Attach Service

- ✓ Smart Services
- ✓ Advanced Services

Attach Premium Service

- ✓ Nexus
- ✓ UCS
- ✓ Catalyst 6500/6800's
- ✓ ASA Firewalls

Attach Multi-Year Service

Goal of AAA Plan

Complete, integrated solutions drive better outcomes for your customers and richer constructs for you. A complete solution sale, one that includes Cisco Services, is nearly six times larger than ones that only include products. In addition, ***solution sales are 3x as profitable, and lead to a 33% higher retention rate.***

With this in mind, attaching services at the point of sale is a top priority for all of us. It is why we are launching the new AAA Attach program.

AAA Attach – Attach and Drive Premium Services

The Services team will work with you to drive services attach in Commercial—with a focus on premium services. AAA Attach focuses on three areas:

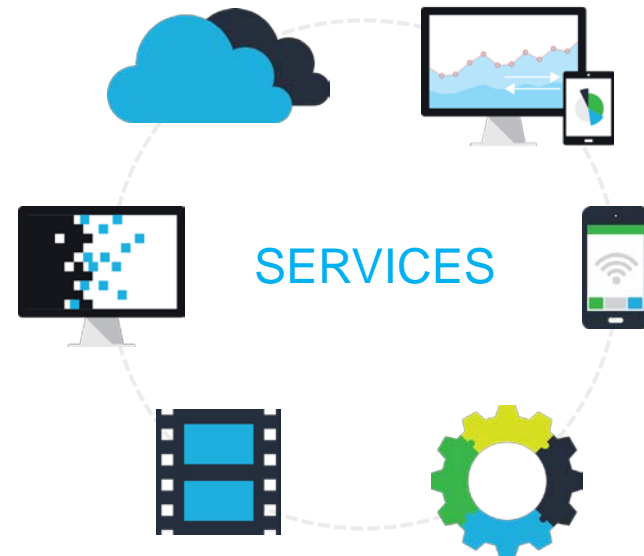

- **Attach Services**—Smart Services, and Advanced Services
- **Attach Premium Services** for Key Architectures—Nexus, UCS, Catalyst 4500/6500/6800s, and Security
- **Attach Multiyear Services**

Why Services?

Major market transitions such as mobility, collaboration, big data, video, virtualization, and cloud are creating significant services opportunities for you. This puts you in an excellent position to support customer business outcomes and help solve their challenges.

By taking a **services-lead approach**, your customer interactions extend beyond a simple product sales relationship by providing comprehensive, strategic and innovative solutions. This positions you to assume the role of trusted advisor contributing to your customers' success.

Why Services?

Services represent a significant growth opportunity.

\$40B+ services
market global
opportunity

Higher gross and
net margin dollars
(18-25% vs 1%)

Predictable
recurring revenue

Add more value to
your services
portfolio

Sell to both LOB
and IT

Why Services?

Services opportunity continued...

Better insight into
your customers'
networks

Enhance your
market
differentiation

Quickly deliver
comprehensive,
innovative bundled
solutions

Strengthen your
trusted business
advisor role

Improve customer
satisfaction and
loyalty

Partner Support Service

Implementation Services

Always Attach
Multi-Year Contracts

For *Every* Sales Opportunity

1

Talk to your customers EARLY about the value of Services for their business. It's the best time to overcome any objections.

2

Work with your customer to select the right level of service for the customer. This will make your sales conversations more consultative than transactional and enable you to sell complete solutions.

3

Quote the service on EVERY order. Leverage Cisco Capital to minimize your customers' initial cash outlay. Fixed monthly payments help customers budget appropriately and there are business tax advantages that may be in your customers' favor.

Why Your Customers Need Service

Cisco Services help customers keep their networks up-and-running, at full efficiency. Reducing the cost of downtime is a benefit that many customers will be especially receptive to, because the costs of downtime are so high and so widespread.

What goes up?

- Network availability
- Performance
- Users satisfaction
- Expert support

What goes down?

