IN REPLY REFER TO

The Honorable J. James Exon  
Governor of Nebraska  
State Capitol Building  
Lincoln, Nebraska 68509

Dear Governor Exon:

I have the honor to transmit to you herewith the Forty-First Biennial Report of the Department of Water Resources. The report contains a summary of the work of the department for the two-year period ending September 30, 1976. It also contains a detailed list of the water appropriations from natural streams as well as other statistical information.

In preparing this report an entirely new procedure was used in assembling the bulk of its contents. The roster of water appropriations is a computer listing retrieved from the Nebraska Natural Resources Data Bank. Utilization of that listing made possible a considerable savings in time, effort and expense in preparation of the report. The Nebraska Natural Resources Commission and particularly Messrs. Schakat and Atkins, former Data Bank employees, are hereby acknowledged for their considerable efforts in assembly, storage and retrieval of this data.

Respectfully submitted,

*M E Ball*  
Director of Water Resources

## FOREWARD

This Biennial Report is prepared in accordance with the provisions of Section 46-214, Reissue Revised Statutes, Nebraska, 1943. It is intended as a full report of the work of the Department of Water Resources with respect to water rights, water administration, and districts of various kinds over which the Department has jurisdiction.

The Report does not contain discharge records of streams nor the records of canal or pump diversions. Such records are published in the annual reports of the U.S. Geological Survey and in the Department's Biennial Hydrographic Reports. The activities of the Power Review Board are published annually following the end of each fiscal year.

## WATER SUPPLY

The runoff from the North Platte drainage was significantly less than during the 1973-1974 biennium. Runoff from the watershed upstream of Pathfinder Reservoir during 1975 was 1,285,900 acre-feet or 118% of normal. The 1976 runoff above Pathfinder totalled 1,030,000 acre-feet or 90% of normal. All upper Platte storage ownerships were filled during June of both years. Water surplus to ownership in the amount of 50,000 acre-feet was released to the river in 1975. During 1976 some 64,000 acre-feet of water surplus to ownership was released to the river.

The flow of the South Platte River into Nebraska during 1975 was 255,400 acre-feet and 168,120 acre-feet in 1976 representing 65% and 43% respectively. Annual anticipated flow is 390,120 acre-feet. That deficiency created a serious shortage for Nebraskans relying on this source for irrigation.

The relatively meager water supply in the Niobrara River basin again created problems for water users. The 1975 flow above Box Butte Reservoir was 17,760 acre-feet. Supplies during 1976 amounted to 16,050 acre-feet. The average annual supply is 20,270 acre-feet.

The total carryover storage at the end of the reporting period in the five federal reservoirs within the Republican River Basin was at the lowest point since the early 1950's. Harlan County, Swanson and Harry Strunk Reservoirs were at their lowest levels since initial filling.

Despite the existence of drought conditions, water supplies within the Loup River Basin were sufficient to meet most needs during the biennium.

Drought conditions in the remainder of the state caused rather severe problems for individuals not having access to storage water.

## WATER RIGHTS ADMINISTRATION

Throughout much of the State the water supply available for appropriation was considerably below normal during the irrigation seasons of the reporting period. In both 1975 and 1976 shortages forced the Department to deny water to junior appropriators during the irrigation season.

The following are summaries of regulation in 1975 and 1976 as reported by the Department's Division Engineers.

Platte River Basin

Appropriators upstream and junior to December 28, 1894, were closed to natural flow on July 30, 1975. On August 2nd, further closures were made for the benefit of appropriators having priority to September 22, 1894. Those additional closures were rescinded on August 5. On August 6, additional appropriators senior to September 7, 1926, were allowed to resume diversion of natural flow. All appropriators were allowed to divert natural flow from August 9 to August 13, when those junior to January 23, 1895, were again closed. All appropriators were opened to natural flow for the remainder of the year beginning on August 27.

