonia* sensu Anderson (1999), in FNA and by Barcenas et al. (2004).
- Echinomastus** Britton & Rose, Cact. 3: 147 (1922). Type: *Echinocactus erectocentrus* J. Coulter. ~ *Sclerocactus* [Em]. Accepted by Zimmermann & Parfitt (2003) in their treatment for FNA, with the reservation that it ‘is inferred to be a paraphyletic group, with some species (i.e. *E. johnsonii*) more closely related to *Sclerocactus* than to other members of *Echinomastus*.
- Isolatocereus** (Backeberg) Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *Cereus dumortieri* Scheidweiler. ~ *Stenocereus* [Is]. Accepted by Nyffeler & Eggli 2010. The exclusion of the monotypic *Isolatocereus* from *Stenocereus* was supported by Gibson (1991) on morphological grounds but is not supported by molecular data (Arreola-Nava 2006).
- Lemaireocereus** Britton & Rose, Contr. US Nat. Herb. 12: 424 (1909). Type: *Cereus hollianus* Weber. ~ *Pachycereus* [Lm]. Excluded from *Pachycereus* by A+T.
- Leucostele** Backeberg, Kakt. and. Sukk. 4: 40 (1953). Type: *L. rivierei* Backeberg. ~ *Echinopsis* [Ls] Accepted by S+R for a small clade including *E. atacamensis* and other Chilean species of *Echinopsis*.
- Leuenbergeria** Lodé, Cactus Aventures 97: 25–27 (2013). Type: *P. quisqueyana* Liogier. ~ *Pereskia* subg. *Leuenbergera* Rowley, Cact. Syst. Init. 32: 7 (2014). Type: *P. lychnidiflora* DC. [Le]. *Pereskia* is paraphyletic and the two major clades may deserve taxonomic recognition. (Rowley (CSI 32: 6–7. 2014). Species referable to the proposed segregate genus *Leuenbergeria* are indicated by the abbreviation ‘[Le]’ after the name but in the absence of clear-cut distinctions Rowley’s proposal to treat the clades as subgenera has the virtue of preserving nomenclatural stability.
- Lobivia** Britton & Rose, Cact. 3: 49 (1922). Type: *Echinocactus pentlandii* Hooker. ~ *Echinopsis* [Lo] Included in *Echinopsis* in previous editions but excluded from *Echinopsis* s.l. by S+R. This is the principal component of their LOBIVIA clade and restricted by them to numerous mainly small-growing species in Bolivia.
- Lophocereus** (Berger) Britton & Rose, Contr. US Nat. Herb. 12: 426 (1909). Type: *Cereus schottii* Engelmann. ~ *Pachycereus* [Lp]. Excluded from *Pachycereus* by A+T.
- Morangaya** Rowley, Ashingtonia 1: 44 (1974). Type: *Cereus pensilis* K. Brandegee. ~ *Echinocereus* [Mo]. Excluded from *Echinocereus* by V+.
- Nyctocereus** (Berger) Britton & Rose, Contr. US Nat. Herb. 12: 423 (1909). Type: *Cereus ser-*

*pentinus* (Lagasca & Rodriguez) De Candolle. ~ *Peniocereus* [Ny]. Currently included in *Peniocereus* but reinstated by A+T.

**Pseudomitrocereus** Bravo & Buxbaum, Bot. Stud. 12: 49, 53 (1961). Type: *Pilocereus fulviceps* Weber. ~ *Cephalocereus* or *Neobuxbaumia* (not *Pachycereus*) [Pm]. *P. fulviceps*, the only species, is part of a polytomy with *Cephalocereus* and *Neobuxbaumia* so is misplaced in *Pachycereus* [A+T]

**Pterocereus** MacDougal & Miranda, Ceiba 4: 135 (1954). Type: *Pterocereus foetidus* MacDougal & Miranda. ~ *Pachycereus* [Pt] Excluded from *Pachycereus* by [A+T]

**Rapicactus** Buxbaum & Oehme, Cact. Jahrb. Deutsch. Kakt. Ges. 1942: 24 (1942). Type: *Rapicactus subterraneus* Buxbaum & Oehme. ~ *Turbinicarpus* [Ra]. A member of the LOPHOPHORA clade (V+) but hitherto included in the polyphyletic group *Turbinicarpus*

**Reicheocactus** Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *R. pseudoeicheanus* Backeberg. ~ *Echinopsis* [Re]. Hitherto included in *Echinopsis* or *Lobivia* but found by S+R to occupy a basal position in the Trichocereeae

**Setiechinopsis** (Backeberg) De Haas, Succulenta 22: 9 (1940). Type: *Echinopsis mirabilis* Spegazzini. ~ *Echinopsis* [Se]. Monotypic. Accepted by S+R (DENMOZA clade)

**Soehrensia** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [21] (1938). Type: *Lobivia bruchii* Britton & Rose. ~ *Echinopsis* [So]. Accepted by S+R for numerous taxa previously included in *Lobivia* (*Helianthocereus*) and *Trichocereus*.

**Trichocereus** (Berger) Riccobono, Boll. R. Ort. Palermo 8: 236 (1909). Type: *Cereus macrogonus* Otto. ~ *Echinopsis* group [Le], [So] and [Tr]

According to S+R, the *Trichocereus* group *sensu* NCL includes three separate lineages. The neotypification of *Trichocereus* by Albesiano & Kiesling (2012), based on their application of the dubious name *Cereus macrogonus*, limits the generic name to *T. pachanoi* and its close relatives in Peru and Bolivia [Tr]. The more varied, mainly Argentine and partly day-flowering lineage becomes *Soehrensia* (including *Helianthocereus*) [So] and the mainly Chilean group, including the iconic Andean species *E. atacamensis* becomes *Leucostele* [Le] (see Schlumpberger 2012/CSI 28: 29–31). Pending general acceptance of this scheme, the species will continue to be listed alphabetically with their hypothetical lineage indicated by the relevant abbreviation..**Weingartia** Werdermann, Kakteenkunde 1937: 20,21 (1937). Type: *Echinocactus fidianus* Backeberg. ~ *Rebutia* subg. *Weingartia* (Werderm.) Rowley, Cactus World 27(2): 89 (2009). [Wg]. One of three clades distinguished in *Rebutia* by Ritz et al. (2007).

**List of genera of Cactaceae and their principal synonyms**  
*(to be further updated)*

*Notes:* Names of genera currently accepted for the purpose of the Checklist are printed in **bold type**. ‘Alternative’ names (as defined on page 10) are printed in **bold-italic** type. The currently preferred name of genera so treated (i.e. where the relevant taxa are listed) is indicated at the end of the entry by the name of the preferred genus, preceded by a tilde (~). Synonyms are printed in *italic*, and the genera to which they are referred indicated after an arrow (→). The number of taxa quoted for each genus (‘Taxa:’) is the number of currently accepted species, plus (+) the total number of provisionally accepted species, heterotypic subspecies (both fully and provisionally accepted) and hybrids, if any. Total numbers of taxa are summarized in the **Summary Table on pp. [Not yet updated]**

- Acanthocalycium*** Backeberg in Backeberg & Knuth, Kaktus ABC, 224, 412 (1936). Type: *Echinocactus spiniflorus* Schumann. Taxa: 1+2. Distr.: Argentina. ~ *Echinopsis* [**Ac**]. This small genus allied to *Echinopsis* was provisionally accepted in CCC2 but not in the *New Cactus Lexicon*. It was excluded from *Echinopsis* s.l. by Schlumpberger & Renner (2012) and grouped in a clade with the diverse monotypic genera *Denmoza* and *Setiechinopsis*. This places *Acanthocalycium* on a footing comparable with that of other small putative genera or subgenera that will continue to be listed under *Echinopsis* pending general acceptance of Schlumpberger & Renner’s proposals.
- Acanthocereus*** (Engelmann ex Berger) Britton & Rose, Contr. US Nat. Herb. 12: 432 (1909). Type: *Cereus baxaniensis* Karwinsky ex Pfeiffer. Taxa: 1+5. Distr.: Trop. America, Caribbean. Syn.: *Monvillea* Britton & Rose (1920), as to type.
- Acantholobivia*** Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *Lobivia tegeleriana* Backeberg. → *Echinopsis*
- Acanthorhipsalis*** (Schumann) Britton & Rose, Cact. 4: 211 (1923). Type: *Rhipsalis monacantha* Grisebach. → *Pfeiffera*
- Acanthorhipsalis*** Kimnach, Cact. Succ. J. (US) 55: 177 (1983), non (Schumann) Britton & Rose. Type: *Cereus micranthus* Vaupel. → *Lymanbensonia*
- Akersia*** Buining, Succulenta 1961: 25 (1961). Type: *A. roseiflora* Buining. → *Borzicactus*
- Ancistrocactus*** Britton & Rose, Cact. 4: 3 (1923). Type: *Echinocactus megarhizus* Rose. ~ *Sclerocactus* [**An**]. Accepted by FNA as distinct from *Sclerocactus* but closer to *Ferocactus* (B+W); included in the FEROCACTUS clade by V+. → *Sclerocactus* [**An**]
- Anisocereus*** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [8, 21] (1938). Type: *Cereus lepidanthus* Eichlam. → *Pachycereus*
- Aporocactus*** Lemaire, Illustr. Hort. 7: Misc. 67 (1860). Type: *A. flagelliformis* (Linnaeus) Lemaire. ~ *Disocactus* [**Ap**]. Included in *Disocactus* by Barthlott (1991/Brdl. 9: 87) but excluded by A+T; a revision of *Disocactus* is in preparation.
- Arequipa*** Britton & Rose, Cact. 3: 100 (1922). Type: *Echinocactus leucotrichus* Philippi. → *Oreocereus*
- Arequipiopsis*** Kreuzinger & Buining, Fedde’s Repert. Sp. Nov. 50: 20 (1941). Type: *Echinopsis hempeianus* Gürke. → *Oreocereus*
- Ariocarpus*** Scheidweiler, Bull. Acad. Sci. Brux. 5: 491 (1838). Type: *A. retusus* Scheidweiler. Taxa: 6+2. Distr.: SW USA (S Texas), N Mexico. Syn.: *Roseocactus* Berger (1925); *Neogomesia* Castañeda (1941). Ref.: Anderson (1960–64).
- Armatocereus*** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [21] (1938). Type: *A. laetus* (Kunth) Backeberg. Taxa: 10+5. Distr.: W South America.
- Arrojadoa*** Britton & Rose, Cact. 2: 170 (1920). Type: *Cereus rhodanthus* Gürke. Taxa: 4+2. Distr.: E Brazil.

