Descriptors Classrooms, *Elementary Schools, Expenditures, High School Graduates, *National Surveys, *Public Schools, School Districts, *School Statistics, *Secondary Schools, Student Enrollment, Student Teacher Ratio, Teacher Certificates, Teachers, Teacher Salaries, Urban Areas

This 15th annual national survey of public elementary and secondary school statistics presents data as of fall 1968 for each State, the District of Columbia. seven outlying areas, and the 14 largest cities. Questionnaires completed by State departments of education provide data on the number of local school districts. enrollment by grade, high school graduates, teachers, pupil-teacher ratios, instruction rooms, estimated school expenditures by major purpose, and average salaries of instructional staff and classroom teacners. A sample survey report form is appended.

Fall 1988 Statistics of Public Schools

HIGHLIGHTS

School districts. -The number of local school districts decreased to in the fall of 1968, down 7.1 percent from fall 1967.

Classicom teachers. -- 1,942,800 full-time and part-time classroom teacher were employed, an increase of 4.7 percent over the number in the fall of 1967.

Teachers with less than standard credentials. -- 100,000 ... 1-time classroom teachers, or 5.6 percent of all teachers, did not meet the regular limit certification requirements for the positions they occupied.

Enrollment. -- The peak fall enrollment of 44,962,000 purils consisted of 27,418,000 in elementary schools and 17,543,000 in secondary schools.

Pupil-teacher ratio. -- The number of pupils per teacher decreased to the lowest on record--23.1.

Curtailed sessions. -- Twenty-nine States reported 317,000 pupils were attending school for less than a full or normal school day.

Public high school graduates. -- A record 2,395,000 students completed high school during the 1967-68 school year, representing 77.6 percent of the ninth-grade enrollment 4 years earlier.

Classroom completion. -- A new high of 75,400 classroom completions was reported for 1967-68.

Expenditures. -- Of the estimated \$35.5 billion in total expenditures for public school purposes for 1968-69, \$28.6 billion are for current expenditures for elementary and secondary day schools, \$1.2 billion for current expenditures for other programs, \$4.7 billion for capital outlay, and \$1.0 billion for interest on school debt.

Current expenditure per pupil. -- The estimated average current expenditure per pupil in average daily attendance in 1968-69 is \$696. Pased on average daily membership, the per pupil expenditure is \$657.

Average salaru. -- The estimated average annual salary of the total instructional staff in public elementary and secondary schools in 1968-69 is \$8,200. For classroom teachers, the estimated average salary is \$7,900.

FOREWORD

The 15th annual fall survey of public elementary and secondary day schools is part of the regular Office of Education program to collect and disseminate timely and useful information about the largest segment of the educational system in the United States. The survey provides current data on the number of local school districts, enrollment by grade, high school graduates, teachers, instruction rooms, estimated expenditures, and average salaries of the staff. These data are given for each State and outlying area and for 14 of the largest cities.

Data from this survey were first made available in an advance report, released in March 1969.

The survey was planned and conducted under the general supervision of Carol J. Hobson, Chief, Elementary and Secondary Education Surveys Branch.

The Office of Education is indebted to the State education agency officials, listed below, who were responsible for supplying the data for this survey:

- Alabama......W. H. Kimbrough,

 <u>Director, Division of Administration and Finance</u>
- Alaska......Robert L. Thomas, Assistant Commissioner
- Arizona.....Mrs. Gene Rullie, Research Analyst
- Arkansas.....Frank W. Cannaday, Supervisor of Research and Statistics
- California......Robert J. Clemo, Chief of Bureau of Administrative Research and District Organization
- Colorado.......Robert M. Little,
 Director, Division of Statistics
 and Data Processing
- Connecticut......James J. Naughton,

 Fducation Consultant, Bureau of

 Research, Statistics and Finance
- Delaware......Wilmer E. Wise,
 Director of Research
- Florida.....Mitchell Wade,
 Assistant Superintendent, Research

NATURE AND CONDUCT OF THE SURVEY

The 1968 survey was the 15th of an annual series in which the Office of Education, in cooperation with State education agencies, collects basic data on the number of local school districts, pupils, high school graduates, teachers, and instruction rooms in public elementary and secondary day schools. Because of the widespread demand for current official figures on school finance, the survey was expanded in the fall of 1964 to include estimated school expenditures by major purpose and average salaries of instructional staff and classroom teachers.

