MR. BOUTWELL AND THE FOREIGN BANKERS.

There is little reason for the disappointment that has been expressed in some quarters as to the delay of the European bankers in responding to the proposals for Mr. Boutwell's new loan. We bave frequently suggested the probability that in presence of the demand for capital which would be developed with the close of the war, any new financial negotiation from this country would be slow in attracting attention. The German and French governments are of course expected to require considerable funds to meet their immediate requirements for disbursement, and the position of the Bank of England has awakened some solicitude, espe. cially as rumors have been put in circulation that a second advance in the rate of discount was imminent. The increase in the stock of bullion in that institution indicates, however, that its authorities have been adopting prudential expedients to provide beforehand against the drain of gold, and that they have ceased to depend, as heretofore, on the Bank of France and other sources to check the temporary outflow of the precious metals. It so happens that at this moment there are several other loans besides our own which have just appeared in the London market. One of them is that i millions of dollars, and to meet the constantly recurring

ot Brazil, which being small will doubtless be successful. Another less popular is from Russia. The amount is only 60 millions of dollars, but it has stirred up a discussion as to the attitude of the Czar during the late war. The Emperor Frederic William positively affirmed in his dispatch to the Czar that Russia had prevented the war from spreading. The London Morning Post and other authorities explained this by saying that just before the war a secret treaty was signed between Russia and Germany, by which it was agreed, that if the French were successful in the first campaign, Russia should interfere. If Austria made any military demonstration, the Czar was to march an army to the frontier, and in the event of any European Power joining France Russia was to help Prussia. In return for these stipulations Prussia engaged to give moral support to Russia in her Black Sea projects, and especially in her attempts to neutralize the concessions induced by the Crimean war, and to shake herself free from the fetters imposed by the treaty of 1856. The existence of such an understanding has long been suspected. But that it was the subject of a treaty is officially denied by the Russian The denial is supported by Le Nord, a Government. well-known journal at Brussels, which is usually well informed on Russian topics. In that paper we find a letter from St. Petersburg, which affirms that it was hostility to Russia which induced the victorious Germans to demand from France the cession of Alsace and Lorraine. This writer goes on to argue that as long as Germany can hold the impenetrable Vosges frontier, and the great quadrilateral made by the four fortified centres-Metz, Thionville, Strasburg and Belfort-she will be protected in her rear against any hostile movements on the part of France, and will then be able without fear to pursue any designs against Russia in an easterly direction. There may be something in these apprehensions, and on them were perhaps founded the unconfirmed reports last Thursday that Prussia was willing to give up Alsace and Lorraine for a pecuniary consideration. The favorable conclusion of the Black Sea conference has not wholly set these questions at rest. They form an interesting chapter in the history of the war, and no doubt we shall hear more of them hereafter.

Another point raised in regard to this Russian loan, is the unsatisfactory state of the finances of that government. It has been pointed out that ever since 1832 every year has brought a deficit, and that the public debt has been steadily increasing year by year till it has reached the aggregate of 690 millions of roubles, or 600 millions of dollars. Besides this, the forced circulation of irredeemable paper has reached the aggregate of 656 millions; while the expenditure of the army alone consumes from 90 to 100 deficit the paper money circulation has more than doubled in the past ten years.

It is not improbable, however, that all these questions which are agitating the financial magnates of Europe will soon be adjusted. And if the prospects of Mr. Boutwell's negotiation in Amsterdam, London or Frankfort are likely to be embarrassed it will not be from any such causes. The new bonds are not yet printed, but he has the plates ready. In accordance with the law each bond states that the loan is redeemable "in coin of the standard value of the United States, on July 14th, 1870, with interest in such coin payable quarterly, both the principal and the interest to be exempt from the payment of all taxes or duties of the United States, as well as from taxation in any form by or under State, municipal, or local authority."

EUROPEAN ARMIES AND THEIR COST.

For several years past the armies of Europe on a peace footing have withdrawn three millions of men from productive labor and have annually cost440 millions of dollars. It has been predicted by some persons of political sagacity that the last quarter of the nineteenth century like the first will be devoted to war. The explosion of the long pentup ambition and rivalry of France and Prussia for the place of leader in the politics of the old world, has, howover, disclosed two things which may help to administer an antidote to the threatening war mania. First, the destructive appliances of modern military science are so enormously augmented that wars hereafter are likely to be short and terrific in their losses. Never in the previous history of the world have so many men been slain in war as in the three months between the first shot at Saarbrück on the 2d of August and the final capitulation of Metz on the 28th of October. Secondly, with the present facilities for moving large masses of men any country at war is liable to be overrun in a few weeks by concentrated hosts of invaders, who may destroy in a single campaign the wealth accumulated in centuries. The devastation and suffering of France will be for all time a warning of the punishment modern civilization visits upon any people who go to battle for an idea, and seize the terrible scourge of war at the bidding of revenge, ambition, glory or conquest. Up to this time the excuse for the large armaments of the European Powers has always been that Napoleon kept up such large military forces " for the protection, security and power of France," that no neighboring nation could afford to disarm. The armament of the French Emperor was a standing menace to Europe, and he bears much of the blame for the prodigious armies of disciplined troops, the existence of which is certainly discreditable to this age of liberty, progress, scientific philanthrophy, and boasted intelligence.

As France is disabled and prostrate, and finds herself under such heavy bonds to refrain from war and to be at peace, it might seem as if the chief reason for such vast armies would be disposed of. England, however, does not appear to cherish such peaceful prognostications. And the tone of newspaper discussions in Belgium, Russia, Germany, and even France itself, is far from reassuring. In this state of doubt the following table of the magnitude and the cost of the armies of the several Enropean powers will be of interest. The figures are drawn from official reports nearest to the beginning of the year 1870:

TABLE OF THE STRENOTH AND COST OF EUROPEAN ARMIES.

	Annual	Number of	Men C	ost per 1	1
	expenditure.	Peace.	War. S	oldier.

* New organization.

From this table it will be seen that there are three ways by which in the old world armies are raised : by enlistment, by conscription and by national armament. Enlistment stimulated by bounties or otherwise, was formally general in Europe. It still survives only in England and in the United States. England has just remodelled her army, but she has left the principle of enlistment undisturbed. The other changes, however, amount to a complete revolution. ' The aristocratic organization of the army has been destroyed by abolishing the sale of commissions. Thirty-seven millions of dollars are the cost of this single change. How it will work depends of course on the other means used to selec officers possessing courage, honor, education and ability to command. The aggregate of the new army consists of 431,-779 men of whom the Artillery are 68,600; the Cavalry, 26,952; the Engineers and Infantry, 79,410. The standing army is thus 192,327. To this aggregate the volunteers add 130,386; and the organized Reserves complete the total of 431,779. The military system is to be reconstructed ; the country is divided into military districts, the field artillery is to be improved and the repeating rifles are to be the arm of the infantry. Heretofore the army has been less regarded and England has relied for her protection from foreign enemies upon her navy alone. The navy is now a front line of defense, and a more formidable army than England has ever previously had is to be placed behind it.

Prior to the recent changes the army of England was therefore small. In conformity with the individualism and impatience of restraint which for centuries have characterized the turbulent inhabitants of Great Britain, military service has always been voluntary. Forced service can not be resorted to to fill up its regiments however great the crisis. For home service alone can militia duty be compelled. The law allowing compulsory levies has been rarely put in force, and has slumbered for more than half a century. During the troubles of 1847 the organizing of the national armament or militia was contemplated, but the idea was given up as unpopular and useless. In the navy, however, which is the grand defensive bulwark of England, forced service has always been legal in time of war under the sanction of a law passed in 1379; and incidentally recognized in many later acts of Parliament. While the navy has always been regarded with indulgence and pride by the English; a standing army has been treated with suspicion and fear as a probable instrument of arbitrary power. The famous Bill of Rights of 1690 declared that "the raising or keeping a standing army in time of peace, unless with the consent of Parliament is against law." This fundamental principle of the British Constitution is guarded as sacred and the army is only continued from year to year. And for its support two distinct laws have to be passed by Parliament, either of which if defeated would disband the army. The first is the supply bill, and the second the mutiny bill, which is necessary to military diseipline. Without this annual law the soldier would be liable merely to the civil tribunals, and would be amenable to no other laws than the rest of the citizens. Last year the British army cost £14,093,500, or about one-fifth of the whole revenue of the Government. The army expenses average for each soldier about £100 a year, including all extraordinary expenses. The net cost of each British soldier is abont 394 dollars, or about twice as much as in any other

army in Europe. The ordinary cost per man, under the new organization now in progress, will probably be lessened eventually, but for the first year or two the extraordinary expenses of the changes making will be of necessity large.