- Arthrocereus** Berger, Kakteen: 337 (1929), *nom. cons.*; F. Knuth, Den Nye Kaktusbog: 111 (1930). Type: Monatsschr. Kakt.-Kunde 28: illus. opp. p. 62 (1918), as '*Cereus damazioi*', *typ. cons.* (→ *A. glaziovii* [Schumann] Taylor & Zappi). Taxa: 4+2. Distr.: Brazil.
- Astrophytum** Lemaire, Cact. Gen. Nov. Sp. Hort. Monv., 3 (1839). Type: *A. myriostigma* Lemaire. Taxa: 4. Distr.: SW USA (S Texas), Mexico.
- Austrocactus** Britton & Rose, Cact. 3: 44 (1922). Type: *A. bertinii* (Cels) Britton & Rose. Taxa: 3+2. Distr.: S Argentina, S Chile.
- Astrocephalocereus** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [22] (1938). Type: *Cephalocereus purpureus* Gürke. Distr.: E Brazil. → *Micranthocereus*
- Astrocyllindropuntia** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [3, 21] (1938). Type: *Opuntia exaltata* Berger. → *Opuntia*
- Aylostera** Spegazzini, An. Soc. Cient. Argent. 96: 75 (1923). Type: *Echinopsis pseudominuscula* Spegazzini. ~ *Rebutia* subg. *Aylostera* (Speg.) Buining & Donald, Sukkulantenkunde 7/8 : 98, 101 (1963). [Ay]. One of three clades distinguished in *Rebutia* by Ritz et al. (2007).
- Aztekium** Bödeker, Monatsschr. Deutsch. Kakt. Ges. 1: 52 (1929). Type: *A. ritteri* Bödeker. Taxa: 2. Distr.: NE Mexico.
- Azureocereus** Akers & Johnson, Cact. Succ. J. (US) 21: 133 (1949). Type: *A. nobilis* Akers & Johnson. → *Browningia*
- Backebergia** Bravo, An. Inst. Biol. Mex. 24: 230 (1953). Type: *Pilocereus chrysomallus* Lemaire. ~ *Pachycereus* [Ba]. Excluded from *Pachycereus* (and *Lophocereus*) by A+T
- Bartschella** Britton & Rose, Cact. 4: 57 (1923). Type: *Mammillaria schumannii* Hildmann. → *Mammillaria*
- Bergerocactus** Britton & Rose, Contr. US Nat. Herb. 12: 435 (1909). Type: *B. emoryi* (Engelmann) Britton & Rose. Taxa: 1. Distr.: SW USA (S California), NW Mexico (NW Baja California).
- Binghamia** Britton & Rose, Cact. 2: 167 (1920). Type: *Cephalocereus melanostele* Vaupel. → *Espostoa*
- Bisnaga** Orcutt, Cactography, 1 (1926). Type: *Echinocactus cornigerus* De Candolle. → *Ferocactus*
- Blossfeldia** Werdermann, Kakteenkunde 1937: 162 (1937). Type: *B. liliputana* Werdermann. Taxa: 1. Distr.: N Argentina, Bolivia. ~ *Parodia*
- Bolivicereus** Cárdenas, Cact. Succ. J. (US) 23: 91 (1951). Type: *B. samaipatanus* Cárdenas. → *Cleistocactus*
- Bonifazia** Standley & Steyermark, Publ. Field Mus. Nat. Hist. bot. ser. 23: 66 (1944). Type: *B. quezalteca* Standley & Steyermark. → *Disocactus*
- Borzicactella** Ritter, Kakteen in Sudamerika 4: 1385 (1981). Type: *Cleistocactus tenuiserpens* Rauh & Backeberg. → *Cleistocactus*
- Borzicactus** Riccobono, Boll. R. Ort. Palermo 8: 261 (1909). Type: *B. ventimigiae* Riccobono. The IOS Working Party's decision to include this genus in *Cleistocactus* is now regarded an error, their similar pollination syndrome of the genera being a case of convergence mistaken for close affinity. The reinstated genus includes *Loxanthocereus* and *Seticereus* (already merged with *Borzicactus* by Kimnach 1960).
- Brachycalyx** Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *B. tilcarensis* (Backeberg) Backeberg. → *Gymnocalyx*
- Brachycereus** Britton & Rose, Cact. 2: 120 (1920). Type: *Cereus nesioticus* Schumann (LT: Backeberg 1959). Taxa: 1. Distr.: Ecuador (Galapagos Islands).
- Basilicactus** Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *Echinocactus graessneri* Schumann. → *Parodia*
- Basilicereus** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [8, 22] (1938). Type: *Cereus phaeacanthus* Guerke. Taxa: 2. Distr.: Brazil.
- Brasiliopuntia** (Schumann) Berger, Entwicklungslinien Kakt., 17 (1926). Type: *Cactus*

- brasiliensis* Willdenow. → *Opuntia*
- Brasiliparodia* Ritter, Kakteen in Südamerika 1: 144 (1979). Type: *Parodia buenekeri* Buining. → *Parodia*
- Bravocactus* Doweld, Sukkulenty (Moscow] 1998(1): 22 (1998). Type: *Bravocactus horripilus* (Lemaire] Doweld. → *Turbinicarpus*
- Browningia** Britton & Rose, Cact. 2: 63 (1920). Type: *B. candelaris* (Meyen] Britton & Rose. Taxa: 5+6. Distr.: W Paraguay, Bolivia, Peru, N Chile. Syn.: *Gymnanthocereus* Backeberg (1937); *Azureocereus* Akers & Johnson (1949); *Castellanosia* Cárdenas (1951); *Gymnocereus* Backeberg (1959).
- Buiningia* Buxbaum in Krainz, Die Kakteen, Lfg. 46–47 (1971). Type: *Buiningia brevicylindrica* Buining. → *Coleocephalocereus*
- Cactus* Linnaeus, Species Plantarum, 466 (1753). Type: *C. mammillaris* Linnaeus (see note). → *Mammillaria*
- Cactus* sensu Britton & Rose, Cact. 3: 220 (1922). → *Melocactus*
- Calymmanthium** Ritter, Kakt. and. Sukk. 13: 25 (1962). Type: *C. substerile* Ritter. Taxa: 1. Distr.: N Peru.
- Carnegiea** Britton & Rose, J. New York Bot. Gard. 9: 187 (1908). Type: *C. gigantea* (Engelmann] Britton & Rose. Taxa: 1. Distr.: SW USA (Arizona), Mexico.
- Castellanosia* Cárdenas, Cact. Succ. J. (US] 23: 90 (1951). Type: *C. caineana* Cárdenas. → *Browningia*
- Cephalocereus** Pfeiffer, Allg. Gartenz. 6: 142 (1838). Type: *Cactus senilis* Haworth. Taxa: 3+2. Distr.: Mexico. Syn.: *Pilocereus* Lemaire (1839); *Haseltonia* Backeberg (1949); *Neodawsonia* Backeberg (1949).
- Cephalocleistocactus* Ritter, Succulenta 1959: 108 (1959). Type: *C. chrysocephalus* Ritter. Distr.: Bolivia. → *Cleistocactus*. Provisionally accepted in CCC2 but not supported by Schlumberger & Renner's data, being 'nested' in their *CLEISTOCACTUS* clade.
- Cereus** Miller, Gard. Dict. Abr. ed. 4, [unpaged] (1754). Type: *C. hexagonus* (Linnaeus] Miller. Taxa: 23+16. Distr.: Caribbean, South America. Syn.: *Piptanthocereus* (Berger] Riccobono (1909); *Subpilocereus* Backeberg (1938); *Mirabella* Ritter (1979).
- Chamaecereus** Britton & Rose, Cact. 3: 48 (1922). Type: *Cereus silvestrii* Spegazzini. ~ → *Echinopsis* [Ch]. Excluded from *Echinopsis* and *Lobivia* by S+R.
- Chiapasia* Britton & Rose, Cact. 4: 203 (1923). Type: *Epiphyllum nelsonii* Rose. → *Disocactus*
- Chichipia* Backeberg in Marnier-Lapostolle, Liste Cact., 12 (1950). Type: *Cereus chichipe* Gosselin. → *Polaskia*
- Chilita* Orcutt, Cactography, 2 (1926). Type: *Mammillaria grahamii* Engelmann. → *Mammillaria*
- Cintia* Knize & Riha, Kaktusy 31(2): 35–39 (1996). Type: *C. knizei* Riha. Taxa: 1. Distr.: Bolivia. → *Rebutia* [subg. *Weingartia*]. A monotypic genus provisionally accepted in CCC2 but not supported by Ritz et al. (2007).
- Cipocereus** Ritter, Kakteen in Südamerika 1: 54 (1979). Type: *Cipocereus pleurocarpus* Ritter. Taxa: 5+1. Distr.: Brazil (Minas Gerais). Syn.: *Floribunda* Ritter (1979).
- Cleistocactus** Lemaire, Illustr. Hort. 8: Misc. 35 (1861). Type: *Cereus baumannii* Lemaire. Taxa: 23+25. Distr.: W South America, S Brazil, N Argentina. Syn.: *Borzicactus* Riccobono (1909); *Loxanthocereus* Backeberg (1937); *Seticereus* Backeberg (1942); *Maritimocereus* Akers & Buining (1950); *Bolivicereus* Cárdenas (1951); *Akersia* Buining (1961); *Winteria* Ritter (1962), non Murray; *Seticleistocactus* Backeberg (1963); *Winterocereus* Backeberg (1966); *Hildewintera* Ritter (1966); *Borzicactella* Ritter (1981).
- Cleistocana* Rowley, Bradleya 12: 5 (1994). (*Cleistocactus* 'Matucana'). Taxa: 1. Distr.: Peru.
- Cochemiea** (K. Brandegee] Walton, Cactus Journal 2: 50 (1899). Type: *Mammillaria halei* K. Brandegee. ~ *Mammillaria* [Co]. Nested in the *MAMMILLARIA* clade (V+). Its present sub-

