ABSTRACT

        One of eight sections of a handbook for use by
vocational teacher educators in improving vocational teacher
education linkage with business, industry, and labor, this fifth
section is designed to promote vocational teacher education
department linkages with the private sector through the use of
workshops. (Workshops is defined broadly to include such activities
as seminars, conferences, and institutes.) Focus is on the
organization and management of workshops as an effective method for
professional development. An introduction outlines the whole handbook
and lists behavioral objectives for this section. Basic activities
common to most workshop planning are described as a model approach.
Suggested alternative forms and procedures are then presented to aid
departments in developing plans that are unique to their own
situation. A chapter on administrative details deals with the
investigation and establishment of policies and procedures and
contains a checklist of planning steps. (This handbook and related
ones are considered easily adaptable for use by vocational educators
at postsecondary and secondary levels.) (JT)

FOREWORD

Continuing advances in technology, changing employment opportunities, and changing work requirements demand that vocational teacher educators establish linkages with the private sector in order to keep up-to-date in their efforts to support relevant education programs for youth and adults. It is recognized also that in developing these linkages, vocational educators can be helpful to their business, industry, and labor counterparts.

Educat, 's must share their concerns for the design and maintenance of viable vocational education programs. Giving visibility to effective strategies and working arrangements will help spread the practice of utilizing business, industry, and labor inputs and, in the process will greatly strengthen the possibilities of placing vocational education graduates in satisfying and rewarding careers.

These eight handbook sections are a response to the need for direction and suggestions in increasing business, industry, and labor inputs into vocational teacher education programs. The guidelines contained in the handbook sections are intended for use by faculty members of vocational teacher education departments, but the material is also easily adaptable for use by vocational educators at the post-secondary and secondary levels.

A strength of these handbook sections is the interest and involvement of vocational education teacher educators across the nation. Appreciation is expressed to the many educators who contributed materials and reviews of the initial drafts. Center staff involved in the development of the Resource Handbook sections include Dr. Richard Dieffenderfer, project director, Ms. Lee Kopp, and Mr. Orest Cap.

Robert E. Taylor
Executive Director
The Center for Vocational Education

4

Preface

Resource Handbook Development

The Resource Handbook for improving vocational teacher education linkage with business, industry, and labor was prepared as resource materials for an EPDA Training Workshop conducted at The Center for Vocational Education, April 18-19, 1977. The training workshop and resource materials development work are part of the activities of a Center project sponsored by the U.S. Office of Education and the Ohio Department of Education, Division of Vocational Education under EPDA Part F, Section 553 as a national priority project entitled: "Improving Business, Industry, Labor Inputs into Personnel Development Programs."

The Resource Handbook has been prepared based on information gathered during literature searches, contributions of individual vocational teacher educators, inputs from the project planning committee and work session review panel, and the development effort and adaption by project staff of ideas thought most appropriate to the needs of vocational teacher education departments. The choice of the eight topics developed in each of these handbook sections was based on the stated needs of respondents to a national survey of vocational teacher education departments conducted as part of project activities for identifying existing business, industry, and labor linkages.

The development of the resource handbook for improving vocational teacher education department linkages with business, industry, and labor was guided by several basic objectives. These included a desire to:

1. Identify various types and sources of information appropriate to the business, industry, and labor interests of vocational teacher education departments;

2. Describe for vocational teacher educators appropriate ways to access and utilize selected business, industry, and labor information resources; and

3. Organize and present resource information in a way that encourages its use in meeting the business, industry, and labor linkage objectives of vocational teacher education departments.

The eight topics featured in the Resource Handbook sections include:

#1 *Staff Development:*
   Creating a Staff Development Plan for Business, Industry, and Labor Involvement.

#2 *Advisory Committees:*
   Utilizing Business, Industry, and Labor Advisory Committees.

Securing Program Support for Business, Industry, and Labor Involvement.

Resource Handbook Feedback

The development of this type of resource handbook series needs the continual input of fresh ideas and reactions in order to make the final product as useful as possible to vocational teacher educators. Inside the back cover of each of the Resource Handbook Sections there is a feedback reaction sheet for submitting your suggestions for improving business, industry, labor, and education linkages. Your ideas are wanted concerning:

1. Suggestions for other linkage ideas and approaches;

2. Linkage problems that are unique to various types/sizes of teacher education departments;

3. Suggestions for references and resource materials;

4. Identification of additional planning steps and procedures; and

5. Additional Comments.

Your professional contribution to cooperative efforts with business, industry, and labor is appreciated.

Contents

Introduction

This part of the handbook section provides an overview of the workshop approach to utilizing business, industry, and labor inputs. The introduction begins with a need statement for the use of workshops in vocational teacher education programs, followed by a statement of the benefits and contributions of workshops to vocational teacher educators, an overview of the parts of this handbook section, and a list of objectives for department faculty that use this handbook section.