Data are shown to the extent available for each of the 50 States, the District of Columbia, and seven outlying areas. Most of these data are also provided for 141 of the 15 cities that ranked highest in total population in the 1960 census. City data appear in the appropriate tables at the end of the State listing. Data for Washington, D.C., are shown both in the State listing (as one of the 51 jurisdictions comprising the total for the United States) and again with the large cities, to facilitate intercity comparisons.

Totals for the United States comprise data for the 50 States and the District of Columbia. Excluded from the national totals but shown separately in the report are data for American Samoa, the Canal Zone, Guam, Puerto Rico, the Virgin Islands, the Department of Defense schools operated overseas for minor dependents of military and civilian personnel, and the Trust Territory of

1/ Data were not received from Detroit in time to be included in the report.

the Pacific Islands. National and State totals for fall 1967 are provided in this report for comparisons. Some of these data differ from those originally published in the fall 1967 report, because more complete data became available after the issuance of that report.

The data in this report were furnished by the State departments of education on two report forms designed by the Office of Education. (See Appendix.)

Each completed State questionnaire was reviewed for internal consistency and for comparability with information received in previous surveys and related Office of Education studies. Telephone calls were used to obtain data from nonrespondents and to resolve outstanding questions.

As in any survey that employs the mail questionnaire, latitude for interpretation of instructions and directions by respondents may exist. Because public elementary and secondary education is a State and local responsibility, any statistical total for the Nation as a whole is necessarily a composite of the heterogeneous educational practices existing in the United States. use of a standard form and definitions in collecting the data tends to minimize these variations. the extent that State deviations from prescribed definitions and instructions are known, they are shown in the footnotes to the various tables.

The Office of Education encourages each State to obtain the data for its report by conducting a fall survey of local school districts and by using an adaptation of the Federal form and accompanying instructions. Some

State education agencies find this approach impractical for a variety of reasons, such as costs of conducting a fall survey when funds and staff may not be available, the infeasibility of collecting certain items of information from local school superintendents in the fall when similar data for a recent period are already available in the State office, and the problem of tabulating data from large numbers of local school systems. Although most of the States used adaptations of the Federal report form, some of them collected the data in regular end-ofyear annual reports, and a few submitted estimates based primarily on records. Financial estimates for 1968-69 were prepared in the State offices generally without recourse to survey procedures. However, State appropriations and budgets filed by local school districts often served as bases for these estimates.

LOCAL SCHOOL DISTRICTS

As a result of reorganization laws, the consolidation of small districts, and the elimination of nonoperating school districts, the number of school districts (local basic administrative units) continued its steady decline. The number of school districts decreased from 22,010 in the fall of 1967 to 20,440 in the fall of 1968, down 7.1 percent.

Six States having more than 1,000 school districts each include California, Illinois, Minnesota, Nebraska, South Dakota, and Texas. They account for 38.4 percent of all the school districts in the Nation (table 2).

of the 20,440 districts in the fall of 1968, the number performing their prescribed function by operating public schools was 19,339 or 94.6 percent. The other 1,101 districts

did not operate schools but sent their pupils to nearby operating districts on a tuition basis.

CLASSROOM TEACHERS

Full-time and part-time classroom teachers

In the fall of 1968 there were 1.9 million full-time and part-time public elementary and secondary school teachers (table 1). This total represented an increase of 87,600, or 4.7 percent over the number in the fall of 1967. In the fall 1968 survey, the reporting of part-time teachers was changed to full-time equivalents; therefore the actual increase was slightly greater than the 4.7 percent indicated.