- generic position and circumscription is retained pending a consensus favouring either a broader or a narrower circumscription of the ‘parent’ genus.
- Cochiseia** Earle, Saguaro Land Bull. no. 30: 61, 64–66 (1976). Type: *Cochiseia robbinsorum* Earle. → Escobaria
- Coleocephalocereus** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [22] (1938). Type: *C. fluminensis* (Miquel) Backeberg. Taxa: 6+2. Distr.: E Brazil. Syn.: *Buiningia* Buxbaum (1971).
- Coloradoa** Boissevain & Davidson, Colorado Cacti, 54 (1940). Type: *C. mesae-verdae* Boissevain & Davidson. → Sclerocactus
- Consolea** Lemaire, Rev. Hort. 1862: 174 (1862). Type: *Opuntia rubescens* Salm-Dyck. → Opuntia
- Copiapoia** Britton & Rose, Cact. 3: 85 (1922). Type: *C. marginata* (Salm-Dyck) Britton & Rose. Taxa: 20+9. Distr.: N Chile. Syn.: *Pilocopiapoia* Ritter (1961).
- Corryocactus** Britton & Rose, Cact. 2: 66 (1920). Type: *C. brevistylus* (Schumann) Britton & Rose. Taxa: 12+23. Distr.: Bolivia, Peru, N Chile. Syn.: *Erdisia* Britton & Rose (1920).
- Corynopuntia** F. Knuth in Backeberg & Knuth, Kaktus ABC, 114, 410 (1936). Type: *Opuntia clavata* Engelmann. ~ *Grusonia* [Cr]. Accepted in NCL, following Griffith (2002/Hasl. 86–93), but included in *Grusonia sensu* Anderson (1999), in FNA and by Barcenas et al. (2004).
- Coryphantha** (Engelmann) Lemaire, Les Cactées, 32 (1868). Type: *C. sulcata* (Engelmann) Britton & Rose (LT: Hunt & Benson 1976). Taxa: 41+16. Distr.: SW USA, Mexico. Syn.: *Lepidocoryphantha* Backeberg (1938); *Cumarinia* Buxbaum (1951).
- Cryptocereus** Alexander, Cact. Succ. J. (US) 22: 164 (1950). Type: *C. anthonyanus* Alexander. → Selenicereus
- Cullmannia** Distefano, Kakt. and. Sukk. 7: 8 (1956). Type: *Cereus viperinus* Weber. → Peniocereus
- Cumarinia** Buxbaum, Oesterr. Bot. Zeitschr. 98: 61 (1951). Type: *Coryphantha odorata* Bödeker. → Coryphantha
- Cumulopuntia** Ritter, Kakteen in Südamerika 2: 399 (1980). Type: *Opuntia ignescens* Vaupel. → Opuntia
- Cylindropuntia** (Engelmann) F. Knuth in Backeberg & Knuth, Kaktus ABC, 117 (1936). Type: *Opuntia imbricata* (Haworth) De Candolle. → Opuntia
- Deamia** Britton & Rose, Cact. 2: 212 (1920). Type: *Cereus testudo* Karwinsky ex Zuccarini. → Selenicereus
- Delaetia** Backeberg, Die Cact. 6: 3788 (1962). Type: *Delaetia woutersiana* Backeberg, nom. inval. → Eriosyce
- Dendrocereus** Britton & Rose, Cact. 2: 113 (1920). Type: *Cereus nudiflorus* Engelmann ex Sauvalle. Taxa: 1+1. Distr.: Cuba, Haiti. ~ Acanthocereus
- Denmoza** Britton & Rose, Cact. 3: 78 (1922). Type: *Echinocactus rhodacanthus* Salm-Dyck. Taxa: 1. Distr.: NW Argentina.
- Digitorebutia** Buining, Succulenta 22: 51 (1940). Type: *Rebutia haagei* Fric & Schelle. → Rebutia
- Discocactus** Pfeiffer, Allg. Gartenz. 5: 241 (1837). Type: *D. insignis* Pfeiffer. Taxa: 6+4. Distr.: E Bolivia, Brazil, N Paraguay.
- Disocactus** Lindley, Bot. Reg. 31: t. 9 (1845). Type: *D. bififormis* (Lindley) Lindley. Taxa: 16. Distr.: S Mexico, Central America, Caribbean, N & W South America. Syn.: *Aporocactus* Lemaire (1860); *Wittia* Schumann (1903) non Pantocsek; *Heliocereus* (Berger) Britton & Rose (1909); *Mediocactus* Britton & Rose (1920), as to type; *Nopalxochia* Britton & Rose (1923); *Chiapasia* Britton & Rose (1923); *Lobeira* Alexander (1944); *Bonifazia* Standley & Steyermark (1944); *Pseudonopalxochia* Backeberg (1958); *Wittiocactus* Rauschert (1982).
- Dolichothele** (Schumann) Britton & Rose, Cact. 4: 61 (1923). Type: *Mammillaria longimamma* De Candolle. → Mammillaria

- Eccremocactus* Britton & Rose, Contr. US Nat. Herb. 16: 261 (1913). Type: *E. bradei* Britton & Rose. → *Weberocereus*
- Echinocactus** Link & Otto, Verh. Ver. Beförd. Gartenb. Preuss. Staaten, 420 (1827). Type: *E. platyacanthus* Link & Otto. Taxa: 6+1. Distr.: SW USA, Mexico. Syn.: *Homalocephala* Britton & Rose (1922); *Echinofossulocactus* Lawrence (1841) non Britton & Rose; *Emorycactus* Doweld (1996); *Meyerocactus* Doweld (1996).
- Echinocereus** Engelmann in Wislizenus, Mem. Tour N. Mex., 91 (1848). Type: *E. viridiflorus* Engelmann (LT: Britton & Rose). Taxa: 54+57. Distr.: SW USA, Mexico. Syn.: *Wilcoxia* Britton & Rose (1909); *Morangaya* Rowley (1974). Ref.: Taylor (1985, 1988, 1989, 1994).
- Echinofossulocactus* Lawrence in Loudon, Gard. Mag. 17: 317 (1841). Type: *E. helophorus* (Lemaire) Lawrence (LT: Hunt 1980). → *Echinocactus*
- Echinofossulocactus* sensu Britton & Rose, Cact. 3: 109 (1922). Type: *E. coptonogonus* Lemaire (LT: Britton & Rose). → *Stenocactus*
- Echinomastus** Britton & Rose, Cact. 3: 147 (1922). Type: *Echinocactus erectocentrus* J. Coulter. ~ *Sclerocactus* [Em]. Accepted by Zimmermann & Parfitt (2003) in their treatment for FNA, with the reservation that it 'is inferred to be a paraphyletic group, with some species (i.e. *E. johnsonii*) more closely related to *Sclerocactus* than to other members of *Echinomastus*'.
- Echinopsis** Zuccarini, Abh. Bayer. Akad. Wiss. München 2: 675 (1837). Type: *E. eyriesii* (Turpin] Zuccarini (LT: Britton & Rose 1922). Taxa: 61+85. Distr.: Bolivia, Peru, S Brazil, S South America. Syn.: *Trichocereus* (Berger] Riccobono (1909); *Chamaecereus* Britton & Rose (1922); *Lobivia* Britton & Rose (1922); *Soehrensia* Backeberg (1938); *Hymenorebutia* Fric ex Buining (1939); *Setiechinopsis* (Backeberg] De Haas (1940); *Acantholobivia* Backeberg (1942); *Pseudolobivia* (Backeberg] Backeberg (1942); *Reicheocactus* Backeberg (1942); *Helianthocereus* Backeberg (1949); *Neolobivia* Y. Ito, (1950); *Leucostele* Backeberg (1953).
- Emorycactus* Doweld, Succulenta 75(6): 270 (1996). Type: *Echinocactus polycephalus* Engelmann & Bigelow. → *Echinocactus*
- Encephalocarpus* Berger, Kakteen, 331, 332 (1929). Type: *Ariocarpus strobiliformis* Werdermann. → *Pelecyphora*
- Eomatucana* Ritter, Kakt. and. Sukk. 16: 230 (1965). Type: *E. oreodoxa* Ritter. → *Matucana*
- Epiphyllanthus* Berger, Rep. Missouri Bot. Gard. 16: 84 (1905). Type: *Cereus obtusangulus* Schumann. → *Schlumbergera*
- Epiphyllum* (Berger] Backeberg & Knuth, Kaktus ABC, 158 (1936). Type: *Epiphyllum gaertneri* Schumann. → *Hatiora*
- Epiphyllum** Haworth, Syn. Pl. Succ., 197 (1812). Type: *E. phylanthus* (Linnaeus] Haworth. Taxa: 8+11. Distr.: Trop. America, Caribbean. Syn.: *Phyllocactus* Link (1829).
- Epiphyllum* Pfeiffer, Enum. Cact., 123 (1837), non Haworth. Type: *Epiphyllum truncatum* Haworth. → *Schlumbergera*
- Epithelantha** Weber ex Britton & Rose, Cact. 3: 92 (1922). Type: *Mammillaria micromeris* Engelmann. Taxa: 1+5. Distr.: SW USA (Texas), NE Mexico. → *Epithelantha*. Ref.: Glass & Foster (1978).
- Erdisia* Britton & Rose, Cact. 2: 104 (1920). Type: *Cereus squarrosum* Vaupel. → *Corryocactus*
- Eriocactus* Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *Echinocactus schumannianus* Nicolai. → *Parodia*
- Eriocephala* Backeberg, Blätt. Kakt.-Forsch. 1938(6): [7,21] (1938), non *Eriocephalus* Linnaeus. → *Parodia*
- Eriocereus* Riccobono, Boll. R. Ort. Palermo 8: 238 (1909). Type: *Cereus gracilis* Miller. → *Harrisia*
- Eriosyce* Philippi, Anal. Univ. Chile 41: 721 (1872). Type: *Echinocactus sandillon* Gay (→

