## Jumper Settings

### J1 COM Port 1

RS-232, RS-422, RS-485 switch by BIOS setting

COM1 (RS232)			
Pin	Signal Name	Pin	Signal Name
1	DCD	2	RX
3	TX	4	DTR
5	GND	6	DSR
7	RTS	8	CTS
9	RI-		

COM1 (RS422)			
Pin	Signal Name	Pin	Signal Name
1	TXD-	2	TXD+
3	RXD-	4	RXD+
5	GND	6	---
7	---	8	---
9	---		

COM1 (RS485)			
Pin	Signal Name	Pin	Signal Name
1	Data-	2	Data+
3	---	4	---
5	GND	6	---
7	---	8	---
9	---		

### J2 COM1 & COM2 Power Switch

JP1			
COM1 (pin9)		COM2 (pin9)	
Short Pin	Function	Short Pin	Function
1-2 (Default)	RI1	3-4 (Default)	RI2
5-7	+5V	6-8	+5V
7-9	+12V	8-10	+12V

### J3 AC Back Auto Power ON

JP9	
Pin	AC Back auto Power ON function
Short 1-2	Disable (Default)
Open	Enable

### J4 External Power SW & Clear CMOS

SW2	
Pin	Signal Name
1	PWRSW-
2	+5V
3	GND
4	RTC_RST#

### Safety Information

Read the following precautions before setting up a Shuttle UXP.

#### CAUTION

Incorrectly replacing the battery may damage this computer. Replace only with the same or equivalent as recommended by Shuttle. Dispose of used batteries according to the manufacturer's instructions.

## A. Begin Installation

⚠ For safety reasons, please ensure that the power cord is disconnected before opening the case.

1. Unscrew two screws of the chassis cover.

2. Slide the cover forwards and upwards.

## B. Memory Module Installation

⚠ This mainboard does only support 1.35V DDR3L memory modules.

1. Locate the SO-DIMM slot on the mainboard.  
2. Align the notch of the memory module with the one of the memory slot.

3. Gently insert the module into the slot in a 45-degree angle.  
4. Carefully push down the memory module until it snaps into the locking mechanism.

5. Repeat above steps to install additional memory modules, if required.

## C. Component Installation

1. Unscrew the rack from chassis.

2. Place the HDD or SSD in the rack and secure with the two screws from the side.

3. Lay the HDD or SSD into its drive bay and push it gently to the right until it clicks into place.

4. Refasten screws.

5. As shown, unfasten the screw first.

6. Install the M.2 device into the M.2 slot and secure with the screw.

## D. Complete

1. Replace the covers and refasten the screws.

2. Screw the included antennas onto the appropriate connectors at the back panel (B9). Make sure they are aligned vertically or horizontally to achieve the best possible signal reception.

⚠ Make sure all antennas are aligned in the correct direction.

3. Complete.

⚠ Please press the "Del" key while booting to enter BIOS. Here, please load the optimised BIOS settings.

⚠ Operation Position: Please make sure to use either the supplied feet or the VESA mount.
