PRIVATE HIGH SCHOOLS AND ACADEMIES, 1921-22.

For the 1921-22 school year 1,963 private high schools and academies sent to the bureau schedules complete enough to include in this bulletin. Every State reports schools under this classification excepting Nevada. The outlying possessions Hawaii and Porto Rico sent in reports.

The number of schools reporting decreased about 6 per cent since 1920. This decrease can not be charged to any particular type of control. There is a substantial increase in the number of graduates from these schools. There is a slight increase in the total enrollment over 1920. The average number of students per school has increased from 56 in 1900 to 96 in 1922. There has been no increase in the enrollment for the first three years of secondary work. There is an increase in fourth-year enrollment, and a still greater increase in students taking work above the fourth year, where the increase over 1920 is 61 per cent. This latter increase should lend encouragement to the advocates of the junior college. The increase appears to be in the enrollment of white girls, and particularly in girls' schools.

Table 18 of this report contains a list of these private high schools and academies having an enrollment of 100 or more students. This table serves as a directory of the larger schools, and relates some of the important facts about each institution.

The bureau has gathered high-school enrollment by subjects every five years since 1890, with the exception that the last collection of these data was in 1922 instead of in 1920. Tables 13 and 14, inclusive, present the facts as reported to the bureau. So many different interpretations were given to the enrollments in subjects in English that it was thought best to include, as far as possible, students enrolled in one or more courses in English. The English data, then, are not comparable with those for previous pentads in rhetoric and English literature. A complete discussion of the trends in enrollment by subjects is reserved for the Statistical Survey of Education.

TABLE 1.—Review of statistics of private high schools and academies, 1890 to 1922.