- Eriosyce aurata* (Pfeiffer] Backeberg; *E. ceratistes* sensu Britton & Rose). Taxa: 34+14. Distr.: Chile. Syn.: *Neopoteria* Britton & Rose (1922); *Islaya* Backeberg (1934); *Pyrrhocactus* Backeberg & Knuth (1936); *Horridocactus* Backeberg (1938); *Neochilenia* Backeberg ex Doelz (1942); *Thelocephalia* Y. Ito (1957); *Rodentiophila* Backeberg (1959); *Delactia* Backeberg (1962).
- Erythrorhipsalis* Berger, Monatsschr. Kakt. 30: 4 (1920). Type: *Rhipsalis pilocarpa* Loefgren. → *Rhipsalis*
- Escobaria* Britton & Rose, Cact. 4: 53 (1923). Type: *E. tuberculosa* (Engelmann] Britton & Rose. Taxa: 18+12. Distr.: W USA, N Mexico. Syn.: *Neobesseyea* Britton & Rose (1923); *Cochiseia* Earle (1976). Ref.: Taylor (1986).
- Escontria* Rose, Contr. US Nat. Herb. 10: 125 (1906). Type: *Cereus chiotilla* Weber. Taxa: 1. Distr.: Mexico.
- Espostoa* Britton & Rose, Cact. 2: 60 (1920). Type: *E. lanata* (Kunth] Britton & Rose. Taxa: 9+7. Distr.: W South America. Syn.: *Binghamia* Britton & Rose (1920); *Pseudeespstoa* Backeberg (1934); *Thrixanthocereus* Backeberg (1937); *Vatricania* Backeberg (1950).
- '*Espostocactus* Mottram, Contrib. New Class. Cact. Fam., 38 (1990). (*Cleistocactus* ' *Esposta*). Taxa: 0+1. Distr.: Peru.
- Espstoopsis* Buxbaum, Krainz, Die Kakteen Lfg. 38–39 (1968). Type: *Cereus dybowskii* Roland-Gosselin. Taxa: 1. Distr.: E Brazil (Bahia). Syn.: *Gerocephalus* Ritter (1968).
- Eulychnia* Philippi, Florula Atacamensis, 23 (1860). Type: *E. breviflora* Philippi. Taxa: 5+2. Distr.: Chile, S Peru. Syn.: *Philippicereus* Backeberg (1942).
- Facheiroa* Britton & Rose, Cact. 2: 173 (1920). Type: *F. pubiflora* Britton & Rose. Taxa: 3+1. Distr.: Brazil. Syn.: *Zehntnerella* Britton & Rose (1920).
- Ferocactus* Britton & Rose, Cact. 3: 123 (1922). Type: *F. wislizeni* (Engelmann] Britton & Rose. Taxa: 23+16. Distr.: SW USA, Mexico. Syn.: *Bisnaga* Orcutt (1926). Ref.: Taylor (1984).
- Floribunda* Ritter, Kakteen in Südamerika 1: 58 (1979). Type: *Floribunda pusilliflora* Ritter. → *Cipocereus*
- Frailea* Britton & Rose, Cact. 3: 208 (1922). Type: *F. cataphracta* (Dams] Britton & Rose. Taxa: 11+14. Distr.: E Bolivia, S Brazil, Paraguay, Uruguay, N Argentina. ~ *Parodia*
- Geohintonia* Glass & Fitz Maurice, Cact. Suc. Mex. 37(1): 16–19 (1991). Type: *Geohintonia mexicana* Glass & Fitz Maurice. Taxa: 1. Distr.: NE Mexico.
- Gerocephalus* Ritter, Kakt. and. Sukk. 19: 156 (1968). Type: *Cereus dybowskii* Roland-Gosselin. → *Espstoopsis*
- Glandulicactus* Backeberg, Blätt. Kakt.-Forsch. 1938(6): [10, 22] (1938). Type: *Echinocactus uncinatus* Galeotti. → *Sclerocactus*
- Grusonia* F. Reichenbach ex Britton & Rose, Cact. 1: 215 (1919). Type: *Cereus bradtiana* J. Coulter. → *Opuntia*
- Gymnanthocereus* Backeberg, Blätt. Kakt.-Forsch. 1937(7): Nachtr. 15 (1937). Type: *Cactus chlorocarpus* Kunth. → *Browningia*
- Gymnocactus* Backeberg, Blätt. Kakt.-Forsch. 1938(6): [10, 22] (1938). Type: *Echinocactus saueri* Bödeker. → *Turbinicarpus*
- Gymnocalycium* Pfeiffer ex Mittler, Taschenbuch für Cactusliebhaber 2: 124 (1844) ('*Gymnocalicum*'); Pfeiffer, Abbild. Beschr. Cact. 2: (1845). Type: *G. denudatum* (Link & Otto) Pfeiffer (LT: Britton & Rose 1922). Taxa: 42+48. Distr.: Bolivia, S Brazil, S South America. Syn.: *Brachycalycium* Backeberg (1942).
- Gymnocereus* Backeberg, Die Cact. 2: 920 (1959). Type: *Cereus microspermus* Werdermann & Backeberg. → *Browningia*
- Haageocereus* Backeberg, Blätt. Kakt.-Forsch. 1934(6): [1] (1934). Type: *H. pseudomelanostele* (Werdermann & Backeberg] Backeberg. Taxa: 13+12. Distr.: Bolivia, Peru, N Chile. Syn.: *Peruvocereus* Akers (1947).

- 'Haagespostoa** Rowley, Nat. Cact. Succ. J. 37(3): 76 (1982). (*Epostoa* 'Haageocereus'). Taxa: 0+2. Distr.: Peru.
- Hamatocactus** Britton & Rose, Cact. 3: 104 (1922). Type: *Echinocactus setispinus* Engelmann. → *Thelocactus*
- Harrisia** Britton, Bull. Torrey Bot. Club 35: 561 (1908). Type: *H. gracilis* (Miller) Britton. Taxa: 14+7. Distr.: SE USA (Florida), Caribbean, Brazil, Bolivia, Paraguay, Uruguay, Argentina. Syn.: *Eriocereus* Riccobono (1909); *Roseocereus* Backeberg (1938).
- Haseltonia** Backeberg, Blätt. Sukk.-Kunde 1: 3 (1949). Type: *Pilocereus hoppenstedtii* Weber. → *Cephalocereus*
- Hatiiora** Britton & Rose in Bailey, Standard Cycl. Hort. 3: 1432 (1915). Type: *Rhipsalis salicornioides* Haworth. Taxa: 5+2. Distr.: NE to S Brazil. Syn.: *Rhipsalidopsis* Britton & Rose (1923); *Epiphyllopsis* Backeberg & Knuth (1936); *Pseudozygocactus* Backeberg (1938). Ref.: Barthlott (1987), Barthlott & Taylor (1995).
- Heliaibravoa** Backeberg, Cact. Succ. J. Gt. Brit. 18: 23 (1956). Type: *Cereus chende* Roland-Gosselin. → *Polaskia*
- Helianthocereus** Backeberg, Cact. Succ. J. Gt. Brit. 11: 53 (1949). Type: *Trichocereus poco* Backeberg. → *Echinopsis*
- Heliocereus** (Berger] Britton & Rose, Contr. US Nat. Herb. 12: 433 (1909). Type: *Cactus speciosus* Cavanilles. Distr.: Mexico, Guatemala. → *Disocactus*
- Hertrichocereus** Backeberg, Cact. Succ. J. (US) 22: 153 (1950). Type: *Cereus beneckeii* Ehrenberg. → *Stenocereus*
- Hildewintera** Ritter, Kakt. and. Sukk. 17: 11 (1966). Type: *Winteria auresipina* Ritter. → *Cleistocactus*
- Homalocephala** Britton & Rose, Cact. 3: 181 (1922). Type: *Echinocactus texensis* Hopffer. → *Echinocactus*
- Horridocactus** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [7] (1938). Type: *Cactus horridus* Colla. → *Eriosyce*
- Hylocereus** (Berger] Britton & Rose, Contr. US Nat. Herb. 12: 428 (1909). Type: *H. triangularis* (Linnaeus] Britton & Rose. Taxa: 11+7. Distr.: Mexico, Central and N South America, Caribbean. Syn.: *Wilmattea* Britton & Rose (1920).
- Hymenorebutia** Fric ex Buining, Succulenta 21: 101 (1939). Type: *H. kreuzingeri* Fric ex Buining. → *Echinopsis*
- Islaya** Backeberg, Blätt. Kakt.-Forsch. 1934(10): [3] (1934). Type: *Islaya minor* Backeberg. → *Eriosyce*
- Isolatocereus** (Backeberg] Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *Cereus dumortieri* Scheidweiler. ~ *Stenocereus* [Is]. Accepted by Nyffeler & Eggli 2010. The exclusion of the monotypic *Isolatocereus* from *Stenocereus* was supported by Gibson (1991) on morphological grounds but is not supported by molecular data (Arreola-Nava 2006).
- Jasminocereus** Britton & Rose, Cact. 2: 146 (1920). Type: *J. galapagensis* (F.A.C. Weber] Britton & Rose (→ *J. thouarsii* (Weber] Backeberg). Taxa: 1. Distr.: Ecuador (Galapagos Isls.). Ref.: Wiggins & Porter, Fl. Galapagos Isls. 534–537 (1971).
- Kadenicarpus** Doweld, Sukkulenty (Moscow] 1998(1): 22 (1998). Type: *Kadenicarpus pseudomacrochele* (Backeberg] Doweld. → *Turbinicarpus*
- Krainzia** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [11, 21] (1938). Type: *Neomammillaria longiflora* Britton & Rose. → *Mammillaria*
- Lasiocereus** Ritter, Succulenta 48(8): (1966). Type: *Lasiocereus rupicola* Ritter. Taxa: 2. Distr.: Peru. ~ *Haageocereus*?
- Lemaireocereus** Britton & Rose, Contr. US Nat. Herb. 12: 424 (1909). Type: *Cereus hollianus* Weber. ~ *Pachycereus* [Lm]. Excluded from *Pachycereus* by A+T.
- Leocereus** Britton & Rose, Cact. 2: 108 (1920). Type: *L. bahiensis* Britton & Rose. Taxa: 1.

Distr.: E Brazil.

*Lepidocoryphantha* Backeberg, Blätt. Kakt.-Forsch. 1938(6): [10, 22] (1938). Type: *Mammillaria macromeris* Engelmann. → *Coryphantha*

**Lepismium** Pfeiffer, Allg. Gartenz. 3: 315 (1835). Type: *L. commune* Pfeiffer (LT: Britton & Rose). Taxa: 14+1. Distr.: Brazil, Paraguay, Peru, Bolivia, Uruguay, Argentina. Syn.: *Pfeiffera* Salm-Dyck (1845); *Acanthorhipsalis* (Schumann) Britton & Rose (1923); *Acanthorhipsalis* Kimnach (1983); *Lymanbensonia* Kimnach (1984). Ref.: Barthlott (1987), Barthlott & Taylor (1995).

**Leptocereus** (Berger) Britton & Rose, Contr. US Nat. Herb. 12: 433 (1909). Type: *L. assurgens* (Grisebach) Britton & Rose. Taxa: 4+11. Distr.: Caribbean. Syn.: *Neoabbottia* Britton & Rose (1921).

