

Crypto Drive 197 - Premium AES 256-bit Security

INTRODUCTION

USB Flash Drive security can be a big headache for IT departments. The Integral Crypto Drive FIPS 197 provides a highly secure and simple to use solution.

FIPS 197 certification provides the military level of security demanded by many government departments and corporations.

Users of Integral Crypto Drives include; police forces, local and national governments, education departments and global corporations.

FEATURES

- **Military level security with AES 256-bit hardware encryption** - More secure than a software-only solution.
- **FIPS 197 Approved** - Certificate No. 1137
- **Multi-lingual interface** – in 24 languages and a simple user interface for “out of the box” use*
- **PC and Mac compatible**

SECURITY FEATURES

- **Mandatory encryption of all files (100% privacy)** - All data stored on the drive is secure. Unprotected files cannot be saved to the Crypto Drive.
- **Secure Entry** - Data cannot be accessed without the correct high strength alphanumeric 8-16 character password. A password hint option is available. The password hint cannot match the password.
- **High Strength Password Enforcement** - Setting of a high strength password is mandatory.
- **Brute-Force Password Attack Protection** - Data is automatically erased after 6 failed access attempts. The data

and encryption key are securely destroyed and the Crypto Drive is reset.

- **Zero Footprint** - No software installation required. All password and encryption functions are securely executed on the drive.
- **Auto-lock** - Drive will automatically encrypt all data and lock when removed from a PC or when the screen saver or “computer lock” function is activated on the host PC.
- **Password Entry Count** - The Crypto Drive records the failed entry count. e.g. if the Crypto is removed after 2 failed attempts and reinserted, the drive will resume with the 3rd attempt.
- **Personal ID Function** – As an option, contact details can be added to the Crypto that can be viewed without compromising encrypted data.
- **Rugged triple-layer waterproof design** - Protects the Crypto Drive against knocks, drops, break-in and submerging in water. The electronics are sealed in epoxy resin and then shielded by a steel inner case. The rubberised silicone outer casing provides a final layer of protection.
- **Endpoint security software compatible** – The Integral Crypto operates comfortably with endpoint security solutions by using the embedded unique ID.
- **Embedded Unique ID (optional)** – During production a personalised tag (e.g. “ACME APPROVED USB”) can be embedded into the Crypto that can be viewed on a PC. The tag gives endpoint software a convenient way to identify Integral Crypto as the “official” company drive, whilst denying access to other unauthorised USB drives that do not carry the unique ID tag.

- **Etched unique ID (optional)** – During production a unique code upto 8 digits can be etched onto the USB connector as an addition to the unique number. This can be used as the embedded unique ID.
- **Easy To Use** –
 - Plug and Play device, allowing ‘drag and drop’ of files into secure area
 - Does not require any software or drivers to be installed
 - Works on Mac OSX, Windows XP, Vista, 7 and 8 without administrator privileges
 - User manual stored on drive
- **Warranty** – 2 Years

Extended Spec

- **Shock resistance** - 1000G (maximum)
- **Altitude** - 80,000 feet (relative to sea level)
- **Vibration** - 15G peak to peak max
- **Operating temperature** - 0° to 70°
- **Humidity** - 20% to 90%
- **System Requirements** - Windows XP, Vista, 7, 8 and Mac OS X
- ***24 languages supported by the software GUI** -
 - Bulgarian
 - Chinese
 - Croatian
 - Czech
 - Dutch
 - English
 - Estonian
 - Finnish
 - French
 - German
 - Greek
 - Hebrew
 - Italian
 - Japanese
 - Latvian
 - Lithuania
 - Norwegian
 - Polish
 - Portuguese
 - Romanian
 - Russian
 - Spanish
 - Swedish
 - Turkish

Triple Layer Protection
