CLIENT DISCLOSURE STATEMENT

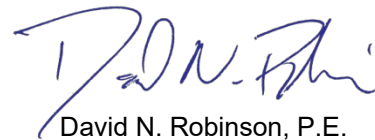

This report was prepared for and may be relied upon by Vertical Bridge Development, LLC, its respective Subsidiaries, and its respective successors, assigns, and/or affiliates. Any rating agency, issuer, purchaser, or underwriter of any security collateralized or otherwise backed by the property that is the subject of this report or any loans placed upon the property may further rely upon this report. Vertical Bridge Development, LLC, also consents to inclusion of this report in any form, whether in paper or digital format, including any electronic media such as a storage device or the internet/hyperlink, in the Prospectus Supplement relating to any such securitization transaction, and Vertical Bridge Development, LLC, consents to the reference to our firm under the caption 'Experts' in such Prospectus Supplement.

We declare that, to the best of our professional knowledge and belief, we meet the definition of Environmental Professionals as defined in 40 CFR 312.10. See Qualifications in Appendix F.

We possess the specific qualifications based on education, training, and experience required to assess a property of the nature, history, and setting of the target property. We have developed and performed all appropriate inquiries regarding environmental conditions at the target property in conformance with the standards and practices set forth in 40 CFR Part 312.

Kelly Reidy
Environmental Scientist

EXECUTIVE SUMMARY

At the request of Vertical Bridge Development, LLC (VBD), and/or its Subsidiaries, a Phase I Environmental Site Assessment (Phase I ESA) was conducted by Lotis Environmental, LLC (Lotis), at a proposed communications site located at **102 West Russ Street, Cle Elum, Washington (N 47° 11' 32.69", W 120° 56' 12.53")**. The target property is generally an open area next to an interstate which has not yet been developed for communications purposes. The target property is referred to in this report as **"Cle Elum DT."** This Phase I ESA was conducted in conformance with the scope and limitations of the American Society for Testing and Materials (ASTM) Standard E 1527-13 (Standard). Any exceptions to, or deviations from, the Standard are described in Section 1.0 of this report.

The following potential environmental concerns were identified during the review of historical and/or regulatory information and from observations made during site reconnaissance activities.

Table 1 - Potential Environmental Concerns

| | |
|-----------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Data Gaps/Limitations | <p>Historical Source Interval: Standard historical sources reviewed for the Phase I ESA were not available at the 5-year intervals described in Section 8.3.2.1 of the Standard.</p> <p>Based on the information collected and reviewed as part of this Phase I ESA, the data gap presented above is not likely to impact the overall ability to determine recognized environmental conditions at the target property.</p> |
| RECs | None |
| Historical RECs | None |
| Controlled RECs | None |
| De Minimis Conditions | None |

This Phase I ESA has identified no recognized environmental conditions in connection with the target property.

Based on the results of the Phase I ESA, Lotis does not recommend further investigation at this time.

1.0 INTRODUCTION

1.1 PURPOSE

The primary purpose of this study was to provide VBD with sufficient information about recognized environmental conditions (RECs) associated with the target property.

1.2 SCOPE OF WORK

The Scope of Work for this assessment included the following components:

- Site Reconnaissance (to the extent possible)
 - Observations of Hazardous Substances/Petroleum Product Containers
 - Observations of Storage Tanks
 - Indications of Polychlorinated Biphenyls (PCBs)
 - Indications of Solid Waste Disposal/Other
- Records Review
 - Physical Setting Sources
 - Standard Environmental Record Sources
 - Historical Use Information
- Interviews
 - Interviews with Owners and Occupants (if available during site visit and/or via telephone)
 - Interviews with Local Government Officials (when applicable)
- Evaluation, Report Findings, and Recommendations summarized in this written Phase I Environmental Site Assessment (ESA).

1.3 SIGNIFICANT ASSUMPTIONS

No significant assumptions were made during the completion of this study.

1.4 LIMITATIONS AND EXCEPTIONS

Lotis performed these services in a manner consistent with the level of care and expertise exercised by members of the environmental assessment profession and in accordance with the ASTM Standard for Phase I ESA which is "intended to permit a user to satisfy one of the requirements to qualify for the innocent landowner defense to Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA)."

It is Lotis' experience that environmental liabilities may be incurred that are in addition to those associated with CERCLA. Lotis is strictly limited to identifying RECs associated with the target property as identified within the scope of work. Lotis' assessment does not evaluate the structural conditions of any buildings on the target property or for regulatory compliance issues. Lotis additionally did not assess the target property for the potential of asbestos containing building materials, biological agents, cultural or historic resources, ecological resources, endangered species, health and safety concerns, indoor air quality unrelated to releases of hazardous substances or petroleum products into the environment, industrial hygiene concerns, lead-based paint, lead in drinking water, mold, radon, or wetlands. Non-assessed potential issues such as these can present environmental liabilities to a property owner but are generally considered "non-scope" items in the ASTM scope of work for Phase I ESAs. In addition, any limitations requested by VBD are described herein. Additional limitations were not requested by VBD. By not commenting on the presence of materials or the conduct of practices, Lotis does not confirm the absence of materials or the acceptability of site operations. Sampling of soils, groundwater, and surface water were not included within the scope of work for this project.

Additionally, the site inspection activities did not include any attempt to identify the presence of environmental contamination that exists in areas that cannot be visually observed. This includes surface soils located under pavement, structures, vehicles, or other media interference; subsurface soils; groundwater; areas in any buildings; or other areas on the property that are otherwise inaccessible due to locked or blocked accesses, geographic or vegetation impediments, weather interference, or size of the property. **NO WARRANTIES, EXPRESSED OR IMPLIED, ARE MADE.**

This report presents Lotis' site reconnaissance observations, findings, and conclusions based on conditions as they existed at the time of the site reconnaissance. The findings presented in this report are based upon reasonably ascertainable information, available records, and site conditions observed during the ESA. Lotis makes no representation or warranty that past or current operations at the property are, or have been, in compliance with applicable federal, state, and local laws, regulations, and codes. Lotis makes no guarantees as to the accuracy or completeness of information obtained from others during this Phase I ESA investigation. It is possible that information exists beyond the scope of this assessment, or that pertinent information was not provided to Lotis. Additional information subsequently provided, discovered, or produced may alter findings or conclusions presented in this Phase I ESA report. Lotis is under no obligation to update this report to reflect such subsequent information.

The ASTM E1527-13 Standard recognizes inherent limitations for Phase I ESAs that apply to this report, including:

- Uncertainty Not Eliminated – No Phase I ESA can wholly eliminate uncertainty regarding the potential for RECs in connection with a property. Data gaps identified during this Phase I ESA are listed in Section 6.0.
- Not Exhaustive – A Phase I ESA is not an exhaustive investigation.
- Past Uses of the Property – A review of standard historical sources at intervals of less than five years is not required.

VBD is advised that the Phase I ESA conducted at the target property is a limited inquiry into a property's environmental status, cannot wholly eliminate uncertainty, and is not an exhaustive assessment to discover every potential source of environmental liability at the target property. Therefore, Lotis does not make a statement: i) of warranty or guarantee, expressed or implied for any specific use; ii) that the target property is free of RECs or environmental impairment; iii) that the target property is "clean"; or iv) that impairments, if any, are limited to those that were discovered while Lotis was performing the Phase I ESA. This limiting statement is not meant to compromise the findings of this report; rather, it is meant as a statement of limitations within the ASTM Standard and intended scope of this assessment. Any site-specific limitations identified during the target property reconnaissance are described in Section 2.2. Subsurface conditions may differ from the conditions implied by surface observations and can be evaluated more thoroughly through intrusive techniques that are beyond the scope of this assessment.

This report does not warrant against future operations or conditions, nor does it warrant against the presence of operations or conditions of a type or at a location not assessed. Regardless of the findings stated in this report, Lotis is not responsible for consequences or conditions arising from facts that were not fully disclosed to Lotis prior to submission of this report.

An independent data research company conducted the government agency database review referenced in this report. Information regarding surrounding area properties was requested for approximate minimum search distances. The information provided was assumed to be correct and complete unless obviously contradicted by Lotis' observations or other credible reference sources reviewed during the assessment.

Results of this assessment are based upon the visual site inspection of readily accessible areas of the target property conducted by Lotis personnel, information from interviews with knowledgeable persons regarding the target property, information reviewed regarding historical uses, information requested from regulatory agencies, and review of publicly available and practicably reviewable information identifying current and historical uses of the target property and surrounding properties.

Access to the interior of all buildings within the target property was not provided and building interiors are not included in the scope of work for this project.