*Leptocladodia* Buxbaum, Oesterr. Bot. Zeitschr. 101: 601 (1954). Type: *Mammillaria elongata* De Candolle. → *Mammillaria*

**Leuchtenbergia** Hooker, Curtis's Bot. Mag. 74: t.4393 (1848). Type: *L. principis* Hooker. Taxa: 1. Distr.: N Mexico.

**Leucosteple** Backeberg, Kakt. und. Sukk. 4: 40 (1953). Type: *L. rivierei* Backeberg. ~ *Echinopsis* [Ls] Accepted by S+R for a small clade including *E. atacamensis* and other Chilean species of *Echinopsis*.

**Leuenbergeria** Lodé, Cactus Aventures 97: 25–27 (2013). Type: *P. quisqueyana* Liogier. ~ *Pereskia* subg. *Leuenbergera* Rowley, Cact. Syst. Init. 32: 7 (2014). Type: *P. lychnidiflora* DC. [Le]. *Pereskia* is paraphyletic and the two major clades may deserve taxonomic recognition. (Rowley (CSI 32: 6–7. 2014). Species referable to the proposed segregate genus *Leuenbergeria* are indicated by the abbreviation '[Le]' after the name but in the absence of clear-cut distinctions Rowley's proposal to treat the clades as subgenera has the virtue of preserving nomenclatural stability.

*Lobeira* Alexander, Cact. Succ. J. (US) 16: 177 (1944). Type: *L. macdougallii* Alexander. → *Disocactus*

**Lobivia** Britton & Rose, Cact. 3: 49 (1922). Type: *Echinocactus pentlandii* Hooker. ~ *Echinopsis* [Lo] Included in *Echinopsis* in previous editions but excluded from *Echinopsis* s.l. by S+R. This is the principal component of their *LOBIVIA* clade and restricted by them to numerous mainly small-growing species in Bolivia.

**Lophocereus** (Berger) Britton & Rose, Contr. US Nat. Herb. 12: 426 (1909). Type: *Cereus schottii* Engelmann. ~ *Pachycereus* [Lp]. Excluded from *Pachycereus* by A+T.

**Lophophora** J. Coulter, Contr. US Nat. Herb. 3: 131 (1894). Type: *L. williamsii* (Lemaire) J. Coulter. Taxa: 2. Distr.: SW USA (S Texas), N Mexico.

*Loxanthocereus* Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1937: 24 (1937). Type: *Cereus acanthurus* Vaupel. → *Borzicactus*

**Lymanbensonia** Kimnach, Cact. Succ. J. (US) 56: 101 (1984). Type: *L. micrantha* (Vaupel) Kimnach. Reinstated by Korotkova et al. (2011) for three species hitherto included in *Pfeiffera*: *P. micrantha* (type), *P. crenata* and *P. brevispina*, plus the previously misclassified *Lepismium incachacanum*.

*Machaerocephalus* Britton & Rose, Cact. 2: 114 (1920). Type: *Cereus eruca* Brandegee. → *Stenocereus*

**Maihuenia** (Philippi ex F.A.C. Weber) Schumann, Gesamtb. Kakt., 754 (1898). Type: *Opuntia poeppigii* Otto ex Pfeiffer (LT). Taxa: 2. Distr.: Argentina and Chile. Ref.: Leuenberger (1997).

**Maihueniopsis** Spegazzini, An. Soc. Sci. Argent. 99: 86 (1925). Type: *Maihueniopsis molfinoi* Spegazzini. Taxa:

*Malacocarpus* Salm-Dyck, Cact. Hort. Dyck. 1849: 24, 141 (1850), non Fischer & Meyer. Type: *Echinocactus corynodes* Pfeiffer. → *Parodia*

*Mamillopsis* Morren ex Britton & Rose, Cact. 4: 19 (1923). Type: *Mammillaria senilis* Lod-

diges. → *Mammillaria*

**Mammillaria** Haworth, Syn. Pl. Succ., 177 (1812), *nom. cons.* Type: *M. simplex* Haworth (→ *Cactus mammillaris* Linnaeus; *M. mammillaria* [Linnaeus] Karsten). Taxa: 145+119. Distr.: SW USA, Mexico, Central America, Caribbean, Colombia, Venezuela. Syn.: *Cactus* Linnaeus (1753); *Cochemia* (K. Brandegee) Walton (1899); *Barischella* Britton & Rose (1923); *Dolichothele* (Schumann) Britton & Rose (1923); *Mamillopsis* Morren ex Britton & Rose (1923); *Phellosperma* Britton & Rose (1923); *Solisia* Britton & Rose (1923); *Neomammillaria* Britton & Rose (1923); *Porfiria* Bödeker (1926); *Chilita* Orcutt (1926); *Krainzia* Backeberg (1938); *Oehmea* Buxbaum (1951); *Pseudomammillaria* Buxbaum (1951); *Leptocladiodina* Buxbaum (1954). Ref.: Hunt (1983–87, 1989–92, 1996–97).

**Mammilloidia** Buxbaum, Bot. Stud. 12: 64,65 (1951). Type: *Mammillaria candida* Scheidweiler. Taxa: 1. Distr.: N Mexico. → *Mammillaria*

*Marenopuntia* Backeberg, Desert Plant Life 22(3): 27 (1950). Type: *Opuntia marenae* Parsons. → *Opuntia*

*Marginatocephalus* (Backeberg) Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 77 (1942). Type: *Cereus marginatus* De Candolle. → *Pachycereus*

*Maritimocereus* Akers & Buining, Succulenta 1950: 49 (1950). Type: *M. gracilis* Akers & Buining. → *Cleistocactus*

*Marniera* Backeberg, Cact. Succ. J. (US) 22: 153 (1950). Type: *Phyllocactus macropterus* Lemaire. → *Selenicereus*

*Marshallocereus* Backeberg, Cact. Succ. J. (US) 22: 154 (1950). Type: *Cereus aragonii* Weber. → *Pachycereus*

**Matucana** Britton & Rose, Cact. 3: 102 (1922). Type: *Echinocactus haynei* Otto. Taxa: 15+. Distr.: Peru. Syn.: *Submatucana* Backeberg (1959); *Eomatucana* Ritter (1965). Ref.: Bregman et al. (1986–90); Bregman (1996).

*Mediocactus* Britton & Rose, Cact. 2: 210 (1920). Type: *Cereus coccineus* Salm-Dyck (→ *Disocactus*; cf. Hunt 1989); *Mediocactus* sensu Britton & Rose. → *Selenicereus*

*Mediolobivia* Backeberg, Blätt. Kakt.-Forsch. 1934(2): [3] (1934). Type: *Rebutia aureiflora* Backeberg. → *Rebutia*

**Melocactus** Link & Otto, Verh. Ver. Beförd. Gartenb. Preuss. Staaten, 417 (1827), *nom. cons.* Type: *Cactus melocactus* Linnaeus (= *M. caroli-linniae* Taylor). Taxa: 29+16. Distr.: Mexico, Central America, Caribbean, N & W South America, E Brazil. Syn.: *Cactus* sensu Britton & Rose (1922). Ref.: Taylor (1991).

*Meyerocactus* Doweld, Succulenta 75(6): 271 (1996). Type: *Echinocactus horizonthalonius* Lemaire. → *Echinocactus*

**Mieranthocereus** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [22] (1938). Type: *Cereus polyanthus* Werdermann. Taxa: 9. Distr.: E Brazil. Syn.: *Astrocephalocereus* Backeberg (1938); *Siccobaccatus* Braun & Esteves (1990).

**Mila** Britton & Rose, Cact. 3: 211 (1922). Type: *M. caespitosa* Britton & Rose. Taxa: 1+3. Distr.: Peru. Ref.: Donald (1978).

*Mirabella* Ritter, Kakteen in Südamerika 1: 108 (1979). Type: *Acanthocereus albicaulis* Britton & Rose. → *Cereus*

*Mitrocereus* (Backeberg) Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 77 (1942). Type: *Pilocereus chrysomallus* Lemaire. → *Pachycereus*

*Monvillea* Britton & Rose, Cact. 2: 21 (1920). Type: *M. cavendishii* (Monville) Britton & Rose (→ *Acanthocereus*); *Monvillea* sensu Britton & Rose → *Praecereus*

**Morangaya** Rowley, Ashingtonia 1: 44 (1974). Type: *Cereus pensilis* K. Brandegee. ~ *Echinocereus* [Mo]. Excluded from *Echinocereus* by V+.

*Morawetzia* Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1936: 73 (1936). Type: *M. doelziana* Backeberg. → *Oreocereus*

'*Myrtgerocactus* Moran, Cact. Succ. J. (US) 34: 186 (1962). (*Bergerocactus* ' *Myrtillocactus*).