During the summer of 1976, appropriators upstream and junior to January 23, 1895, were closed on July 10. Further closures were required on July 18 to meet the needs of appropriators having priority of September 22, 1894, or earlier. Additional closings were made on July 19 for the benefit of appropriators senior to February 12, 1894. On July 25, appropriators upstream and junior to July 26, 1894, were opened to natural flow, and on July 31, additional irrigators were opened upstream and senior to September 15, 1894. Three days later, appropriators upstream and junior to December 28, 1894, were again closed. All appropriators were open from August 10 to August 23. On August 24, appropriators upstream and junior to January 23, 1895, were closed to natural flow. They were reopened on September 3 for the remainder of the reporting period.

Regulation and enforcement activity in the Oak Creek watershed was quite brief during 1975. Appropriators upstream and junior to February 4, 1965, were closed for three days in August of that year. Appropriators upstream and junior to November 1, 1971, were closed to direct flow diversion the entire 1976 irrigation season.

Appropriators in the Pumpkinseed Creek Basin upstream and junior to October 6, 1890 (Court House Rock Canal) were closed from July 15, 1975, to September 5, 1975, and from July 15, 1976, to September 18, 1976.

During 1976 direct flow appropriators upstream and junior to May 12, 1934, were closed within the Rock Creek Basin. On nearby Stevens Creek direct flow appropriators were closed for the benefit of downstream users senior to July 22, 1963.

Canals diverting from Blue Creek were regulated intermittently during both years for the benefit of senior appropriators.

Periodic regulation was also required on Lodgepole Creek and Buffalo Creek in response to complaints pertaining to senior permits, industrial pumping and stockwater.

### Loup River Basin

Drought conditions prevailed within the basin during both years of the biennium. Although significantly depleted, water stored in reservoirs was generally adequate to serve the needs of appropriators. Increased pumping from the Loup River and its tributaries in 1976 was an all-time high of 25,000 acre-feet.

### Niobrara River Basin

Appropriators upstream and junior to the Mirage Flats Canal were closed from July 15, 1975, to September 5, 1975, and from July 15, 1976, to September 18, 1976.

Ten appropriators from the Keya Paha River were closed to direct flow diversion from mid-July, 1976, through the end of the irrigation season.

### White River and Hat Creek Basins

Regulation of water use was limited to the Hat Creek Basin during the reporting period. Direct flow and storage appropriators were closed on demand of downstream riparian water users from September 12, 1975, to November 7, 1975, and from November 21, 1975, to December 13, 1975. The same appropriators were again closed from September 20, 1976, into the next biennium.

### Republican River Basin

Closing orders were issued to irrigators on Frenchman River and Stinking Water Creek upstream and junior to May 16, 1890, during each year of the biennium. Those closing orders remained in force (except for two brief periods) until the end of August when the storage supply in Enders Reservoir was essentially exhausted. Closing orders were also in effect during much of July and August 1975 and 1976 for irrigators upstream and junior to April 3, 1946, on Red Willow and Medicine Creeks.

### Blue River Basin

For the reporting period regulation and enforcement was limited to the summer of 1976 within the basin. During the period from June 16 to September 13, appropriators upstream and junior to April 28, 1950, were periodically closed. Upstream from its confluence with Lincoln Creek, additional direct flow appropriators were closed during several weeks in July for the benefit of senior, downstream appropriators having priorities earlier than July 24, 1934.

Appropriators from Turkey Creek were closed during August, 1976, for the benefit of downstream permits senior to April 14, 1953.

### Elkhorn River Basin

Regulation within the Elkhorn River Basin was limited to 1976 for the biennium. Although numerous press accounts describing water shortage difficulties were noted, the Department received but five requests for regulation and enforcement. Closing orders were issued to several unpermitted irrigators on Maple Creek during July. Closing orders were also issued during July to irrigators upstream and senior to March 31, 1964, on Bell Creek. On Logan Creek regulation of irrigators in accordance with their permitted diversion rates was required during one week in July.

