THE WORLD'S LARGEST RANGE OF POWERSPORT BRAKES

EBC[®]
BRAKES

Brake pads, rotors, braided stainless brake lines, clutches and much more, with four manufacturing plants in the UK and USA producing over 10 million components each year.

www.ebcbrakes.com

Welcome to 2021 and the latest EBC Catalog with, as always, all the new brakes and clutches you need for your customers.

With nearly 40 years in the USA motorcycle market, we can only thank again our thousands of loyal dealers for their support through the years. Carrying EBC as an alternative product line to genuine parts continues to make good commercial sense, saves inventory dollars, increases hit rate on sales and offers a truly long-term solution to stocking aftermarket parts.

EBC also represents a sound investment as products do not perish or age, and with the help of your distributor and the stock rotation programs that many of them offer you, you don't get left with a bunch of old mis-matched inventory which could easily happen with other "New kid on the block" brands.

2019 saw a change in the way that we produce and distribute our catalogs. This catalog includes only the NEW products added to our range since the publication of the 2020 edition. This update-only catalog is designed to supplement the 2020 Issue 302 edition; we will publish a full catalogue in 2021 which will be entitled Issue 303. An up to date full catalogue will always be available on our website on the catalogs page.

Once again **THANK YOU DEALERS** and have a great 2021 selling season.

MOTORCYCLE BRAKE PADS

Aramid Fiber Organic FA Series Pads

“X” Pads

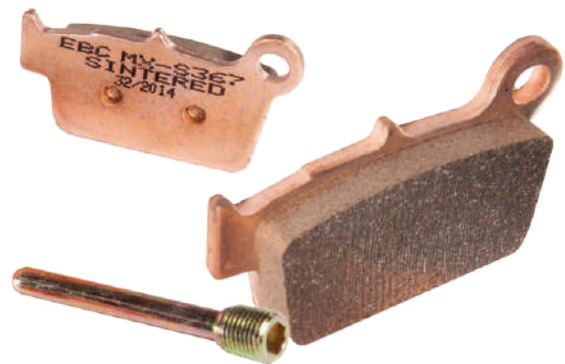

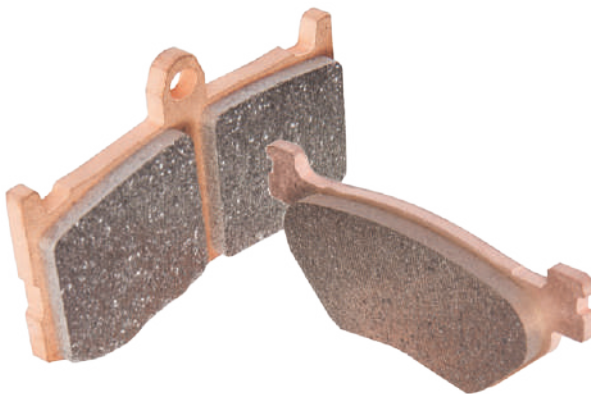

FA series organic brake pads will deliver fingertip stopping power and superb brake feel and control, the preferred choice for many sportbike riders. This compound has low disc attack characteristics and gives medium lifetime.

“X” series moto-x sport and enduro pads, cool running based pad compound for sport use in moto-x and ATV applications. For mud, sand or wet conditions requiring longer life, use our sintered range below.

Double-H™ Pads

MXS Series Pads

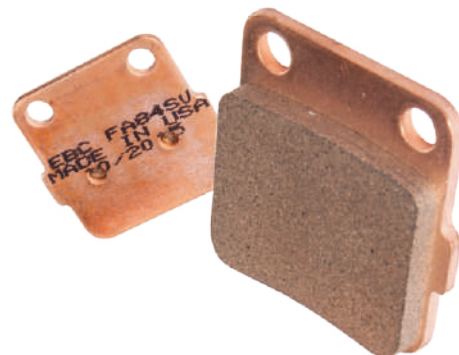

FA series with HH suffix, EBC’s American-made ultra high friction Double-H™ sintered copper alloy brake pads for maximum stopping power and lifetime. With stainless steel radiator plates to reduce heat transfer and double compact for wider pads.

