

Supplement for 1961 to

Statistics On

Cotton

and

Related Data

Supplement to

Statistical Bulletin No. 99

October 1961

UNITED STATES DEPARTMENT OF AGRICULTURE
Economic Research Service
Washington, D.C.

EXPLANATION

The tables that follow make up the 1961 annual supplement to Statistics on Cotton and Related Data, 1920 to 1956, United States Department of Agriculture, Statistical Bulletin No. 99, which was revised in February 1957. The supplement was prepared by Mildred V. Jones, under the supervision of Frank Lowenstein.

Tables are numbered as in Statistical Bulletin No. 99. The footnote numbers refer to numbers in the original tables. New footnotes were given numbers which follow the last number in the original table.

When available, revised data were included for earlier years. Tables 23, 81, 82, 83, 85, 86, 87, 128, 129, 145, 149, and 150 were complete as published in February 1957. Data for tables 69 and 80 since 1954 are not available.

Table 12A replaces table 12 because of the addition of data on manmade waste. Table 12 is complete as published in the supplement for 1960.

The series on monthly mill margins is expanded to include 20 constructions of gray goods and cotton prices for four growths. Table 32A contains the new series.

The Crop Reporting Board no longer reports acreage in cultivation on July 1 for cotton. It now reports planted acreage. Tables 35A to 51A give the data for planted acreage and replace tables 31 to 51 which contain data on acreage in cultivation on July 1 through 1957.

CCC no longer sells cotton for export only; all sales are now made for unrestricted use. A payment-in-kind is made on all cotton exported from the U. S. Data on U. S. prices in table 192B reflect the spot market prices adjusted for the payment-in-kind rate and for net weight. These prices are called "spot export prices."

Starting with the 1958-59 marketing year the grade into which the cotton crop is classed for quality purposes includes split grades, such as "Middling plus." Table 97A shows the split grade categories starting with the 1958 crop.

The data on the seasonal adjustment of the average daily rate of mill consumption of cotton in the United States, table 102, are revised; the revised data are shown in table 102A in the supplement.

Starting with the 1956 crop year, the basic quality for pricing purposes in the designated spot markets was changed to Middling 1 inch. The data in tables 152A and 153A reflect differentials from the new base quality and replaces tables 152 and 153 in Statistical Bulletin No. 99.

Table 155A replaces table 155 for 1959. Table 155A reflects purchases and loans under price support programs in 1959. A purchase program was not operated by CCC for price support purposes in prior seasons.

Table 156A replaces table 156 because of a revision in the industrial production index to include utilities.

Table 192A in the supplement reflects CCC average sales prices for export at average location for the 1956-57 and 1957-58 seasons. These prices replace the average spot market prices for United States cotton which were applicable for the preceding seasons and shown in table 192.

Table 205A replaces table 205. Loan rates on Sea Island and Sealand cotton were quoted separately for the first time for the 1961 crop. Therefore, the table was revised to reflect the separate loan rates.

The grades for linters were revised starting with the 1956-57 season and the prices are quoted on the basis of the new grade. Tables 228A and 229A show prices under the new standards and replace tables 228 and 229 which show prices under the old standards.

Table 234A replaces table 234 because of a revision in waste factors.

A new series on Government financed exports, by major country of destination using shipping data, is contained in tables 242 - 245.

New statistical series are included as tables 246 through 259. These tables pertain to c.i.f. prices for cotton at Liverpool and Bremen, the fiber equivalent of exports and imports of textiles and textile products, and domestic manmade fiber consumption.

This supplement supersedes the supplement for 1960 issued October 1960.

SUPPLEMENT FOR 1961 TO STATISTICS ON COTTON AND RELATED DATA

INDEX

	<u>Table No.</u>	<u>Page No.</u>
Acreage of cotton:		
Harvested:		
Foreign Countries	18, 84	16, 50

1/ Total production.

2/ Gross weight bales.

3/ Preliminary.

4/ Linters production collected in thousands of pounds since 1957.

5/ Not available

Cotton and linters data from "Cotton Production"; Cottonseed from "Cotton production and Distribution"; annual reports of the Bureau of the Census.

1/ Bureau of the Census. Population continental United States as of July 1, including armed forces overseas. 2/ Mill consumption as reported by the Bureau of the Census. For American cotton, tare as reported by the Crop Reporting Board has been deducted; for foreign cotton, 3 percent (15 pounds) was deducted, (20 pounds beginning August 1, 1958). Since 1950, data have been adjusted to year ended December 31. 3/ Includes apparel and carpet wool on a scoured basis. Data from Wool Consumption reports of the Bureau of the Census. 4/ Textile Organon, publication of the Textile Economics Bureau, Incorporated. Includes filament and staple fibers. Data are United States producers' domestic shipments, plus imports for consumption. 5/ Textile Organon. Nylon, orlon, glass fiber, etc. United States production less exports plus imports for consumption. 6/ Producers' manmade fiber waste consumed by mills, (excludes glass). 7/ Flax. Imports and estimated production. Bureau of the Census and Plant Industry through 1957. 1949-1952 production was estimated by the Agricultural Marketing Service, Portland, Oregon, office. Imports only since the 1953 season. 8/ Bureau of the Census. Net imports through 1953. Since 1954, imports for consumption. 9/ Total consumption divided by population and not a summation of per capita consumption of fibers. 10/ Less than 0.05 pounds. 11/ Preliminary. 12/ Includes Alaska. 13/ Includes Alaska and Hawaii.