All conclusions regarding this property represent the professional opinions of the Lotis personnel involved with this project. The findings of this report should not be considered a legal interpretation of existing environmental regulations. Lotis assumes no responsibility or liability for errors in the public data utilized, statements from sources outside of Lotis, or developments resulting from situations outside the scope of this project.

1.5 DEVIATIONS

There were no deviations from the ASTM E1527-13 Standard during the completion of this Phase I ESA report.

2.0 SITE DESCRIPTION

A current aerial photograph of the target property and USGS 7.5 Minute Topographic map showing the target property and surrounding area are provided as Figure 1 and Figure 2, respectively.

2.1 GENERAL

The target property is located on the south side of Oakes Avenue, less than one-eighth mile north of I-90. The latitude/longitude of the target property is N 47° 11' 32.69", W 120° 56' 12.53", and the elevation of the target property is approximately 1923 feet above mean sea level. The following onsite features were noted during Lotis' site reconnaissance:

Table 2 - Site Observations

| Site Feature | Description |
|------------------------------------|--------------------------------------------------------------------|
| Communications Tower(s) | none |
| Fenced | no |
| Equipment Cabinet(s) | none |
| Equipment Shelter(s) | none |
| Electrical Service | none |
| Electric Meter(s) | none |
| Generator(s)/Observed or Indicated | diesel (none), propane (none), natural gas (none), hydrogen (none) |
| Surface Material | dirt and gravel |
| Topography | flat |
| Vegetation | some weeds |
| Sewage | none |
| Potable Water | none |
| Other | none |

2.2 SITE RECONNAISSANCE

Lotis performed a site reconnaissance on August 13, 2020. The purpose of the reconnaissance was to evaluate the target property, to observe adjoining/nearby properties, and to identify unlisted properties in the area that may affect the target property. Photographs from the site reconnaissance are provided as Appendix A. The perimeter of the target property was walked, as its small area did not necessitate the use of a grid search pattern.

2.2.1 Current Uses of the Target Property:

The target property is currently an open area next to an interstate.

2.2.2 Current Uses of Adjacent/Nearby Properties:

Current visible uses of nearby properties include the following as viewed from the target property to the:

- North - Oakes Avenue, then vacant land, then Swiftwater Boulevard, then railroad tracks, then vacant land, then East Railroad Avenue, then North Harris Avenue and commercial (Pioneer Beverage, Attitudes! Salon, Beau's Pizza & Pasta, Ruby's Store), then East 1st Street, then commercial (AmeriTitle, Cascade Funeral Home, Paradise Mountain Log & Timber Frame Homes, Evergreen Home Loans), then East 2nd Street, then Cle Elum Seventh-day Adventist Church and residential;
- East - forested, then Oakes Avenue, then tree line, then Swiftwater Boulevard, then commercial (Pacific Pride Gas Station, Marson & Marson Lumber), then railroad tracks, then vacant land;
- South - forested, then I-90, then open field with some trees, then South Oaks Avenue, then recreational (Whispering Pines RV Park), then forested, then the Yakima River, then open field with some trees; and
- West - brush with some trees, then commercial (Norris Storage, K&F Storage, Stan's Storage & Commercial), then residential, then pond, then tree line, then open field with some trees, then railroad tracks, then open field with some trees, then South Cle Elum Way.

2.2.3 Hazardous Materials

No hazardous substances or petroleum product containers were observed on the subject property during the site reconnaissance. There were no indications of hazardous substance or petroleum product mishandling such as distressed vegetation, staining, or soil discoloration.

No hazardous substances or petroleum product containers were observed on adjacent properties during the site reconnaissance. There were no indications of hazardous substance or petroleum product mishandling such as distressed vegetation, staining, or soil discoloration.

2.2.4 Indications of Waste Disposal / Other

No evidence of waste disposal on the target property was noted at the time of the site reconnaissance. There was no evidence of trash burning on the target property.

No evidence of waste disposal on adjacent properties was noted at the time of the site reconnaissance. There was no evidence of trash burning on adjacent properties.

There was no indication of foul or unusual odors at the target property during the site visit.

2.2.5 Indications of PCBs

Lotis inspected the target property for types of equipment that have historically been associated with the use of PCBs as a dielectric fluid coolant and stabilizer (i.e. transformers, elevators, hydraulic lifts, fluorescent lighting). The use of PCBs was banned in 1979. The following transformer observations were noted during the site reconnaissance:

Table 3 - Transformer Observations

| | Pole-Mounted | Pad-Mounted | PCB-Free Sticker(s) Observed | Observed Staining/Leaking |
|---------------------|--------------|-------------|------------------------------|---------------------------|
| Target Property | none | none | n/a | n/a |
| Adjacent Properties | none | none | n/a | n/a |

2.2.6 Storage Tanks

The following storage tank observations were noted on the **target property** during Lotis' site reconnaissance:

Table 4 - Target Property Tanks

| | Petroleum | Propane | Other | Environmental Concern |
|--------------------------------|-----------|---------|-------|-----------------------|
| Aboveground Storage Tank (AST) | none | none | none | none |
| Underground Storage Tank (UST) | none | none | none | none |

The following storage tank observations were noted on **adjacent properties** during Lotis' site reconnaissance:

Table 5 - Adjacent Tanks

| | Petroleum | Propane | Other | Environmental Concern |
|--------------------------------|-----------|---------|-------|-----------------------|
| Aboveground Storage Tank (AST) | none | none | none | none |
| Underground Storage Tank (UST) | none | none | none | none |

3.0 ENVIRONMENTAL AND HISTORICAL RECORDS REVIEW

3.1 PHYSICAL SETTING

3.1.1 General Topographic Setting

Review of the United States Geological Survey (USGS), 6004929 CLE ELUM, WA 7.5-Minute Quadrangle map indicates that the regional topography generally slopes in a northerly gradient. The soil surface texture in the vicinity of the target property is loam and the soil drainage is considered somewhat poorly drained.

3.1.2 Surface Water

The target property is located in FEMA Flood Zone 5300960001B and the Cle Elum National Wetland Inventory Quad. No surface water was observed on the target property during the site visit. No surface water was observed on adjacent properties during the site visit.

3.1.3 Groundwater Depth

Depth to groundwater at the target property is unknown. The EDR report identified the following water well data within the one-mile search radius:

Table 6 - Well Information

| Well Type | Quantity |
|-----------------------------------------|-------------------------|
| Federal USGS | twenty-two |
| Federal FRDS Public Water Supply System | one |
| State Database | two hundred seventy-two |

Average depth to groundwater at the reported wells in the database is seventy feet below ground surface.

3.1.4 Groundwater Flow

Groundwater flow direction at the target property is not known. However, based on topographic gradient, the direction of groundwater flow in the general area of the target property is estimated to be in a northerly direction. Groundwater beneath the target property is of concern when there are properties located upgradient of the target property that may have environmental concerns. Section 3.4 provides additional information on identified upgradient properties with current or historical environmental concerns.

It is important to note that although groundwater flow direction can be interpreted based on topography, the actual measurement of groundwater levels and potentiometric surface mapping is beyond the scope of work for this project. Measurement of groundwater levels and potentiometric surface mapping is the only accurate means of determining groundwater flow direction and gradient. Additionally, localized factors such as the presence of undocumented or unregistered pumping wells or other subsurface obstructions, seasonal fluctuations in precipitation, geologic heterogeneity, and nearby surface waters may also significantly influence groundwater gradient and flow direction at the target property.

3.2 HISTORICAL USE INFORMATION

The following historical reference materials were utilized to determine prior use of the target property and adjacent/nearby properties:

EDR Aerial Photo Decade Package – 1956, 1964, 1979, 1981, 1983, 1990, 1994, 2006, 2009, 2013, and 2017.

