## DACAME

DACAME is a company specialized in the design and manufacturing of scaffolding, safety and construction equipment systems. The company's headquarters are based in Tarragona and cover an area of 70,000m<sup>2</sup>. Our Business System is developed to provide you with an integral solution for your projects, offering the best product and service. This is why if you work with us, you will receive:

- Design and manufacturing adapted to your needs.
- Delivery wherever and whenever you want.
- 5 scaffolding models and compatibility between our certified Modular and Frame Scaffolding Systems\*.
- Excellent price-quality ratio.
- Customized training.

*\* Consult the Technical Department before adapting the two certified Scaffolding Systems.*

## THE COMPANY

DACAME is dedicated to the design, manufacture and marketing of scaffolding, safety and construction equipment systems.

DACAME was born in early 90s as a family company and operated in the local and national market. The company was formed of a young and dynamic team who enjoyed their work and had a perfect knowledge of the product and a great future vision (both in the national and international markets) who established our Corporate Culture.

Nowadays our headquarters covers an area of more than 70,000m<sup>2</sup>, where the various factory departments are situated: the central offices, the technical departments and the manufacturing and logistics areas. Our location between the international ports of Barcelona and Valencia, and the fact that we have our own truck fleet, means excellent logistic optimization and efficiency, enabling us to offer a door-to-door service to all our clients, both European and international.

**SERVICE: as the basis of our Culture.**

Our Corporate Culture is based on constant investment in Research and Development, Manufacturing, and, ultimately, on all the Organizational Areas. It is also based on the continuous training of our team, who work constantly to offer you the best business plan that will provide you with integral solutions for all your projects.

Nowadays we work with over 50 countries, and our philosophy is based on offering the best solutions wherever and whenever you need them. An efficient and flexible structure allows us to adapt to all projects.

In addition, we have a big fleet truck, and can therefore offer a door-to-door service to our clients all over Europe.

For transcontinental services, our location between the international ports of Barcelona and Valencia means excellent logistic optimization and efficiency.

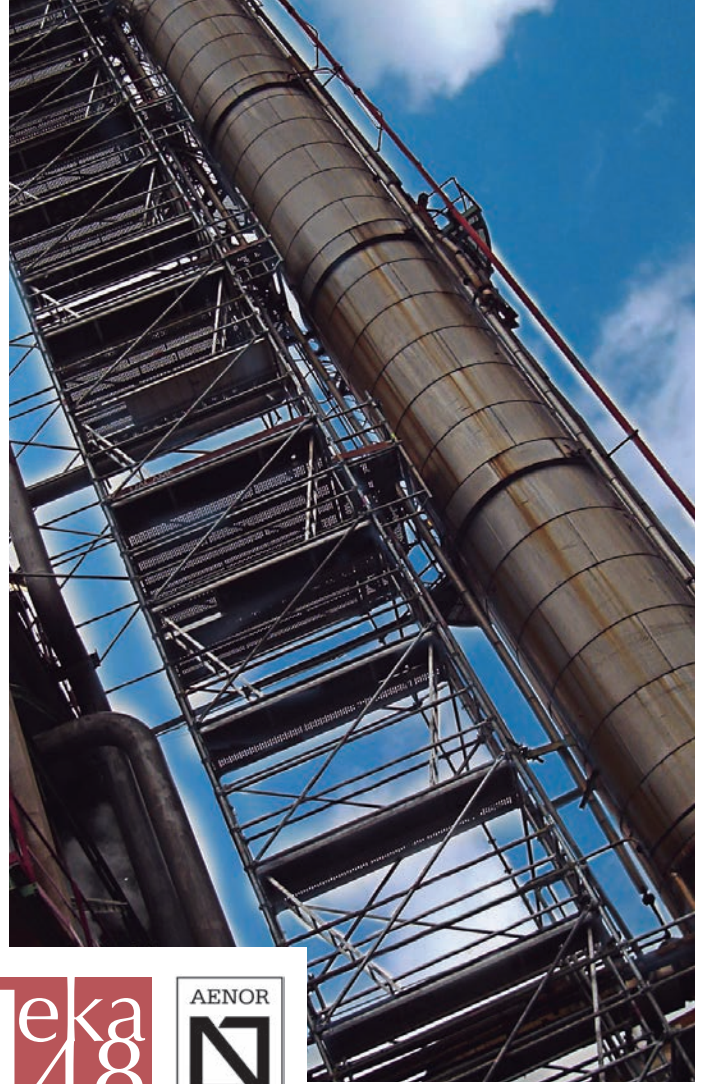

**QUALITY: as the basis of our Products.**

DACAME is synonymous with quality and safety, which means constant investment in Research and Development to ensure that all our products are manufactured according to European Standards and are adapted to new market demands.

In order to adapt to the market's demands, our R&D department invests in new products and offers you a very competitive service. Our quality system is based on the control and exhaustive analysis of all our manufacturing processes. In 2004, we received the Quality Certificate ISO-9001-00, followed by AENOR N certifications for our Modular MEKA 48 and DINO 48 European Frame Scaffolding, our Façade Scaffolding DUO 45 and our Temporary Edge Protection System B35. Following the same Quality Policy, our range of Construction Equipment is guaranteed for CE Marking (where applicable).

*All our certified products are regularly verified by their respective inspection bodies, in accordance with current regulations.*

## PRODUCT CHARACTERISTICS

### SHORING TOWER D-SYSTEM

- Designed and manufactured in compliance with standards EN 12812 and EN 12813.
- Dimensions in plant 1.5 m (length) x 1.3m (width).
- Load capacity per foot: 3000 kg (contact our Technical Department for other capacities).
- Settings at different heights.
- Can be lifting using a crane.
- Easy and safe assembly.