The relative annual increase in the number of secondary teachers was greater than that for elementary teachers (6.0 percent compared with 3.7 percent).

Teachers with less than standard certificates

Because of the shortage of fully qualified teachers, the States have permitted the employment of teachers who do not have all the qualifications necessary to obtain regular teaching certificates. The emergency certificates issued to these teachers are usually for a period shorter than that for regular certificates. Many of these provisionally employed teachers are working toward standard certificates.

In the fall of 1968, State departments of education reported 108,000 full-time teachers with less than standard certificates (table 4). These teachers constituted 5.6 percent of the total teaching staff in 1968, as compared with 4.9 percent

PUPILS

a year earlier. A large portion of this difference was due to changes in reporting. For example, teachers in Chicago who do not fully qualify for a Chicago license were reported this year as less than standard even though they may hold a State teaching certificate valid outside the city. On the basis of 25 pupils per teacher in elementary schools and 20 in secondary schools, it is estimated that over 2.5 million pupils are being taught by teachers with less

than standard certificates.

Some of these teachers meet the general education requirements of their respective States but may lack one or more of the other Stateprescribed requirements. Although most States require at least a bachelor's degree to obtain a regular teaching certificate at both the elementary and the secondary levels, there is considerable variation in the other requirements. this reason, the data on the number of teachers with substandard certificates are useful in calling attention to the situation in individual States but do not readily permit significant interstate comparisons. Since the current requirements relate to the issuing of new certificates, teachers who obtained regular certificates when the requirements were lower are not considered as holding substandard certificates.

It should be noted that the total number of teachers with substandard certificates does not represent the so-called "teacher shortage." To arrive at the size of the teacher shortage, the number of teachers needed to reduce classification, eliminate multiple sessions, fill vacant positions, and expand and improve educational services would also have to be included.

Population growth²/

From October 1, 1967, to October 1, 1968, the estimated school-age population (ages 5-17 years, inclusive) rose from 51,747,000 to 52,359,000, an increase of 1.2 percent. During this period, the estimated total population increased from 198,498,000 to 200,461,000 persons, or 1.0 percent.

Enrollment

A record 45.0 million pupils were enrolled in full-time public elementary and secondary day schools in the fall of 1968, an increase of 1.1 million, or 2.4 percent over the fall of 1967 (table 5).

Changes in enrollment among the States varied considerably. Enrollment increases from 1967 to 1968 ranged from less than 1 percent in 10 States to 4 percent or more in 10 States. Enrollment decreased in three States and the District of Columbia (table 5).

Table 5 gives enrollment by organizational level of the school. Grades 7 and 8 were to be reported either in the elementary or secondary level depending upon the organization of the school of which they were a part.

Table 6 gives enrollment by grade arranged within the traditional grade groups of kindergarten through grade 8 and grades 9 through 12.

Enrollment in grades 7 and 8 by organizational level

In the fall of 1962 the Office of Education began to collect enrollment data by grade as well as by organizational level. Most States have been able to report their numbers of seventh and eighth grade pupils

^{2/} Data from U.S. Bureau of the Census.

by the types of schools they attendelementary or secondary. In the fall 1968 survey, 30 States were able to furnish such information (table 7). This group of States, representing 52.4 percent of the Nation's total enrollment, reported that 67.6 percent of their seventh-graders and 71.9 percent of their eighth-graders were in secondary schools.

PUPIL-TEACHER RATIO

In recent years the teaching staff has been growing at a slightly higher rate than enrollment. Consequently, the pupil-teacher ratio for the Nation has decreased from 25.1 pupils per teacher in 1964 to 23.1 in 1968 (table 1). However, at the national level, and even at the State level, pupil-teacher ratios have only limited value and should be used with caution.