EDR Sanborn® Map - 1925 and 1940

Physical characteristic changes for the target and adjacent/nearby properties were observed as follows:

Table 7 - Historic Uses Summary

| Year | Setting | Target Property Use | Adjacent/Nearby Property Use | | | |
|------|----------|------------------------------------------------|---------------------------------------------|-------------------------------------------------------------|------------------------------------------------------|----------------------------------------------|
| | | | North | East | South | West |
| 1925 | Suburban | Undeveloped and portion of Harris Avenue South | Commercial, Railroad Tracks and Residential | Undeveloped and Railroad Tracks | Undeveloped | Residential |
| 1956 | Suburban | Undeveloped | Commercial, Railroad Tracks and Residential | Residential, Forested and Railroad Tracks | Forested and the Yakima River | Residential and the Yakima River |
| 1979 | Suburban | Undeveloped | Railroad Tracks, Commercial and Residential | Forested, Railroad Tracks and Pond | Forested, Highway and the Yakima River | Commercial, Residential, Pond and Open Field |
| 1990 | Suburban | Undeveloped | Railroad Tracks, Commercial and Residential | Open Field with Trees, Railroad Tracks and Pond | Forested, Highway and the Yakima River | Commercial, Residential, Pond and Open Field |
| 1994 | Suburban | Undeveloped | Railroad Tracks, Commercial and Residential | Open Field with Trees, Railroad Tracks, Commercial and Pond | Forested, Highway, Recreational and the Yakima River | Commercial, Residential, Pond and Open Field |
| 2017 | Suburban | Undeveloped | Railroad Tracks, Commercial and Residential | Open Field with Trees, Railroad Tracks, Commercial and Pond | Forested, Highway, Recreational and the Yakima River | Commercial, Residential, Pond and Open Field |

3.3 SUMMARY OF PREVIOUS ENVIRONMENTAL SITE ASSESSMENTS

Lotis was not provided a previous Phase I ESA for the target property, as reflected in Appendix E.

3.4 STATE STANDARD AND FEDERAL ENVIRONMENTAL RECORD SOURCES

Environmental Data Resources (EDR) was utilized to conduct a database search of environmental records. The search radius of the EDR Radius Map™ Report with GeoCheck® (EDR Report) meets or exceeds the government records search requirements of the ASTM Standard E1527-13 for Phase I ESAs. The EDR Report is provided as Appendix C. Table 8 provides the summary of the databases searched by EDR and findings of each, i.e. number of sites identified within the search radius.

Table 8 - EDR Summary

| Database * | Total Site(s) |

* The acronym for each database is defined in the EDR Report in Appendix C.

Within a one-mile radius of the target property, thirty-six sites were identified on the federal and/or state databases (*note: sites may be listed in multiple databases*). One orphan site, those sites not mapped due to poor or inadequate address information, was identified. During the site visit, the orphan site was not observed near the target property.

Of the sites listed in Table 8, two were located within one-eighth mile of the target property. A summary of Lotis' review of these sites is presented in Table 9 below.

Table 9 - Sites of Concern Summary

| Site | Database | Review Notes |
|------------------------|------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------|
| CLERF ROGER | EDR Hist Cleaner | This site was operated as a garment pressing and cleaners facility from at least 1994 through at least 1999. No violations. |
| SCHOOL DIST BUS GARAGE | UST, ALLSITES | This site was identified as a registered underground storage tank (UST) facility with one tank listed as closed in place as of August 6, 1996. No violations. |

The listings described at Table 9 above are not likely to environmentally impact the target property. Based on a distance generally greater than one-eighth mile from the target property, general topographic position relative to the target property, lack of violations, and/or case type/status, no further evaluation of potential impact from the remaining sites is needed.

4.0 INTERVIEWS

4.1 CURRENT OWNER/OPERATORS/SITE OCCUPANTS/SITE MANAGER

The current property owner contact of the target property (Ms. Lucy Temple for The City of Cle Elum: (509) 674-2262) was interviewed to obtain information indicating RECs in connection with the target property. Ms. Temple indicated that to her knowledge the target property has no environmental cleanup liens or Activity and Use Limitations (AULs). Ms. Temple also indicated that she was unaware of past environmental concerns (i.e., chemical releases or cleanups) at the target property. Ms. Temple stated that The City of Cle Elum purchased the property over 50 years ago and that the target property is currently an undeveloped area next to an interstate. A copy of Lotis' key site personnel interview record is included in Appendix B.

4.2 LOCAL GOVERNMENT OFFICIALS

Ms. Kathi Swanson of the Cle Elum Fire Department was interviewed to obtain information indicating RECs in connection with the target property. Ms. Swanson had no knowledge of any environmental concerns on or immediately adjacent to the target property, nor has her department responded to any environmental emergencies at the property. A copy of Lotis' fire department interview record is included in Appendix B.

4.3 ADDITIONAL INTERVIEWS

No additional interviews were completed.

4.4 USER QUESTIONNAIRE

A completed User Questionnaire was not provided to Lotis by the User. No title records were provided to Lotis by the User.

5.0 NON-SCOPE ENVIRONMENTAL CONSIDERATIONS

5.1 ASBESTOS-CONTAINING BUILDING MATERIALS

No structures were located onsite at the time of the inspection and no asbestos containing materials were noted onsite.

5.2 Lead-Based Paint

No painted surfaces were noted onsite.

5.3 RADON

Research in the area of the target property suggests an average basement radon concentration of less than four pCi/L relative to Kittitas County, Washington. As such, radon should not be a concern.

5.4 WETLANDS

The EDR database report includes general information relative to wetlands and flood zones. No wetlands were identified on or adjacent to the target property. The target property is located within a Special Flood Hazard Area (1%).

5.5 MOLD

None observed.

5.6 VAPOR ENCROACHMENT CONDITIONS

This assessment included review of the regulatory database discussed above in relation to Section 3.4 of the ASTM E2600-10 Standard Guide for Vapor Encroachment Screening on Property Involved in Real Estate Transactions. If soil or groundwater is contaminated with a volatile compound (that is, something that can escape from water or soil to air, such as gasoline and solvents), that contaminant can migrate through the soil and present in the air inside of buildings, especially within basement areas. The ASTM E2600-10 standard designates this a Vapor Encroachment Condition (VEC). Soil vapors do not necessarily migrate along groundwater flow paths. Vapors can migrate via hydraulic gradients and may extend beyond a groundwater plume. Vapor intrusion has been identified at a significant number of sites and state and federal environmental regulators have "reopened" numerous spill and waste cases to assess whether a VEC assessment is warranted.

None of the information obtained/reviewed as part of this assessment suggested the potential for a VEC at the target property.

6.0 DATA GAPS

A data gap, as defined in the ASTM Standard E1527-13, is an absence of information that affects the ability of the environmental professional to identify RECs. The following data gap was identified in the Phase I ESA:

Historical Source Interval: Standard historical sources reviewed for the Phase I ESA were not available at the 5-year intervals described in Section 8.3.2.1 of the Standard.

Based on the information collected and reviewed as part of this Phase I ESA, the data gap presented above is not likely to impact the overall ability to determine RECs at the target property.

7.0 FINDINGS AND OPINIONS

7.1 RECs

ASTM defines recognized environmental conditions (RECs) as “the presence or likely presence of any hazardous substances or petroleum products in, on or at a property: (1) due to any release to the environment; (2) under conditions indicative of a release to the environment; or (3) under conditions that pose a material threat of a future release to the environment.” The term is not intended to include *de minimis* conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies.

This Phase I ESA has identified no RECs in connection with the target property.

7.2 HISTORICAL RECs

ASTM defines historical recognized environmental conditions (HRECs) as “a past release of any hazardous substances or petroleum products that has occurred in connection with the property and has been addressed to the satisfaction of the applicable regulatory authority or meeting unrestricted use criteria established by a regulatory authority, without subjecting the property to any required controls (e.g., property use restrictions, activity and use limitations (AULs), institutional controls, or engineering controls).”

This Phase I ESA has identified no HRECs in connection with the target property.

7.3 CONTROLLED RECs

ASTM defines controlled recognized environmental conditions (CRECs) as “a recognized environmental condition resulting from a past release of hazardous substances or petroleum products that has been addressed to the satisfaction of the applicable regulatory authority (e.g., as evidenced by the issuance of a no further action letter or equivalent, or meeting risk-based criteria established by regulatory authority), with hazardous substances or petroleum products allowed to remain in place subject to the implementation of required controls (for example, property use restrictions, activity and use limitations, institutional controls, or engineering controls).”

This Phase I ESA has identified no CRECs in connection with the target property.

7.4 DE MINIMIS CONDITIONS

ASTM defines *de minimis* conditions (*de minimis*) as “conditions that generally do not present a threat to human health or the environment and that generally would not be the subject of an enforcement action if brought to the attention of appropriate governmental agencies. Conditions determined to be *de minimis* are not recognized environmental conditions.”

This Phase I ESA has identified no *de minimis* conditions in connection with the target property.

8.0 RECOMMENDATIONS

Based on the results of the Phase I ESA, Lotis does not recommend further investigation at this time.

KEY SITE PERSONNEL TELEPHONE INTERVIEW FORM

Lotis Interviewer Interview Date

Site ID

Site Name

Site Address

Key Site Personnel Phone Number

Relationship to Property

The objective of this telephone interview is to obtain information indicating recognized environmental conditions in connection with the property.

1. Are you aware of any environmental cleanup liens against the property that are filed or recorded under federal, tribal, state or local law?

If yes, describe.

