STATISTICS OF PRIVATE HIGH SCHOOLS AND ACADEMIES, 1927-28

Statistics of 2,448 private high schools and academies for the school year 1927-28 are contained in this report. The principal items tabulated are: Instructors; pupils; graduates; volumes in libraries; value of grounds, buildings, and contents; student enrollments by subject; and data in detail for each school having 100 or more secondary pupils.

Reports were received from 2,350 schools in 1926 and from 2,448 in 1928. These schools reported 18,025 instructors and 248,076 secondary pupils in 1926, and 20,333 instructors and 269,249 secondary pupils in 1928. The number of pupils graduated increased from 40,715 to 46,189 during this 2-year period. No material change is noted in the percentage distribution of pupils among the four high-school years since 1926, although changes have taken place since 1920 and earlier years. In 1920, 36.1 per cent of the enrollment were in the first year, and 16.6 per cent in the fourth year. In 1928, 31.5 per cent were in the first year, and 19.6 per cent in the fourth year. This reduction in the proportion of pupils in the first year, and the increase in the fourth year indicate better conditions concerning promotions, and an increase in the holding power of the schools. Expansion of the junior-college idea may also be a factor, since 11,200 pupils were registered for work beyond the fourth high-school year.

While the number of schools reporting has increased but 200, or 8.9 per cent over the number reporting in 1915, the number of secondary pupils enrolled has increased 73.6 per cent, the number in the fourth year increased 88.7 per cent, and the number of graduates increased 107.3 per cent. This indicates the tendency to larger schools, rather than more schools. The number of colored pupils of secondary grade is smaller for 1928 than for 1920, or for any year since 1920, although it represents an increase of 30 per cent over 1915.

Military drill was given to 15,006 boys in 1926, and to 16,528 in 1928. The greatest number of boys in military drill in schools of this type was reported for 1918, when 31,532 boys received military training.

Practically all of these private schools are organized on the regular 4-year basis, and only a very few reported either junior or senior departments or divisions. No attempt is made, therefore, to compile statistics for reorganized schools or to report them separately from other schools.

¹ Students above fourth year not included.

Information given in Table 10 shows the number and percentage of pupils enrolled in specified high-school subjects by 5-year periods from 1890 to 1915, and for 1922 and 1928. For the years previous to 1910 the percentages are computed upon the total number of pupils enrolled in all schools reporting to the bureau regardless of whether or not they reported subject enrollments. Beginning with 1910 the percentages are based upon the number of pupils in schools reporting enrollment by subject.

Since 1900 more pupils are enrolled in English than in any other one subject. From 1900 to 1915 English enrollments were those for rhetoric and English literature. In 1922 the schedule asked for English enrollments by year of course and these were combined into a total. In 1928 the schedule asked for enrollments in English, including rhetoric, composition, and literature. While the figures are not exactly comparable from one period to the other, English enrollments seem to show an upward trend from about 71 per cent of the enrollment in all schools reporting in 1900, to 94 per cent of the pupils in schools reporting subject enrollments in 1928.

Among the other languages, Latin leads as usual, and has increased from 31 per cent of the total enrollment in 1890 to 56.5 per cent in 1928. With the exception of a slight increase in the study of German, the modern foreign languages show decreases since 1922.

The percentage enrollments in mathematics, physics, chemistry, and general science show little, if any, change since 1922. There is a slight falling off in all history courses, and a decided drop in enrollments in English history. Biology shows an increase, but physiography, botany, and other sciences show decreases. Both manual training and home economics show decreases, while the social sciences show increases. Problems of American democracy appear as a high-school subject in 1928 for the first time, with an enrollment of 1,764 pupils. Community civics and general civics combined about equal the percentage reported previously for civil government as a single subject.

Tables 11 and 12 show subject enrollments by sex and the number of schools reporting each subject by States, for the United States, and for the outlying parts of the United States.

58620°—29—2

Beginning with 1910 the percentage of pupils in each study is based upon the number in the schools reporting studies. In previous years the percentages are based upon the total number of pupils in all schools reporting.

TABLE 11.—Secondary pupils pursuing certain studies