The average number of pupils per classroom teacher, often used as a measure of teacher workload, is not a valid measure of average class size. Furthermore, pupil-teacher ratios do not reflect the educational services provided in varying degrees by staff outside the classroom. The ratios shown in table 8 serve only as rough guidelines in studying the State-by-State situation, and more detailed information on other aspects of this problem would be needed in order to make valid judgments.

PUPILS ON CURTAILED SESSIONS

Data on the number of pupils attending school for less than a full or normal school day include pupils on so-called "half-day sessions," "curtailed sessions," "double shifts," or "reduced time." Extended sessions are not considered as curtailed sessions when students attend for a full day with some overlapping

of the sessions. In reporting data on kindergartens, where the half-day session is considered the normal school day, the count includes only pupils on triple shifts.

In the fall of 1968, 29 States reported a total of 317,000 pupils on curtailed sessions, of which 58.5 percent were in elementary schools and 41.5 percent in secondary schools. Fifteen States and the District of Columbia reported no pupils on curtailed sessions, and data were not available for the six remaining States (table 9).

The use of curtailed sessions is only one of several expedients adopted by school administrators who are faced with the condition of having more pupils than the available classrooms can accommodate. They usually cope with the problem by the use of over-crowded classrooms, improvised or makeshift facilities, obsolete facilities, and/or rented quarters. Together, these various categories of expedients would be more indicative of the need for additional classrooms than is the number of pupils on curtailed sessions.

HIGH SCHOOL GRADUATES

A record 2.4 million public high school graduates were reported for the 1967-68 school year, a gain of 20,000, or slightly less than 1 percent over the prior year (table 10).

The increasing retention rate of public high schools is indicated by the improvement taking place during the most recent 5-year period. The high school graduates in 1967-68 represented 77.6 percent of the class that entered the ninth grade in 1964-65--higher than the ratio 5 years earlier, when the 1962-63 high school graduates represented 70.9 percent of the ninth-grade class of 1959-60.

INSTRUCTION ROOMS

Instruction rooms completed during 1967-68

The number of instruction rooms completed during the school year includes not only newly constructed rooms but also rooms converted from other uses to instructional purposes. During the 1967-68 school year, 75,400 instruction rooms were completed, an increase of 4,400 from the 71,000 completed in the previous year (table 1).

Instruction rooms abandoned during 1967-68

The States reported that 19,400 instruction rooms were abandoned during the 1967-68 school year-4,600 less than in the preceding year (table 1). Included in the number of rooms abandoned are those destroyed by fire, earthquake, tornado, urban redevelopment, and other causes, as well as rooms converted from instructional purposes to other uses. The abandonment of rooms also reflects the elimination of unsafe or obsolete structures and the closing of schools as a result of school district recorganization and consolidation.

Instruction rooms available, fall 1968

The States reported a total of almost 1.8 million publicly owned instruction rooms available and in use at the beginning of the 1968-69 school year, an increase of 55,500 over the number in the preceding year (table 1).

Based on the average national pupilroom ratio, an additional 6,240 rooms are needed to house the 317,000 pupils reported on curtailed sessions.

ESTIMATED EXPENDITURE AND SALARY DATA, 1968-69

Total expenditures

Estimated total expenditures for all public school purposes in 1968-69 amount to \$35.5 billion. Included in the grand total are current expenditures for elementary and secondary day schools (\$28.6 billion) and for other programs (\$1.2 billion); capital outlay (\$4.7 billion); and payments of interest on debt (\$1.0 billion). Debt retirement is not included since it would be duplication of expenditures made and reported in prior years.

Current expenditure per pupil in ADA and ADM

The estimated average annual current expenditure per pupil in average daily attendance (ADA) in 1968-69 is \$696. Based on average daily membership (ADM), the estimated amount is \$657.

Average salary of classroom teachers and instructional staff

The estimated average annual salary of classroom teachers in 1968-69 is \$7,900. An analysis of average salaries by State indicates that wide differences exist among the States in salaries paid classroom teachers, with State averages ranging from \$5,772 to \$10,427. In five States and the District of Columbia the average salary was \$9,000 or over; in 12 States, between \$8,000 and \$8,999; in 16 States, between \$7,000 and \$7,999; in 13 States, between \$6,000 and \$6,999, and in four States, less than \$6,000 (table 12).