1. Are you aware of any AULs, such as engineering controls, land use restrictions or institutional controls that are in place at the site and/or have been filed or recorded in a registry under federal, tribal, state or local law?

If yes, describe.

2. Commonly known or reasonably ascertainable information about the property (40 CFR 312.30):

a. Do you know the past uses of the property?

If yes, what were they?

b. Do you know of specific chemicals that are present or once were present at the property?

c. Do you know of spills or other chemical releases that have taken place at the property?

d. Do you know of any environmental cleanups that have taken place at the property?

3. When was the property acquired by the current owner?

4. What year was the communications tower constructed?

Other pertinent information

Ms. Temple is the site contact for the current property owner, The City of Cle Elum.

EXECUTIVE SUMMARY

A search of available environmental records was conducted by Environmental Data Resources, Inc (EDR). The report was designed to assist parties seeking to meet the search requirements of EPA's Standards and Practices for All Appropriate Inquiries (40 CFR Part 312), the ASTM Standard Practice for Environmental Site Assessments (E 1527-13), the ASTM Standard Practice for Environmental Site Assessments for Forestland or Rural Property (E 2247-16), the ASTM Standard Practice for Limited Environmental Due Diligence: Transaction Screen Process (E 1528-14) or custom requirements developed for the evaluation of environmental risk associated with a parcel of real estate.

SURROUNDING SITES: SEARCH RESULTS

Surrounding sites were identified in the following databases.

Elevations have been determined from the USGS Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified. Sites with an elevation equal to or higher than the target property have been differentiated below from sites with an elevation lower than the target property.

Page numbers and map identification numbers refer to the EDR Radius Map report where detailed data on individual sites can be reviewed.

Sites listed in ***bold italics*** are in multiple databases.

Unmappable (orphan) sites are not considered in the foregoing analysis.

STANDARD ENVIRONMENTAL RECORDS

State- and tribal - equivalent NPL

HSL: The Hazardous Sites List is a subset of the CSCSL Report. It includes sites which have been assessed and ranked using the Washington Ranking Method (WARM).

A review of the HSL list, as provided by EDR, and dated 02/26/2020 has revealed that there are 4 HSL sites within approximately 1 mile of the target property.

State- and tribal - equivalent CERCLIS

CSCSL: The State Hazardous Waste Sites records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. The data come from the Department of Ecology's Confirmed & Suspected Contaminated Sites List.

A review of the CSCSL list, as provided by EDR, and dated 04/13/2020 has revealed that there are 5 CSCSL sites within approximately 1 mile of the target property.

State and tribal landfill and/or solid waste disposal site lists

SWF/LF: The Solid Waste Facilities/Landfill Sites records typically contain an inventory of solid waste disposal facilities or landfills in a particular state. The data come from the Department of Ecology's Solid Waste Facilities Handbook.

A review of the SWF/LF list, as provided by EDR, has revealed that there is 1 SWF/LF site within approximately 0.5 miles of the target property.

State and tribal registered storage tank lists

UST: The Underground Storage Tank database contains registered USTs. USTs are regulated under Subtitle I of the Resource Conservation and Recovery Act (RCRA). The data come from the Department of Ecology's Statewide UST Site/Tank Report.

A review of the UST list, as provided by EDR, and dated 05/12/2020 has revealed that there are 7 UST sites within approximately 0.25 miles of the target property.

CSCSL NFA: The data set contains information about sites previously on the Confirmed and Suspected Contaminated Sites list that have received a No Further Action (NFA) determination. Because it is necessary to maintain historical records of sites that have been investigated and cleaned up, sites are not deleted from the database when cleanup activities are completed. Instead a No Further Action code is entered based upon the type of NFA determination the site received.

A review of the CSCSL NFA list, as provided by EDR, and dated 04/13/2020 has revealed that there are 4 CSCSL NFA sites within approximately 0.5 miles of the target property.

Other Ascertainable Records

RCRA NonGen / NLR: RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or

EXECUTIVE SUMMARY

dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

A review of the RCRA NonGen / NLR list, as provided by EDR, and dated 03/23/2020 has revealed that there are 3 RCRA NonGen / NLR sites within approximately 0.25 miles of the target property.

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR Hist Cleaner: EDR has searched selected national collections of business directories and has collected listings of potential dry cleaner sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include dry cleaning establishments. The categories reviewed included, but were not limited to dry cleaners, cleaners, laundry, laundromat, cleaning/laundry, wash & dry etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

A review of the EDR Hist Cleaner list, as provided by EDR, has revealed that there is 1 EDR Hist Cleaner site within approximately 0.125 miles of the target property.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

RCRAInfo is a national information system that supports the Resource Conservation and Recovery Act (RCRA) program through the tracking of events and activities related to facilities that generate, transport, and treat, store, or dispose of hazardous waste. RCRAInfo allows RCRA program staff to track the notification, permit, compliance, and corrective action activities required under RCRA.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

ICIS (Integrated Compliance Information System) is the Integrated Compliance Information System and provides a database that, when complete, will contain integrated Enforcement and Compliance information across most of EPA's programs. The vision for ICIS is to replace EPA's independent databases that contain Enforcement data with a single repository for that information. Currently, ICIS contains all Federal Administrative and Judicial enforcement actions. This information is maintained in ICIS by EPA in the Regional offices and it Headquarters. A future release of ICIS will replace the Permit Compliance System (PCS) which supports the NPDES and will integrate that information with Federal actions already in the system. ICIS also has the capability to track other activities occurring in the Region that support Compliance and Enforcement programs. These include; Incident Tracking, Compliance Assistance, and Compliance Monitoring.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

Environmental Interest/Information System:

Washington Facility / Site Identification System (WA-FSIS) provides a means to query and display data maintained by the Washington Department of Ecology. This system contains key information for each facility/site that is currently, or has been, of interest to the Air Quality, Dam Safety, Hazardous Waste, Toxics Cleanup, and Water Quality Programs.

[Click this hyperlink](#) while viewing on your computer to access additional FINDS: detail in the EDR Site Report.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

To maintain currency of the following federal and state databases, EDR contacts the appropriate governmental agency on a monthly or quarterly basis, as required.

Number of Days to Update: Provides confirmation that EDR is reporting records that have been updated within 90 days from the date the government agency made the information available to the public.

STANDARD ENVIRONMENTAL RECORDS

Federal NPL site list

NPL: National Priority List

National Priorities List (Superfund). The NPL is a subset of CERCLIS and identifies over 1,200 sites for priority cleanup under the Superfund Program. NPL sites may encompass relatively large areas. As such, EDR provides polygon coverage for over 1,000 NPL site boundaries produced by EPA's Environmental Photographic Interpretation Center (EPIC) and regional EPA offices.

Proposed NPL: Proposed National Priority List Sites

A site that has been proposed for listing on the National Priorities List through the issuance of a proposed rule in the Federal Register. EPA then accepts public comments on the site, responds to the comments, and places on the NPL those sites that continue to meet the requirements for listing.

NPL LIENS: Federal Superfund Liens

Federal Superfund Liens. Under the authority granted the USEPA by CERCLA of 1980, the USEPA has the authority to file liens against real property in order to recover remedial action expenditures or when the property owner received notification of potential liability. USEPA compiles a listing of filed notices of Superfund Liens.

Federal Delisted NPL site list

Delisted NPL: National Priority List Deletions

The National Oil and Hazardous Substances Pollution Contingency Plan (NCP) establishes the criteria that the EPA uses to delete sites from the NPL. In accordance with 40 CFR 300.425.(e), sites may be deleted from the NPL where no further response is appropriate.

SEMS: Superfund Enterprise Management System

SEMS (Superfund Enterprise Management System) tracks hazardous waste sites, potentially hazardous waste sites, and remedial activities performed in support of EPA's Superfund Program across the United States. The list was formerly known as CERCLIS, renamed to SEMS by the EPA in 2015. The list contains data on potentially hazardous waste sites that have been reported to the USEPA by states, municipalities, private companies and private persons, pursuant to Section 103 of the Comprehensive Environmental Response, Compensation, and Liability Act (CERCLA). This dataset also contains sites which are either proposed to or on the National Priorities List (NPL) and the sites which are in the screening and assessment phase for possible inclusion on the NPL.