- Taxa: 1. Distr.: Mexico (Baja California).
- Myrtillocactus** Console, Boll. R. Ort. Bot. Palermo 1: 8 (1897). Type: *M. geometrizans* (Martius) Console. Taxa: 4. Distr.: Mexico.
- Navajoa* Croizat, Cact. Succ. J. (US) 15: 89 (1943). Type: *Navajoa peeblesiana* Croizat. → *Pediocactus*
- Neoaabbottia* Britton & Rose, Smiths. Misc. Coll. 72: 2 (1921). Type: *Cactus paniculatus* Lamarck. → *Leptocereus*
- Neobesseyea* Britton & Rose, Cact. 4: 51 (1923). Type: *Mammillaria missouriensis* Sweet. → *Escobaria*
- Neobinghamia* Backeberg, Cact. Succ. J. (US) 22(5): 154 (1950), gen. hybr. Type: *Binghamia climaxantha* Werdermann. → 'Haagespostoa'
- Neobuxbaumia** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [8,21] (1938). Type: *Pilocereus tetezo* Weber. Taxa: 9. Distr.: Mexico. Syn.: *Rooksyba* (Backeberg) Backeberg (1959).
- Neocardenasia* Backeberg, Blätt. Sukk.-Kunde 1: 2 (1949). Type: *Neocardenasia herzogiana* Backeberg. → *Neoraimondia*
- Neochilenia* Backeberg ex Doelz, Fedde's Repert. Sp. Nov. 51: 60 (1942). Type: *Echinocactus jussieui* Monville. → *Eriosyce*
- Neodawsonia* Backeberg, Blätt. Sukk.-Kunde 1: 4 (1949). Type: *Cephalocereus apicicephalium* Dawson. → *Cephalocereus*
- Neoevansia* Marshall in Marshall & Bock, Cactaceae, 84 (1941). Type: *Cereus diguetii* Weber. → *Peniocereus*
- Neogomesia* Castañeda, Cact. Succ. J. (US) 13: 98 (1941). Type: *N. agavoides* Castañeda. → *Ariocarpus*
- Neolloydia** Britton & Rose, Bull. Torrey Bot. Club 49: 251 (1922). Type: *N. conoidea* (De Candolle) Britton & Rose. Taxa: 1+1. Distr.: SW USA (S Texas), N Mexico. Ref.: Anderson (1986).
- Neolobivia* (Backeberg) Y. Ito, Bull. Takarazuka Insectarium 71: 18 (1950). → *Echinopsis*
- Neomammillaria* Britton & Rose, Cact. 4: 65 (1923). Type: *Mammillaria simplex* Haworth. → *Mammillaria*
- Neopoteria* Britton & Rose, Cact. 3: 94 (1922). Type: *N. subgibbosa* (Haworth) Britton & Rose. Distr.: S Peru, NW Argentina, Chile. → *Eriosyce*
- Neoraimondia** Britton & Rose, Cact. 2: 181 (1920). Type: *N. macrostibas* (Schumann) Britton & Rose. Taxa: 2+1. Distr.: Bolivia, Peru. Syn.: *Neocardenasia* Backeberg (1949).
- Neowerdermannia** Fric, Kaktusar 1(11): 85 (1930). Type: *N. vorwerkii* Fric. Taxa: 2+1. Distr.: Bolivia, N Argentina, N Chile.
- Nopalea* Salm-Dyck, Cact. Hort. Dyck. 1849: 63,233 (1850). Type: *Cactus cochenillifer* Linnaeus. → *Opuntia*
- Nopalxochia* Britton & Rose, Cact. 4: 204 (1923). Type: *Cactus phyllanthoides* De Candolle. → *Disocactus*
- Normanbokea* Kladiwa & Buxbaum, in Krainz, Die Kakteen Lfg. 40–41 (1969). Type: *Pelecyphora valdeziana* Moeller. → *Turbinicarpus*
- Notocactus* (Schumann) Fric, Price list for 1928 [unpaged] (1928). → *Parodia*
- Nyctocereus* (Berger) Britton & Rose, Contr. US Nat. Herb. 12: 423 (1909). Type: *Cereus serpeninus* (Lagasca & Rodriguez) De Candolle. ~ *Peniocereus* [Ny]. Currently included in *Peniocereus* but reinstated by A+T.
- Obregonia** Fric, Zivot v Prirode 29(2): 1–4 (1925). Type: *O. denegrii* Fric. Taxa: 1. Distr.: NE Mexico.
- Oehmea* Buxbaum, Sukkulantenkunde 4: 17 (1951). Type: *Neomammillaria nelsonii* Britton & Rose. → *Mammillaria*
- Opuntia** Miller, Gard. Dict. Abr. ed. 4, [] (1754). Type: *Cactus opuntia* Linnaeus (LT: Britton & Brown 1913). Taxa: 161+195. Distr.: S Canada, USA, Mexico, Caribbean, Central &

- South America. Syn.: *Nopalea* Salm-Dyck (1850); *Consolea* Lemaire (1862); *Tephrocactus* Lemaire (1868); *Grusonia* F. Reichenbach ex Britton & Rose (1919); *Maihueniopsis* Spegazzini (1925); *Brasiliopuntia* (Schumann) Berger (1926); *Cylindropuntia* (Engelmann) F. Knuth (1936); *Corynopuntia* F. Knuth (1936); *Astrocytropuntia* Backeberg (1938); *Marenopuntia* Backeberg (1950); *Platycopuntia* (Engelmann) Ritter (1979); *Cumulopuntia* Ritter (1980); *Puna* Kiesling (1982).
- Oreocereus** (Berger] Riccobono, Boll. R. Ort. Palermo 8: 258 (1909). Type: *O. celsianus* (Lemaire] Riccobono. Taxa: 5+4. Distr.: Bolivia, Peru, NW Argentina, N Chile. Syn.: *Arequipa* Britton & Rose (1922); *Morawetzia* Backeberg (1936); *Arequipoopsis* Kreuzinger & Buining (1941).
- Oroya** Britton & Rose, Cact. 3: 102 (1922). Type: *Echinocactus peruvianus* Schumann. Taxa: 1+1. Distr.: Peru.
- Ortegocactus** Alexander, Cact. Succ. J. (US) 33: 39 (1961). Type: *Ortegocactus macdougallii* Alexander. Taxa: 1. Distr.: S Mexico.
- Pachyceracactus** Rowley, Nat. Cact. Succ. J. 37(3): 78 (1982). (*Bergerocactus* 'Pachycereus'). Taxa: 1. Distr.: Mexico (Baja California).
- Pachycereus** (Berger] Britton & Rose, Contr. US Nat. Herb. 12: 420 (1909). Type: *P. pringlei* (S. Watson] Britton & Rose. Taxa: 12. Distr.: SW USA (S Arizona), Mexico, Guatemala, Honduras. Syn.: *Lemaireocereus* Britton & Rose (1909); *Lophocereus* (Berger] Britton & Rose (1909); *Anisocereus* Backeberg (1938); *Marginatocereus* (Backeberg] Backeberg (1942); *Mitrocereus* (Backeberg] Backeberg (1942); *Backebergia* Bravo (1953); *Pterocereus* MacDougall & Miranda (1954); *Pseudomitrocereus* Bravo & Buxbaum (1961).
- Parodia** Spegazzini, An. Soc. Cient. Argent. 96: 70 (1923). Type: *P. microsperma* (F.A.C. Weber] Spegazzini. Taxa: 60+29. Distr.: Brazil, Paraguay, Bolivia, Uruguay, Argentina. Syn.: *Malacocarpus* Salm-Dyck (1850) non Fischer & Meyer; *Notocactus* (Schumann) Fric (1928); *Eriocephala* Backeberg (1938); *Brasilicactus* Backeberg (1942); *Eriocactus* Backeberg (1942); *Wigginsia* D.M. Porter (1964); *Brasiliparodia* Ritter (1979).
- Pediocactus** Britton & Rose, Britton & Brown, Ill. Fl. ed. 2, 2: 569 (1913). Type: *P. simpsonii* (Engelmann] Britton & Rose. Taxa: 6+10. Distr.: SW USA. Syn.: *Utahia* Britton & Rose (1922); *Navajoa* Croizat (1943); *Pilocanthus* B.W. Benson & Backeberg (1957).
- Pelecyphora** Ehrenberg, Bot. Zeit. 1: 737 (1843). Type: *P. aselliformis* Ehrenberg. Taxa: 2. Distr.: N Mexico. Syn.: *Encephalocarpus* Berger (1929).
- Peniocereus** (Berger] Britton & Rose, Contr. US Nat. Herb. 12: 428 (1909). Type: *P. greggii* (Engelmann] Britton & Rose. Taxa: 13+5. Distr.: SW USA, Mexico and Central America. Syn.: *Nyctocereus* (Berger] Britton & Rose (1909); *Neoevansia* Marshall (1941); *Cullmania* Distefano (1956). Ref.: Sánchez-Mejorada (1974).
- Pereskia** Miller, Gard. Dict. Abr. ed. 4, [unpaged] (1754). Type: *P. aculeata* Miller. Taxa: 16+3. Distr.: S Mexico, Cent. America, Caribbean, trop. South America. Syn.: *Rhodocactus* (Berger] F. Knuth (1936). Ref.: Leuenberger (1986).
- Pereskiopsis** Britton & Rose, Smiths. Misc. Coll. 50: 331 (1907). Type: *P. porteri* (K. Brandegee] Britton & Rose. Taxa: 6+1. Distr.: Mexico, Guatemala.
- Peruvocereus** Akers, Cact. Succ. J. (US) 19: 67 (1947). Type: *Peruvocereus salmonoideus* Akers. → Haageocereus
- Pfeiffera** Salm-Dyck, Cact. Hort. Dyck. 1844: 40 (1845). Type: *P. cereiformis* Salm-Dyck (~ *P. ianthothele* (Monville] Weber). Included in *Lepismium* in previous editions, but molecular evidence has subsequently shown that the two genera are not closely related, and that *Pfeiffera* is closer to *Corycactus* etc than to the Rhipsalideae (see Nyffeler 2000/CSI 10: 10–11). Species referable to *Lymanbensonia* are now excluded. Group status for the former genus *Acanthorhipsalis* is no longer necessary (Korotkova et al. 2011),  
*Phellosperma* Britton & Rose, Cact. 4: 60 (1923). Type: *Mammillaria tetrancistra* Engelmann.  
→ *Mammillaria*