“MXS” moto-x race pads, ultra high friction American-made sintered copper alloy with diamond ground surface finish for fast brake-in. With external hex drive slider pins, these pads are suitable for all fast moto-x riding.

“R” Series Pads

SV Pads

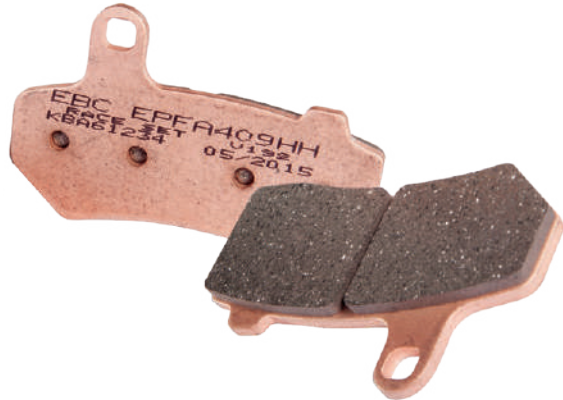

“R” series American-made sintered copper alloy ATV and Moto-X replacement pads for sport and utility off road riding.

“SV” series severe duty ATV pads, high density copper alloy for longest possible life in utility applications on ATV, especially in wet, mud, dust and dirt conditions.

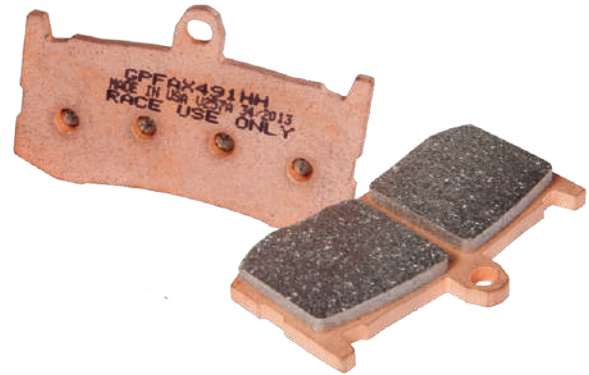

MOTORCYCLE BRAKE PADS

EPFA Trackday Pads

EPFA trackday pads give long life in street use with improved fade resistance and heat cycling plus improved noise characteristics, making this a great pad for heavy streetbikes and cruisers as well as faster superbikes. Great for intermittent track use.

GPFX Race Series Pads

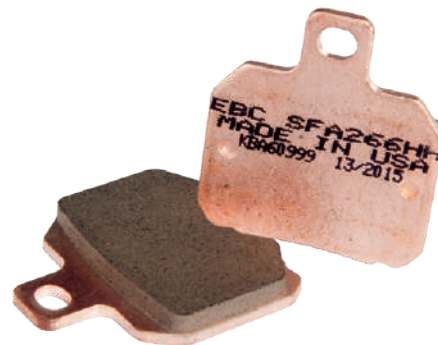

GPFX vacuum sintered ultra-high friction race pads are for sportbike asphalt racing and have been refined over the years to deliver one of the best brake race materials ever made. See page xii for full details.

SFA Organic Scooter Pads

A superb general replacement pad for urban use on scooter mopeds, mopeds and mopeds. Made using aramid fibers, these pads give above average lifetime, reduced rotor wear characteristics and offer great value for money.