Need Statement

Teacher educators and business, industry, and labor representatives all lead very busy work lives, yet there is a need to take time to establish dialogue, to present information, and to attempt to solve problems of mutual interest to the two groups. Workshops—seminars—institutes—and conferences are all different methods used to do this, but they are also similar in that they represent a concentrated short-term group effort to respond to defined needs.

Contributions / Benefits

Workshops and the related types of group efforts have as their main goal the achievement of common goals. Persons with the same interest are brought together in a structured setting to share their expertise and to resolve common problems or at least to arrive at a consensus of the definition of the problem.

A main benefit of the workshop technique is the short concentrated period of time in which participants' efforts are focused on a common issue or problem.

Workshops are a particularly useful in-service activity that can be used by educators to update knowledges, upgrade skills, learn of new concepts, and develop new understandings in regard to some of the changes taking place in business, industry, and labor.

Handbook Section Overview

The term workshop in this handbook section is used as a general term for all those activities that also include seminars, conferences, and institutes. The same type of planning procedures are generally included in all of these activities.

This handbook section is sub-divided into the following parts:

- Introduction—This part of the handbook section contains a need statement, statement of the contributions and benefits of this approach to the department faculty, overview of the handbook section, and a list of objectives for the handbook section.

- The Workshop Approach—Included in this part are descriptions of the basic activities that are common to most workshop planning.

- Alternative Approaches—Suggested alternative forms and procedures are presented in this section to aid departments in developing plans that are unique to their own situation.

- Administrative Details—Part of planning involves investigating and establishing policies and procedures. This part contains suggested items to consider.

- Planning Notes—This part is a step by step listing of ideas designed to help the faculty develop plans for the effective use of workshops by their department.

- Selected References—References in this part include sources of information used in the handbook section as well as additional references that may be helpful to your department.

- Resource Materials—The example materials contained in this part are illustrative of the types of materials you may be developing as part of your department's involvement with workshops.

Developmental Objectives

This handbook section is designed to promote vocational teacher education department *linkages with business, industry, and laobr* through the use of the workshop approach. Based on the reading, adapting, and implementation of the strategies and techniques presented in this section, department staff will be able to more effectively:

1. Plan and implement workshops to provide linkage experiences;

2. Develop related criteria based on department goals;

3. Assess how well workshops are being effectively utilized by the department;

4. Select appropriate strategy(ies) for department needs;

5. Prepare department plan/procedures for organizing workshops;

6. Locate and utilize available, needed reference materials and resource persons; and

7. Design and prepare aids to assist in planning, implementing, and evaluating activities.

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

11

This handbook section is one of an integrated series of eight sections designed for vocational teacher education departments interested in utilizing business, industry, and labor resources in their personnel development programs.

Workshops properly organized and managed can be an effective and valuable method for professional development.

The Workshop Approach

The Workshop Approach part of this handbook section will describe basic activities that are common to most workshop planning. Procedures for planning, conducting, and evaluating workshops will be described under Planning/Preparations Required. This will be followed by Resources Required where budget, responsibility, and resource persons are discussed. A worksheet summarizing the major activities involved in planning, conducting, and evaluating workshops is included in Resource Materials (Figure 5.1).

Planning / Preparation Required

Determine Needs

Workshops should be based on the identified needs of the group(s) to be involved. Needs assessment may be a formal or informal activity through which potential participants are studied to reveal a lack of knowledge or understanding of concepts or skills. Assessment of learning needs is a very important aspect of workshop planning, for if no learning needs are identified then there would be no reason to hold a workshop.

Decisions to be made prior to doing the needs assessment include:

- What is the target audience?

- Are the problems/needs identified?

- When should the needs assessment be done?

- How large an area (geographical) will be approached?

- Who will be responsible for conducting the assessment?

- What aspect(s) will be focused on?

- Should consultants be brought in?

- How will the data be gathered?

- What are some possible limitations?

There are several sources which can be tapped to determine areas needing attention or further development. A comprehensive assessment effort can address the following resources:

- Practitioners;

- Administrators

5.6

- Community representatives;

- Goals nominated by vocational educators;

- Evaluation efforts;

- Recommendations of advisory groups;

- Government resources;

- Professional associations;

- Relevant research; and

- Supervisors.

Due to the difference in training needs, results of assessments would differ in scope and treatment of data. However, the basic process involved in conducting the needs assessment would be similar. The following elements are basic to conducting a training needs assessment:

- Define probable problems, goals, and recommendations;

- Establish desired level of performance;

- Prepare sample statements;

- Develop instrument with statements;

- Conduct survey to determine needs;

- Identify present level of performance;

- Compare present status with desired level;

- Determine priority of identified needs; and

- Assign priorities.

Sample needs assessment questions are included in Resource Materials (Figure 5.2).