The estimated 1968-69 average annual salary of the total irstructional staff (supervisors of instruction,

principals, teachers, and other instructional staff members) is \$8,200.

LARGE CITY DATA

The educational problems of the Nation's large cities have been receiving increasing attention in recent years. Since 1962 the States have been requested to furnish separate data in the fall survey for the 15 cities with the highest total population in the 1960 Decennial Census. One of these cities, Washington, D.C., has always been included in this survey, as it is in other national surveys that cover all jurisdictions. Data were requested from the 12 States in which the other 14 cities are located.

The 15 large cities are New York, Chicago, Los Angeles, Philadelphia, Detroit, Baltimore, Houston, Cleveland, Washington, St. Louis, San Francisco, Milwaukee, Boston, Dallas, and New Orleans. Data were not received for Detroit in time for inclusion in this report.

At the time of the last Decennial Census (April 1960), the combined populations of the 15 cities, ranging from 7.8 million in New York to 628,000 in New Orleans, comprised one-seventh of the total population of the United States. The 14 cities reporting had 13.1 percent of the 1960 population and in the fall of 1968 had a combined enrollment of 4.1 million, or about 9 percent of the Nation's public school pupils. Reported data for each of these large cities appear below the outlying areas in the appropriate tables.

Previously published data have been revised.
Includes estimates for non-reporting States.
Incomplete; totals are for the States reporting.
Data not available until fall 1969.
Because of changes in school plant inventories, the number of instruction rooms at the beginning of a particular school year may not equal the net change (rooms completed minus rooms abandoned) plus the number, shown for the beginning of the preceding year.

Previously published data have been revised.

In those instances where two or more districts have organized into jointures for purposes of operating schools, the larger unit (jointure) is the administrative unit counted here.

DOD Overseas Schools are elementary and secondary schools operated in foreign countries by the Department of Defense for minor dependents of military and civilian personnel in the Department who are stationed overseas.

The Trust Territory of the Pacific Islands is administered by the United States by agreement with the United Nations Security Council.

Data are reported in full-time equivalence.
Incomplete; totals represent data for those States reporting part-time teachers separately from full-time.
Previously published data have been revised.
Distribution estimated by the Office of Education.
DOD Overseas Schools are elementary and secondary schools operated in foreign countries by the Department of Defense for minor dependents of military and civilian personnel of the Department who are stationed overseas.
The Trust Territory of the Pacific Islands is administered by the United States by agreement with the United Nations Security Council.

Comparisons between States cannot readily be made because of the variation in State requirements for regular teaching certificates

Comparisons between States cannot readily be made because or the variation in State requirements for regular teaching contributed at both the elementary and secondary levels.

Totals include estimates for the nonreporting States.

Data reflect changes in definition and reporting at the State level.

Previously published data have been revised.

Includes city of Chicago teachers who meet State requirements, but are not fully certified by the City.

Includes city of Chicago teachers who meet State requirements, but are not fully certified by the Department of Defense for minor dependents DOD Overseas Schools are elementary and secondary schools operated in foreign countries by the Department of Defense for minor dependents of military and civilian personnel in the Department who are stationed overseas.

The Trust Territory of the Pacific Islands is administered by the United States by agreement with the United Nations Security Council.

^{1/} Comparisons between States cannot readily be made because of the variation in State requirements for regular teaching certificates at both
the elementary and secondary levels.
2/ Includes estimates for the non-reporting States.
3/ Distribution estimated by the Office of Education.
4/ Less than 0.05 percent.
5/ Large numbers of native teachers have little or no college preparation.
6/ U.S. Overseas Schools are elementary and secondary schools operated in foreign countries by the Department of Defense for minor dependents of
military and civilian personnel of the Department who are stationed overseas.
7/ The Trust Territory of the Pacific Islands is administered by the United States by agreement with the United Nations Security Council.