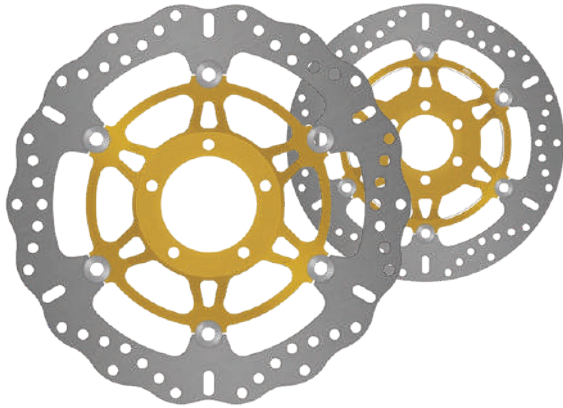

SFA-HH Sintered Scooter Pads

These American-made sintered scooter pads are long lasting with high performance HH rated stopping power for perfect braking - wet or dry. The HH pads target the faster and heavier scooter market and work well with stainless steel brake discs.

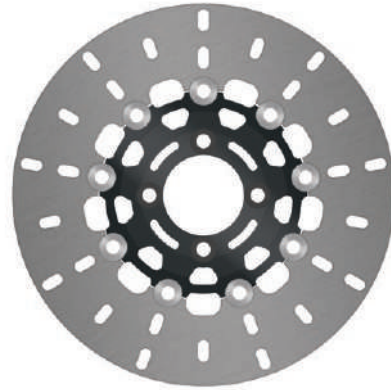

MOTORCYCLE BRAKE ROTORS

X and XC Series Sportbike Rotors

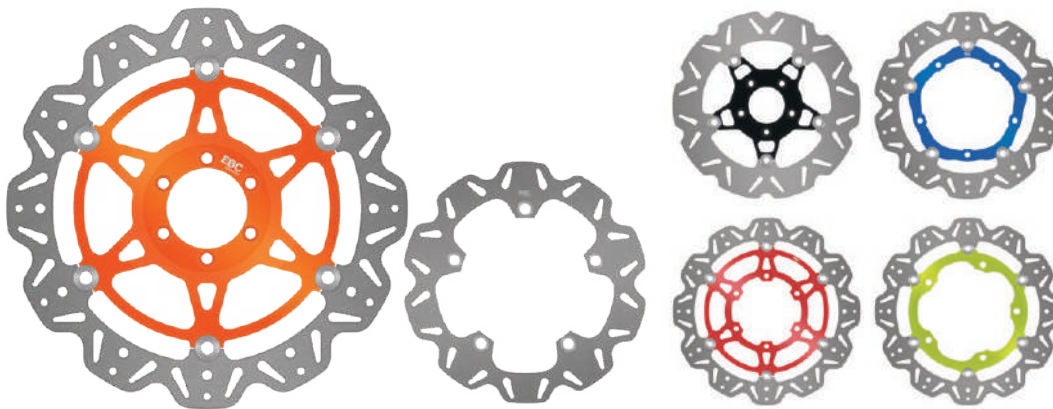

X and XC series rotors feature mill hard stainless steel high friction rotor blades for maximum brake effect and are direct size for size replacements for OEM rotors. These lightweight rotors feature our patented SD system square drive button system.

VMD Classic Style Rotors

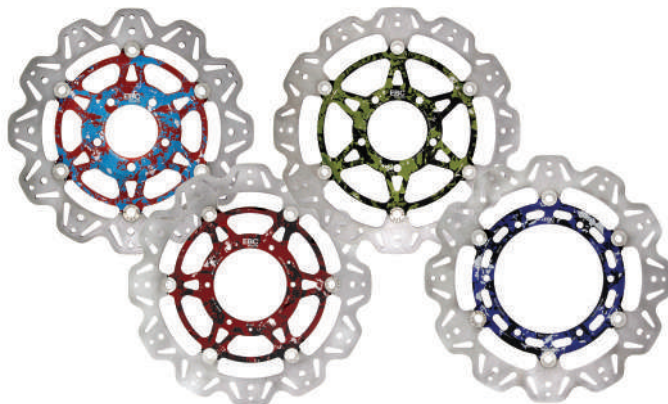

These lightweight, black anodised vintage rotors are new to our range. The vintage fitment benefits from billet aluminum construction; lightweight, less unsprung weight enables better handling and stopping power. Perfect for the Café racer scene.