Develop Objectives

Once the needs assessment is completed, the scope and setting of goals can be established to initiate programs to correct or change deficiencies. Well-defined objectives are essential to workshop planning. They contribute to the success of a workshop in the following ways:

- Define parameters;

- Establish direction;

RESOURCE HANDBOOK
Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

14

- Give purpose to workshop;

- Provide basis for potential participants to choose workshop;

- Provide guidelines for staff to select potential participants;

- Provide basis for determining learning strategies, materials, etc.;

- Provide basis for determining impact of workshop experience through evaluation; and

- Set realistic expectations for participants.

Needs identified and prioritized through the needs assessment procedure will provide the base of information needed to develop objectives.

The content of objectives is usually classified as one of several types. These statements may emphasize:

- Cognitive objectives—which deal with knowledge to be learned;

- Psychomotor objectives—which refer to skills to be learned; and

- Affective objectives—which refer to attitudes and value formations.

Numerous books exist that provide guidelines for the development of measurable objectives.

Planning by Objectives

How will the objectives of the workshop be met? Planning based on objectives is a useful approach for designing the workshop format. Activities are chosen that provide a realistic approach to meeting stated objectives. Related decisions are then made concerning each activity.

Primary decision: What type of activity(ies) will aid in achieving a stated objective?

Supporting decisions will need to focus on such things as:

- Time required;

- Facilitator (speaker, resource person, etc.);

- Staff required;

- Consultants required;

- Facilities/location;

- AV materials;

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

15

5.8

- AV equipment needed;

- Supplies needed;

- Evaluation techniques; and

- Cost.

A sample planning by objectives worksheet is included in Resource Materials (Figure 5.3).

A sample materials checklist for planning is included in Resource Materials (Figure 5.4).

Plan the Agenda

There are a wide variety of activities and learning strategies to choose from in designing a work-shop program format. Using the learning objectives developed and the information acquired in making the planning decisions as described in the previous section, an agenda can be created.

Information that should be considered in preparing the agenda includes:

- What are the time constraints?

- What is the best order in which to introduce the subject/activity?

- How much time is needed for each subject/activity? Consider audience ability to concentrate.

- Is there a time of day that would be optimal for the activity? When are more active types of activities needed? When will participants benefit most from presentations?

The following are some suggestions for developing effective workshop formats:

- A social hour at the beginning of the workshop is beneficial if participants do not know each other. This could be combined with registration.

- Workshops have greater impact when a few topics are covered in depth.

- Workshop participants gain from having time to discuss, comment, and question after a prepared presentation. Small group sessions may help to facilitate such interaction.

- Intersperse sitting and listening activities with more interactive activities.

- Provide combinations of both small group and large group activities.

- Allow time for participants to move from one activity to another.

- Use alternate learning strategies for variety.

- Obtain feedback and evaluation comments from participants.

A variety of suggested activities and approaches are described in the Alternative Involvement Approaches section of this activity.

When printed agendas are prepared be sure to also include:

- Title of workshop;

- Location and address of workshop site;

- Dates of workshop; and

- Name of contact person.

A sample agenda is included in Resource Materials (Figure 5.5).

Select Facilities

Preparations for securing the workshop facilities should begin early. If the workshop is to be held on the campus or in the community, arrangements for the facilities can be fairly easily made. If the workshop will be held out of the local area, the planners should personally inspect the facilities.

Planning for meeting facilities should include (as needed) a check on:

- Meeting registration space;

- Hospitality suite;

- Meeting rooms;

- Banquet rooms and food service;

- Room for exhibits;

- Tables;

- Chairs;

- Stage, podium;

- AV equipment availability;

- Sound system;

- Participant parking; and

- Room set-up procedures.

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

17

Information you may wish to collect on meeting rooms include:

- Floor plan;

- Size of room;

- Seating capacity;

- Physical characteristics such as stage, pillars obstructing view, etc.

- Electrical outlets;

- Control switch for lights; and

- Location of controls for sound system.

Additional information you may wish to obtain from the facility personnel includes:

- Procedures for processing billings;

- Procedure for handling medical emergencies and messages;

- Procedure for requesting help with air-conditioning or heating;

- Procedure for utilizing public address system if it becomes necessary to page participants;

- Procedure for making room reservations for participants; and

- Procedure for storing luggage if check-out time is before the end of the workshop.

A sample planning facilities arrangements worksheet is included in Resource Materials (Figure 5.6).

Promote and Invite Participants

The pre-workshop information that participants receive before arrival plays an important part in the total workshop experience. It serves as a motivation device. It helps participants decide whether to attend the workshop and helps them set expectations for the workshop. It helps potential participants schedule time and determine finances required. An attractive and informative brochure or flyer sent with the registration form should include information on:

- Objectives of the workshop;

- Brief description of major topics;

- Information on open enrollment or criteria to be used to screen applications;

- Accommodation rates/procedures/times;

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

18

- Registration fees/procedures/times;

- Name, address, phone number of workshop site;

- Contac⁺ person for workshop, address, phone number;

- Name, address, phone number of accommodation site;

- Parking/local travel information;

- Suggested modes of travel;

- Due date; and

- Motivational material such as suggested readings, items to prioritize, or thought-provoking questions.