The second method of filling the ranks of an army is by onscription. France claims to have discovered this effective weapon of military ambition. Napoleon laid down the axiom that every million inhabitants yields by conscription 7,000 to 8,000 conscripts a year. The French law was originated in 1793 by the National Assembly. The new Republic seemed at its last gasp. Money to pay hired troops not being at hand, the system of hiring was given up, The mass of the citizens were to take the place of the old professional veterans. The patriotism of regenerated France was appealed to and the example of Rome was cited, whose armies were raised by means of the conscriptio and the legio-all citizens capable of bearing arms being enrolled, and a certain portion being chosen for actual service in the field, Gradually the French conscription was perfected in two artieles, first that all men between 20 and 25 capable of fighting should be enrolled, and secondly, that the Government call for so many soldiers every year, the individuals being chosen by lot. This system gave to, the consummate generalship of the first Consul a million of men, and notwithstanding the bloody wars and frightful slaughter of the following years, it put Napolcon at the head of 1,200,000 men when he set out on this fatal campaign, which ended at Moscow, broke his power, and changed the destinies of Europe.

The army of France was reorganized in 1868, and was classed into three divisions-the active army of 404,192 men, the army of Reserve, 200,000, and the National Guard Mobile, 390,000 men. This law fixes the service in the active army at five years, at the expiration of which the soldier enters the Reserve for four years more. Men who have not been in the activo army serve four years in the Reserve and five years in the National Guard Mobile, There are thus two different careers open to a soldier. He may begin in the active army or he may begin in the Reserve. Which of these two services each man shall adopt is settled by lot. If a man be drawn for the reserve he is not allowed to get a substitute; but if for the active army he may escape military service by a fine charged to him as the price of a substitute, but seldom spent for that purpose of late years. Hence one of the numerous sources of the defective numbers and general inefficiency in the French army which made it when badly handled and badly supplied, outnumbered and out-generalled, an unequal match for the victorious Germans in its most obstinate and hard-fought combats. The military organization of France is about to be changed, and conscription seems likely to be abandoned for a method more like that of Prussia.

This we referred to above as the third system of raising soldiers-that of national armament. This system was forced on Prussia by Napoleon alter the battle of Jena and the treaty of Tilsit. It was agreed that Prussia should never keep more than 42,000 men under arms. This stipulation was intended to annihilate the power which Frederick I. had built up by his victories won by enlisted troops against overwhelming Austrian, French and Russian armies. General Scharnhorst, the Von Moltke of that day, devised a subtle scheme for converting the whole Prussian nation into soldiers without breaking the letter of the treaty. He kept up the army of 42,000 men always in camp, but he made a well-contrived organization for renewing this number constantly. He kept each man in eamp just long enough to give him a good military training and sent him

objects were gained of the highest possible military value. First the skeletons of the various regiments were always kept up so that raw and less experienced men were always flanked by veterans, and each citizen not only had his place in the army organization, but was drilled and disciplined to its duties. Secondly. The army was capable of swift. mobilisation; and in 1813, after four years' drill, its prowess was triumphantly exhibited in driving Napoleon out of Germany. This system was modified in 1813 and reformed in 1861. The law is now that every man not disabled by health or want of physical aptitude shall receive military instruction and enter the army for a certain number of years. There are some exemptions from military service, but substitution is prohibited. Personal, service is Imperative, and every Prussian is enrolled as a soldier as soon as he has completed his twentieth year. His service lasts seven years-from the age of 20 to 23 in the regular army and from 23 to 27 in the army of reserve. For nine years more he enters the "Landwehr," and is liable to frequent drills and to forced service in the regular army in time of war. From 36 till the age of 50 the Prussian serves in the "Landsturm," which is only ealled on for home service. Thus every man is a soldier, with a few exceptions in favor of the nobility, the clergy, and a few other orders of the people. The aristocratic constitution of the army is kept up in various methods, among others by an arrangement that a certain amount of education and fortune shall allow a man who can buy his own equipment and pass a slight examination to serve one year in the regular army instead of three years. With few exceptions, then, the whole male population of Prussia is trained to arms, organized in permanent bodies, and is ready for defensive warfare within the country till the age of 50, and for offensive or defensive warfare in the mobilized army from the age of 20 to that of 36. How such an organization as this must exhaust Prussia, and how it will work when applied in Southern Germany, where it is new, offers one of those difficult and doubtful problems which are destined to put German statesmanship to a severer test than any with which it has had to deal since the title of Emperor of Germany was resigned by Francis II. and the Empire was finally dissolved on the 12th of July, 1806. The army of Germany is one of the least expensive in Europe. It is settled on the basis that the sum of 225 thalers is to be allowed for every soldier on active service.

These then are the three methods of armament in use in Europe: 1. That of enlistment with which we are best acquainted is disused everywhere else but in England, where it will probably long survive for reasons which we have suggested above. 2. The method of conscription which, with various modifications, is in force in France, Prussia, Austria, Belgium, Greece, Italy, Netherlands, Portugal, Spain, Sweden, Turkey. Till their incorporation with the German Empire conscription was also established in the South German States. 3. The system of forced general service in the army has been copied from Prussia by Switzerland as well as by Norway and Sweden, and prospectively by Republican France. Switzerland has, however, from her small resources, no standing army properly so called, and her military expenses are less than those of any other country in Europe.

RAILROAD EARNINGS IN FEBRUARY AND FROM JANUARY 1 TO MARCH 1.

he made a well-contrived organization for renewing this number constantly. He kept each man in eamp just long enough to give him a good military training and sent him home again, replacing him with a fresh recruit. Thus two

month of 1870. The roads, indeed, are so differently located, and liable to have their earnings affected by such different causes, that a general movement, either upward or downward, is now seldom noticed in the duller months of the year, when there is no heavy transportation of cereals or other produce, and local traffic, together with the through business rendered necessary by the absolute demands of trade, constitute the whole business.

Among the old roads, Chicago and Alton, Marietta and Cincinnati, Michigan Central, Ohio and Mississippi, and Toledo Wabash and Western show a fair increase in earnings ranging from \$23,266 to \$113,538, as shown below; while on the other side, Illinois Central shows a decrease of \$96,373, and Milwaukee and St. Paul \$55,367. Central Pacific shows an increase of \$86,909, and Union Pacific a decrease of \$104,370 in gross earnings, though a decrease also in expenses and a consequent increase in net receipts of \$87,285. It will be observed that the Marietta and Cincinnati and Ohio and Mississippi roads are among those which show an improvement in earnings, a fact which is worth noticing, since it is probably due in part to the completion of the bridge over the Ohio river at Parkersburg. The increase in the receipts of these roads should be still more marked after the change to narrow gauge has been effected in the Ohio and Mississippi, although the full benefit of that change will not be apparent in the reports of gross receipts, but should be felt also in a large decrease of expenses.