Sportbike VR Series Rotors

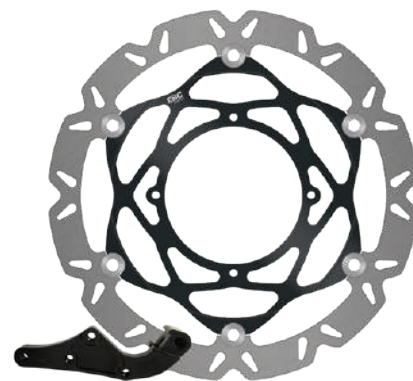

Vee profile lightweight rotors with alloy hubs and ground stainless steel rotor blades for fast street bikes. Choose from black or colored hub options as shown above. To order prefix with VR and suffix with chosen color BLK, RED, BLU, GRN, GLD. For rear rotors just the VR number.

Custom Finish VR Series Rotors

Special edition splatter anodised custom finish is applied to the center hubs of our VR series rotors by hand. The coating has the same resilience as other EBC rotor finishes but with a radical and unique aesthetic. Color options available: Light Blue, Red & White; Red, White & Black; Green, White & Black; Dark Blue, White & Black.

Supermoto Brake Rotor

SMX rotor with vee design contoured rotor, 320mm rotor upgrade kits complete with relocation bracket.

MOTORCYCLE BRAKE ROTORS

MD Series Stainless Scooter Rotors

Made from mill hard rolled steel, these rotors are machined to match the original units, mechanically de-stressed to avoid rotor distortion, surface finished for precise smoothness and then zinc coated to prevent corrosion or rusting.

VR Series Stainless Scooter Rotors

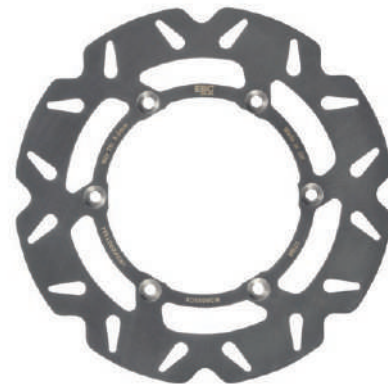

Made in the UK using German mill rolled heat treated and precision ground stainless steel, the new VR series stainless profiled scooter sport rotors are the lightest and best looking on the market and can be used with any type of brake pad.

UTVX Rotors for ATV/Quad/4x4

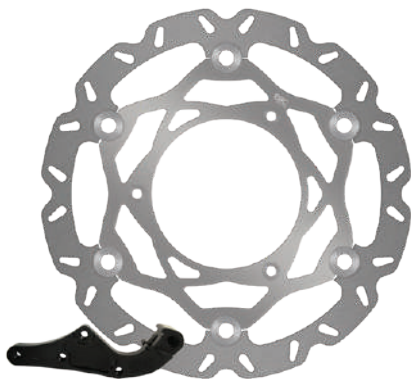

These rotors look great and give an improved brake performance. Made in our British manufacturing facility using durable, tough German mill rolled stainless steel, heat treated & diamond ground to give great braking for less than OEM prices.

CX Extreme Off Road Rotors

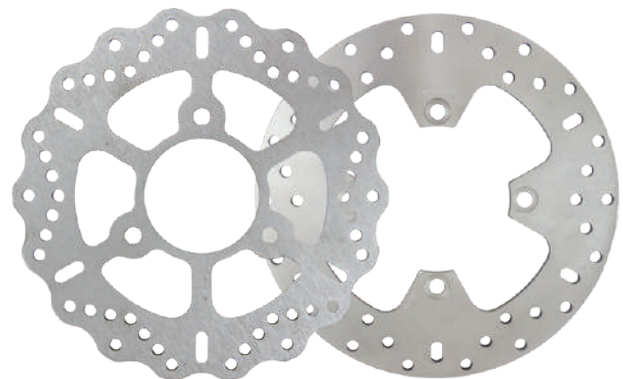

CX Extreme self-cleaning lightweight stainless rotors are a size-for-size replacement/upgrade for front and rear fitment on all modern motocross machines.