If enrollment is open, registration forms can be sent with brochures or flyers and application forms.

A courtsey map of the area is also useful to participants.

The types of registration information to be obtained from participants may include:

- Name (title, position);

- Institution/business/union represented;

- Business address;

- Home address;

- Business and home phone;

- Social security number;

- Plans for accommodations/travel; and

- Stated interest in workshop topic areas.

Sample planning worksheets for recording participant responses to invitations are included in Resource Materials (Figures 5.7, 5.8, 5.9).

Participant Accommodations

Several approaches may be utilized for arranging participant accommodations:

RESOURCE HANDBOOK
Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

19

- Participants could be provided hotel/motel reservation forms which they send directly to the hotel/motel; or

- Participants mail in all registration forms to workshop staff who in turn make reservations at the hotel/motel (not recommended for large groups).

Planning is facilitated if a staff person acts as liaison person for the motel/hotel.

Most hotels/motels suggest reserving in advance a block of rooms for the number of anticipated participants. Check to find out how far ahead this block of rooms should be reserved, and check to find the latest date that this block of rooms will be held. Most hotels/motels will provide reservation cards to be sent to the participants. These cards can be included in the pre-conference materials packet. Be sure to mark cards with the workshop title.

Participants should be given information on:

- Room sizes and rates;

- Reservation procedures;

- Deadlines;

- Contact name, address, phone number;

- Additional information required as to designation as workshop participant, etc.; and

- Alternative methods to get to accommodation site from airport, etc.

Conducting the Workshop

The following are some suggestions to help make the workshop run more smoothly:

- Conduct last minute on-site inspection to make sure that needed equipment and materials are in place.

- Someone who is able to make policy-related decisions should be available to take care of unplanned for events.

- If time changes or program changes are made they should be posted on a message board located in a central spot.

- Provide workshop registration list to participants.

- Give directions for finding meeting rooms that may be difficult to locate.

Evaluate the Workshop

Several strategies are appropriate for evaluation of workshops. These include:

RESOURCE HANDBOOK
Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

20

- Daily feedback—conducted daily to provide specific feedback to presenters and planners;

- Final evaluation—designed to assess overall quality and success of workshop;

- Follow-up evaluation—designed to assess impact of the workshop;

- Other strategies—include pretest, posttests instructor's evaluation, and third party evaluations.

Sample evaluation forms and follow-up letters are included in the Resource Materials (Figures 5.10—5.14).

Resources Required

Budget

Planners arranging for workshops most often are working with an allocated sum of money. A budget plan will allow planners to decide ahead of time what "good ideas" can't fit into the budget or where a little more can be spent for those extra "nice items."

Budgeting for workshop planning expenses may include:

- Printing costs;

- Postage;

- Office supplies;

- Salaries;

- Travel expenses;

- Telephone expenses; and

- Material and equipment storage expenses.

Budgeting for presenters and participants may include:

- Transportation to site;

- Local transportation;

- Speaker fees;

- Accommodations;

- Any other per diem expenses; and

- Preparation time.

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

21

5.14

Budgeting for workshop program activities may include:

- Meeting rooms;

- Banquet rooms;

- Hospitality suite;

- Meals;

- Coffee break;

- Equipment;

- Decorations;

- Gratuities;

- Special set-up charges;

- Custodial expenses; and

- Preparation of workshop materials.

Budgeting for post-conference expenses may include:

- Printing;

- Postage;

- Report writing;

- Photo processing; and

- Transcribing presentations.

Responsibility for Planning

One person should be assigned who is responsible for coordinating all planning, implementation, and evaluation activities. The proportion of the coordinator's time that would be committed to the workshop is dependent on the scope of the workshop and the planning and follow-up time required.

Additional personnel needed include clerical help and supportive services sta

If the scope of the workshop is large and a number of staff are available, it may be possible to subdivide staff into planning groups with specific responsibilities.

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

22

Resource Persons/Speakers

Finding the right resource persons/speakers for the workshop is very important. Suggestions for locating and contacting resource persons are given in the handbook section *Resource Persons*. See also the sample worksheet for recording information in Resource Material (Figure 5.15).

Information to be Given to Resource Persons/Speakers

Once the resource person has agreed to participate, the following information should be provided to the resource person in writing:

- Purpose of conference;

- Type of talk/help desired;

- Number and type of participants;

- Length of time needed;

- Copy of tentative program;

- Person responsible to prepare materials; and

- Financial arrangements agreed upon should describe;

    —Travel;

    —Per diem expenses;

    —Honorarium;

    —How payment will be made;

    —Paperwork required;

    —When payment will be made;

    —Accommodation arrangements; and

    —Transportation arrangements.