For the month of March earnings may be affected to some extent by the lower tariff on through freights which has just been adopted by the New York Central and Hudson River Railway, the Eric and the Pennsylvania Central lines to the more important western points are as follows:

FREIGHT LIST. Per ewi. for first-class goods, including dry goods, boots and shoes and gene-

For the two months of the year which have now clapsed, earnings generally show much the same results as in Febr lary, the same roads showing balances on the side of decrease. There seems every prospect, however, that as the year goes on the business done upon the old established lines will be equal to that of last year; upon the new roads, an increase, of ecurse, is to be expected. Upon the basis of last year's traffic a paying business may be anticipated where roads are managed with economy. The steady progress of railroad traffic for several years past has been such as to give every encouragement to parties pecuniarly inter-

ested in this property, whenever ability is shown in the management; on the other hand, the desire on the part of officers to extend their lines by leasing or constructing new roads and branches has often been carried so far, as to saddle upon good roads a large amount of heavy expenses without any adequate remuneration.

DEBT AND FINANCES OF LOUISIANA.

DEBT AND FINANCES OF LOUISIANA. The present public debt of this Commonwealth represents the value of such public improvements as the people desired and the State had not ready money to pay for, and it was contracted for the purposes, mainly, of improving the Mississippi levee, for building railreads, for perfecting the drainage system, and for other public works. The State is rich in natural resources, and the com-merce of New Orleans constitutes a strictly business source of large wealth, the taxes on which furnish the Stato a handsome revenue of themselves. The course pursued in regard to the payment of the public obligations has been such as to reflect credit on the good faith, financial soundness and integrity of the Commonwealth, despite the fact that the laws for raising the revenue are among tho most imperfect of any in our country. The alteration of these laws, however, has been urgently recom-mended by the financial officers, and there has been propounded a needed by the financial officers, and there has been propounded a scheme for codifying them, which, if adopted, will, it is believed, render the Louisiana revenue laws specific, easy, and economical

scheme for codifying them, which, if adopted, will, it is believed, render the Louisiana revenue laws specific, casy, and economical in operation. The recent condition of the finances shows a large absolute increase of indebtedness, although this increase is not very large when viewed relatively to the resources of the State. During the yoar 1670 bonds to the aggregate of \$6,214,000 were issued in the sums and for the purposes thus specified : January 3, \$80,000 in favor of Boeuf and Crecedile Navigation Company (mature January 3, 1890): March 1, \$3,000,000 in favor of work done or to be done on the levees of the State (mature March 1, 1875); January 1, \$134,000 for payment of indebtedness to J. P. Kennedy (payable January 1, 1890); May 1, \$3,000,000 to previde for the payment or funding of the floating debt of the State, by the issue and sale or exchange of State honds issued to defray expenses of building levees. The fiscal year closed November 30, 1870. On that day the total State debt of Louisiana amounted to \$22,589,628 41, of which the following are the gross items: liabilities for property in banks, \$4,838,933 33; debts proper in trast funds, \$868,195 08; debts proper in bends maturing and matured between the years 1867 and 1909, \$16,848,685; certificates of indebtedness, issued under Act No. 5, of 1866, \$33,815. REVENUE AND TAXATION.

REVENUE AND TAXATION.

The revenue of Louisiana is collected by tho "Parish," and at the

The revenue of Louisiana is collected by the "Parish," and at the close of the last fiscal year there remained uncollected from the different parishes, and due betwen 1861 and 1870, taxes to the amount of 44,340,647 71. This sum includes State tax, mill tax and poll, interest and levee taxes. The total taxable value of all the real and personal property in Louisiana is about \$1,220,000,000. The State government rate per cent of taxation is 4 mills on the dollar. The total amount réceived into the Treasury during the past fiscal year, from all sources, was \$7,498,440 95. Of this aggregate, \$960,481 58 was the balance in the Treasury at the beginning of the year, and \$703,380 55 were received as uncollected taxes, for the years between 1861 and 1869, inclusive, leaving the net amount raised by taxation during 1870, \$5,834,578 72. The revenue is obtained from licenses and from taxation, applied to real, personal and between 1861 and 1869, inclusive, leaving the net amount raised by taxation during 1870, \$5,834,578 72. The revenue is obtained from licenses and from taxation, applied to real, personal and chattel property, and to invested capital, and to monetary and incorporated institutions. The amount of interest to be paid on the bonded debt during the current year, will be \$!,168,840. The total amount of the State government's expenditures (including general fund, interest, and all other accounts) during 1870, were \$7,131,302 11. This amount was \$367,138 84 less than the total receipts of the year; but it exceeded the strictly net income for the year by \$1,296,723 39. This draft, however, on the resources of the State is not considered too heavy for them; and there is every reason to believe that the State of Lonisiana will promptly discharge the principal and interest of its obliga-tions as they mature.

State in aid of private enterprises. He also recommends that the expenses of keeping up the Levces should now be placed upon the riparian owners, as the \$5,000,000 already spent by the State is enough to place them in as good condition as they were in 1860. A recapitulation of the several items of Receipts and Expen-ditures for the fiscal year shows the following:

DEBT AND FINANCES OF TENNESSEE.

The debt of Tennessee was contracted principally for internal improvements, and by far the larger part for railroads; there is also a liability of the State on the old bank of Tennessee notes amounting to about \$1,500,000. At the close of the last fiscal year, ending September 20th, 1870, the total debt of the State was stated at \$35,539,802, as follows:

Ronds losued railroad companies	27,618,500 8,324 600 663,000 102,060 80,000 7,200 130,804 890,756

Indoreed londs..... 330,000 00 105,000 00 136,600 00 591,500 00 During the fiscal year the amount of \$4,512,850 in bonds and coupons was paid into the State Treasury by solvent railroad com-panies to whom they had been loaned; these payments being authorized to be made in Tennessee bonds at par, by the act of January 20, 1870, which thus affords the companies an oppor-tunity of extinguishing their indebtedness to the State upon which they have been paying full interest, in bonds, purchased by them at the current price of 65 or thereabout.

ASSETS.

The Comptroller estimates the assets of the State, consisting of its interest in railroads, to which credit has been loaned, as follows:

ESTIMATED RESOURCES.

Table showing the indeblednes of railroads to the State, and estimated value upon the same, as follows:

FIRST CLASS-SOLVENE BOADS	WHICH PAY INTEREST	
Name of Railroad.	Estimated value.	Indebtednese.
Memphis and Charleston	.]	\$1.934,343
Memphie and Ohio Mississippi and Tennessee.	TTT auth du 11	2,467,993

Bouldwestern-worth nothing		553,790
Mineral Home-funds in bank	40,000	109,000

Total..... \$21,962,844

Since the close of the fiscal year at least, \$2,825,000 more, of the debt owing by the solvent roads has been paid, of which the Nash-ville and Decaur road paid over \$3,700,000 extinguishing all its

ville and Decatnr road paid over \$2,700,000 extinguising an its debt to the State. The estimate of the Comptroller above given of the value of the State's interest in Railroads is considered by parties well informed upon the subject to be about fair; some of the roads would in all probability bring less than the amount assigned for them, but others are worth at the present time more than the Comptroller's estimate; allowing, however, a reasonable insign of \$3,000,000 for the uncertainty, and there would still be about

\$16,006,957

\$19,000,000 of these assets, which, if realized, would reduce the State debt to \$19,539,802. It will be remembered that the interest of the State in these railroads was actually advertised to be sold on the 3d of November, 1870, but that the sale did not take place, on account of the peculiar character of the interest offered for on account of the peculiar character of the interest offered for sale, and the uncertainty as to the extent of the title which could be conveyed to the purchasers. The question is now before the conrts of the State, and a decision is daily expected, which it is said will probably be in favor of the State and establish the right to sell her interest in the roads and convey an absolute title in the same way as any other owner or mortgagee.

REVENUE AND TAXATION.

