Holidays & Deliveries Holiday season will soon be upon us!

Your regular delivery schedule may be interrupted due to one of the major holidays. Customer Service will notify you of any changes in delivery day and order deadline **approximately 4 weeks** before your regularly scheduled delivery. Your regular delivery schedule will resume after the holiday.

If your delivery is cancelled due to a holiday, you may request an "off-schedule" delivery. This is a special circumstances request and may be requested through your Customer Service department. Not all requests can be granted, as we are working with only so many hours, drivers, and trucks available. Please hold your requests until officially notified by your Customer Service agent that the route in question has been cancelled.

UNFI will do everything we can to get you your desired products during this busy season. If there are items you can purchase early, we suggest you do so to avoid last minute out of stocks.

Next Edition

In October's Tool Box, we will detail how to read the unfi.com Member Invoices.

United Natural Foods Eastern division operates
warehouses in:

Atlanta, GA; Chesterfield, NH;
Dayville, CT; Greenwood, IN;
Iowa City, IA; York, PA;
and Sarasota, FL.

Policies & Business Information

Over twenty five years ago a group of visionary companies shared the goal of bringing healthier and more natural food to people across the country. Those companies—Mountain People's Warehouse, Cornucopia Natural Foods, Stow Mills, Rainbow Natural Foods, Blooming Prairie Cooperative and Northeast Cooperatives—shared a commitment to nourishing people, communities and the planet. Today, as United Natural Foods, that commitment is stronger and deeper than ever and is manifested in a proactive concern for the environment, a reverence for the land and sustainable agriculture and the importance placed on core values and social responsibility in the way we do business.

United Natural Foods, Eastern Region, operates distribution centers in: Atlanta, GA; Chesterfield, NH; Dayville, CT; Greenwood, IN; York, PA and Iowa City, IA. We supply a broad selection of natural and organic products to stores, institutions and consumer buying clubs throughout the region.

BUYING CLUB SERVICES: To assist our Buying Club customers, UNFI provides Web Ordering at no charge. Web ordering simplifies operations with features such as:

*Consolidates member orders into one order for the warehouse

*Member IDs print on warehouse pick labels for quicker distribution

*Simplifies case sharing among members

*Electronic invoice processing generates individual member's invoices

Visit our site at www.unitedbuyinclubs.com for more information on Web Ordering, buying club resources, suggestions on how to best organize and operate your club, news, and other information.

For effective and efficient communication between United Natural Foods and your buying club all communication should be funneled through your buying club coordinator for specific issues, such as credits, ordering, or delivery arrangements.

TERMS: Standard terms for all orders are COD.

Checks returned unpaid (bounced) are subject to a \$25 penalty and the loss of volume discount. When paying for your delivery, make sure your account number and group name are on the check.

DELIVERY PROCEDURES: Our drivers work hard to keep their deliveries on time and provide good service. Please help them stay on schedule by following these procedures:

- Select an easily accessed delivery site where a tractor trailer can be easily maneuvered. Avoid cul-de-sacs, dirt or gravel roads, and low-hanging wire or viaducts. Final approval of delivery sites rests with the Transportation Department. The safety of our customers, our drivers and everyone at the delivery site is of primary concern.
- Each customer will be assigned a regular delivery day based on our truck schedules in the area. UNFI will make all efforts to keep your delivery schedule as consistent as possible, but it is subject to change.
- Delivery time of day may vary from delivery to delivery.
- Customers are responsible for unloading the truck using our unloading procedure. Drivers will either bring the product to

the back of the truck for your group to unload or use a lift gate to lower it to ground level. A minimum of three adults from your buying club must be present to unload your order.

- Credits for frozen and refrigerated product can only be issued by the driver at the time of delivery. Customers are responsible for carefully checking all frozen and refrigerated product for errors or damage before the driver completes the paperwork. The driver can issue credits for other missing, mis-picked or damaged goods at the time of delivery.
- The grocery or dry items are a piece count. The driver will give you the number of boxes that are to be on the truck and your group counts the number of boxes.
- To help the driver get to his/her next delivery on time, your group will need to go through repacks after the driver has gone.
- Any repack or grocery errors will need to be handled through the Claims process (Claims & Adjustments below).
- Customers are responsible for signing each invoice to acknowledge that all items billed have been received in good condition or credited.