- Downtime
- Risk and uncertainty
- Support costs
- Wasted time & resources

Trigger Questions: Services

- How many devices do you have?
- How much time are you spending dealing with software release management?
- Have you been asked to support any new technologies?
- How do you know if the network is ready?
- How do you track network health today?
- Are you able to measure and track network improvements?
- Is your technical staff experienced and certified to support today's highly advanced technology?
- Do you have the tools in-house to evaluate system performance?
- How are you currently managing software updates?
- How much downtime are you currently experiencing?

Smart Net Total Care

Smart Net Total Care is a Cisco Service that helps your customers more efficiently manage their Cisco inventory and contracts, minimize network disruption and resolve network issues faster.

Smart Net Total Care can help customers address challenges around:

- Limited visibility into support coverage and contracts
- Spending too much time tracking alerts, contract renewals or network changes
- Tracking contract coverage for Cisco devices
- Expediting access to technical resources and Cisco TAC engineers
- Shifting from reactive to proactive network management

Smart Net Total Care (SNTC) - More Than Warranty

	Cisco TAC Support	Renewable	Expedited Hardware Replacement	Cisco OS Updates	Registered Access to Cisco.com	Smart Call Home Diagnostics and Alerts	Smart Entitled
Cisco SNTC Service							
Cisco Standard Warranty							

Trigger Questions: Smart Net Total Care

- How are you managing your network inventory and service contacts today? Is that a manual process?
- Are you frustrated with limited visibility into support coverage and contracts?
- Does your support team ever have issues getting the information they need to resolve network issues?
- How do you identify devices that need to be refreshed?
- How do you identify devices that have security alerts and/or notifications?
- Are you able to identify potential issues before they impact your business?
- Do you encounter situations where you have limited visibility as to whether critical Cisco products are covered by the right service contract?

Why Multi-year Contracts?

Smart Net Total Care

Smart Assist

Threat Awareness

Premium Services

Partner Support Service

Implementation Services

Smart Assist

Cisco Smart Assist Service (Smart Assist) is a new value added service offering for Cisco smart-entitled service offerings. Smart Assist is a remote consultative and support engagement for customers who have Cisco smart-entitled services.

- Value-added, subscription-based technical service for Cisco smart-entitled foundational services (e.g. Smart Net Total Care, Solution Support, etc.).
- Remote consultative and support engagement to assist customers in enabling and supporting smart capabilities (Cisco Common Services Platform Collector [CSPC] and Smart Net Total Care portal).

[Learn More](#)

Target Customer

Smart Assist is ideal for customers who use/want to use smart-entitled foundational services and have medium-to-large size Cisco product installed bases who want assistance to onboard, enable and support their use of the Cisco Collector (CSPC) and Smart Net Total Care portal.

Complementary Cross-Sell Services

Smart Assist complements other Cisco technical service offerings such as Asset Management and Cisco® Technical Services (TS) Advantage, enabling customers to get the most value out of their smart capabilities.

Threat Awareness Service

The Cisco Threat Awareness Service (CTAS) is an easy-to-use, portal-based threat intelligence service. It enhances threat visibility for Smart Net Total Care (SNTC) customers, by making broad, foundation based security information accessible 24 hours a day.

- Timely detection of malicious activities based on Cisco’s extensive network visibility and threat intelligence experience.
- Helps companies quickly identify compromised systems by flagging those networks and suspicious behavior.
- Helps IT and security teams recognize threats and delivers actionable intelligence.
- Continuous improvement of overall security posture through analysis of network traffic as seen from outside the network.

- Security (ASA's)
- High-End Switching (C4500 and up)

In the event of a hardware failure, the cost of downtime can be magnified exponentially if you do not have the replacement part(s) on hand.

Attach Smart Net Total Care Premium Services when your customers want:

Faster Time to Resolution: Cisco Smart Net Total Care offers premium service levels for rapid replacement of hardware, including 2-hour, 4-hour and next business day options.

Eliminate the Hassle and Expense of Sparring: With the right level of rapid hardware replacement, you can eliminate the budget and space required to maintain an inventory of replacement hardware and the hassle of delivering them to remote sites.