The Comptroller furnishes the following statement of the assessed valuation and of the taxes collected in the fiscal years ending in 1869 and 1870:

	Valu			ollected-
	1869.	1870.	1869.	1870.
East Tennessee	\$45,342,139	\$53,365,914	\$335,223	\$106.797
Middle Tennessee	93,635,353	112,348,948	636,540	224,703
West Tenuessee	82,409,538	87,168,012	539,880	173,935
Total	\$221 387 030	\$252,882,874	@1 511 644	@K05 497

The receipts and disbursements the last fiscal year were as follows:

ing sources : т.

The State has been exceedingly embarrassed in her revenue account from several unfortunate but temporary causes. *First*— The rate of taxation has not been as high as it should have been The rate of taxaton has not been as high as it should have been to provide for ordinary expenses and to make any provision for the Interest on the debt; it has been twenty cents on the \$100. Second—The assessments of property in different counties have been entirely unequal and in numerous cases far below value. Third—The obligation on the part of the State to accept the old perhod the conservation permet of two here to construct the Third—The obligation on the part of the State to accept the old Bank of Tennessee notes in payment of taxes has so reduced her available revenue that the Comptroller says the tax receipts of 1870 would fall short 66 per cent of paying the current expenses of the State Government. The old bank notes are sold by, specu-lators to tax-payers who would otherwise pay in currency, and this is often done by collusion with the Collectors who share the profits. Fourth—There have been no adequate penalties for non-payment of taxes on real estate, so that taxes have often been evaded entirely. Fifth—Collectors have not been responsible men and have defrauded the State to a large amount, the delin-quencies of Collectors, Clerks of Courts, &c., amounting Sept. 30 to the energous of \$1,283,115. PRESENT FINANCIAL CONDUTION

PRESENT FINANCIAL CONDITION.

PRESENT FINANCIAL CONDITION. The Comptroller urgsd very strongly upon the Legislature the necessity of passing laws to remedy the evils complained of, and some measures have been taken in pursuance of his suggestions. The State, as we have seen before, ie taking the necessary steps to sell all her interest in Railroads. A second step of great im-portance was accomplished in passing the law raising the rate of taxation to 60 cents on the \$100, and increasing also the rate on privileges, from which alone it is hoped that a revenue of \$600,000 will be received. A similar tax of 6 mills is likewise imposed on the net earnings of railroads and other corporations. The same law contains stringent provisions for obtaining a cor-rect and equitable assessed valuation of property, under which it is estimated that the amount returned will be increased from \$252,882 in 1870 to nearly \$400,000,000. The taxes for schools heretofore levied by the State are now left to the counties, and we hear that they are generally levying fair taxes for this purpose, averaging from 2 to 3 mills. Since the Comptroller's report \$250,000 of the old bank bills have been destroyed by the Treasmere, and \$250,000 more are now in his hands which will also soon be burned. It is expected that a new funding bill will be passed in October,

It is expected that a new funding bill will be passed in October,

1871, by the Legislature then convening, and provision made for 1871, by the Legislature then convening, and provision made for resuming the payment of interest on the State debt Jan. 1, 1873, paying then the coupons for interest of the previous six months. The payment of current expenses for the State Government, and the clearing up of all floating liabilities including the \$1,000,000 of old bank notes will be accomplished, it is said, by the revenue of 1871 under the new laws as noted above. By the present con-stitution of the State no new debt can be created except by a law submitted to the people and passed by a two-third vote. The submitted to the people and passed by a two-third vote. The Railroads to which the State had previously made promises of assistance were necessarily excepted from this provision; the addi-

assistance were necessarily excepted from this provision; the addi-tional loans or endorsements for such roads, however, will not probably amount to any considerable sum. It will be seen from the foregoing review that the finances of Tennessee are apparently in a more hopeful condition than for some time past, and that the improvement is not more shown by the prospect of an important increase in revenue, than it is by the spirit which has been evinced by her Legislature and State a higher rate of taxation, a fair assessment of property, and an ultimate provision for the payment of debts.

CHANGES IN THE REDEEMING AGENTS OF NATIONAL BANKS.

The following are the changes in the Redeeming Agents of National Banks since the 9th of March, 1871. These weekly changes are furnished by, and published in accordance with an arrangement made with the Comptroller of the Currency.

LOCATION.	NAME OF BANK.	REDEEMING AGENT.
Kewance	The First National Bank. The Bellefontaine National Bank	The Third National Bank of Chi- cago, approved. The Central National Bank of N. York, approved.

Statistics of Commerce and Navigation.

Monthly Report No. 6, of the Bureau of Statistics, now in press, gives the statistics of our foreign trade during the month of December, 1870, and the calender year ended the same, compared with the corresponding periods of 1869. Mr. Edward Young, the Chief of the Bureau, furnishes the following synopsis:

Periods.	Imports.	Domestic exports, (apcele values.)	For. exports.
Month ended December 31, 1970 Month ended December 31, 1869	\$33,939,845 80,293,478	\$ 15,569,092 43,517,4+9	\$1,815,779 3,151,877
Twelvo months ended Dec. St. 1870	496,790,015	453,905,409	80,660,116
Twelvo months ended Dec. 81, 1869.	403,424,421	863,458,770	22,273,229

The proportions of the foregoing shipped in American and foreign vessels respectively during the calender year of 1870, were as follows:

American yessels Forcign yessels	Imports. \$151,912,888 331,867,130	Domestie exports, (mixed values), \$187,206,426 \$19,742,968	For. exports. \$11,459,983 16,200,133
1010-0-100	CALXNDEE YEAR		
American vessels. Foreign vessels. The proportions of t of merchandise and sp the following table :	he foreign trad	\$160,910,815 903,963,461 o for 1870, which	For. exports. \$15,848,408 13,421,821 consisted e shown in

The value of foreign commodities remaining in warehouse De cember 31, 1870, was \$55,620,635, as compared with \$51,763,413 in 1869.

cember 31, 1870, was \$55,555,555, as compared with \$51,755,415 in 1869. It will be noticed that there is a marked improvement in the disproportion between imports and exports in the last as compared with the previous calendar year, the excess of imports in 1869 being \$68,692,422, and in 1870 only \$2,214,493. An examination of the above tables also shows that over 73 per cent of our entire foreign trade in 1869, and over 79 per cent in 1870, were carried in foreign vessels and vehicles.

carried in foreign vessels and vehicles. The values of the principal commodities imported and exported during the calendar years 1870 and 1869 were as follows:

A. S. HATCH.

BANKING AND FINANCIAL. HARVEY FISK.

Office of Fisk & Hatch, Bankers, } No. 5 Nassau street, New York, March 11, 1871. THE CHESAPEAKE AND OHIO RAILROAD.

A NEW TRUNK LINE FROM THE SEA-BOARD TO THE WEST.

is already completed and in operation' from Richmond to the celebrated White Sulphur Springs, 227 miles, and there remain hut 200 miles, now under construction, to complete it to the Western terminas on the Ohio River, 315 miles below Pittsburg, at the head of RELIABLE AND CONTINUOUS navigation. .

The completed portion of the Road is doing a GOOD LOCAL BUSI-NESS, which will be enormonsly increased as it progresses and opens the immense mineral riches of Virginia and West Virginia, whose coal and iron are celebrated for their quality and abundance, and would alone enrich the means of communication which affords them access to the markets East and West.

The advantages of the Chesapeake and Ohio Railroad AS A GREAT EAST AND WEST THROUGH LINE for the transportation of the heavy freights (which constitute the principal part of the East and West through traffic), are numerous and important.

1. A short route between the Atlantic coast and the Great West.

2. Low grades.

3. Light curves.

4. A Genial climate, which admits of safe, economical, and rapid railroad operation throughout the year.

5. East and West termini at favorable points on tidewater and the Ohio River.

6. A very large through and local traffic awaiting its progress.

7. A comparatively light capital and debt, and consequently a light tax upon traffic for payment of interest and dividends.

All these conditions favor a cheap and economical working of the line, and will enable the Chesapeake and Ohio route to do a profitable East and West through, business at rates which would not pay by the more difficult and costly lines, and to control an enormous South-western through trade.