PICKUP ORDERS: Appointments to pick up your order may be made when placing your order. Pick up hours are:

- Atlanta - 8am-4pm M-F
- Chesterfield - 7am-2pm M-F
- Dayville - 8am-2pm M-F
- Iowa - M, W, TH & F 8am - 2pm; TU 8am-5pm
- Greenwood - 8am-4pm M-F
- Moundsview - M, W by Appointment
- York - 9am-5pm M-F
- Sarasota - 8am-5pm M-F

A \$350 minimum order is required for orders picked up at the warehouse. Pickup times must be scheduled in advance. We are unable to make any changes to your order the day you pick it up. Payment is by check or money order only—no cash. The warehouse is extremely busy, so please follow these procedures: The customer is responsible for checking the order against the invoice.

- Please send two people to transfer product to your vehicle.
- Groups may not breakdown the order at the warehouse.
- For safety reasons, no one under 18 is allowed in the warehouse.

MINIMUM ORDERS: Orders picked up at our warehouses: \$350. Delivered orders: \$750, unless a higher minimum is assigned by Transportation due to your location and distance from the warehouse or our routes.

MINIMUM ORDER FREQUENCY: Like other wholesalers, United Natural Foods sets minimum order size and order frequency required for service on our delivery routes. Order cycles are assigned by the Transportation Department and are once every four weeks.

SALES TAX: Sales tax will be applied to all taxable products purchased by buying clubs unless we have a valid resale tax certificate on file. Tax is based on your delivery location.

VOLUME DISCOUNTS: Volume discounts apply to most

regularly priced items. Volume discounts are not applied to items already on sale, deposits, fees and selected products. For a list of products not subject to volume discount, contact your buying club coordinator. If your volume discount is more than a monthly special discount, the volume discount will apply. Your volume discount level is reviewed and assigned twice per year, based on your purchase history, although we are happy to make adjustments at any time for groups whose orders are increasing. Coordinators with questions about volume discounts can contact Buying Club Services (see Who to Contact in the front of this pricelist).

ORDERING INFORMATION: Customers are encouraged to place orders using our Web Ordering. Orders may also be placed by telephone, fax, or email. Orders are generally due three days before your truck leaves, however, earlier deadlines may be assigned. Telephone orders are taken Monday - Friday on an individually scheduled basis. When calling, please have your entire order ready, including your customer number and product ID numbers and be prepared to make substitutions if necessary. Ordering Phone and Fax Numbers: see Who To Contact in the front of this pricelist Fax cover sheets and email orders should include your order person's name and phone number in case there are questions about your order, as well as your UNFI customer name and account #.

PRICING POLICIES: Your order is priced based on the DAY YOUR TRUCK LEAVES THE WAREHOUSE. Prices are not guaranteed and rapidly changing market conditions may result in occasional price changes.

RAINCHECKS: Rainchecks are available for out of stock or mispicked sale items. Rainchecks will be honored on your next scheduled order for the quantity ordered but not received in the previous order. Rainchecks are not available for: unadvertised specials/short date sales; discontinued products; and holiday-only items. How to get a Raincheck: Request rainchecks from the Sales Department when placing your order. If you use Web Ordering include your raincheck requests in the comment section. Include the product number, quantity previously not received and the sale price. Rainchecks are not issued by the credits department and no adjustments will be made after shipping.

CREDITS & ADJUSTMENTS: One person from your group should be responsible for communication with us and follow through for all claims for your members.

Frozen and Refrigerated Items: Credits for frozen and refrigerated product can only be issued by the driver at the time of delivery. Customers are responsible for carefully checking all frozen and refrigerated product for problems before the driver completes the paperwork.

Credits & Adjustments at Delivery: The driver can issue credits for other missing, mis-picked or damaged goods at the time of delivery.

Policies & Business Information

Requesting a Credit after Delivery: All credit and return requests must be made within FIVE business days of delivery. A Credit Memo will be issued upon approval by your Claims Representative and will be applied or attached to your next invoice. Once the driver has left your site, frozen and cooler items cannot be returned and will not receive credit.