Distribution estimated by Office of Education.

Previously published data have been revised.

Does not include 18,296 high school graduates from the adult educational programs.

DOD Overseas Schools are elementary and secondary schools operated in foreign countries by the Department of Defense for minor dependents of military and civilian personnal in the Department who are stationed overseas.

The Trust Territory of the Pacific Islands is administered by the United States by agreement with the United Nations Security Council.

Includes expenditures for summer schools, adult education, community services (such as public libraries operated by school districts, expenditures for nonpublic schools where authorized by lew, community centers, and recreational activities), and community colleges and technical institutes under the jurisdiction of local boards of education.

Includes supervisors, principals, classroom teachers, and other instructional staff.

Jundor college expenditures have been excluded because they are no longer operated by local elementary and secondary school systems. Effective July 1, jundor college expenditures have been excluded because they are no longer operated by local elementary and secondary school systems. Effective July 1, local college expenditures have been excluded because they are no longer operated by local elementary and secondary school systems. Effective July 1, local college expenditures in the major cities of Alaska is about a fourth Money figures in Alaska cannot readily be compared with the highest cost of living index. higher than in other major cities in the United States with the highest cost of living index. Includes salaries paid to teachers with little or no college preparation. Includes a salaries paid to teachers with little or no college preparation. DOD Overseas Schools are elementary and secondary schools operated in foreign countries by the Department of DoD personnel and expenditures of funds received by DOD schools as tuttion for 7,589 children of non-DOD personnel. This amount does not include an estimated \$14.8 million paid as tuttion for approximately 18,000 children of DOD personnel and expenditures of funds Proseived by DOD schools as tuttion for 7,589 children of non-DOD personnel. The Trust Territory of the Pacific Islands is administered by the United States by agreement with the United Nations Security Council.

OE FORM 2007, 6/68

REPLACES EDITION OF 6/67 WHICH IS OBSOLETE

PLEASE ATTACH A COPY OF YOUR STATE DATA-COLLECTION FORM AND INSTRUCTIONS FOR A DESCRIPTION OF ANY OTHER METHOD USED TO OBTAIN THE INFORMATION FOR THE OFFICE OF EDUCATION QUESTIONNAIRE

GENERAL INSTRUCTIONS

- 1. The report is due in the Office of Education on November 15. If complete data for all local reporting units are not available in the State department of education in time to meet the November 15 due date, please forward promptly the best figures for the whole State by including an estimate for nonrespondents. Final data should follow within a week or ten days.
- 2. The information for this report should reflect the facts on or about October 1, 1968, or the nearest date thereto when membership can be considered stabilized.
- 3. It is important that the States incorporate in their own questionnaires all basic definitions contained in the Federal form. Where reported data do not conform to prescribed definitions, deviations should be explained.
- 4. If data have been estimated in whole or in part, please indicate the basis of the estimate.
- 5. Data on staff and pupils are to be classified either as "elementary" or "secondary" depending upon the way in which the school is organized rather than on a K-8 and 9-12 basis. An elementary school is one so classified by State and local practice and consists of any span of grades not above grade 8 (most commonly K-6 or K-8). Prekindergarten schools are to be included with elementary. A secondary school comprises any span of grades beginning with the next grade following the elementary school and ending with or below grade 12, including junior high schools, the different types of academic high schools, and vocational or trade high schools. Grades 7 and 8 may fall into the elementary or secondary school classification depending upon the organization of the school of which they are a part.
- 6. The figures reported this year should be compared with those for last year. Reasons for unusual increases or decreases should be noted by attaching an explanation, e.g., change in method of reporting, change in standard used, etc.

INSTRUCTIONS FOR INDIVIDUAL ITEMS

ITEM 5. Exclude administrative personnel, supervisors, principals, librarians, guidance and psychological personnel, and other personnel who devote more than half of their time to non-teaching duties. Report teachers either as elementary or secondary or the basis of the principal level they serve.