We are now authorized to sell an additional amount of the FIRST MORTGAGE 6 PER CENT GOLD BONDS of the company, at the original price of 90 and accrued interest.

The Bonds are secured by a mortgage upon the entire road franchises and property of the company, WHICH NOW, IN COM-PLETED ROAD AND WORK DONE, EXCEEDS THE ENTIRE AMOUNT OF THE MORTGAGE, and which, when completed, will be worth at least \$30,000.000.

A Sinking Fund of \$100,000 per annum is provided for their redemption.

They are issued as Coupon or Registered Bonds, and in denominations of

\$100, \$500 and \$1,000.

Interest payable May and November, in the City of New York.

The superior advantages, valuable property and franchises, and able and honorable management of the Chesapeake & Ohio Rail road Company, render it one of the most substantial, reliable and trustworthy Corporations in the country, and commend its Securities to the unhesitating confidence of capitalists and investors. Pamphlets, maps and full particulars furnished upon applica. tion.

FISK & HATCH, Bankers.

BANKING HOUSE OF HENRY CLEWS & CO., 32 WALL ST., N. Y. Our business is the same as an incorporated bank.

Deposit accounts can be opened with us in either Currency or Coin, subject to check without notice. Five per cent. interest will be allowed on all daily balances. Checks upon us pass through the clearing house as if drawn upon any city hank.

We issue Circular Letters of Credit for travelers, available in all parts of the world ; also Commercial Credita. We make tele. graphic transfere of money to any desired point, and transact every description of foreign banking business.

We draw Bille of Exchange in sums from £1 upward on.

The Imperial Bank, and Messrs. Clews, Habicht & Co., London. The Provincial Bank of Ireland, The National Bank of Scotland, and all their branches.

We issue Certificates of Deposit payable on demand or at fixed date, bearing interest, and available at all money centres.

Orders executed for Government and other investment securitles; also Gold and Exchange.

Advances made on approved collaterals and against Merchandise consigned to onr care.

We make collections of Notes, Drafts, Coupons and Dividends with promptness on all points, and are fully prepared to offer banking facilities upon either currency or gold basis.

The Bankers' Gazette.

FRDAY EVENING. March 17, 1873. The Money Market.—There has been a slight tendency t The Money Market.—There has been a slight tendency to-ward firmness in the rates for money, although it has not been sufficiently marked to warrant a change in the quotations of call loans. The tendency is, in fact, more in anticipation of an in-creased demand for money as the 1st of April approaches, than in any lack of loanable funds at the present time, as borrowers have had no difficulty in supplying their wants at 4@5 per cent, and balances have also, in some cases, been left with the large Government [houses at 3 per [cent, but 'this rate was exceptional. The bank returns of Saturday, 11th inst., were unfavorable to an easy market, and undoubtedly encouraged the idea that the sup-ply of loanable funds at this centre may be materially diminished within the next few weeks. The banks chowed an expansion in loans of \$6,721,508, an increase in deposits of \$4,865,010, a de-crease in circulation of \$5,211, a decrease in specie of \$563,031, aid a decrease in legal tenders of \$973,884. The result of this statement was to leave the banks \$2,751,864 weaker in their ex-cess over the 25 per cent of reserve required by law, the whole of that excess being \$15,420,147. A comparison of the statement with that of the same date in the last two years, as given below, shows that the loans and discounts are much larger than they were in either of those years, and that the specie line is lower than at this date in 1870, although legal tenders are abou \$4,000,000 higher. The comparison can not, upon the whole, be considered as favorable nor as warranting a long continuance of the present low rates for money, should the course of business be the same which it usually is at this season of the year. The in-fluence of the Secretary of the Treasury is unquestionably re-garded as of much importance, in estimating the probabilities of the future course of money may be over estimated. On time engagements the rates have been 6 per cent for thirty days and 7 per cent for sixty days, on approved collaterals, show-ing a perceptible ward firmness in the rates for money, although it has not been

days and 7 per cent for sixty days, on approved collaterals, show-ing a perceptible improvement in this class of loans in favor of the lender, and indicating more decidedly than the rate on call loans, the prevailing ideas entertained by our bank officers in re-

United States Bonds .- The market for Governments has been

comparatively dull during most of the week, with prices steady, closing to-day at about the figures of last week. At the opening there was a feeling of much hesitancy on account of the interest which was felt in observing the progress of the new loan, but since the curiosity of the market has been gratified upon that point there has been more business done, and redew upon that point there have been our last record with to-day was the most active of any since our last report, with prices quite firm. An important feature was the purchase of bonds by the foreign bankers, who have taken advantage of the higher quotations abroad to buy bonds here and profit by the margin between London and New York.

Some progress is reported in the subscriptions to the new load, which probably amount now to between \$12,000,000 and \$15, 000,000, all in this country. No subscriptions abroad have yet been reported to our knowledge, and the loan has apparently been received without special enthusiasm in the foreign markets, where would five per cents can be purchased at lower prices. It has Some progress is reported in the subscriptions to the new loan, our old five per cents can be purchased at lower prices. It has been stated, but not on official authority, that Sceretary Boutwell peen stated, but not on official authority, that Secretary Boutwell will next month adopt the course of paying off a certain amount of five-twentles in gold, and thus stimulate the price of bonds, and at the same time intimate to the banks that they will soon be obliged to substitute other bonds for the 5-20s, now on deposit at Washington, and thus hasten their action in buying new five per cents. At the treasury purchase of \$2,000,000 on Wednesday, the bids amounted to \$7,323,500, an amount so considerable as to temporarily depress the market. The following were the highest and lowest prices of leading

This is the price hid and asked, no sale was made at the Board. Railroad and Miscellaneous Stocks .-- The market has been strong during most of the week on a pretty active business,

soveral of the prominent speculative stocks fluctuating to a con-siderable extent. To-day there was some heaviness in the market after the second call, led by Ohio and Mississippi and Lake Shore, the former selling down to 464 and the latter to 084. Subsequently there was a partial recovery in prices, with greater firmness at the close. It has been stated that the chief cause of the decline is to be found in the large stated that the chief cause of the decline is to be found in the large states made by parties who have heretofore been "bulls," and who are now selling to realize the ad-vance which has already been obtained. Another report, which has less probability, however, states that a clique has been formed to make money siringent about the first of April for the usual purpose of depressing stocks. In regard to the New York Central and liudson scrip, it is reported that the certifleates are to bo retired, and in their place a first mortgage six per cent gold bond issued; also, that the difference between the interest on the certif-cates and the new gold bonds, which is two per cent instead of eight, as now. Harlem stock took a sharp upward turn of fiv-per cent on Monday, which was as rapidly lost the next day. Famings of the several roads which make reports of their traffic were generally favorable for the months of January and February, as may be seen by the figures published on another page. A reduction in freights to the West has just been made, amounting to about thirty-three per cent of the previous tariff, \$1 per cwt. being the rate to Chicago against \$15 before. This change will be most acceptable to merchants, and it is to be hoped that it may continue for some time. Eric stock has been weak upon the alleged financial embarrassment of the Company and the statement it at its floating debt is \$6,000,000. The following were the highest and lowest prices of the active its of rationed and miscellaneous stocks on each day of the last weak.

