OmniView Dual-Port PS/2 KVM Cable, 1.8m

The OmniView Dual-Port PS/2 KVM Cable provides you with the proper connection between your PS/2 computer and your Quad-Bus KVM Switch, up to 1.8m (6 feet) apart.

Belkin OmniView ENTERPRISE Series Dual-Port PS/2 KVM Cables provide maximum connectivity between your PS/2 servers and OmniView ENTERPRISE Series KVM Switches. Our coaxial video cabling preserves video strength and clarity at higher resolutions, and the dual-port design delivers built-in cable management for your convenience.

Available in 1.8m, 3m, 4.5m and 7.6m lengths, this Dual-Port PS/2 Cable works with OmniView ENTERPRISE Series KVM Switches.

Benefits

- Available lengths of 1.8m, 3m, 4.5m and 7.6m
- PC99 color-coded connectors for easy port identification and installation
- Double-shielded (braid-and-foil) construction
- Aluminum undermold shield for EMI/RFI reduction
- Comes with a Belkin Lifetime Warranty
- Reduces electromagnetic and radio frequency interference (EMI/RFI)
- Protects against damage to conductors
- Features exclusive, 360-degree turning radius for flexibility even under extreme conditions
- Adds durable strength with Tactilite™ molded-strain relief construction
- Preserves signal integrity at higher resolutions with coaxial VGA cabling

Part Number
F1D9400-06