Oversize MX Rotors

250 or 280mm motocross oversize rotor kit complete with billet aluminum relocation brackets for improved brake power and control with vee design rotor.

Rear Brake Rotors

Made from stainless steel and available in full circle or contoured profile, suitable for performance street use or racing with new lightweight hole pattern construction.

MOTORCYCLE CLUTCH OPTIONS

CK/CKF Series Clutch Kits

DRC/DRCF Series Clutch Kits

CK complete engine sets of stack height controlled friction plates feature the EBC Brakes' unique alloy particle impregnated clutch facings that prevent burn up or slippage. CKF carbon fiber impregnated kits for ATV and moto-x use are built to last longer, grip and feel better than cork kits.

DRC is the ultimate clutch rebuild kit for your ATV and Moto-X machine. The DRCF kit swaps the stock type cork friction plates for a set of severe duty carbon fiber lined friction plates for better heat and wear abilities.

SRC/SRK Series Clutch Kits

CSK Coil & Diaphragm Clutch Kits

SRC is an aramid fiber lined plate set with heavy duty clutch springs (diaphragm type springs included where required). Ideal for heavy sport bikes, faster riders and production based race use. SRK series includes a full engine set of aramid lined friction plates with clutch springs and steel separator plates.

CSK sets include either coiled springs or diaphragm springs where appropriate. Coil springs are spiral wound with 4 to 8 pieces per set, made from heat treated high carbon steel delivering the right tension for your bike. Diaphragm springs are dish shaped flat steel pressure rings.

Clutch Removal Tools

NOW MADE IN STAINLESS STEEL

Made in the UK by EBC Brakes, these laser cut clutch tools make clutch removal, loosening of the drive shaft bolts and re-tightening a breeze, without any fear of damage to your expensive clutch basket. Tools can be extended to create more leverage if required with any simple workshop tool or tube. EBC Brakes produce a clutch tool for almost every clutch plate design known.

The longest lasting, highest performing aftermarket pads and rotors for the SxS industry yet ...

All EBC Brakes pads for SxS fitments, both sintered and carbon X pads, are made with beefed-up pad thickness and DO NOT REQUIRE or accommodate the fitting of noise shims, offering even more available pad life for this tough application.

BURNISH & SNUB STOPS

These pads bed in fast and deliver extremely high friction linear performance in track use. GP FAX pads are high friction but highly stable in stop. This means pads are powerful and predictable time after time when the brake is applied in race use. The “in-stop” friction fall off is almost zero and can hardly be noticed at the lever, meaning the brakes offer superb control. The EBC dyno is set to duplicate race conditions at the Road America race track and represents a true simulation of race brake demand. The number of race teams using GP FAX grows annually and for 2021 the exact same formulation developed through 2019 is used again.

EBC pads are developed in our own laboratory and tested using this race track simulator dynamometer to guarantee perfection before being thoroughly field tested on dozens of race teams.

⚠ This symbol indicates a rotor made of billet steel, and should be only used with EBC FA Kevlar® Organic or Vee pads. SAFETY NOTICE - With vehicles primarily designed for off highway use such as quads now being used on the highway, we would recommend the use of X or MXS pads for highway use and ONLY using the R and SV higher density / harder pad series for off road riding.

BRAKE LINES

EBC Brakes braided brake lines are manufactured in Great Britain from the highest quality materials, with braided stainless steel PTFE hose and grade 303 stainless steel precision machined fittings. At EBC Brakes we do not use mild steel or aluminum components in our brake lines, instead we choose stainless steel for every fitting, as this material offers maximum quality in terms of strength and corrosion resistance. EBC brake line kits are supplied 100% complete and include brand new stainless steel bolts for maximum visuals.

EBC Brakes braided hoses fit many bikes in front, rear and race designs. Braided hoses improve brake pressure transfer to the caliper and disc pads, they help improve lever feel and reduce "bulging" which may happen with standard rubber hoses. Braided hoses are also more resistant to abrasion or cuts common with off road riding and thereby improve safety.