State and Railroad Bonds .- There has been much activity State and Railroad Bonds.—There has been much activity at times in the list of Southern State bonds, the new South Carolina's having been most active, with fluctuations between 64[±]/₂ and 69, closing at 65[±]/₂. The large transactions in these bonds have been based upon the recent legislation in regard to funding, which had the effect of putting up the price to 69, from which point there was subsequently an important reaction. Intelligence from several of the other Southern States is also of much importance in regard to financial legislation. In Virginia it is reported that the new bill which provides for funding the outstanding debt to July 1, 1871, and the resemption of interest payment on the first of January, 1872, is likely to be passed at the present session.
In regard to Georgia bonds an erroneous impression as to the amount of the State debt has been given by the roport of the treasurer, but the financial agents in this city state that only \$2,000,000 of bonds have been issued since January 1, 1870, making the debt of the State new \$7,514,500; the railroad endorsements up to date amount to \$5,923,000, as stated in a telegram from the Governor yesterday, and these figures are worthy of especial notice on account of the rumors which have been circulated that these endorsements reached a very much larger sum.
In Tennessee the question of selling the State's interest in railroad she still before the Courta, and it is expected that a decision will be made in a few days which will enable the State officers to diapose of that interest by public sale. The legislation in these to holders of their securities, and has generally been of such a such a character as to encourage the expectation that all liabilities will be provided for, and that no idea of repudiation is entertained for a noment. at times in the list of Southern State bonds, the new South Caro

a moment

In railroad bonds the Pacifics have been, as usual, the chief In railroad bonds the Pacifics have been, as usnal, the chief feature. An attempt was made early in the week to depress these securities, on the rumor that the question of the roads getting pay from the Government for one half their transportation was not considered aettled, but would be 'rought up again at the next session of Congress; the rumor, however, was soon contradicted by a telegram from the Secretary of the Trensury, and the bonds subsequently advanced, closing to-day as follows: 1st Mortgage, 834@34; Land Grants, 764@704; and Incomes, 694@70. Central Pacifies have been firm, closing at 955 § 96. The following are the highest and lowest prices of the most active State Bonds at the Board on each day of the week:

This is the price bid and asked, so sale was made at the Board.

The Gold Market .-- The market has been dull and steady The Gold Market.—The market has been dull and steady throughout most of the week, closing to-day after some activity at 1114. One of the principal features was the sale on Tneeday of three or four millions by a Cuban speculator, who had been holding for a rise during some time past; the sales depressed the price temporarily to 1114, a comparatively small decline for so large an amount pressed on a dull market. The shipments of specie during the week will amount to about \$1,600,000, of which only \$275,000 will go out to-morrow, and this amount being less than was expected from the considerable shipments of Wednes-day, and from the high rates of exchange, had the effect of de-pressing the market. The higher quotations of ohr securities in London also tended in the same direction. The customs demand is large, amounting to \$3,016,000 for the

The customs demand is large, amounting to \$3,016,000 for the past six days.

past aix days. There seems to be a fair "short" interest as indicated by the rates for carrying which have ranged from 4 to "flat," and to-day from "flat" to 1, 14, 2, 24 and 3 per cent., and 2 and 3 per cent. ex Chearing House. At the Treasury sale of \$1,000,000 on Thursday the bids amounted to \$4,942,500. The following table will show the course of the gold premium each day of the week past:

Foreign Exchange.—For 60 days bankers sterling the out-side quotation has reached 110 per cent, less a commission of 1-16, but this rato was rather exceptional and 1085 has been the side quotation has reached 110 per cent, less a commission of 1-16, but this rato was rather exceptional and 1084 has been the regular price for the past three days. While rates have been nomi-nally maintained, it has still been noticed that to-day there was a little better supply of bills offering by some houses, which was attributed to the abundance of cotton bills at the South, produced by free exports of cotton; and also to purchases of bonds for ex-port, which have been made by the German bankers to a limited extent this week. Rates have now reached just about specie shipping point, and some houses who do not insure their gold have found a slight profit in shipping. The high rates of ex-change which have now ruled steadily since the first of the year are generally believed to arise from the lack of bond. Shipments, which have been insignificant compared with previous years; in fact, the bond movement has probably been nearly even, as it is well known that considerable amounts have at times been pur-chased abroad and sold here at a profit. Cotton bills are almost the entire source of supply, and these, under the low prices ruling for the great staple, are not sufficient to meet the trade demand and keep exchange down. In regard to the new Government ionn, it does not aseem to be anticipated that any disturbance in exchanges will be likely to result from it, as the foreign movement would, at best, probably consist chiefly in an exchange of the old bonds already held there for the new five per cents. The cotton exports of the week amounts to 108,600 heles from all ports producing about \$6 440 000 in gold accident of the lose form

The cotton exports of the week amounts to 103,600 bales from all ports, producing about \$6,440,000 in gold, against 94,807 bales the same week of 1870, producing then \$8,549,000 in gold, with Middling Uplands at 22c. and gold at 112. Quotations are as follows:

The Railway Monitor.

EXPLANATION OF THE STOCK AND BOND TABLES 1. Prices of the Active Slocks and Bonds are given in the "Bankers' Gazatte" ants; quotations of other securities will be found on the preoeding pag

2. Bank and Insurance Stocks, Mining. Petroleum. City Railroad and Gas Stocks, and Sonthern Securities of those kinds which are least active, are all quoted either regularly or occasionally at the end of "Bankers' Gazette," on a previous page.

3. The Table of Rallroad, Canal and Other Stocks, on the next page, comprises all Companies of which the stock is cold in any of the principal cities (except merely local corporations). The figures just after the name of the company indicate the No. of the CHRONICLE in which a report of the Com-pany was last published. A star (*) indicates leased roads; in the dividend column x=extra; a=stock or scrip.

x=extra; a=slock or scrip. 4. The 'Tables of Railroad, Canal and Other Bonds occupy in all, four pages, two of which will be published in each number. In these pages the bonds of Companies which have been consolidated are frequently given nuder the name of consolidated Corporation. The date given in brackete immediately atter the name of each Company, indicates tha time at which the state-ment of its finances was made. In the "Interest Column" the abbreviations are as tollows: J. & J.=January and July; F. & A.=February and August; M. & S.= March and Saptember; A. & O. April and October; M. & N.=May and Novem-ber; J. & D.=Jana and December Q.-J.=Quarterly, beginning with January; Q.-F.=Quarterly, beginning with February. Q.-M.=Quarterly, beginning with Q.-F March.

March.
5. The Table of United States and State Securities will be published monthly, on the last Saturday of the month.
6. The Table of City Bonds will be published on the third Saturday of each month. The abbreviations used in this table are the same as those in the tables of railroad bonds mentioned above. The Sinking Fund or assets held by each dity are given on the same line with the name.

Bach dity are given on the same line with the many. Business of the New York Central and Hudson River R.R. in 1870.-The annual statement of the traffic of the New York Central and of the Hudson River, branches respectively of the consolidated New York Central and Hudson River Railroad, as reported to the State Engineer, is as follows: Statement of the number of through and way freight and the earnings therefrom, and the number of through and way passengers and the earnings therefrom, transported over the New York Central Division of the New York Central and Hudson River Railroad, for the year ending Sept. 30, 1870: Theoneth traight

Indianapolis, Cincinnati & Lafayette.—The receivers of this road have reported terms of compromise entered into between themselves and the Whitewater Valley Company, looking to a cancellation of the lease of the latter road now held by the former. The agreement in substance is that the Indianapolis, Cincinnati & Lafayette Company shall cenvey all its rights, title and interest in the Whitewater Valley road to the same, agreeing to operate it, however, until May 1, 1871, at which time the road and all equipments will be turned over to the Whitewater Valley Com-pany, as well as the net prefits that may accrue.—Railroad Ga-zette.

Rome, Watertown and Ogdensburg Railroad.-The Company have made the following returns of their financial condition at the close of the year ending September 30, 1870, and of their

operations during that year:

New Jersey Railroads.—The receipts of the united companies of New Jersey Railroads.—The receipts of the united companies of New Jersey from passengers, mails, expresses, &c., for 1870 were \$7,260,240 78; expenses of operating canals and roads during the same period, \$4,549,185 60; balance, \$2,711,955 18; interest, general expenses, taxes, sinking fund, &c., \$1,486,488 30; net earn-ings, \$1,224,566 88. The United Companies are working upon a share capital, as follows.

follows:

\$4,999,600 5,000,000 6,250,000

1.432.122

\$17,681,722

The share capital proper amounts to \$16,249,600. We assume that the interest on scrip is provided for in the sum of \$1,486,488

named above. The funded debt of the companies amounts to \$12,601,401, of which the joint companies (Camden and Amboy Railroad and Delaware and Raritan Canal) have outstanding \$9,751,401, the New Jersey Railroad and Transportation Company \$850,000, and the United Companies \$2,000,000.