Data Release Frequency: Quarterly

Federal CERCLIS NFRAP site list

SEMS-ARCHIVE: Superfund Enterprise Management System Archive

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

SEMS-ARCHIVE (Superfund Enterprise Management System Archive) tracks sites that have no further interest under the Federal Superfund Program based on available information. The list was formerly known as the CERCLIS-NFRAP, renamed to SEMS ARCHIVE by the EPA in 2015. EPA may perform a minimal level of assessment work at a site while it is archived if site conditions change and/or new information becomes available. Archived sites have been removed and archived from the inventory of SEMS sites. Archived status indicates that, to the best of EPA's knowledge, assessment at a site has been completed and that EPA has determined no further steps will be taken to list the site on the National Priorities List (NPL), unless information indicates this decision was not appropriate or other considerations require a recommendation for listing at a later time. The decision does not necessarily mean that there is no hazard associated with a given site; it only means that, based upon available information, the location is not judged to be potential NPL site.

Federal RCRA non-CORRACTS TSD facilities list

RCRA-TSDF: RCRA - Treatment, Storage and Disposal

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Transporters are individuals or entities that move hazardous waste from the generator offsite to a facility that can recycle, treat, store, or dispose of the waste. TSDFs treat, store, or dispose of the waste.

Federal RCRA generators list

RCRA-LQG: RCRA - Large Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Large quantity generators (LQGs) generate over 1,000 kilograms (kg) of hazardous waste, or over 1 kg of acutely hazardous waste per month.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

RCRA-SQG: RCRA - Small Quantity Generators

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Small quantity generators (SQGs) generate between 100 kg and 1,000 kg of hazardous waste per month.

RCRA-VSQG: RCRA - Very Small Quantity Generators (Formerly Conditionally Exempt Small Quantity Generators)

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Very small quantity generators (VSQGs) generate less than 100 kg of hazardous waste, or less than 1 kg of acutely hazardous waste per month.

State- and tribal - equivalent CERCLIS

CSCSL: Confirmed and Suspected Contaminated Sites List

State Hazardous Waste Sites. State hazardous waste site records are the states' equivalent to CERCLIS. These sites may or may not already be listed on the federal CERCLIS list. Priority sites planned for cleanup using state funds (state equivalent of Superfund) are identified along with sites where cleanup will be paid for by potentially responsible parties. Available information varies by state.

PTAP: PTAP Site Listing
A list of sites accepted into the Petroleum Technical Assistance Program. The Petroleum Technical Assistance Program (PTAP) expands the state's ability to respond to the high customer demand to clean up petroleum contaminated sites. Under the PTAP, the Pollution Liability Insurance Agency (PLIA) may provide informal site-specific technical consultations and issue written opinion letters to persons conducting independent remedial actions at qualifying petroleum cleanup sites. PLIA may provide these services under the authority of RCW 70.149.040(9) and the Model Toxics Control Act (MTCA), Chapter 70.149 RCW and Chapter 173-340 WAC.

ADDITIONAL ENVIRONMENTAL RECORDS

Local Brownfield lists

US BROWNFIELDS: A Listing of Brownfields Sites

Brownfields are real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. Cleaning up and reinvesting in these properties takes development pressures off of undeveloped, open land, and both improves and protects the environment. Assessment, Cleanup and Redevelopment Exchange System (ACRES) stores information reported by EPA Brownfields grant recipients on brownfields properties assessed or cleaned up with grant funding as well as information on Targeted Brownfields Assessments performed by EPA Regions. A listing of ACRES Brownfield sites is obtained from Cleanups in My Community. Cleanups in My Community provides information on Brownfields properties for which information is reported back to EPA, as well as areas served by Brownfields grant programs.

US CDL: Clandestine Drug Labs

A listing of clandestine drug lab locations. The U.S. Department of Justice ("the Department") provides this web site as a public service. It contains addresses of some locations where law enforcement agencies reported they found chemicals or other items that indicated the presence of either clandestine drug laboratories or dumpsites. In most cases, the source of the entries is not the Department, and the Department has not verified the entry and does not guarantee its accuracy. Members of the public must verify the accuracy of all entries by, for example, contacting local law enforcement and local health departments.

Other Ascertainable Records

RCRA NonGen / NLR: RCRA - Non Generators / No Longer Regulated

RCRAInfo is EPA's comprehensive information system, providing access to data supporting the Resource Conservation and Recovery Act (RCRA) of 1976 and the Hazardous and Solid Waste Amendments (HSWA) of 1984. The database includes selective information on sites which generate, transport, store, treat and/or dispose of hazardous waste as defined by the Resource Conservation and Recovery Act (RCRA). Non-Generators do not presently generate hazardous waste.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

EPA WATCH LIST: EPA WATCH LIST

EPA maintains a "Watch List" to facilitate dialogue between EPA, state and local environmental agencies on enforcement matters relating to facilities with alleged violations identified as either significant or high priority. Being on the Watch List does not mean that the facility has actually violated the law only that an investigation by EPA or a state or local environmental agency has led those organizations to allege that an unproven violation has in fact occurred. Being on the Watch List does not represent a higher level of concern regarding the alleged violations that were detected, but instead indicates cases requiring additional dialogue between EPA, state and local agencies - primarily because of the length of time the alleged violation has gone unaddressed or unresolved.

2020 COR ACTION: 2020 Corrective Action Program List

The EPA has set ambitious goals for the RCRA Corrective Action program by creating the 2020 Corrective Action Universe. This RCRA cleanup baseline includes facilities expected to need corrective action. The 2020 universe contains a wide variety of sites. Some properties are heavily contaminated while others were contaminated but have since been cleaned up. Still others have not been fully investigated yet, and may require little or no remediation. Inclusion in the 2020 Universe does not necessarily imply failure on the part of a facility to meet its RCRA obligations.

RMP: Risk Management Plans

When Congress passed the Clean Air Act Amendments of 1990, it required EPA to publish regulations and guidance for chemical accident prevention at facilities using extremely hazardous substances. The Risk Management Program Rule (RMP Rule) was written to implement Section 112(r) of these amendments. The rule, which built upon existing industry codes and standards, requires companies of all sizes that use certain flammable and toxic substances to develop a Risk Management Program, which includes a(n): Hazard assessment that details the potential effects of an accidental release, an accident history of the last five years, and an evaluation of worst-case and alternative accidental releases; Prevention program that includes safety precautions and maintenance, monitoring, and employee training measures; and Emergency response program that spells out emergency health care, employee training measures and procedures for informing the public and response agencies (e.g the fire department) should an accident occur.

RAATS: RCRA Administrative Action Tracking System

RCRA Administration Action Tracking System. RAATS contains records based on enforcement actions issued under RCRA pertaining to major violators and includes administrative and civil actions brought by the EPA. For administration actions after September 30, 1995, data entry in the RAATS database was discontinued. EPA will retain a copy of the database for historical records. It was necessary to terminate RAATS because a decrease in agency resources made it impossible to continue to update the information contained in the database.

HIST FTTS: FIFRA/TSCA Tracking System Administrative Case Listing

A complete administrative case listing from the FIFRA/TSCA Tracking System (FTTS) for all ten EPA regions. The information was obtained from the National Compliance Database (NCDB). NCDB supports the implementation of FIFRA (Federal Insecticide, Fungicide, and Rodenticide Act) and TSCA (Toxic Substances Control Act). Some EPA regions are now closing out records. Because of that, and the fact that some EPA regions are not providing EPA Headquarters with updated records, it was decided to create a HIST FTTS database. It included records that may not be included in the newer FTTS database updates. This database is no longer updated.

US AIRS (AFS): Aerometric Information Retrieval System Facility Subsystem (AFS)

The database is a sub-system of Aerometric Information Retrieval System (AIRS). AFS contains compliance data on air pollution point sources regulated by the U.S. EPA and/or state and local air regulatory agencies. This information comes from source reports by various stationary sources of air pollution, such as electric power plants, steel mills, factories, and universities, and provides information about the air pollutants they produce. Action, air program, air program pollutant, and general level plant data. It is used to track emissions and compliance data from industrial plants.

ABANDONED MINES: Abandoned Mines

An inventory of land and water impacted by past mining (primarily coal mining) is maintained by OSMRE to provide information needed to implement the Surface Mining Control and Reclamation Act of 1977 (SMCRA). The inventory contains information on the location, type, and extent of AML impacts, as well as, information on the cost associated with the reclamation of those problems. The inventory is based upon field surveys by State, Tribal, and OSMRE program officials. It is dynamic to the extent that it is modified as new problems are identified and existing problems are reclaimed.

FINDS: Facility Index System/Facility Registry System

Facility Index System. FINDS contains both facility information and 'pointers' to other sources that contain more detail. EDR includes the following FINDS databases in this report: PCS (Permit Compliance System), AIRS (Aerometric Information Retrieval System), DOCKET (Enforcement Docket used to manage and track information on civil judicial enforcement cases for all environmental statutes), FURS (Federal Underground Injection Control), C-DOCKET (Criminal Docket System used to track criminal enforcement actions for all environmental statutes), FFIS (Federal Facilities Information System), STATE (State Environmental Laws and Statutes), and PADS (PCB Activity Data System).