1/ Average wholesale price for 20 selected constructions. Prices per yard are converted to the approximate value of cloth obtainable from a pound of cotton. 2/ Average monthly price based on landed quotations (Group 201 mill points) for four growths--Southeastern, Memphis Territory, Texas-Oklahoma and California. 3/ Difference between cloth prices and prices for the average qualities of cotton used in the 20 constructions.

1/ Includes export taxes where applicable. 2/ Quotations on new weight basis. 3/ Average of prices collected once each week. 4/ Net weight price for U. S. is CCC average sales price divided by 0.96. Annual price is a simple average of monthly prices which in turn are an average of weighted average prices for each sale made during the month. 5/ Quality of U. S. cotton generally considered to be most nearly comparable to the foreign cotton. 6/ Beginning November 1956, spot price less 35 percent export subsidy paid by Turkish Government. 7/ Delivered at Brownsville. Net weight price = actual price divided by 0.96 8/ Quotation on net weight basis. 9/ Average 14 spot market gross weight price less export payment-in-kind rate per pound, divided by 0.96 to convert price to a net weight basis. 10/ CCC average sales price divided by 0.96 for August 1958 through June 1959 and price as explained under footnote 9/ for July 1959.

* Discounts of varying amounts are offered on export sales.

Foreign Agricultural Service and Cotton Division, AMS.

Footnote 4/ on original table should be changed to read:

That portion of net farm income that remains after charges for the use of invested capital and production credit have been deducted. It is obtained by dividing the return to operator and family by the total hours of their loan.

Economic Research Service.

1/ The equivalent net weight pounds of raw cotton for each pound of manmade fibers are:

- a. Regular and intermediate tenacity rayon and acetate filament yarn - 1.51
- b. Rayon and acetate staple fiber - 1.10
- c. High tenacity rayon - 1.80
- d. Non-cellulosic manmade fiber for uses other than tires - 1.74
- e. Non-cellulosic manmade fibers used in tires - 2.73
- f. Non-cellulosic manmade staple fiber - 1.37
- g. Fiber glass - 1.70

2/ Includes fiber glass for United States only, prior to 1950.

Based on production data from the Textile Organon, a publication of the Textile Economics Bureau, Incorporated.

1/ The equivalent net weight pounds of raw cotton for each pound of manmade fibers are:

- a. Regular and intermediate tenacity rayon and acetate filament yarn - 1.51
- b. Rayon and acetate staple fiber - 1.10
- c. High tenacity rayon - 1.80
- d. Non-cellulosic manmade fiber for uses other than tires - 1.74
- e. Non-cellulosic manmade fibers used in tires - 2.73
- f. Non-cellulosic manmade staple fiber - 1.37
- g. Fiber glass - 1.70

2/ Includes fiber glass.

Based on production data from the Textile Organon, a publication of the Textile Economics Bureau, Incorporated.

1/ Data based on: Liftings under Mutual Security Act authorizations, reported shipments under Titles I and II of P.L. 480, reports on distribution of exports under barter contracts. 2/ Totals were made before rounding. 3/ Total exports and those financed under the specified export programs are not directly comparable because of differences in reporting periods and techniques. Over the long run the differences tend to cancel out. 4/ Estimated. 5/ Less than \$500,000. 6/ Less than 500 bales. 7/ Includes 38 million dollar Export-Import Bank loan, estimated to represent 207 thousand bales. 8/ Includes 5 million dollar Export-Import Bank loan, estimated to represent 34 thousand bales.

^{1/} Includes manufactures of mohair, alpaca and other wool-like specialty hair. Omissions indicate data were not reported separately. ^{2/} Not including rags.

^{3/} 1920 and 1921 weight was computed from estimated price per pound and reported value.

^{4/} Pounds were computed from estimated price per pound, 1926 to date.

^{5/} Includes men's and boys' suits, pants, overcoats group items converted at 4 pounds each 1926-44, 3.5 pounds 1945-49, 3 pounds 1950 to date; women's and children's suits, dresses, ensembles group items converted at 3 pounds each 1926 to date; wool felt hats group converted at 0.25 pounds each 1922-47, 0.21 pounds 1948-51, 0.17 pounds 1952 to date. Other wearing apparel not knit 1945 to date computed from price estimates. Includes knit wearing apparel 1920 and 1921.

^{6/} Census Bureau's Schedule B classification, designated manufactures, nec.

^{7/} Converted at pounds per square yard as follows: 1922-29, 1.65; 1930-38, 1.75; 1939-47, 1.8; 1948-50, 2.1; 1951 to date 2.5. ^{8/} Preliminary.

Compiled from reports of the U. S. Department of Commerce.

^{1/} Includes manufactures of mohair, alpaca, and other wool-like specialty hair.

^{2/} Not including rags.

^{3/} Includes pile fabrics and manufactures, tapestry and upholstery goods, press and billiard cloths.

^{4/} Includes carriage and automobile robes, steamer rugs, etc.

^{5/} Includes laces, lace articles, veils and veillings, nets and nettings, when reported in pounds.

^{6/} Includes knit fabrics in the piece and miscellaneous manufactures not elsewhere specified.

^{7/} Converted at pounds per square foot as follows: Not made on power-derived loom, 1920-57, 0.5; made on power-driven loom, 1920-42, 0.17; 1943, 0.29; 1944, 0.09; 1945, 0.10; 1956, 0.16; 1947, 0.21; 1948-59, 0.20.

^{8/} Preliminary