COMMERCIAL EPITOME.

FRIDAY NIGHT, March 17, 1871.

A very large volume of trade is being done, and the markets for merchaudize the past week have not been without speculative features which serve to give tone to business circles. Inland navigation in the Northern and Western States is practically reopened, and there is every reason to anticipate that the Erie Canal will be in a navigable condition twenty days earlier than last Spring. The great staples of the country continue to pass rapidly into the hands of shippers and consumers, and manufacturers are generally well employed.

Cotton has varied $\frac{1}{2}@_{\frac{3}{2}}c$. per lb., and closed $\frac{1}{4}@_{\frac{3}{2}}c$. advance; Low Middling Upland 14c. on the spot, and 133@ 143c. for the next four months. Flour has been dull. Shipping extras close at \$6 65@6 85. Wheat firm and active.; New Spring, \$1 58@1 60. Corn firmer, closing active at 871@881c. for prime Western, mixed and yellow. Groceries have ruled dull, except for sugars, which have been active at higher prices, fair to good refining 81@81c.

Hides have been rather quiet at the late advance. Leather has become dull, and little has been done in skins. Tallow, however, has been active for export, ut some advance, choice bringing as high as 9 de.

In provisions, the chief features of the week have been speculative movements in Pork and Lurd. Mess Pork, which on Saturday last was sold down to \$21 371@21 50 for cash and early delivery, advanced to \$22@22 25 on Wednesday, from which prices it has since receded, closing to-day at \$21 $62\frac{1}{2}$ @21 75, with Prime Mess nominal at \$20. The movement in Lard was not so strong, and the close lower, at \$12 $\frac{3}{4}$ @12 $\frac{1}{5}$ for Prime Western Steam on spot, and seller April. Bucon has declined to $10\frac{1}{2}$ @10 $\frac{1}{2}$ c. for short and long clear. Bucon has been dull and prices weak, a favorite brand of prime mess selling at \$27 25. Butter has been weak, and cheese is not salable except at some decline; the promise of a very early Spring is the main cause of depression.

Tobacco has been irregular. Kentucky Leaf closes dull and weak with some reduction in prices. There was some business early in the week, but for three or four days nothing of moment has been done, buyers not even looking about the market to see what they could do. The sales of the week have been about 500 hhds. of which 150 to the home trade, the balance for export, mainly to the North of Europe. We quote Common to good new lugs 6@64c; low to medium leaf, 7@84c. Old Tobacco is nominal. Seed Leaf has sold fairly at very satisfactory prices, including 157 cases new Connecticut, running lots, at 17@18c., (the quality being quite inferior this season), 800 cases Pennsylvania, new crop, at $23\frac{1}{2}$ @25c. (of which 200 cases re-sold at something above the higher price named; 79 cases new Ohio at 16c.; 50 cases good to prime old Connecticut wrappers at 521@65c; 200 cases Common and Medium ditto, in lots, 35@50c. Spanish Tobacco has been in good demand, owing in part to the poor qualities of the domestic Seed Leaf from the New England States; and the sales include 233 bales Yara, new crop, on private terms, and 500 bales Havana at 85@98c. currency, duty paid.

There has been nothing of moment done in metals. East India goods quiet except Calcutta Linseed, which has sold moderately at \$2 10, gold, per 52 lbs. Naval Stores and Petroleum have been dull and drooping. Oils have been dull, except Linseed, which meets with a reasonable demand. Hops have become quiet. Hay has declined. Whiskey is lower. The demand for Clover Seed has subsided, and prices declined to 12@12‡c. Foreign fruits have been active for whole lots and the jobbing trade is brisk at steady prices. There has been less doing in Wools the past week, but

prices remain firm at the late improvement.

Freights at some decline in rates for weight have been more active in grain shipments; the business of to-day em-braced wheat to Liverpool and Glasgow, by steam, at 51d.; and Cotton to Liverpool, by steam, 5-16d.@#d.

Exports of Leading Articles from New York. The following table, compiled from Custom House returns, shows the exports of leading articles from the port of NewYork since Jannary 1, 1871, to all the principal foreign countries, and also the totals for the last week, and since January 1. The last two lines show total values, including the value of all other articles besides those mentioned in the table Same time 1870. 296,602 296,602 16,282 717,541 6,709 6,185 5,185 16,497 8,621 8,621 8,621 11,402 11,402 3,670 9,126 9,126 501 10,072 195 2,551 6,814 211 2,662 2,662 97,689 47 6,541 Britlsb 363 80 1,475 67 67 2236 646 929 221 221 221 221 6 lco. 236 1,414 6 81 81 340 340 340 340 340 340 340 340 515 515 580 454 171 345 345 183 143 684 684 684 166 7,976 ,558 39,384 35.2 10 A A

COTTON.

FRIDAY, P. M., March 17, 1871. ved by us to-night from t FRIDAY, P. M., March 17, 1871. By special telegrams received by us to-night from the Bouthern ports, we are in possession of the returns showing the receipts, exports, &c., of cotton for the week ending this evening March 17. From the figures thus obtained it appears that the total receipts for the seven days have reached 103,484 bales against 136,533 bales last week, 126,935 bales the previous week, and 136,661 bales three weeks since, making the total receipts since the first of Septomber, 1870, 3,153,517 bales against 2,303,872 bales for the same period of 1869-70, showing an increase since September 1 this year of \$49,645 bales. The details of the receipts for this week (as per telegraph) and the corresponding week of 1870 are as follows:

BROEIPTS Rec'd this wack st-	1871.	1870.	BECEIPTe Rec'd this week st-	1871.	1870.
New Orleans bales Mobile Charleston	46,600 6,945 6,070 10,173 16,138 12,289	19,289 8,660 2,640 6,478 5,837 5,362		1,007 8,996 102,494	297 893 2,410 44,866

The exports for the week ending this evening reach a total of 103,600 bales, of which 66,325 were, to Great Britain, 666 Franco and 36,609 to rest of the Continent, while the stocks as made up this evening, are now 644,882 bales. Below we give the ex-ports and stocks for the week, and also for the corresponding week of last season, as telegraphed to us from the various ports to night:

	Export	led to-	Totalthis	Same w'k	Stock.		
Week ending M'ch 17.	Q. Brit	Contin'L	week.	1870.	1971.	1370.	
New Orleans Mobile Charleelon Savanah Texas. New York Other ports	21,893 2,959 6,748 10,193 7,036 19,996	18,640 2,239 8,877 8,206 6,276 3,537	40,023 6,198 6,748 13,570 10,242 24,272 3,537	42,5%6 8,424 4,507 9,425 12,634 17,551 700	292.523 60,777 24,340 70,808 64,439 110,000 82,000	2:6,753 69,932 20,655 60,589 85,158 67,000 28,000	
Total	66,525	87,275	103,600	95,807	644,883	499,197	

From the foregoing statement it will be seen that, compared with the corresponding week of last season, there is an increase in the exports this week of 8,793 bales, while the stockato-night are 145,685 bales more than they were at this time a year ago. The following is our nama table showing the movement of cotton at all the ports from Sept. 1 to March 10, the latest mail dates. We do not include our telegrams to-night, as we cannot insure the accuracy or obtain the detail necessary by telegraph.

