# TeraStation™ WS5020N6 Series

**SW RAID  
Windows Storage Server 2016**

## Perfect Integration

**High Performance Storage Solution for  
Windows-based Environments – Hard Drives Included**

Buffalo's new TeraStation™ WS5020N6 series with Windows Storage Server 2016 combine two or four hard drive, high-performance network attached storage with the power and convenience of Windows operating system. TeraStation™ WS5020N6 series features native 10GbE connectivity and achieves increased reliability by populating with hard drives built specifically for always-on NAS devices.

The WS5020N6 seamlessly melds with networks' existing Windows computers and server enabling quick straightforward deployment and massive storage capacity available in an instant. WS5020N6 is an ideal solution for consolidating multiple file servers into a single solution that enables cost reduction and lowering of the overhead on your existing servers for other workloads.

Once deployed, users will find WS5020N6 enables full Active Directory integration facilitating comprehensive access management, policies, and security. This allows networks to automate access and manage storage in the same way as they do their Windows Server. PowerShell and Microsoft Systems Center are ready-to-use, as well as a flexible choice of storage protocols (iSCSI, CIFS/SMB, NFS). Your most demanding applications and processes, such as replication, SQL, a fast-indexing search during an anti-virus scan, and more, are no problem for the WS5020N6.

The series comes equipped with the powerful Intel® Atom™ C3338 Dual-Core 1.56Ghz family Processor and 8GB of fast ECC DDR4 memory installed and is designed to guard against failures and prevent downtime with two or four hot-swappable drives.

## Features and Benefits

- Pre-tested NAS-grade hard drives included with RAID 1 or 5 pre-configured
- Windows Storage Server 2016, 2 or 4-bay desktop (Workgroup edition) and 4-bay rackmount (Standard edition) NAS with and native integration with the Active Directory Service
- No CAL (Client-Access Licenses) required. Cost-effective storage solution to make full use of existing Windows-based environments
- 10 GbE/Dual Core CPU with 8GB DDR4 ECC memory
- A variety of backup features [DFS Replication, Shadow Copies/Azure Backup]
- Highly secured with the latest SMB protocol support (3.1.1)
- Business-level sever/PC backup NovaBACKUP® software bundled
- 3-year TeraStation VIP warranty, optional extended warranty
- Made in Japan
