# HPE FLEXNETWORK 7506 SWITCH WITH 2X2.4TBPS FABRIC AND MAIN PROCESSING UNIT BUNDLE (JH332A)

## Modular Ethernet Switches

---

### WHAT'S NEW

- Full Layer 3 networking, MPLS, and Layer 2/Layer 3 VXLAN in a campus network.
- Powerful switching capacity of up to 4,160 Gbps.
- Compact density with up to 480 ports of 10GbE.

### OVERVIEW

The HPE FlexNetwork 7500 Switch Series is a versatile, high-performance, modular switch designed for the evolving needs of integrated services networks. Deployed across verticals at the enterprise LAN core, aggregation layer and wiring closet edge it offers 40GbE connectivity, cost-effective wire-speed 10GbE ports, high-density PoE/PoE+, and advanced

- 
- Advanced security features include 802.1X, MAC Authentication, and MACsec.

functionality with service modules.

With Hewlett Packard Enterprise Intelligent Resilient Fabric (IRF) technology, the 7500 Switch can be virtualized across four chassis with a single management interface—enabling flatter, more agile networks.

## FEATURES

### **Versatile Switch Delivers Intelligent, Real-time Services for the Campus**

The HPE FlexNetwork 7500 Switch Series is designed for the evolving network demands of campus LAN core, aggregation, and access layer.

This series offers up to 160 Gbps of switching capacity per slot using two switch and routing units (SRPUs) and up to 1440 W for PoE/PoE+ power per slot for mission-critical applications.

Broad offering of interfaces includes 40GbE connectivity, cost-effective high-density 10GbE ports and high-density PoE/PoE+ of up to 480 PoE/PoE+ ports for IP phones, cameras, and future high-density Internet of Things (IoT) deployments.

Includes advanced hardware feature sets such as VXLAN to build Layer 2 overlay networks using Layer 3 underlays, and MACsec for greater end-point or switch-to-switch security.

No hidden costs with the license-free Layer 2 and 3 feature set, including IPv6, MPLS functionality, and robust Quality of Service (QoS).

### **Architected for a High-performance Network**

The HPE FlexNetwork 7500 Switch Series supports a maximum of 4,160 Gb/s switching capacity from a 2.4 Tbps ASIC, delivering enhanced performance and future expansion capability.

Delivers up to 2,380 Mpps of packet performance with dual fabrics performing all switching and routing functions in the I/O modules, meeting current and future demands of bandwidth-intensive applications.

HPE Intelligent Resilient Fabric (IRF) allows up to four 7500 Switch Series chassis to be virtualized into a single switching/routing fabric that improves network performance and resiliency, simplifying your deployment and management.

### **Robust Security and Quality of Service (QoS) Controls**

The HPE FlexNetwork 7500 Switch Series includes a robust set of security and quality of service features to build a trusted network that meets your ever-changing corporate policies and compliances.

Flexible authentication options include 802.1X, MAC and Web Authentication, and Endpoint Admission Defense, delivering greater security and policy-driven application authentication.

Advanced distributed denial of service (DDOS) protection, such as DHCP Snooping, IP Source Guard, and ARP Protection, and flexible traffic controls, such as policy-based routing, QoS, and ACLs, are available to manage end-to-end application priorities.

The 7500 Switch Series includes a powerful set of multilevel-access security controls, such as varying security management login, RADIUS, SSH, TACACS/TACACS+, to protect and control change management access.

### Single Management View of the Network

The HPE FlexNetwork 7500 Switch Series can be managed as a part of a larger network with HPE Intelligent Management Center (IMC) Software.

IMC provides end-to-end visibility and control of the wired network through comprehensive configuration, compliance and policy management.

IMC functions seamlessly in a multivendor network environment providing ease of management across the network edge to data center.

IMC supports port and traffic mirroring, RMON and sFlow.

## Technical specifications

## HPE FlexNetwork 7506 Switch with 2x2.4Tbps Fabric and Main Processing Unit Bundle

<b>Product Number (SKU)</b>	JH332A
<b>Differentiator</b>	8-slot horizontal chassis, 13U, with 6 I/O and 2 fabric slots. Includes 2 HPE 7500 2.4Tbps Fabric with 8-port 1/10GbE SFP+ and 2-port 40GbE QSFP+ Main Processing Units.
<b>Ports</b>	(6) I/O module slots Supports a maximum of 288 Gigabit Ethernet ports or 288 autosensing 10/100/1000 ports or 96 1/10GbE ports or 48 10GbE ports or 24 40GbE ports, or a combination
<b>Memory and processor</b>	MIPS64 @ 1 GHz 1 GB flash 1 GB SDRAM
<b>Management features</b>	IMC - Intelligent Management Center Command-line interface Web browser Out-of-band management (serial RS-232C) SNMP manager Telnet Terminal interface (serial RS-232C) Modem interface IEEE 802.3 Ethernet MIB Ethernet interface MIB
<b>Input voltage</b>	100 - 120 / 200 - 240 VAC, rated -48 to -60 VDC, rated (depending on power supply chosen)
<b>Operating humidity range</b>	10 to 95% (noncondensing)
<b>Product Dimensions (metric)</b>	43.6 x 42 x 57.5 cm
<b>Weight</b>	93.9 kg

Most, if not all IT organizations are on a digital transformation journey — each at a different stage. With over 11,000 IT projects conducted and 1.4 million customer interactions each year, [HPE Pointnext Services](#)' 15,000+ experts and its vast ecosystem of solution partners and channel partners are uniquely able to help you at every stage of your digital transformation. We bring together technology and expertise to help you drive your business forward and prepare for whatever is next.

Advisory and Professional Services help you accelerate your digital transformation. [Operational Services](#) help you remove complexity and respond rapidly to business demands.

### **Operational Services from HPE Pointnext Services**

[HPE Pointnext Tech Care](#) provides fast access to product-specific experts, an AI-driven digital experience, and general technical guidance to help enable constant innovation. We have reimagined IT support from the ground up to deliver faster answers and greater value. By continuously searching for better ways to do things—as opposed to just fixing things that break—HPE Pointnext Tech Care helps you focus on achieving your business goals.

- **[HPE Datacenter Care](#)** helps modernize and simplify IT operations. Partner with an assigned account team, access technical expertise, an enhanced call experience gives you priority access, choose hardware and software support, implement proactive monitoring to help stay ahead of issues, and access HPE IT best practices and IP.
- **[HPE Proactive Care](#)** offers an enhanced call experience and helps reduce problems with personalized proactive reports and advice. This also includes collaborative software support for Independent Software Vendors (ISVs), (Red Hat, VMWare, Microsoft, etc.). [Read more](#)
- **[HPE Foundation Care](#)** helps when there is a problem and has a choice of response levels. Collaborative software support is included and provides troubleshooting help for ISVs running on your server. [Read more](#).

### **Other related services**

**[Defective Media Retention](#)** is optional and applies only to Disk or eligible SSD/Flash Drives replaced by HPE due to malfunction.

**[HPE Service Credits](#)** offers a menu of technical services, access additional resources, and specialist skills.

**[HPE Education Services](#)** delivers a comprehensive range of services to support your people as they expand their skills required for a digital transformation.

Consult your HPE Sales Representative or Authorized Channel Partner of choice for any additional questions and support options.