How to Request a Credit: There are 4 options for requesting credits. For accurate and timely processing of your credits, please follow these guidelines:

1. Use the Credit Request Form on our website, OR
2. Fax your request to 877-842-6352, using the correct Claims Form.
(To get the form, call 800-451-2525, select option 3, then option 5 and leave your fax number; we will fax you the form.), OR
3. Email your request to: erclaims@unfi.com. When emailing, be sure to include your customer name and number, the invoice number, the product number and description, the quantity and the reason for the credit. When reporting a mis-pick you must include a detailed description of the item you received in place of the item you were billed for (include brand, size and product description), OR
4. You may also call and speak to a claims representative, 8 am to 4:30 pm (Eastern Time) Mon-Fri. Call 800-451-2525, select option 3, then option 5. When calling, please leave ONLY your name, daytime phone number where you can be reached, your customer name and customer number. A Claims Representative will return your call. Do not leave details of your request on voice mail.

Acceptable grocery credit categories include: Undelivered Sales: Items invoiced but not delivered. Mis-picked Items: Received another product in place of product ordered (right label, wrong product); Please report the UPC number of the item received. Quality: Item is unusable due to manufacturer's defect, such as no safety seal, moldy; Please report the expiration date or lot number of the item received. Damaged Product: Product arrived damaged. Short Dated Products: Items past their sell-by date; Please report the expiration date and purchase date to the Claims Department. For Product Dating guidelines, please see our website. Freezer and Cooler Items cannot be returned. To insure product quality and integrity for all our customers, we do not accept returns of frozen or refrigerated product.

Return Guidelines: All claims must have prior approval by the Claims Department before returning. Your UNFI Claims Representative may determine because of the condition of the product that the contents may be discarded; however you may be requested to return the UPC code or lids. All products must be returned in saleable condition, in original cases. Full case items must be returned with all the pieces. Product that is not returned in saleable condition will be debited back to your account.

Restocking Fee: We will charge a 10% restocking fee on goods which are returned due to customer ordering error.

ALBERT'S ORGANICS: Produce from Albert's Organics is available to customers ordering from our Chesterfield New Hampshire warehouse. Please note that Albert's policies and procedures differ from those printed here. Contact your Albert's sales rep for information.

How to Get a Buying Club Pricelist

Buying Club pricelists need to be ordered on your regular monthly order the month prior. For example, when you place your order in June and you are wanting July catalogs, you will need to add that item number to your regular order that you place in June to be received on the truck delivery. The cost for each catalog is \$1.50. They are sold individually. Listed below are all of the item numbers that correspond for each month's catalogs.

#0282079 JANUARY	#0282095 FEBRUARY
#0282111 MARCH	#0282129 APRIL
#0281956 MAY	#0281972 JUNE
#0281980 JULY	#0281998 AUGUST
#0282012 SEPTEMBER	#0282038 OCTOBER
#0282053 NOVEMBER	#0282061 DECEMBER

Pricelists are available to view and download from www.unfi.com with Log In information.

A Sweet Way to Save a Tree

In the North West corner of the African Country of Zambia, lies the Miombo forest. One of the last of the earth's biologically diverse ecosystems, it spreads over 11,000 square miles of untouched land. Pressure to harvest these trees for fuel and commercial purposes is high as it is in all of timber-starved Africa, but for over 500 years, the subsistence farmers of the region have been producing honey from the flowering trees. Two Peace Corps volunteers created Zambezi Honey to help improve the lot of the regions farmers and prevent deforestation.

Zambezi Organic Forest Honey is produced by wild bees that harvest pollen from the untouched flowering trees of the forest. It is sustainably harvested by over 5,000 registered organic beekeepers using traditional wild crafting techniques. Zambezi Honey adheres to the Peace Corps values of helping others and giving back. Due to its Fair Trade principles, beekeepers are paid an average of 40% above the prevailing market price for honey and are given training and education on sustainable beekeeping, agriculture and small business skills. The result is simply the finest organic honey in the world. You can taste the forest in its complex, lingering rich yet subtle flavor and because the honey is truly raw, it contains all the bioflavonoids, enzymes and antioxidants of fresh from the hive honey. Zambezi Forest Honey is certified 100% organic so you can be sure that you are eating honey the way that nature intended without contaminants, antibiotics or GMO pollen. GMO crops are banned in Zambia.