Information to be Provided by the Resource Persons/Speakers

A list of information to be provided by resource persons includes:

- Date and time arriving/departing;

- Special materials/equipment needs;

RESOURCE HANDBOOK
Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

23

- N..eded paper work information;

- Biographical material (if needed); and

- Prior copy of speech (if desirec).

Hospitality Arrangement at Workshop

A list of items to be considered when making arrangements for resource persons includes:

- Person is designated to greet speaker;

- Speaker is shown conference arrangements;

- Speaker is introduced to other head table guests;

- Check on speaker's needs/expectations; and

- Process paper work is necessary for payment of speakers.

Small Group Sessions—Chairpersons/Recorders`

. When preparing for a workshop, time must be set aside to identify persons who will be responsible to act as chairpersons and group recorders. Once individuals have been selected, provide each with a brief description of their responsibilities.

Guidelines should include:

- Names of persons in their groups;

- Where to obtain necessary equipment, supplies, materials;

- Type of material to be included in report (significant discussions, recommendations, conclusions);

- Whom reports should be submitted to;

- Time use guidelines during session; and

- Types of activities to be included.

Sample small group procedures are included in Resource Materials (Figure 5.16).

Alternative Approaches

Alternative forms and procedures for planning and conducting workshops are presented in this section. Alternatives presented include types of meetings and alternate learning strategies and exhibits. Special themes/topics related to workshops are included at the end of this part of the handbook section. These suggestions should aid departments in developing plans that are unique to their own situation and needs.

Other Procedures / Purposes

Types of Meetings

Workshops—Workshops are usually used for training purposes to meet needs of the participants. Activities include a variety of large and small group sessions. Participants are considered to be part of the resources.

Conferences—Conferences are usually used for problem solvii g and fact-finding. Activities include a variety of large and small group sessions. Participation of attendees is expected.

Institutes—Institutes are usually used for training. Activities include a variety of large and small group sessions. The staff provides most of the resources.

Seminars—Seminars are used by groups of experienced persons to share experiences. Activities usually include a small group session under the guidance of a group discussion leader. There is a great degree of attendee participation.

Clinics—Clinics are used for training, with participants being trained by clinic leaders. Activities include one-to-one, small and large group activities.

Alternate Learning Strategies

Brainstorming—In brainstorming, participants spontaneously express their thoughts about a specific problem. It is a let-yourself-go session that calls for ingenuity and creativity in seeking a solution to a problem. Brainstorming is used to elicit both numerous and unique ideas.

Case Study—The case study provides a description of a realistic situation that the workshop participants are encouraged to consider and for which they resolve problems as if they were personally involved.

Cracker Barrel Sessions—A type of group discussion session that provides for discussion that moves freely and adjusts to the expressed interests of the participants. Unstructured group discussion should be conducted as informally as possible.

Demonstrations—Demonstration is the procedure of doing something in the presence of workshop participants either as a means of showing them how to do it themselves or in order to illustrate a point. The workshop leader should be sure that the demonstration meets a necessary instructional need. The effectiveness of this instructional technique depends on the participants having a clear view of what is being presented.

Group Discussions—Structured group discussions are characterized by adherence to a topic or a problem for which the participants want to arrive at a decision or conclusion. This type of discussion is generally directed by a group moderator.

Hands-on experience—Participants are actually involved in trying out or creating a technique or product. This often follows a demonstration.

In-Basket—This technique is used to develop decision-making skills which focus on participants' abilities to set priorities and carry out tasks. Workshop participants are asked to assume the roles and responsibilities of specific staff members. They are provided written information in memo form about a number of tasks that they must complete. Workshop participants must determine which tasks they would attend to and in what order.

Panel Discussion—A panel consists of a group of experts on a particular issue or problem who participate in a discussion on the topic and/or answer questions raised by workshop participants.

Role-Playing—Role-playing is an instructional technique in which workshop participants assume roles other than their own. During the workshop structured settings are described and participants have the opportunity to express feelings, work out problems, and experience other persons' roles.

The objective of a role-playing situation might be to suggest alternative solutions to a problem, to gain an understanding of another's feelings, or to gain an experience in new situations. The situation should be clearly presented to workshop participants.

Simulation—A simulation is a representation of significant or central features of reality that requires the workshop participants to become actively involved in working through an experience rather than merely witnessing it. Simulation is a broad term and includes many techniques such as in-basket, case study, role-playing, and gaming.

Site Visits—Site visits include trips to local business and industries and educational facilities.

Speaker—This is a more formal way of presenting information and is most effectively used in the keynote activity. This is an efficient way of presenting information to a large group of people. A drawback is the lack of audience participation.

Symposium—A symposium consists of a group of brief presentations on various aspects of a particular issue or problem. Generally, after the prepared presentations, speakers participate in discussion and/or answer questions raised by workshop participants.

