### LIVESTOCK MARKET NEWS STATISTICS and RELATED DATA

1950

U.S. DEPARTMENT OF AGRICULTURE  
Production and Marketing Administration

Statistical Bulletin No. 104

November 1951

## INTRODUCTION

This edition of Livestock Market News Statistics and Related Data, representing the eighteenth of a series of statistical handbooks pertaining to the livestock, meat, and wool industries, has been compiled by the Livestock Branch of the Production and Marketing Administration, United States Department of Agriculture, for the use of producers, distributors, and others who are interested in statistics relating to these industries.

Most of the statistics included herein have been collected by field offices of the Market News Division, Livestock Branch, in connection with its market reporting activities. The estimates of numbers of livestock on farms, cattle and lambs on feed, calves, lambs and pigs produced, prices received by farmers, and income data, originated in the Bureau of Agricultural Economics. Data showing the number of animals slaughtered and meats processed under Federal inspection are from the records of the Bureau of Animal Industry. Foreign trade, and basic income data are from the official records of the Department of Commerce; retail meat prices for the United States are from the official publications of the Bureau of Labor Statistics; and market-price data on livestock for years prior to 1918 were obtained from the Statistical Yearbook of the Chicago Daily Drovers Journal.

Data for earlier years have been dropped from many of the historical tables in order to improve readability. The statistics in this edition include the 1950 calendar year. Current data on many of the series included are carried in the weekly Market News, a mimeographed publication of the Livestock Branch.

<sup>1/</sup> These two series of animal units on farms replace those heretofore compiled and published by the Bureau of Agricultural Economics. The previous series were based on the numbers of livestock and chickens on farms January 1, and did not include the many hogs and poultry fed during the year which are not on hand on January 1. The new series are intended to include all livestock fed during a year rather than only those on hand January 1. Another difference is that the new series are based on computations for each State separately. The units for each State are computed by multiplying the number of livestock in the State by a constant factor of feed consumption for that State for each kind and class of stock. The factors vary as between States in accordance with differences in feeding practices commonly used. The feeding year commencing October 1, is the year to which the animal units relate. The "average" milk cow in the United States is used as the base determinant of 1 unit for both grain consuming and roughage consuming livestock. The factors used for grain consuming livestock represent the per-head consumption of grain and byproducts feeds by each class and kind of livestock in relation to that consumed by the average milk cow. Similarly the factors used for roughage consuming livestock represent the per-head consumption of total hay, silage, pasture and other roughage by each kind and class compared with that of the average milk cow.

<sup>1/</sup> Estimates include only cattle being fattened for market as a more or less distinct agricultural enterprise, and excludes small operations incidental to dairy and general farming. Cattle thus fed are presumed to produce carcasses that will grade Commercial or better.

In addition there have been a number of cattle finished on distillery slop, mostly in Kentucky, and on byproduct feeds in other States not shown, as well as large numbers being winter-fed in West Virginia, Virginia, Kentucky and some other States, to be marketed as grass fat in late summer.

<sup>1/</sup> Data in this report are obtained from offices of State veterinarians. Under "Shipments from Public Stockyards" are included stockers and feeders which were bought at stockyards markets. Under "Direct Shipments" are included stockers and feeders coming from other States from points other than public stockyards. Some of these animals are inspected at public stockyards while stopping for feed, water, and rest en route.

<sup>1/</sup> Data prior to 1915 may be found in earlier editions of this publication.  
<sup>2/</sup> Prior to 1922, quotations are from the Chicago Drovers Journal Yearbook. Subsequent figures are the weighted average price of all grades of beef steers sold out of first hands at Chicago, as reported by the Production and Marketing Administration.  
<sup>3/</sup> Prior to 1919, quotations are for native calves, from the Chicago Drovers Journal Yearbook. Subsequent figures are the average of the mean of daily quotations on lightweight calves, Medium-Choice grades, January 1919 to June 1925; vealers, Medium-Choice, July 1925 to June 1927; and vealers, Good and Choice, July 1927-December 1950. Effective March 10, 1951, the grade designation for this series became Choice and Prime.

1/ The grade designations used above became effective December 30, 1950. Grades previously used in this publication compare with these grades as follows: Choice and Prime were combined as Prime, Good was changed to Choice, Medium was divided into Good and Commercial, and Common was changed to Utility.  
 2/ Data prior to 1943 may be found in earlier editions of this publication.  
 3/ These summaries developed from data collected on marketings of fed cattle through funds provided under the Research and Marketing Act of 1946.

<sup>1/</sup> The grade designations used above became effective December 30, 1950. Grades previously used in this publication compare with these grades as follows: Choice and Prime were combined as Prime, Good was changed to Choice, Medium was divided into Good and Commercial, and Common was changed to Utility.  
<sup>2/</sup> Data prior to 1943 may be found in earlier editions of this publication.  
<sup>3/</sup> These summaries developed from data collected on marketings of fed cattle through funds provided under the Research and Marketing Act of 1946.

1/ Data for years prior to 1930 may be found in earlier editions of this publication.  
 2/ These series were computed by reducing to a 1910-14 base the Bureau of Labor Statistics' series, 1926-100. The list of farm products includes more than 60 items. The list of all commodities included 784 items from 1930-37 and over 800 items from 1938 to the present time.

1/ Consumption of different types of meat converted to a retail weight and multiplied by retail price of each type to obtain retail value.

2/ Computed from income data of the U. S. Dept. of Commerce, 1929-50. Estimates for 1913-28 by Bureau of Agricultural Economics.

3/ Relationships in war years were greatly affected by price control and other circumstances. Data were included in order to provide a continuous series.

1/ Hair of angora goat, alpaca, and other like animals included in exports for years 1920-50. 2/ General imports less re-exports, 1920-33, inclusive. 3/ Computed from wool consumption reports of the Bureau of the Census. 4/ For the years 1930-35 the item "not finer than 40's" has been deducted from carpet wool totals reported by the Department of Commerce and added to apparel wool, thus making entire series comparable. 5/ Revised. 6/ Excludes 222,222,000 pounds in 1942; 275,476,000 pounds in 1943; 2,726,000 pounds in 1944; 5,373,000 pounds in 1945; and 15,000 pounds in 1946, imported free of duty as an act of international courtesy. Wool so imported consisted almost entirely of wool stored in this country for the British Government. This wool was not available to United States mills. 7/ Not available.

Data for years prior to 1920 may be found in earlier editions of this publication.

1/ Based on shorn wool purchases of 288.6 million pounds, grease basis, or 122.4 million pounds, clean content, from April 1946 through February 1947, and pulled wool purchases of 39.6 million pounds, clean basis, from April 1946 through March 1947. These sales to Commodity Credit Corporation represent approximately the annual production of shorn and pulled wools at that time.