EBC brake lines are designed and built to last, that's why every line is offered with a lifetime warranty. Every individual line is pressure tested after assembly and as an absolute guarantee of quality, EBC brake lines are manufactured to Federal Motor Vehicle Safety Standards (FMVSS-106) and have the following approvals: DOT, TÜV, ISO9001, DEKRA, ARAI, CQC AND ADR.

ISO9001

ADR

BLM is our standard braided hose series whereas BLMR series race hoses have fewer lines and are the choice for track and performance use giving an even firmer lever feel and improving service time. Racing kits take the shortest route from the master cylinder to the caliper. The lines usually bypass any Y-splitters in the existing system, this reduces the number of places where the brakes can leak. The two lines from the master cylinder are a lot easier to bleed than a system with a Y piece as each line bleeds independent of the other whereas with a Y piece they don't until fluid is below the Y piece.

Hose numbers are suffixed with a number and letter designating the number of hoses in the kits and front or rear, for example;

BLM6038-1F is a kit with a single hose for front fitment

BLM8111-3F is a kit with three hoses for front fitment

BLM8113-1R is a kit with a single hose for rear fitment

BLMR8114-2F is a race kit with two hoses for front fitment.

We do not sell BLMR race hoses for rear fitments, only front.

Some kits are sold as complete bike sets only and examples of numbering are:
BLM8169-4FR which is a four hose kit for a complete bike (front and rear).

All motorcycle brake lines (except Harley) are supplied with black stainless fittings, clear hose and red/blue EBC Brakes heat shrink.

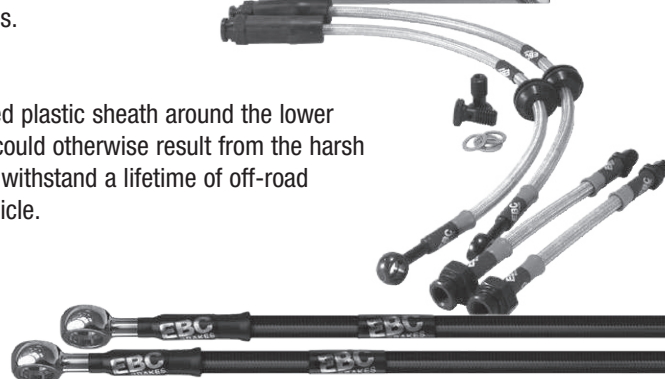

HARLEY-DAVIDSON® BRAKE LINES

EBC Harley-Davidson® lines are supplied in a unique finish, with chromed stainless fittings, black hose and black/space-grey EBC Brakes heat shrink.

Additionally, where many competitors use 'off the shelf' components, EBC Harley-Davidson® lines are manufactured using our own bespoke design of chrome plated hardware and brackets, ensuring perfect fitment for complex Harley-Davidson® brake line assemblies.

MOTOCROSS AND OFF-ROAD BRAKE LINES

EBC Brakes motocross and off-road brake lines are supplied with a hardened plastic sheath around the lower portion of the hose, to provide additional protection against damage which could otherwise result from the harsh and unforgiving conditions of off-road terrain. These brake lines are built to withstand a lifetime of off-road abuse, ensuring high performance and safe riding for the lifetime of the vehicle.

CLUTCH BUYERS GUIDE

How To Make Precision Pilot Jets

Everyone knows how sensitive an engine is to pilot jets in the acceleration stages from 1000 to 3500 rpm and getting fuel mixture right in this area is critical. For this reason jets have be perfectly accurate in their marked size and incremental size steps. EBC Brakes' sister company A-BAX Precision Engineering Ltd in the UK has purchased the most accurate machine on the planet for this work shown below. A-BAX Precision Engineering Ltd pilot jets are precise, clearly marked and reliably gauged using pin gauges, accurate to one tenth of a thousandth of an inch, you can rely on their accuracy.