- Philippicereus* Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 75 (1942). Type: *Cereus castaneus* Schumann. → *Eulychnia*
- Phyllocactus* Link, Handb. Erkenn. Gewächse 2: 10 (1829). Type: *Cactus phyllanthus* Linnaeus. → *Epiphyllum*
- Pierrebraunia* Esteves Pereira, Cact. Succ. J. (US) 69: 296–302 (1997). Type: *Pierrebraunia bahiensis* (Braun & Esteves Pereira) Esteves Pereira. → *Arrojadoa*
- Pilocanthus* B.W. Benson & Backeberg, Kakt. and. Sukk. 8: 187 (1957). Type: *Pediocactus paradinei* B.W. Benson. → *Pediocactus*
- Pilocereus* Lemaire, Cact. Gen. Nov. Sp. Hort. Monv., 6 (1839). Type: *Cereus senilis* Haworth. → *Cephalocereus*
- Pilocereus* Schumann, Engler & Prantl, Nat. Pflanzenfam. 3, 6A: 179 (1894), non Lemaire. Type: *Pilocereus leucocephalus* Lemaire. → *Pilosocereus*
- Pilocopiapoa* Ritter, Kakt. and. Sukk. 13: 20 (1961). Type: *Pilocopiapoa solaris* Ritter. → *Copiapoa*
- Pilosocereus* Byles & Rowley, Cact. Succ. J. Gr. Brit. 19: 66 (1957). Type: *Pilocereus leucocephalus* Poselger. Taxa: 34+9. Distr.: Mexico, Caribbean, N & W South America, E Brazil, Paraguay. Syn.: *Pilocereus* Schumann (1894), non Lemaire; *Pseudopilocereus* Buxbaum (1968).
- Piptanthocereus* (Berger) Riccobono, Boll. R. Ort. Palermo 8: 255 (1909). Type: [?]. → *Cereus*
- Platyopuntia* (Engelmann) Ritter, Kakteen in Südamerika 1: 31 (1979). [Based on subgen. *Platopuntia* Engelmann.] → *Opuntia*
- Polaskia* Backeberg, Blätter f. Sukkulantenkunde 1: 4 (1949). Type: *P. chichipe* Backeberg. Taxa: 2. Distr.: Mexico. Syn.: *Chichipia* Backeberg (1950); *Heliabravaoa* Backeberg (1956).
- Porfiria* Bödeker, Zeitschr. Sukkulantenk. 2: 210 (1926). Type: *Porfiria coahuilensis* Bödeker. → *Mammillaria*
- Praecereus* Buxbaum, Beitr. Biol. Pflanzen 44: 273 (1968). Type: *Cephalocereus smithianus*. Taxa: 2+4. Distr.: Trop. S America. Syn.: *Monvillea* Britton & Rose (1920), excl. type.
- Pseudoacanthocereus* Ritter, Kakteen in Südamerika 1: 47 (1979). Type: *Acanthocereus brasiliensis* Britton & Rose. Taxa: 2. Distr.: Colombia, Venezuela, Brazil.
- Pseudoespostoa* Backeberg, Blätt. Kakt.-Forsch. 1934(10): [1] (1934). Type: *Cephalocereus melanostele* Vaupel. → *Espostoa*
- Pseudolobivia* (Backeberg) Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *Echinopsis ancistrophora* Spegazzini. → *Echinopsis*
- Pseudomammillaria* Buxbaum, Bot. Stud. 12: 84 (1951). Type: *Mammillaria camptotricha* Dams. → *Mammillaria*
- Pseudomitrocereus* Bravo & Buxbaum, Bot. Stud. 12: 49, 53 (1961). Type: *Pilocereus fulviceps* Weber. ~ *Cephalocereus* or *Neobuxbaumia* (not *Pachycereus*) [Pm]. *P. fulviceps*, the only species, is part of a polytomy with *Cephalocereus* and *Neobuxbaumia* so is misplaced in *Pachycereus* [A+T]
- Pseudonopaloxochia* Backeberg, Die Cact. 1: 69 (1958). Type: *Nopaloxochia conzattiana* Mac-Dougall. → *Disocactus*
- Pseudopilocereus* Buxbaum, Beitr. Biol. Pflanzen 44: 249 (1968). Type: *Pilocereus arrabidae* Lemaire. → *Pilosocereus*
- Pseudorhipsalis* Britton & Rose, Cact. 4: 213–214 (1923). Type: *Cactus alatus* Swartz. Taxa: 4+2. Distr.: Trop. America, Caribbean.
- Pseudozygocactus* Backeberg, Blätt. Kakt.-Forsch. 1938(6): [5, 21] (1938). Type: *Rhipsalis epiphyloides* Campos-Porto & Werdermann. → *Hatiiora*
- Pterocactus* Schumann, Monatschr. Kakt. 7: 6 (1897). Type: *P. kunzei* Schumann. Taxa: 9. Distr.: Argentina. Ref.: Kiesling, (1982).
- Pterocereus* MacDougal & Miranda, Ceiba 4: 135 (1954). Type: *Pterocereus foetidus* Mac-Dougall & Miranda. ~ *Pachycereus* [Pt] Excluded from *Pachycereus* by [A+T]

- Puna* Kiesling, Hickenia 1: 289 (1982). Type: *Opuntia clavarioides* Pfeiffer. → *Opuntia*
- Pygmaeocereus*** Johnson & Backeberg, Nat. Cact. Succ. J. 12: 86 (1957). Type: *P. bylesianus* Andreae & Backeberg. Taxa: 1+2. Distr.: Peru. ~ *Echinopsis*
- Pyrrhocactus*** Berger, Kakteen, 345 (1929). Type: [not designated by Berger] *Echinocactus strausianus* Schumann. → *Eriosyce*
- Quiabentia*** Britton & Rose, Cact. 4: 252 (1923). Type: *Pereskia zehntneri* Britton & Rose. Taxa: 2. Distr.: E Brazil, W Paraguay, S Bolivia, NW Argentina.
- Rapicactus*** Buxbaum & Oehme, Cact. Jahrb. Deutsch. Kakt. Ges. 1942: 24 (1942). Type: *Rapicactus subterraneus* Buxbaum & Oehme. ~ *Turbinicarpus* [Ra]. A member of the LOPHOPHORA clade (V+) but hitherto included in the polyphyletic group *Turbinicarpus thbunia* Britton & Rose, Contr. US Nat. Herb. 12: 414 (1909). Type: *Cereus sonorensis* Runge. → *Stenocereus*
- Rauhocereus*** Backeberg, Descr. Cact. Nov., 5 (1957). Type: *Rauhocereus riosaniensis* Backeberg. Taxa: 1+1. Distr.: Peru. ~ *Browningia*
- Rebutia*** Schumann, Monatsschr. Kakteenk. 5: 102 (1895). Type: *R. minuscula* Schumann. Taxa: 24+28. Distr.: Bolivia, Peru, N Argentina. Syn.: *Aylostera* Spegazzini (1923); *Mediolobivia* Backeberg (1934); *Weingartia* Werdermann (1937); *Digitorebutia* Buining (1940); *Sulcorebutia* Backeberg (1951).
- Reicheocactus*** Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *R. pseudoeichananus* Backeberg. ~ *Echinopsis* [Re]. Hitherto included in *Echinopsis* or *Lobivia* but found by S+R to occupy a basal position in the Trichocereeae
- Rhipsalidopsis*** Britton & Rose, Cact. 4: 209 (1923). Type: *Rhipsalis rosea* Lagerheim. → *Hatiiora*
- Rhipsalis*** Gaertner, Fruct. Sem. 1: 137 (1788). Type: *R. cassutha* Gaertner. Taxa: 35+16. Distr.: Trop. and subtrop. America, trop. Africa, Madagascar, Mascarenes, Sri Lanka. Syn.: *Erythrorhipsalis* Berger (1920). Ref.: Barthlott & Taylor (1995).
- Rhodocactus*** (Berger) F. Knuth in Backeberg & Knuth, Kaktus ABC, 48, 96 (1936). Type: *Pereskia grandifolia* Haworth. → *Pereskia*
- Ritterocereus*** Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 76 (1942). Type: *Lemaireocereus standleyi* Gonzalez Ortega. → *Stenocereus*
- Rodentiophila*** Backeberg, Die Cact. 3: 1799 (1959), nom. inval. → *Eriosyce*
- Rooksbya*** (Backeberg) Backeberg, Die Cact. 3: 2165 (1959). → *Neobuxbaumia*
- Roseocactus*** Berger, J. Wash. Acad. Sci. 15: 45 (1925). Type: *Ariocarpus fissuratus* Schumann. → *Ariocarpus*
- Roseocereus*** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [21] (1938). Type: *Cereus tetracanthus* Labouret (*R. tephracanthus* Backeberg). Ref.: Hunt (1987: 92). → *Harrisia*
- Samaipaticereus*** Cárdenas, Cact. Succ. J. (US) 24: 141 (1952). Type: *S. corroanus* Cárdenas. Taxa: 1. Distr.: Bolivia.
- Schlumbergera*** Lemaire, Illustr. Hort. 5: misc. 24 (1858). Type: *S. epiphyloides* Lemaire (→ *S. russelliana* (Gardner ex Hooker) Britton & Rose). Taxa: 6+4. Distr.: SE Brazil. Syn.: *Epiphyllum* Pfeiffer (1837); *Zygocactus* Schumann (1890); *Epiphyllanthus* Berger (1905). Ref.: McMillan & Horobin, Succulent Pl. Res. 4 (1995).
- Sclerocactus*** Britton & Rose, Cact. 3: 212 (1922). Type: *Echinocactus polyancistrus* Engelmann & Bigelow. Taxa: 18+10. Distr.: SW USA, N Mexico. Syn.: *Toumeya* Britton & Rose (1922); *Echinomastus* Britton & Rose (1922); *Ancistrocactus* Britton & Rose (1923); *Glandulicactus* Backeberg (1938); *Coloradoa* Boissevain & Davidson (1940).
- Selenicereus*** (Berger) Britton & Rose, Contr. US Nat. Herb. 12: 429 (1909). Type: *S. grandiflorus* (Linnaeus) Britton & Rose. Taxa: 18+9. Distr.: Trop. America, Caribbean. Syn.: *Strophocactus* Britton & Rose (1913); *Deamia* Britton & Rose (1920); *Cryptocereus* Alexander (1950); *Marniera* Backeberg (1950). Ref.: Hunt (1989).
- Seticereus*** Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 75 (1942). Type: *Cactus*