## HYDROGRAPHY

During the biennium, water quality field measurements were taken on a regular schedule at 96 stations in Nebraska and eastern Wyoming. The measurements included air and water temperature, specific conductance, pH, dissolved oxygen, turbidity, fecal and fecal streptococci. Numerous filtered and unfiltered samples were collected for laboratory analysis. Results of the water quality data collections are published by the U.S. Geological Survey as Water Resources Data for Nebraska.

## LEGISLATION

Both the first and second sessions of the Eighty-fourth Legislature passed several bills pertaining to the duties and responsibilities of the Director and the Department. LB 108 and LB 795 greatly expanded duties of the Department in controlling and regulating construction activities within floodprone areas across the State. The Department is presently responsible for accepting and reviewing permit applications prior to issuing or denying permits for construction within flood plains. A third bill, LB 577, The Nebraska Ground Water Management Act, authorizes broad powers to both the Director and each of the 24 Natural Resources Districts for the development and comprehensive management of ground water resources.

## NEW DEVELOPMENTS

Irrigation from groundwater sources continued to expand with 10,065 wells registered during the biennium. This compares with 4,462 wells registered during the previous two-year reporting period. The increase is attributed to a combination of several factors - dry weather conditions, favorable commodity prices during the early portion of the biennium and enactment of the Nebraska Ground Water Management Act.

During the biennium the Department received one request for a hearing to consider testimony for creation of a ground water control area. The request was made by the North Platte Natural Resources District. The area under consideration is known locally as Horseshoe Bend and lies in northeast Banner County, southeast Scotts Bluff County and west-central Morrill County.

Pursuant to passage of LB 108 and LB 795, the Department issued 232 permits for construction in flood plains. Projects under permit range from bridges and culverts to housing subdivisions and stream channel revetment. During the reporting period 23 complaints were investigated and two lawsuits filed in response to apparent violations. Six county maps for limiting State jurisdiction were prepared for review by individual county boards.

## WATER RIGHTS HEARINGS

Hearings were held during the biennium for the purpose of cancelling water rights for reasons of non-use. The Department held 22 hearings for appropriations on Dog Creek and Bow Creek in northeastern Nebraska. Water rights hearings were also held for 44 appropriations from the Big Nemaha River.

DIVISION OF STATISTICS

MAP  
OF  
**NEBRASKA**  
SHOWING  
WATER DIVISIONS

## WATER DIVISIONS

The State of Nebraska is hereby divided in two water divisions, denominated Water Division No. 1 and Water Division No. 2, respectively. Reissue Revised Statutes, 1943, 46-215.

## WATER DIVISION NO. 1: BOUNDARIES

Water Division No. 1 shall consist of all the lands of the state drained by the Platte Rivers and their tributaries lying west of the mouth of the Loup River; and also all other lands lying south of the Platte and South Platte Rivers that may be watered from other superficial or subterranean streams not tributary to the Platte River. Reissue Revised Statutes, 1943, 46-216.

## WATER DIVISION NO. 2: BOUNDARIES

Water Division No. 2 shall consist of all lands that may be watered from the Loup, White, Niobrara and Elkhorn Rivers and their tributaries, and other lands of the state not included in any other water division. Reissue Revised Statutes, 1943, 46-217.

## DISTRIBUTION

For convenience in the administration of the water laws and the distribution of water, these divisions have been subdivided into twelve water divisions, denominated 1-A, 1-B, 1-C, 1-D, 1-E, 1-F, 2-A, 2-B, 2-C, 2-D, 2-E and 2-F, as shown on the opposite page.

## CLAIMS AND APPLICATIONS

The following tables give a complete list of all claims and applications of record in the Department of Water Resources which have not been cancelled. This list also includes pending applications which have not yet been approved.

The claims and applications have been arranged in each water division by streams in alphabetical order, and the appropriations on each stream are arranged in order of priority.

Appropriations having docket numbers refer to claims covering rights which were acquired under the law prior to April 4, 1895, and those having application numbers were filed to appropriate water under the law of 1895.

Following these tables is a list of water appropriations which have been cancelled in full or in part, or have been dismissed, during the past two years.

Definitions of the abbreviations and texts of the footnotes which appear in these tables may be found on page 302.