EDR HIGH RISK HISTORICAL RECORDS

EDR Exclusive Records

EDR MGP: EDR Proprietary Manufactured Gas Plants

The EDR Proprietary Manufactured Gas Plant Database includes records of coal gas plants (manufactured gas plants) compiled by EDR's researchers. Manufactured gas sites were used in the United States from the 1800's to 1950's to produce a gas that could be distributed and used as fuel. These plants used whale oil, rosin, coal, or a mixture of coal, oil, and water that also produced a significant amount of waste. Many of the byproducts of the gas production, such as coal tar (oily waste containing volatile and non-volatile chemicals), sludges, oils and other compounds are potentially hazardous to human health and the environment. The byproduct from this process was frequently disposed of directly at the plant site and can remain or spread slowly, serving as a continuous source of soil and groundwater contamination.

EDR Hist Auto: EDR Exclusive Historical Auto Stations

EDR has searched selected national collections of business directories and has collected listings of potential gas station/filling station/service station sites that were available to EDR researchers. EDR's review was limited to those categories of sources that might, in EDR's opinion, include gas station/filling station/service station establishments. The categories reviewed included, but were not limited to gas, gas station, gasoline station, filling station, auto, automobile repair, auto service station, service station, etc. This database falls within a category of information EDR classifies as "High Risk Historical Records", or HRHR. EDR's HRHR effort presents unique and sometimes proprietary data about past sites and operations that typically create environmental concerns, but may not show up in current government records searches.

TACOMA/PIERCE COUNTY:

LF TACOMA/PIERCE: Closed Landfill Survey

Following numerous requests for information about closed dumpsites and landfills in Pierce County, the Tacoma-Pierce County Health Department decided to conduct a study on the matter. The aim of the study was to evaluate public health risks associated with the closed dumpsites and landfills, and to determine the need, if any, for further investigations of a more detailed nature. The sites represent all of the known dumpsites and landfills closed after 1950.

OTHER DATABASE(S)

Depending on the geographic area covered by this report, the data provided in these specialty databases may or may not be complete. For example, the existence of wetlands information data in a specific report does not mean that all wetlands in the area covered by the report are included. Moreover, the absence of any reported wetlands information does not necessarily mean that wetlands do not exist in the area covered by the report.

CT MANIFEST: Hazardous Waste Manifest Data

Facility and manifest data. Manifest is a document that lists and tracks hazardous waste from the generator through transporters to a tsd facility.

GOVERNMENT RECORDS SEARCHED / DATA CURRENCY TRACKING

Sensitive Receptors: There are individuals deemed sensitive receptors due to their fragile immune systems and special sensitivity to environmental discharges. These sensitive receptors typically include the elderly, the sick, and children. While the location of all sensitive receptors cannot be determined, EDR indicates those buildings and facilities - schools, daycares, hospitals, medical centers, and nursing homes - where individuals who are sensitive receptors are likely to be located.

AHA Hospitals:

Source: American Hospital Association, Inc.

Telephone: 312-280-5991

The database includes a listing of hospitals based on the American Hospital Association's annual survey of hospitals.

Medical Centers: Provider of Services Listing

Source: Centers for Medicare & Medicaid Services

Telephone: 410-786-3000

A listing of hospitals with Medicare provider number, produced by Centers of Medicare & Medicaid Services, a federal agency within the U.S. Department of Health and Human Services.

Nursing Homes

Source: National Institutes of Health

Telephone: 301-594-6248

Information on Medicare and Medicaid certified nursing homes in the United States.

Public Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

The National Center for Education Statistics' primary database on elementary and secondary public education in the United States. It is a comprehensive, annual, national statistical database of all public elementary and secondary schools and school districts, which contains data that are comparable across all states.

Private Schools

Source: National Center for Education Statistics

Telephone: 202-502-7300

EDR's GeoCheck Physical Setting Source Addendum is provided to assist the environmental professional in forming an opinion about the impact of potential contaminant migration.

Assessment of the impact of contaminant migration generally has two principle investigative components:

1. Groundwater flow direction, and
2. Groundwater flow velocity.

Groundwater flow direction may be impacted by surface topography, hydrology, hydrogeology, characteristics of the soil, and nearby wells. Groundwater flow velocity is generally impacted by the nature of the geologic strata.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW DIRECTION INFORMATION

Groundwater flow direction for a particular site is best determined by a qualified environmental professional using site-specific well data. If such data is not reasonably ascertainable, it may be necessary to rely on other sources of information, such as surface topographic information, hydrologic information, hydrogeologic data collected on nearby properties, and regional groundwater flow information (from deep aquifers).

TOPOGRAPHIC INFORMATION

Surface topography may be indicative of the direction of surficial groundwater flow. This information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

TARGET PROPERTY TOPOGRAPHY

General Topographic Gradient: General North

SURROUNDING TOPOGRAPHY: ELEVATION PROFILES

Source: Topography has been determined from the USGS 7.5' Digital Elevation Model and should be evaluated on a relative (not an absolute) basis. Relative elevation information between sites of close proximity should be field verified.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

HYDROLOGIC INFORMATION

Surface water can act as a hydrologic barrier to groundwater flow. Such hydrologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

Refer to the Physical Setting Source Map following this summary for hydrologic information (major waterways and bodies of water).

FEMA FLOOD ZONE

| <u>Flood Plain Panel at Target Property</u> | <u>FEMA Source Type</u> |
|---------------------------------------------|-------------------------|

NATIONAL WETLAND INVENTORY

| <u>NWI Quad at Target Property</u> | <u>NWI Electronic Data Coverage</u> |
|------------------------------------|------------------------------------------------|
| CLE ELUM | YES - refer to the Overview Map and Detail Map |

HYDROGEOLOGIC INFORMATION

Hydrogeologic information obtained by installation of wells on a specific site can often be an indicator of groundwater flow direction in the immediate area. Such hydrogeologic information can be used to assist the environmental professional in forming an opinion about the impact of nearby contaminated properties or, should contamination exist on the target property, what downgradient sites might be impacted.

AQUIFLOW®

Search Radius: 1.000 Mile.

EDR has developed the AQUIFLOW Information System to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted by environmental professionals to regulatory authorities at select sites and has extracted the date of the report, groundwater flow direction as determined hydrogeologically, and the depth to water table.

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

GROUNDWATER FLOW VELOCITY INFORMATION

Groundwater flow velocity information for a particular site is best determined by a qualified environmental professional using site specific geologic and soil strata data. If such data are not reasonably ascertainable, it may be necessary to rely on other sources of information, including geologic age identification, rock stratigraphic unit and soil characteristics data collected on nearby properties and regional soil information. In general, contaminant plumes move more quickly through sandy-gravelly types of soils than silty-clayey types of soils.

GEOLOGIC INFORMATION IN GENERAL AREA OF TARGET PROPERTY

Geologic information can be used by the environmental professional in forming an opinion about the relative speed at which contaminant migration may be occurring.

ROCK STRATIGRAPHIC UNIT

Era: Cenozoic
System: Tertiary
Series: Eocene
Code: Tec *(decoded above as Era, System & Series)*

GEOLOGIC AGE IDENTIFICATION

Category: Continental Deposits

Geologic Age and Rock Stratigraphic Unit Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - a digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

DOMINANT SOIL COMPOSITION IN GENERAL AREA OF TARGET PROPERTY

The U.S. Department of Agriculture's (USDA) Soil Conservation Service (SCS) leads the National Cooperative Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps. The following information is based on Soil Conservation Service STATSGO data.

Soil Component Name: KAYAK
Soil Surface Texture: loam
Hydrologic Group: Class B - Moderate infiltration rates. Deep and moderately deep, moderately well and well drained soils with moderately coarse textures.
Soil Drainage Class: Somewhat poorly. Soils commonly have a layer with low hydraulic conductivity, wet state high in profile, etc. Depth to water table is 1 to 3 feet.

Hydric Status: Soil does not meet the requirements for a hydric soil.