Augment Your IT Staff with Onsite Service Options: If you need help installing the replacement part, a certified field engineer will travel to your location to replace failed hardware under the optional onsite support.

Optimization Services

Optimization Services helps you work with your customers optimize your network and IT infrastructure, applications, and service management. They identify gaps, deliver recommendations, and provide expert support so you can:

- Improve the performance, availability, resiliency, and visibility of your customer’s network and IT services
- Prepare the network and IT infrastructure for change and more effectively manage change
- Increase customer’s self-sufficiency
- Reduce operating costs and improve return on technology investments
- Mitigate risks that can compromise the privacy and security of data

[Learn More](#)

Multi-year contracts benefit you and your customers.

As a business person you know that network coverage is critical to optimizing an investment. Customers will have the convenience and peace of mind in knowing their network will be continually covered and running. They can maximize their return on investment and manage total cost of ownership.

Selling Cisco services contributes to your business growth as well with incremental revenue and the establishment of a loyal customer.

Multi-year service agreements help customers:

- Avoid price increases by locking in today's price
- Ensure continuous service coverage to reduce risk
- Better manage operating expenses
- Reduce time spent renewing service contracts

Selling multi-year service agreements helps you:

- Expand your total revenue per customer
- Reduce the effort that goes into processing annual renewals
- Increase customer loyalty with a longer commitment

Multi-Year Financing

Top Benefits of Multi-Year Contracts

Stop Price Escalation Risk

- 7.5% per year price climb
- Avoidance is tangible savings

Immediate Savings

- 5% or more incremental discount
- Immediate & tangible savings

Excel Madness

- Renewal event is heavy exercise
- Impacts other important work

Risk

- Delay or skipping items is outage risk
- Murphy's Law-uncovered devices seem to fail

Checklist for Services

- Multi-Year quoted?
- Cisco cap deal?
- What is the \$ value of Services quoted?
- What Premium Services levels are quoted?
- Are you placing the order at time of sale?

How to Answer Customer Objections

More Objection Handling Strategies

“We can’t afford to purchase services.”

If you want to keep costs down, then you’ll want to consider the financial impact of minimizing downtime. The cost of a single service call can be as expensive as the contract itself. Additionally, some customers might want to take advantage of the low monthly payments offered through Cisco Capital.

“We want to wait to order services until the warranty expires.”

That’s a common request. Cisco has a solution called Flexible Service Start Delay (FSSD) which allows us to delaying service start by up to 60 days after shipment.

“We already have a warranty in place. Isn’t that enough?”

The warranty only protects you if there’s a product defect. In fact, 95% of TAC service requests have nothing to do with equipment failures covered by the warranty. With a service contract you get expert support from Cisco TAC engineers, replacement parts in as little as 2 hours, OS updates and upgrades, proactive diagnostic, and access to Cisco.com’s knowledgebase. In the event of an incident or network downtime, all of these can help you get the issue resolved as fast as possible.

How to Answer Customer Objections

More Objection Handling Strategies

“I have in-house technicians who can handle all of my network issues.”

If your in-house experts require support without a service agreement, they may experience delays and costly time and materials charges. With Cisco Services, IT will have the support and knowledge of Cisco experts to help identify and resolve problems quickly. This makes all the difference when dealing with issues that might be outside the scope of their experience.

“I don’t think updating or upgrading operating system software is necessary.”

Keeping OS software up to date adds functionality and enhances performance—in many cases, without the need to purchase or add new hardware. Cisco provides continuous improvements to OS software—including bug fixes and maintenance, and minor and major releases. There is no additional charge for updates as long as the product remains under the Cisco Services agreement.

“I don’t see the need for a hardware replacement option.”

Advance hardware replacement provides the fastest delivery option and is designed to support your network availability requirements. Even under warranty, it could take as long as 10 days for a spare part to be delivered. Smart Net Total Care gets you the parts you need, when you need them. Choose from a variety of hardware replacement options, including premium options such as two-hour replacement and onsite parts replacement and installation.