Exhibits

Exhibits and displays provide an additional attraction to the workshop program. Advance planning is required to develop lists of potential exhibitors, develop exhibit guidelines, and schedule participation of exhibitors at the workshops.

In contacting potential exhibitors the following should be provided:

- Promotional workshop information;

- Guidelines for exhibits;

- Application forms for needed information; and

- Deadline date for participation.

As a follow-up procedure send a confirmation letter to exhibitors upon receipt of application forms.

Persons and/or companies that might wish to provide exhibits include:

- Publishing companies;

- Equipment companies;

- Consultants; and

- Directors of exemplary programs.

See sample exhibit worksheet in Resource Materials (Figure 5.17).

Special Themes / Topics

Important to the process of studying alternative approaches for using workshops as a training and development technique is realizing just how many things might be done by the department. Included below are some suggestions for themes, topics, and groups that might be included in workshops designed to involve business, industry, and labor representatives. This is the start of a brainstorming list; you are encouraged to add to it:

1. Governor's conference on business, industry, labor, education cooperation;

2. Statewide conference on improving linkages with business, industry, and labor;

3. Department staff development workshop on business, industry, and labor involvement;

4. Business, industry, labor involvement programs added to national teacher education association meetings;

5. Orienting the public sector to the needs of education;

6. Orientation meeting for resource persons and participants involved in business, industry, and labor education programs;

7. Workshop on entrepreneurship through vocational education;

8. Seminar series: Contributions of labor to the community;

9. Labor education in the vocational education curriculum;

10. Apprentice instructors teacher training workshop;

11. Understanding apprenticeship: What is it? How does it work?;

12. State of _____: Teacher educators plan for business, industry, and labor linkages;

13. Exemplary business, industry, and labor linkage programs in the state;

14. Business, industry, labor, and education cooperation success stories;

15. Business and industry staff development programs;

16. Training techniques in the world of work;

17. Vocational education in emerging educational settings;

Administrative   Details

This part of the handbook section contains suggested items to consider in investigating and establishing policies and procedures. These items are followed by a Planning Steps Checklist which gives an overview of the major items to be considered in planning workshops.

Examine   Existing   Policy / Procedures

Even the best designed workshops can often be hampered by unanticipated instructional/contract rules and regulations. The following are some areas which should be investigated early in the planning stage:

- What are departmental/institutional/contract regulations regarding registration fees?

- What are departmental/institutional/contract regulations regarding budgeting/paying for meals/refreshments?

- What are departmental/institutional/contract procedures/regulations for ordering equipment and supplies?

- What are departmental/institutional/contract procedures for contracting for facilities and/or meals?

- What are the procedures for reimbursement?

- What are the procedures for payment of speakers, consultants, resource persons?

Establish   Policy / Procedures

Open/Closed Enrollment

The decision to have open or closed enrollment has implications for much of the planning involved in the workshop. Open enrollment is defined as enrollment that is not limited to a specific number of participants or not limited to persons meeting specified criteria. Closed enrollment is enrollment that is limited either by number and/or criteria. The decision as to type of enrollment affects:

- Budget;

- Facilities (size of rooms, number of chairs, etc.);

Accommodation planning;

Refreshments/meals;

Registration procedures; and

Invitations and printed materials.

Registration Fee

If a registration fee is to be charged and the necessary clearances have been obtained, it is necessary to decide if this will be paid by registrants through the mail or if it will also be collected at the time of registration.

Establish a policy on checks, check cashing, and refunds.

Establish a procedure for the recording and safeguarding of fees collected until they are deposited.

Develop receipt forms and establish policy for recording receipt of fees.

Reimbursement Procedures

The need for reimbursement can occur in several instances:

Speakers and resource persons will be reimbursed,

A contract may provide reimbursement for per diem or travel expenses for participants.

Needed reimbursement forms should be developed/obtained. Necessary information/criteria for reimbursement should be shared with the involved participants.

Planning Steps Checklist

The purpose of the Planning Steps Checklist is to give an "at a glance" listing of the major specific items that are involved in planning for the use of workshops to increase business, industry, and laobr inputs into vocational teacher education programs.

☐ Determine audience

☐ Determine needs

☐ Develop objectives

☐ Clearance procedures

☐ Determine date and length of conference

☐ Determine conference site

☐ Prepare a budget plan

☐ Determine conference format

☐ Plan by objectives

☐ Develop facility arrangements

☐ Prepare invitations

☐ Determine participant transportation

☐ Determine participant accommodations

☐ Determine local travel arrangements

☐ Determine needed staff arrangements

☐ Arrange for consultants/speakers

☐ Acquire materials/audio-visual equipment

☐ Plan agenda

☐ Plan promotion

☐ Arrange for refreshments/meals

☐ Plan exhibits

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor

5.26

☐   Prepare workshop evaluation

☐   Send follow-up letters

☐   Prepare final report

Planning Notes

This section is designed to assist you in working out plans for the effective use of workshop activities/approaches by your department. These points are based on the specific items identified in the Planning Steps Checklist. The purpose of these Planning Notes worksheets is to focus attention on gathering information, organizing details, and defining department objectives that are critical to involving business, industry, labor representatives in this type of activity/approach.