Corrosion Potential - Uncoated Steel: MODERATE

Depth to Bedrock Min: > 60 inches

Depth to Bedrock Max: > 60 inches

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

| Soil Layer Information | | | | | | | |
|------------------------|-----------|-----------|---------------------------|-----------------------------------------------------------------------------------------|-------------------------------------------------------------------------|---------------------------|------------------------|
| Layer | Boundary | | Soil Texture Class | Classification | | Permeability Rate (in/hr) | Soil Reaction (pH) |
| | Upper | Lower | | AASHTO Group | Unified Soil | | |
| 1 | 0 inches | 6 inches | loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt. | Max: 2.00 Min: 0.60 | Max: 7.80 Min: 6.60 |
| 2 | 6 inches | 17 inches | loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt. | Max: 2.00 Min: 0.60 | Max: 7.80 Min: 6.60 |
| 3 | 17 inches | 39 inches | fine sandy loam | Silt-Clay Materials (more than 35 pct. passing No. 200), Silty Soils. | FINE-GRAINED SOILS, Silts and Clays (liquid limit less than 50%), silt. | Max: 6.00 Min: 2.00 | Max: 7.80 Min: 6.60 |
| 4 | 39 inches | 60 inches | extremely gravelly - sand | Granular materials (35 pct. or less passing No. 200), Stone Fragments, Gravel and Sand. | COARSE-GRAINED SOILS, Gravels, Clean gravels, Poorly Graded Gravel. | Max: 20.00 Min: 6.00 | Max: 7.80 Min: 6.60 |

OTHER SOIL TYPES IN AREA

Based on Soil Conservation Service STATSGO data, the following additional subordinant soil types may appear within the general area of target property.

Soil Surface Textures: very gravelly - sandy loam
sandy loam
silt loam

Surficial Soil Types: very gravelly - sandy loam
sandy loam
silt loam

Shallow Soil Types: silty clay loam
sandy clay loam

Deeper Soil Types: very gravelly - loamy sand
loamy sand
extremely gravelly - sandy loam
extremely gravelly - loamy sand

GEOCHECK® - PHYSICAL SETTING SOURCE SUMMARY

LOCAL / REGIONAL WATER AGENCY RECORDS

EDR Local/Regional Water Agency records provide water well information to assist the environmental professional in assessing sources that may impact ground water flow direction, and in forming an opinion about the impact of contaminant migration on nearby drinking water wells.

PHYSICAL SETTING SOURCE RECORDS SEARCHED

TOPOGRAPHIC INFORMATION

USGS 7.5' Digital Elevation Model (DEM)

Source: United States Geologic Survey

EDR acquired the USGS 7.5' Digital Elevation Model in 2002 and updated it in 2006. The 7.5 minute DEM corresponds to the USGS 1:24,000- and 1:25,000-scale topographic quadrangle maps. The DEM provides elevation data with consistent elevation units and projection.

Current USGS 7.5 Minute Topographic Map

Source: U.S. Geological Survey

HYDROLOGIC INFORMATION

Flood Zone Data: This data was obtained from the Federal Emergency Management Agency (FEMA). It depicts 100-year and 500-year flood zones as defined by FEMA. It includes the National Flood Hazard Layer (NFHL) which incorporates Flood Insurance Rate Map (FIRM) data and Q3 data from FEMA in areas not covered by NFHL.

Source: FEMA

Telephone: 877-336-2627

Date of Government Version: 2003, 2015

NWI: National Wetlands Inventory. This data, available in select counties across the country, was obtained by EDR in 2002, 2005 and 2010 from the U.S. Fish and Wildlife Service.

State Wetlands Data: Wetland Inventory

Source: Department of Ecology

Telephone: 360-407-6121

HYDROGEOLOGIC INFORMATION

AQUIFLOW^R Information System

Source: EDR proprietary database of groundwater flow information

EDR has developed the AQUIFLOW Information System (AIS) to provide data on the general direction of groundwater flow at specific points. EDR has reviewed reports submitted to regulatory authorities at select sites and has extracted the date of the report, hydrogeologically determined groundwater flow direction and depth to water table information.

GEOLOGIC INFORMATION

Geologic Age and Rock Stratigraphic Unit

Source: P.G. Schruben, R.E. Arndt and W.J. Bawiec, Geology of the Conterminous U.S. at 1:2,500,000 Scale - A digital representation of the 1974 P.B. King and H.M. Beikman Map, USGS Digital Data Series DDS - 11 (1994).

STATSGO: State Soil Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

The U.S. Department of Agriculture's (USDA) Natural Resources Conservation Service (NRCS) leads the national Conservation Soil Survey (NCSS) and is responsible for collecting, storing, maintaining and distributing soil survey information for privately owned lands in the United States. A soil map in a soil survey is a representation of soil patterns in a landscape. Soil maps for STATSGO are compiled by generalizing more detailed (SSURGO) soil survey maps.

SSURGO: Soil Survey Geographic Database

Source: Department of Agriculture, Natural Resources Conservation Service (NRCS)

Telephone: 800-672-5559

SSURGO is the most detailed level of mapping done by the Natural Resources Conservation Service, mapping scales generally range from 1:12,000 to 1:63,360. Field mapping methods using national standards are used to construct the soil maps in the Soil Survey Geographic (SSURGO) database. SSURGO digitizing duplicates the original soil survey maps. This level of mapping is designed for use by landowners, townships and county natural resource planning and management.

LOCAL / REGIONAL WATER AGENCY RECORDS

FEDERAL WATER WELLS

PWS: Public Water Systems

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Public Water System data from the Federal Reporting Data System. A PWS is any water system which provides water to at least 25 people for at least 60 days annually. PWSs provide water from wells, rivers and other sources.

PWS ENF: Public Water Systems Violation and Enforcement Data

Source: EPA/Office of Drinking Water

Telephone: 202-564-3750

Violation and Enforcement data for Public Water Systems from the Safe Drinking Water Information System (SDWIS) after August 1995. Prior to August 1995, the data came from the Federal Reporting Data System (FRDS).

USGS Water Wells: USGS National Water Inventory System (NWIS)

This database contains descriptive information on sites where the USGS collects or has collected data on surface water and/or groundwater. The groundwater data includes information on wells, springs, and other sources of groundwater.

Environmental Data Resources, Inc. (EDR) Aerial Photo Decade Package is a screening tool designed to assist environmental professionals in evaluating potential liability on a target property resulting from past activities. EDR's professional researchers provide digitally reproduced historical aerial photographs, and when available, provide one photo per decade.

The Sanborn Library has been searched by EDR and maps covering the target property location as provided by The Lotis Engineering Group PC were identified for the years listed below. The Sanborn Library is the largest, most complete collection of fire insurance maps. The collection includes maps from Sanborn, Bromley, Perris & Browne, Hopkins, Barlow, and others. Only Environmental Data Resources Inc. (EDR) is authorized to grant rights for commercial reproduction of maps by the Sanborn Library LLC, the copyright holder for the collection. Results can be authenticated by visiting www.edrnet.com/sanborn.

The Sanborn Library is continually enhanced with newly identified map archives. This report accesses all maps in the collection as of the day this report was generated.

Key Qualifications

David Robinson founded The Lotis Group and has served as CEO since its inception in 2007. Mr. Robinson is a New York State Professional Engineer and an ASTM-defined Environmental Professional. Over his 20 year professional career, Mr. Robinson has performed over 18,000 Phase I Environmental Site Assessments in all 50 states and Canada. As CEO of Lotis, Mr. Robinson directs the strategic direction of the company and has grown Lotis into a leader in the environmental due diligence industry.

Telecommunications Experience

- Vertical Bridge Holdings, LLC, Nationwide, US (2014-ongoing): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies. David has been responsible for managing resources to complete these services onsite in all 50 states, the Caribbean and Canada.
- Blue Sky Towers, LLC, Nationwide, US (2014-ongoing): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies. David has been responsible for managing resources to complete these services onsite in the Northeast.
- InSite Towers, LLC, Nationwide, US (2014-ongoing): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies. David has been responsible for managing resources to complete these services onsite throughout the US and Caribbean.
- Mercury Towers, LLC, Nationwide, US (2014-2015): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies. David has been responsible for managing resources to complete these services onsite in the Northwest.
- IWG-TLA Telecom, LLC, Nationwide, US (2014-ongoing): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies. David has been responsible for managing resources to complete these services onsite throughout the US and Canada.
- Turris Sites, Canada (2014-ongoing): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout Canada. Services include Phase I Environmental Site Assessments. David has been responsible for managing resources to complete these services onsite throughout Canada.
- Phoenix Towers International, Nationwide, US (2014-ongoing): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies. David has been responsible for managing resources to complete these services onsite throughout the US and Caribbean.
- SBA, Inc. Acquisition Services, Nationwide, US (2001-2011): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include property surveys, 2C surveys, Phase I Environmental Site Assessments, NEPA compliance studies, zoning issues, and structural evaluation of existing towers. David has been responsible for managing resources to complete these services on over 7,000 sites in all 50 states, the Caribbean and Canada.
- Global Tower Partners, Inc., Nationwide, US (2004-2013): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include property surveys, 2C surveys, Phase I Environmental Site Assessments, NEPA compliance studies, zoning issues, and structural evaluation of existing towers. David has been responsible for managing resources to complete these services on over 5,000 sites in all 50 states and the Caribbean.