Because of its fair trade practices, Zambezi Honey beekeepers enjoy a 100% increase in their income. This helps provide money

for schooling their children and for health care. In addition, Zambezi Honey donates a portion of their profits back to Zambia to aid in malaria prevention, HIV/AIDS education, school scholarships and rural-income generation grants. Try Zambezi Organic Forest Honey. It's a healthy treat for your taste buds and a wonderful way to preserve an irreplaceable forest.

The Little
Berry
that could

Save
the
Rain Forest

It has been said that the Amazon jungle is the lungs of the earth. Here, millions of trees breathe in green house gasses like carbon dioxide and breath out oxygen. The Açaí palm is one of the more important trees in this jungle. It grows in the floodplains and swamps along the great river. It is so important to the region that it is protected by law, but it has an often-fatal attribute. Its leaves produce the "hearts of palm" that are a "millionaire's salad" across the globe. Sadly, when the leaves are harvested for their tender hearts, the tree dies. The Wall Street Journal, in a 2002 article, estimated that up to 10,000 trees a week were being illegally destroyed by *palmiteiros* or palm poachers.

However, the Açaí palm also has another edible crop, its berries. Each palm tree produces two crops of fruit a year, and what a special fruit it is! Known to the natives since before Columbus as a diet mainstay, the world is discovering that the Açaí berry has an almost unbelievable nutritional value. Studies have shown that it is a powerful antioxidant and anti-inflammatory. It contains high levels of fiber and monounsaturated essential fatty acids as well. Rich in vitamins and minerals, Açaí is quickly being recognized across the globe as a "super fruit."

As demand for Açaí juice grows, so does its value and it is becoming more profitable to keep the trees alive for their berries than destroying them for their "hearts of palm." Açaí juice is available from Harvest Bay™. Try it, you will be doing your body a big favor and saving the rain forest at the same time.

RENEWABLE ENERGY

United Natural Foods® focuses on non-renewable energy reduction.

One of the most important goals any home or business can set for themselves is to conserve the earth's natural resources by minimizing consumption of non-renewable energy. Using renewable energy sources such as solar, wind, biomass and low-impact hydropower is an excellent way to reduce your building's ecological footprint and save money.

One example of an on-site renewable technology is solar power. Solar panel systems have been around for decades and are made up of an array of solar panel cells, also called Photovoltaic (PV) cells. These cells convert sunlight to direct current (DC) which can then be inverted to Alternating Current (AC). The AC electricity produced can be used to supply electrical power to any device or equipment for your home or business. In the past, solar panel systems were typically held to a certain structural requirement in order to generate the most amount of energy. Today PV manufacturers have been able to improve cell efficiency, allowing for smaller, more efficient panels which have a smaller up front cost and can be installed on rooftops, building tops, or as stand-alone facilities. In addition, there are many state and federal programs available for home or business owners that help to further reduce the cost through the use of tax credits or grants. As a result, solar panel projects are now more affordable than ever. For information about incentives that may be available in your area, visit www.dsireusa.org and www.nrel.gov/ncpv/ for basic information on PV systems and incentives.

Here at United Natural Foods®, we are committed to reducing our impact on the environment and have recently completed our first solar panel project, a 1.19 megawatt array placed on the roof of our Rocklin, CA distribution center. The system is expected to generate over 1.5 million kilowatts of clean energy annually, which is enough power to run more than 180 average American homes for a year! We are very proud of our accomplishments in Rocklin, but our commitment does not end there. We have also begun construction on another solar panel project across the country at our corporate headquarters in Dayville, CT. That system will include 3,146 panels for a total system size of 550 kilowatts. When completed, the Connecticut system is expected to generate over 600,000 kilowatts of clean energy annually, enough to power 67 average New England homes for one year! According to the Connecticut Clean Energy Fund (CCEF), and other industry sources, when complete, this project will be the largest solar power system in New England.

These solar projects are just some examples of how United Natural Foods® is reducing our environmental footprint. We invite you to contact us with any questions about our projects, or our other environmental initiatives by emailing us at greenteam@unfi.com for more information.