- icosagonus* Kunth. → Cleistocactus
- Seticelistocactus* Backeberg, Descr. Cact. Nov. III, 13 (1963). Type: *Cleistocactus piraymirensis* Cárdenas. → Cleistocactus
- Setiechinopsis*** (Backeberg] De Haas, Succulenta 22: 9 (1940). Type: *Echinopsis mirabilis* Spegazzini. ~ Echinopsis [Se]. Monotypic. Accepted by S+R (DENMOZA clade)
- Siccobaccatus* Braun & Esteves Pereira, Succulenta 69: 6 (1990). Type: *Astrocephalocereus dolichospermaticus* Buining & Brederoo. → Micranthocereus
- Soehrensia*** Backeberg, Blätt. Kakt.-Forsch. 1938(6): [21] (1938). Type: *Lobivia bruchii* Britton & Rose. ~ Echinopsis [So]. Accepted by S+R for numerous taxa previously included in *Lobivia* (*Helianthocereus*) and *Trichocereus*.
- Solisia* Britton & Rose, Cact. 4: 64 (1923). Type: *Pelecyphora pectinata* Stein. → Mammillaria
- Stenocactus*** (Schumann) A.W. Hill, Index Kewensis, suppl. 8: 228 (1933). Type: *Echinocactus coustonogonus* Lemaire (LT: Byles 1956). Taxa: 7+3. Distr.: Mexico. Syn.: *Echinofossulocactus* sensu Britton & Rose (1922) non Lawrence.
- Stenocereus*** (Berger] Riccobono, Boll. R. Ort. Palermo 8: 253 (1909), nom. cons. Type: *S. stellatus* (Pfeiffer] Riccobono. Taxa: 19+6. Distr.: SW USA (Arizona), Mexico, Caribbean, N South America. Syn.: *Rathbunia* Britton & Rose (1909); *Machaerocereus* Britton & Rose (1920); *Isolatocereus* (Backeberg] Backeberg (1942); *Ritterocereus* Backeberg (1942); *Herrlichocereus* Backeberg (1950).
- Stephanocereus*** Berger, Entwicklungslinien Kakt., 97 (1926). Type: *S. leucostele* (Guerke] A. Berger. Taxa: 2. Distr.: Brazil (Bahia).
- Stetsonia*** Britton & Rose, Cact. 2: 64 (1920). Type: *Cereus coryne* Salm-Dyck. Taxa: 1. Distr.: Paraguay, Argentina, Bolivia.
- Strombocactus*** Britton & Rose, Cact. 3: 106 (1922). Type: *S. disciformis* (De Candolle] Britton & Rose. Taxa: 1+1. Distr.: E Mexico (Hidalgo and Querétaro).
- Strophocactus* Britton & Rose, Contr. US Nat. Herb. 16: 262 (1913). Type: *Cereus wittii* Schumann. → Selenicereus
- Submatucana* Backeberg, Die Cact. 2: 1059 (1959). Type: *Echinocactus aurantiacus* Vaupel. → Matucana
- Subpilocereus* Backeberg, Blätt. Kakt.-Forsch. 1938(6): [22] (1938). Type: *Cereus russel(l)ianus* Otto non Gardner ex Hooker (→ *C. fricii*). → Cereus
- Sulcorebutia* Backeberg, Cact. Succ. J. Gt. Brit. 13: 96 (1951). Type: *Rebutia steinbachii* Werdermann. → Rebutia
- Tacinga*** Britton & Rose, Cact. 1: 39 (1919). Type: *T. funalis* Britton & Rose. Taxa: 2. Distr.: E Brazil.
- Tephrocactus* Lemaire, Les Cactées, 88 (1868). Type: *Opuntia diademata* Lemaire [LT: see Byles 1957: 30]. → Opuntia
- Thelocactus*** (Schumann) Britton & Rose, Bull. Torrey Bot. Club 49: 251 (1922). Type: *T. hexaedrophorus* (Lemaire] Britton & Rose. Taxa: 10+11. Distr.: SW USA (Texas), Mexico. Syn.: *Hamatocactus* Britton & Rose (1922); *Torreyocactus* Doweld (1998). Ref.: Anderson (1987).
- Thelocephala* Y. Ito, Expl. Diagr., 292 (1957). Type: *Neoporteria napina* Backeberg. → Eriosyce
- Thrixanthocereus* Backeberg, Blätter Kakteenforsch. 1937: Nachtr. 15 (1937). Type: *Cephalocereus blossfeldiorum* Werdermann. → Espostoa
- Torreycactus* Doweld, Sukkulenty (Moscow] 1998(1): 19 (1998). Type: *Torreycactus conothelos* (Regel & Klein] Doweld. → Thelocactus
- Toumeya* Britton & Rose, Cact. 3: 91 (1922). Type: *Mammillaria papyracantha* Engelmann. → Sclerocactus
- Trichocereus*** (Berger] Riccobono, Boll. R. Ort. Palermo 8: 236 (1909). Type: *Cereus macrogonus* Otto. ~ Echinopsis group [Le], [So] and [Tr]. According to S+R, the *Trichocereus*

group *sensu* NCL includes three separate lineages. The neotypification of *Trichocereus* by Albesiano & Kiesling (2012), based on their application of the dubious name *Cereus macrogonus*, limits the generic name to *T. pachanoi* and its close relatives in Peru and Bolivia [Tr]. The more varied, mainly Argentine and partly day-flowering lineage becomes *Soehrensia* (including *Helianthocereus*) [So] and the mainly Chilean group, including the iconic Andean species *E. atacamensis* becomes *Leucostele* [Le] (see Schlumberger 2012/CSI 28: 29–31). Pending general acceptance of this scheme, the species will continue to be listed alphabetically with their hypothetical lineage indicated by the relevant abbreviation. Kladiwa & Buxbaum (1969); *Bravocactus* Doweld (1998); *Kadenicarpus* Doweld (1998).

**Turbinicarpus** (Backeberg) Buxbaum & Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1937: 27 (1937). Type: *Echinocactus schmiedeckeana* Bödeker. Taxa: 16+17. Distr.: Mexico. Syn.: *Gymnocactus* Backeberg (1938); *Rapicactus* Buxbaum & Oehme (1942); *Normanbokea*

**Uebelmannia** Buining, Succulenta (NL) 46: 159 (1967). Type: *Parodia gummifera* Backeberg & Voll. Taxa: 3+2. Distr.: E Brazil (Minas Gerais).

**Utahia** Britton & Rose, Cact. 3: 215 (1922). Type: *Echinocactus sileri* Engelmann. → *Pediocactus*

**Vatricania** Backeberg, Cact. Succ. J. (US) 22: 154 (1950). Type: *Cephalocereus guentheri* Kupper. → *Cleistocactus*

**Weberbauercereus** Backeberg, Cact. Jahrb. Deutsch. Kakt. Ges. 1941: 75 (1942). Type: *Cereus fascicularis* Meyen. Taxa: 7+1. Distr.: Peru. ~ *Echinopsis*

**Weberocereus** Britton & Rose, Contr. US Nat. Herb. 12: 431 (1909). Type: *W. tunilla* (F.A.C. Weber) Britton & Rose. Taxa: 9. Distr.: Mexico, Central America, W South America. Syn.: *Werckleocereus* Britton & Rose (1909); *Eccremocactus* Britton & Rose (1913).

**Weingartia** Werdermann, Kakteenkunde 1937: 20,21 (1937). Type: *Echinocactus fidianus* Backeberg. ~ *Rebutia* subg. *Weingartia* (Werderm.) Rowley, Cactus World 27(2): 89 (2009). [Wg]. One of three clades distinguished in *Rebutia* by Ritz et al. (2007).

**Werckleocereus** Britton & Rose, Contr. US Nat. Herb. 12: 432 (1909). Type: *Cereus tonduzii* Weber. → *Weberocereus*

**Wigginsia** D.M. Porter, Taxon 13: 210 (1964). Type: *Echinocactus corynodes* Pfeiffer. → *Parodia*

**Wilcoxia** Britton & Rose, Contr. US Nat. Herb. 12: 434 (1909). Type: *Echinocereus poselgeri* Lemaire. → *Echinocereus*

**Wilmattaea** Britton & Rose, Cact. 2: 195 (1920). Type: *Cereus minutiflorus* Vaupel. → *Hylocereus*

**Winteria** Ritter, Kakt. and. Sukk. 13: 4 (1962), non Murray. Type: *Winteria aureispina*. → *Cleistocactus*

**Winterocereus** Backeberg, Kakteenlexikon, 455 (1966). Type: *Winteria aureispina* Ritter. → *Cleistocactus*

**Wittia** Schumann, Monatsschr. Kakt. 13: 117 (1903), non Pantocsek. Type: *W. amazonica* Schumann. → *Disocactus*

**Wittiocactus** Rauschert, Taxon 31: 558 (1982) [nom. nov. for *Wittia* Schumann]. → *Disocactus*

**Yavia** Piltz, Kakt. u.a. Sukk. 52(3): 57–62 (2001). Type: *Y. cryptocarpa* Kiesling & Piltz. Taxa 1. Distr.: Argentina. Referred to tribe Notocacteae (Nyffeler & Eggli (2010)).

**Yungasocereus** Ritter, Kakteen in Südamerika 2: 668 (1980). Type: *Samaipaticereus inquisivensis* Cárdenas. Taxa: 1. Distr.: Bolivia. ~ *Cleistocactus*

**Zehntnerella** Britton & Rose, Cact. 2: 176 (1920). Type: *Zehntnerella squamulosa* Britton & Rose. → *Facheiroa*

**Zygocactus** Schumann, Martius, Fl. Bras. 4(4): 224 (1890). Type: *Epiphyllum truncatum* Haworth. → *Schlumbergera*

**Summary Table of accepted and provisionally accepted taxa**  
*(to be updated from new Cactus Lexicon text p. 5)*

## How to use the Checklist

### Alphabetical list

The preferred names of accepted taxa (species and subspecies) are printed in **bold** (accepted) or ***bold italic*** (provisionally accepted or 'alternative'; see page 10). Synonyms and inadmissible names are printed in *italic*. *For the purpose of this Checklist the rank indicator for subspecies (subsp. or ssp.) is omitted.* Names covered by the provisions of CITES Appendix I are followed by a red bullet (●)

A unique five-digit **reference number** precedes each entry. This number is the key to further data for accepted and provisionally accepted and some synonyms concerning the author(s) of the name, the original date and place of its publication and other details given under the same number in the text volume of the *New Cactus Lexicon* available as a download. Searching by the reference will quickly find the relevant entry.

Accepted and provisionally accepted names are followed by country/area codes (see below) followed by a black bullet (●) and the page/plate number(s) (if any) of illustrations in the 2nd volume of the *New Cactus Lexicon* (not yet available as a download).

'Alternative' names are followed by the equivalent symbol (≡) and the preferred name of the taxon to which they are considered to apply.

Synonyms are followed by an arrowhead (>) and the preferred name of the taxon to which they are currently considered to apply.

Names of hybrids are followed by the multiplication sign [x] or the names of the presumed parent taxa; the ploidy of cytotaxa may occasionally be indicated, e.g. [2x] etc.

Recently published names not yet evaluated are indicated by the symbol ⓘ preceding the name and (for the purpose of this draft), printed in magenta

Inadmissible names and names of indeterminate application are indicated by a symbol preceding the name and (for the purpose of this draft, printed in blue as it may be preferable, for the purpose of the Checklist, to delete them. Symbols (under review): ⓘ invalid or illegitimate; ⚡ misapplied; ⓘ not known; ⚡ recommended for rejection.

### Country Codes

Two-letter ISO codes (except those marked \* which are arbitrary) used to indicate the countries of origin and distribution of accepted and provisionally accepted taxa:

Argentina .....	AR	EI Salvador .....	SV	Peru .....	PE
Bahamas .....	BS	French Guiana.....	GF	Puerto Rico.....	PR
Belize .....	BZ	Guatemala.....	GT	Suriname .....	SR
Bolivia.....	BO	Guyana.....	GY	Trinidad & Tobago ....	TT
Brazil .....	BR	Haiti .....	HT	Uruguay .....	UY
Canada .....	CA	Honduras.....	HN	USA .....	US

## Appendix

List of taxa subject to the CITES exemption for stems, flowers, and parts and derivatives thereof of naturalized or artificially propagated plants of the genus *Opuntia* subgenus *Opuntia*.

*Note:* Following the classification of the genus *Opuntia* and its relatives proposed for the third edition of the CITES Cactaceae Checklist the genus is co-extensive with that of *Opuntia* subgenus *Opuntia* in previous editions.

10500	<i>Opuntia abjecta</i> > Opuntia aff. humifusa