- Tower Ventures, LLC, Nationwide, US (2011-ongoing): Project Manager/Engineer for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments. David has been responsible for managing resources to complete these services telecommunication sites throughout the US.
- AT&T NexGen, Nationwide, US (2004): Project Engineer for this 16,000-mile long-haul fiber-optic confidential construction project throughout the United States. David was responsible for preparing tax recording documents needed to file taxes for AT&T's fiber build.
- Nassau County Police Department Land Mobile Radio System Modernization Project (2005-2007): Project Manager for engineering services relating to the upgrade of Nassau County's public safety communication system. Services include site design, construction drawing preparation, property surveys, 1A surveys, Phase I Environmental Site Assessments, NEPA compliance studies, zoning issues, and structural evaluation of existing towers. David has been responsible for managing resources to complete these services on 36 sites throughout the county.
- The City of New York Department of Information Technology and Telecommunications Channel 16 Project (2005-2007): Project Manager for engineering services relating to the design and construction of a conventional/trunked radio system for FDNY and other New York City agencies. Services include site design, construction drawing preparation, property surveys, 1A surveys, Phase I Environmental Site Assessments, NEPA compliance studies, zoning issues, and structural evaluation of existing towers. David has been responsible for managing resources to complete these services on 7 sites in New York City.
- NorthStar Communications, Inc., Florida (2003-2004): Project Manager for services relating to the development of telecommunications tower sites throughout Florida for Nextel. Services included construction drawings, property surveys, 2C surveys, zoning issues, and structural evaluation of existing towers. David was responsible for managing resources to complete these services on over 20 sites in the state of Florida.

Other Experience

- BNMC Utilities Relocation, Buffalo, New York (2002): Civil Engineer for the design of utility relocations at Roswell Park in Buffalo. David was responsible for developing construction documents and specifications, as well as providing consulting services throughout the design process. His duties also included preparation of construction cost estimates and submittal review.
- NFTA Metro Bus – Bus Fueling Station Systems Modifications for Dual Fuel, Buffalo, New York (2002): Civil Engineer for the design and preparation of design drawings, specifications and cost estimate for the replacement of an existing single fuel system to that of a dual fuel system.
- New Jersey DPMC Underground Storage Tank Program, New Jersey (1999-2001): Civil Engineer for the design of new aboveground and underground tank fueling systems (including fuel dispensers, leak detection systems, inventory control systems, and concrete tank slabs) for various State Departments in New Jersey. David was responsible for developing design drawings, construction documents and specifications, as well as providing consulting services throughout the construction process. His duties also included creating and maintaining resource-loaded project schedules for project using Primavera® project scheduling software.

- Former Hyatt Clark Industries, Inc. Site, New Jersey (1996-1998): Civil engineer for the preparation for the closure and remediation of the Former GM Industrial site and the construction of a 9-hole golf course recreational facility (including Driving Range, Putting Course, Clubhouse and Maintenance Facilities). David was responsible for the design of the golf course drainage system which included a 5-acre retention pond to be used for irrigation during periods of drought. His duties also included preparing cost estimates for the site closure and subsequent golf course construction, and the modeling and design of the facility entrance and parking.
- Wegmans Food Pharmacy, Buffalo, New York (1998): Civil engineer for the construction of a supermarket on a former industrial site. David was responsible for and the modeling and design of the facility entrance. His duties also included field sampling of excavated soil during construction.
- USACE-Buffalo District, Cuyahoga River Bulkheads Study, Ohio (1999): Civil Engineer for the USACE's bulkhead inspection program along nine miles of the Cuyahoga River in Cleveland, Ohio. David was responsible for preparing a structural assessment of bulkhead along the river by inspecting various conditions of the sheet pile (i.e., corrosion levels, settling). His duties also included preparing remediation recommendations and subsequent cost estimates for damaged bulkhead sections.
- USACE-Buffalo District, Advance Measures Program, New York (1999): Civil Engineer for the study of high Lake Erie levels on four residential areas. David was responsible for gathering residential home elevations and comparing them to historical rain and lake level data. Based on these comparisons and a detailed cost analysis, recommendations to alleviate local residential flooding, including the design of breakwaters and levees, were made.
- FEMA Public Assistance Program, Puerto Rico (1998-1999): Civil Engineer for the inspection of public facilities damaged by Hurricane Georges. David was responsible for gathering field data on hurricane damages, designing mitigation alternatives, and preparing detailed cost analyses of damages.
- NYCDDC Underground Storage Tank Program, New York (1999-2001): Civil Engineer for the design of groundwater/soil remediation systems for the cleanup of petroleum-contaminated groundwater and soils. Groundwater remediation systems typically consisted of the design and installation of pneumatic and electric dual pumping systems for the removal of free phase and dissolved phase contamination. Soil remediation systems incorporated the design and installation of soil vapor extraction systems and bioventing systems.
- Lipari Landfill, New Jersey (1996-1997): Civil Engineer for offsite remediation work at the Lipari Superfund site. David was responsible for modeling migration rates of contaminants from the Superfund site through surrounding soil strata.

KELLY R. REIDY-KACZMAREK

Environmental Scientist, The Lotis Engineering Group, P.C.
Environmental Scientist, Lotis Environmental, LLC

Professional Experience

The Lotis Engineering Group, P.C. – Environmental Scientist (April 2015 – Present)
Lotis Environmental, LLC – Environmental Scientist (June 2019 – Present)

6465 Transit Road - Suite 23
East Amherst, New York 14051

RJS Environmental – Environmental Specialist (March 2010 – April 2015)

4169 Allendale Parkway
Blasdell, New York 14219

STOHL Environmental – Project Manager (May 2009 – March 2010)

4169 Allendale Parkway
Blasdell, New York 14219

Education

B.A., Environmental Science and Biological Science, State College at Brockport, 2009

Certifications

ASTM Conference on Environmental Site Assessments for Property Transfer
New York State and EPA Certified Asbestos Air and Project Monitoring Technician
New York State Asbestos Inspector
OSHA 10-hour Construction Safety Training
Emergency Medical Responder

Key Qualifications

Since 2010, Kelly Reidy has been involved in various aspects of the environmental field with extensive experience in environmental due diligence. She has completed hundreds of environmental site assessments and reports, including Transaction Screens, Phase I assessments, and intrusive (Phase II) studies that range from farmland, to shopping plazas, to heavy industrial sites.

Commercial Lending Experience

- First Niagara Bank, Nationwide, US (2010-2015): Environmental Consultant for services relating to acquisitions and commercial lending of properties throughout the United States. Services include Transaction Screens, Desktop Reviews, Limited Database Reviews, Phase I Environmental Site Assessments and Phase II Intrusive studies.
- Lake Shore Savings Bank, Western New York, US (2012-2015): Environmental Consultant for services relating to acquisitions and commercial lending of properties throughout Western New York. Services include Transaction Screens, Desktop Reviews, Phase I Environmental Site Assessments and Phase II Intrusive studies.
- M&T Bank, New York State, US (2010-2015): Environmental Consultant for services relating to acquisitions and commercial lending of properties throughout New York State. Services include Transaction Screens, Phase I Environmental Site Assessments and Phase II Intrusive studies.

Lotis Environmental, LLC 6465 Transit Road,
Suite 23 East Amherst, NY 14051

- Bank of Akron, Western New York, US (2012-2015): Environmental Consultant for services relating to acquisitions and commercial lending of properties throughout Western New York. Services include Transaction Screens, Desktop Reviews, Phase I Environmental Site Assessments and Phase II Intrusive studies.

Telecommunications Experience

- Vertical Bridge Holdings, LLC, Nationwide, US (2015-ongoing): Environmental Consultant for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies.
- Blue Sky Towers, LLC, Nationwide, US (2015-ongoing): Environmental Consultant for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies.
- InSite Towers, LLC, Nationwide, US (2015-ongoing): Environmental Consultant for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies.
- IWG-TLA Telecom, LLC, Nationwide, US (2015-ongoing): Environmental Consultant for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies.
- Turris Sites, Canada (2015-ongoing): Environmental Consultant for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies.
- Phoenix Towers International, Nationwide, US (2015-ongoing): Environmental Consultant for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies.
- Tower Ventures, LLC, Nationwide, US (2015-ongoing): Environmental Consultant for services relating to the acquisition and development of telecommunications tower sites throughout the United States. Services include Phase I Environmental Site Assessments and NEPA compliance studies.