List of Planning Notes Topics:

1. Determine Audience:
   What is the potential target audience?
   Anticipated needs?
   Number to be involved?

2. Determine Needs:
   What methods might be used to assess needs?
   What needs have been identified?

3. Examine Support:
   What potential funding sources are available?

4. Determine Clearances:
   What institutional clearance procedures/paper work are required?

5. Determine Staffing:
   What staff/faculty will be involved in planning/conducting conference?
   Who will be given responsibility as the coordinator?

6. Determine Agenda:
   Waht are some approaches to be used in conference format/agenda?

7. Select Media:
   What audio/visual materials should be considered?

8. Select Site:
   What are potential sites/facilities? Why?

9. Make Participant Arrangements:
   What information is needed on transportation plans?
   What information is needed on accommodations?

10. Arrange for Resource Persons:
    What speakers/consultants could be considered?

11. Plan Exhibits:
    What types of exhibits could be displayed?

RESOURCE HANDBOOK
Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

34

12. Prepare Evaluation Instruments:
    What types of information should the evaluation instruments collect?

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

35

1. Determine Audience

What is the potential target audience?
Anticipated needs?
Number to be involved?

2. Determine Needs

What methods might be used to assess needs?
What needs have been identified?

3. Examine Support

What potential funding sources are available?

4. Determine Clearances

What institutional clearance procedures/paper work are required?

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

37

5. Determine Staffing

What staff/faculty will be involved in planning/conducting conference?
Who will be given responsibility as the coordinator?

6. Determine Agenda

What are some approaches to be used ir conference format/agenda?

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

38

7. Select Media

What audio/visual materials should be considered?

8. Select Site

What are potential sites/facilities? Why?

RESOURCE HANDBOOK

Improving Vocational Teacher Education Department Linkages With Business, Industry, and Labor
The Center for Vocational Education — The Ohio State University

9. Make Participant Arrangements

What information is needed on transportation plans?

10. Arrange for Resource Persons

What speakers/consultants could be considered?

11. Plan Exhibits

What types of exhibits could be displayed?

12. Prepare Evaluation Instruments

What types of information should the evaluation instruments collect?

Selected References

This part of the handbook section lists selected reference materials that pertain to effectively planning and conducting workshops. In addition to these materials, each service area has a multitude of organizations and publications that are related to that particular service area. The library should be helpful in identifying these. You are encouraged to add to this list.

Figure 5.1   Conference Planning Check List

General needs for workshop planning can be assessed through the use of open-ended questions or it may be useful to provide semi-structured responses.

Sample Question

1. What work sites do you feel should be used for learning?

    School buildings

    Labor union buildings

    Business/Industry facilities

    Other _____ _____.

Sample Survey Question

Statements	Level of Agreement				
	Strongly Agree	Agree	Neutral	Disagree	Strongly Disagree
1. Advisory Committees should be used to evaluate programs	SA	A	N	D	SD
2. Business/Industry and Labor must be tapped for its resources	SA	A	N	D	SD

Add below any promising idea not mentioned in this list which you feel should receive prompt attention.

Sample Survey Question

Level of Importance						Need for Staff Development				
None	Little	Some	Much	Great		None	Little	Some	Much	Great
1	2	3	4	5	1. Improve opportunities for inservice vocational personnel	1	2	3	4	5
1	2	3	4	5	2. Improve the methods for evaluation of vocational personnel	1	2	3	4	5

Figure 5.2   Samples of Needs Assessment Questions

Sample Survey Question

Criteria for Evaluation	Low Importance			High Importance		Medium Importance		Comments
1. Number of Vocational Teachers employed	1	2	3	4	5	6	7	
2. Recruitment procedures to identify potential teachers from industry	1	2	3	4	5	6	7	

Sample Survey Question

Statements	Priority of Needs				
	Low 1	2	Medium 3	4	High 5
1. Ensure that preservice preparation of vocational personnel meets present and emerging needs	1	2	3	4	5
2. Prepare an adequate supply of qualified vocational personnel for each leadership role	1	2	3	4	5

*Once you have completed the ratings: please go back and circle the item numbers of the 10 statements which, in your opinion, MOST URGENTLY NEED ATTENTION.

Workshop Agenda

EPDA Training Workshop

Improving Vocational Teacher Education Department
Linkages With Business, Industry, and Labor
Workshop

The Center for Vocational Education
The Ohio State University
Columbus, Ohio

April 18-19, 1977

TRAINING WORKSHOP OBJECTIVES
The experience of this training workshop is designed to:

1. Stimulate greater involvement of vocational teacher education
    departments with representatives of business, industry, and labor.