ITEM 5a. Full-time classroom teachers are (a) full-time employees whose duties require them to be on the job on school days throughout the school year at least the number of hours of a regular school day, and (b) devote more than half of their time to classroom teaching.

ITEM 5b. Part-time classroom teachers are persons whose total current assignment as classroom teachers requires less than the normal school day or normal school year. This item does not refer to persons employed on a full-time basis who divide their time between classroom teaching and other duties. Report full-time equivalence of part-time teachers.

ITEM 6. Do not count as substandard those teachers who have regular certificates obtained when the requirements were lower than those currently in effect for new teachers.

ITEM 7. The number of pupils for whom less than a full or normal school day is provided includes all pupils on so-called "half-day sessions", "curtailed sessions", "double shifts", "reduced time", etc. Extended sessions do not qualify as double sessions because each extends for a full school day with some overlapping. In the case of kindergartens, special

schools for the handicapped, or others, where less than a full day session is considered as the normal school day, only pupils whose day has been reduced below this normal length would be included.

ITEM 30. Report here the total number of 1967-68 school year high school graduates from the regular public day school program; include 1967 summer school graduates.

ITEM 30a. Report here the total number of graduates from all other public school programs, evening school, adult, etc. during the 1967-68 school year.

ITEM 31. Report the total number of persons receiving high school equivalency certificates during the 1967-68 school year.

ITEM 35. Include here the total number of publicly-owned* instruction rooms available and in use, regardless of whether they are considered as satisfactory or unsatisfactory, permanent or temporary. Exclude improvised or makeshift facilities used as instruction rooms but not designed for such usage, such as hallways, storage rooms, etc.

*In the count of instruction rooms in item 35, include all those built by local schoolbuilding authorities or holding companies; city, town. and county governments; etc.

INSTRUCTIONS FOR SUPPLEMENT A TO FALL 1968 REPORT ON MEMBERSHIP, TEACHERS, AND SCHOOLHOUSING

GENERAL

- 1. This report is due in the Office of Education on November 15.
- 2. All data are to be estimated for the 1968-69 school year.
- 3. In estimating expenditure data, include disbursements from all funds (general fund, debt service fund, etc.) and from all sources (local and county, State and Federal). Estimated expenditures should be rounded to thousands of dollars.

INDIVIDUAL ITEMS

ITEM 1a. The following expenditures should be included here: (1) Expenditures for administration by State board of education and State department of education (excluding expenditures for vocational rehabilitation and salaries for personnel for supplementary services such as State library, State museum, teacher retirement, teacher placement, etc.); (2) Expenditures for administration by county or other intermediate administrative unit; (3) Total current expenditures by local school districts [i.e., expenditures for: Administration; instruction; attendance, health, transportation, and food services (including value of commodities donated by the U.S. Department of Agriculture); and other net expenditures to cover deficits for extracurricular activities for pupils (4) Direct State expenditures for current operation [e.g., State (employer) contributions to retirement

systems, pension funds, or social security on behalf of public school employees; State expenditures for textbooks distributed to local school districts, etc.].

ITEM 3a. Report here estimated interest on short term and long term debt (bonds or notes) to be paid by local education agencies from all funds.

ITEM 3b. Report here estimated interest payments to be made by schoolhousing authorities or similar agencies, and payments to be made directly by State, intermediate, county, city, or other local governmental agency, where such payments will not be recorded in the local education agency accounts.

ITEM 4. Report here the average salary of classroom teachers only. (Total salaries to be paid all classroom teachers divided by the full-time equivalence of the total number of classroom teachers).

ITEM 5. Report here the average salary of the total instructional staff (total salaries to be paid instructional staff divided by the full-time equivalence of the total number of instructional staff positions).

ITEM 6. and 7. Report estimated ADA and ADM for all public day-school pupils enrelled in prekindergarten through Grade 12, including postgraduates.