2. Provide a training setting that will involve participants
    in activities that will answer their questions and help
    resolve problems concerning improved linkages with business,
    industry, and labor.

3. Introduce a series of resource handbook materials that are
    designed to assist vocational teacher education departments
    in improving their linkages with business, industry, and labor.

4. Provide opportunity for sharing ideas, and generating new
    ideas concerning the use of various techniques and programs
    for more effective involvement of business, industry, and labor.

5. Promote the development of vocational teacher education department
    and/or individual staff plans for the utilization of techniques
    or programs for more effective involvement of business, industry,
    and labor.

This training workshop and resource materials development
work are part of the activities of a Center project sponsored by
the U.S. Office of Education and the Ohio Department of Education.
Division of Vocational Education under EPDA Part F, Section 553
as a national priority project entitled: "Improving Business,
Industry., Labor Inputs into Personnel Development Programs".

Workshop Evaluation

Improving Vocational Teacher Education Department
Linkages With Business, Industry, and Labor
Workshop

The Center for Vocational Education
The Ohio State University
Columbus, Ohio
April 18 & 19, 1977

Purpose:

This questionnaire has been designed to help the project staff assess the quality of the workshop and to determine the extent that it has met your expectations.

How Well Were The Seminar Objectives Achieved?

Indicate, by circling the appropriate rating, how well the following workshop objectives were achieved.

Objectives	Extremely well		Adequately		Not at all
1. Stimulate greater involvement of vocational teacher education departments with representatives of B-I-L	1	2	3	4	5
2. Provide training setting involving participants in activities to help answer their questions, resolve problems concerning improved linkages with B-I-L	1	2	3	4	5
3. Introduce a series of resource handbook materials that are designed to assist in improving linkages with B-I-L	1	2	3	4	5
4. Provide opportunity for sharing and generating new ideas concerning the use of various techniques/programs for more effective involvement of B-I-L	1	2	3	4	5

(Letterhead)

April 6, 1977

Two months have passed since the (title) Workshop was held at (address).

As you are aware, the workshop had as a major objective the establishment of closer ties with the private sector. You are now in a position to give us some measure of your use of the documentation distributed at the workshop and specific changes you might have implemented.

Thank you for your participation at the workshop and assistance in completing the enclosed questionnaire. Please return this instrument by (date).

Sincerely

(name)
Workshop Director

JAC/caj

Figure 5.13   Sample Follow-Up Letter

1. Have you initiated any changes as a result of your participation in the workshop?

    _____Yes   _____No

2. Do you plan to implement changes?

    _____Yes   _____No

3. Did you have to prepare a written report for your institution after the workshop?

    _____Yes   _____No

4. Did you have to make an oral report?

    _____Yes   _____No

5. Since the workshop have you disseminated any information?

    _____None   _____Partial   _____Entire

6. Did you distribute copies of the workshop materials to:

    _____Department Chairperson
    _____Dean
    _____Faculty
    _____Teachers
    _____Other (please specify_____)
    _____No one

7. Please rank the skills listed below in terms of their usefulness since completion of the sessions. If any of the skills have not proven useful, please rank them "0".

    Rank   Skill

    _____ 1.

    _____ 2.

    _____ 3.

    _____ 4.

INFORMATION SHEET

WORKSHOP SMALL GROUP DISCUSSION SESSION PROCEDURES

The most concentrated period of involvement for the workshop participants will take place during the small group discussion sessions. There will be four concurrent small group discussion sessions for a part of the morning and afternoon program. The participants will select two of these sessions, one in the morning, and another in the afternoon. In order to make these sessions as useful as possible for the participants this information sheet has been prepared as a guideline for conducting the small group sessions.

Suggested Discussion Session Format:

The following steps are suggested as a way of organizing the group session to make most efficient use of the available time. All persons involved are encouraged to assist in keeping the discussion moving and on target. Format for the group session includes:

1. Moderator review group discussion topic with participants.

   -Set the stage for topic discussion.

   -Describe session presentation and discussion format.

   -Describe Recorder's summary sheet to be used.

   -Direct attention to the two resource handbook sections related to the topic and the feedback suggestion sheet.

2. Moderator presents brief introduction of resource persons.

3. Participants introduce themselves and identify areas of B-I-L interest or involvement.

4. Resource persons start discussion with their 10-15 minute presentation of their activities, and ideas/suggestions for B-I-L involvement.

5. Open discussion and question and answer period with all persons contributing.

6. At end of session Moderator and Recorder summarize topics discussed and apparent group concensus on issues and recommendations.

7. Group session adjourned and participants rejoin next workshop general session.

8. Moderator and Recorder check notes for Recorder's Presentation.