The improvement which was established towards the close of last week not only continued this week, but the upward more-ment progressed quite regularly until yesterday, when Middling Uplands closed at 154c, and Ordinary at 114c.; this advance was engineered under the influence of the increased business and ad-Uplands closed at 154c. and Ordinary at 114c.; this advance was engineered under the influence of the increased business and ad-vance at Liverpool, stimulated somewhat by the smaller receipts at our ports. Holders were less free in their offerings, although purchasors were able to find all the cotton they wanted at the ruling quotations. The principal inquiry has been on the part of shippers; spinners doing something without, however, displaying any particular anxiety to operate, supplying simply present wants. To-day, with the receipts footing up rather more than anticipated and the advices from Liverpool less assuring, the feel-ing here became less favorable and with little doing prices have declined 4c. on the lower grades and 4c. on Low Middling and grades above, Middling Uplands, closing at 154c., and Low Mid-dling at 14c. For forward delivery the business has been large and the fluctuations greater. As prices advanced partices having contracts out, began to desire to cover them under the fear that an extra demand for the continent springing up might leave them short. This feeling helped the advance till on Thursday Low Middlings for April sold at 14⁴/₂c.; for June, 14 3-16; for July, 14 5-16; for August and September, 144. But to-day prices were off &c for April and May, closing for March, 14c.; for April, 13⁴/₂c.; for May, 13⁴/₂c.; for June, 13⁴/₂c.; for July, 14c., and for Angust, 14⁴/₂c. The total sales of this description for the week have been 104,500 bales. For immediate delivery the total sales foot up this week 21,444 bales, including 801 bales to arrive, of which 2,974 bales were taken by spinners, 790 bales on speculation, 15,665 bales for export, and 2,006 bales in transit. The following are the closing quotations: are the closing quotations:

	Upland and Florida.	Mobile.	New Orleans.	Texas.
Ordinaryper lb. Good Ordinary. Low Middling. Middling. Good Middling.	12%@ 11 @ 15%@	11%@ 12%@ 14%@ 15%@ 16%@	11 % @ 13 @ 14 % @ 15 % @ 16 % @	11%@ 18%@ 14%@ 15%@ 17 @

Below we give the total sales of cotton and price of Uplands at this market each day of the past week :

	Total salea.	Ordlaary.	Good Ordinary.	Low Middling.	alidding
Saturday Vonday Tuesday Wednesday Thursday Friday	4,411 2,062 4,945 5,633	11%@ 11%@ 11%@ 11%@ 11%@ 11%@	12%@ 12%@ 12%@ 12%@ 12%@ 12%@	13%@ 13%@ 13%@ 13%@ 14%@	143466 143666 14366 15366 15366

For forward delivery the sales (including ..., free on board) have reached during the week 104,500 bales (all low middling or on the basis of low middling), and the following is a statement of the sales and prices :

FRANCE AND THE COTTON TAX .- The cable dispatches received this week to the effect that the new French Government is about to lay a tax on cotton is so unwise that it would appear to be imto lay a tax on cotton is so unwise that it would appear to be im-possible; nothing could operate more unfavorably to France and more favorably to Germany. In fact such a tax might be styled an easy way to repel Alsace and Lorraine and unite them perma-nently to Prussia, cutting off the export trade of France in cotton cloths and building up that of Germany. The French nation has lost its army, its money, and its lands by the war, but we can-not think it has lost its common sense.

PROSPECTS.—With a crop this year of four million bales and over it may be of interest to be reminded, before completing our planting for another season, at what point we are likely to begin the next crop year. This is the more important as some appear to think that the price at which next year's crop is to be marketed (if it reaches 4,000,000 bales) will not be so low as we have, in Previous reports, indicated. As to consumption we must remember that Great Britain is

As to consumption we must remember that Great Britain is now running at about its present maximum capacity, and it would take several months to increase to any considerable extent the number of its spindles. Low prices for cotton and paying prices for goods will, without doubt, gradually enlarge its manufactur-ing power, but this enlargement must necessarily be of slow growth. According to the best authorities, Great Britain is now growth. According to the best anthorities, Great Britain is now consuming five thousand bales per week more than the average in 1869-70, and we would therefore (allowing for any increased manufacturing power) place her increased takings for the year, as a maximum, at 325,000 bales more than last year. As to the con-tinent, we cannot, in view of the disorganized state of labor and of the manufacturing districts of France and Germany, count on any considerable increase, while our own consumption, by reason of our want of water the early part of the season, will not be much, if any, in excess of 1869-70. Allowing then the largest possible increase for the continent and this country the remainder of the season, we see that 450,000 bales is probably the very utmost the spindles of the world can use during this crop year more than during the previous year. during the previous year.

spindles of the world can use during this crop year more than during the previous year. As to the prospects of supply from other countries they all appear to be quite favorable, the only doubt that there will be a large increase brought to market from these sources arising out of the question whether the low prices will not check the movement. Cotton, in excess of last season, has been raised almost every-where. Egypt is fulfilling her early promises of an enlarged yield. India had a considerable surplus left over from last crop, and is harvesting a better one. Brazil and other minor sources are not from present appearances likely to make any change in their contribution to the total supply, while China has raised so much herself she will want much less than heretofore from India. That these are facts is now admitted on all sides. There is con-siderable doubt, however, when, under the influence of present prices, the India cotton will come to market. But we think it is becoming evident, even if there is delay in the movement from Bombay, which is very likely, that still the world's supply from all sources other than America will at least equal last year's supply. The conclusion from these facts would appear to be that the balance of our present crop can probably be marketed at about the prices now ruling, with perhaps some little improvement in the early summer months, unless during the later spring and early summer months the promises for the next yield should be equal to the last; but with another planting like the last we must be willing to accept lower prices.

willing to accept lower prices.

EXPORTS.—The exports this week are somewhat less than during previous weeks, but are still on a liberal scale, and are likely to continue so for a time at least. It will be seen that the direction of the shipments is changing somewhat, the Continent now taking a larger supply and Liverpool less. Last week the movement to France opened again by two shipments from New Orleans, and this week we have 666 bales to Havana from New York.

York. GUNNY BAGS, BAGOINO, &C.—The market for cloth has been more active for both present and future delivery and prices tend upward. The sales here and in Boston are 7,000 rolls, mostly for future delivery at 20c. cash and 21c. time; 100 bales deliverable in Boston, June 1, at 19‡c. and 300 bales here at 20c. 30 days. Bags also have moved more freely and are held with greater firm-ness at an advance. Sales are 200 bales to arrive per "Mount Washington", at 10‡c. gold in bond; 250 bales per "Tennyson;" 100 bales per "Olive;" 850 bales the particulars of which are not given, all at 10‡c. gold in bond; 40 bales at 16c. gold, and 50 bales at 16‡c. gold, duty paid. Manila Hemp has been quiet, quoted nominally at 94@10c. gold; the only sale reported being 1,000 bales in Boston on private terms. Jute has ruled quiet, but is held at 5½@5‡c. with a sale of 300 bales on private terms. Jute Butts have also been quiet, but are held very confidently. We mote the sale in Boston of 300 bales at 4c. currency and in this market 600 bales at 4½c. currency, 30 days time, and 60 days add-ing interest. ing interest.

SHIPMENTS OF COTTON FROM ALEXANDRIA .- The following a series of years ending Sept. 30 of each pear:

Year ending Great France and Austria,

	16 094	24,589	110.750	7,708	12.622	96.899

* A count of stock at Columbus to-night discloses the fact that there were 1,800 bales less of stock than the running count called for.

These totals show that the interior stocks have decreased during the week 11,477 bales (being now 3,851 bales more than for the same period of last year), while the aggregate receipts are 8,386 bales more, and the shipments 11,967 bales more than for the corresponding period of 1870.

VISIBLE SUPPLY OF COTTON.—The following table shows the quantity of cotton in sight at this date of each of the two past 1871. 1870.

Trade Report .-- The market for gooda and yarns at Manchester is quict and firm.

BREADSTUFFS.

FRIDAY P. M., March 17, 1871. The markets for flour and grain the past week have been only moderately active, and the fluctuations in prices alight, closing with the tone somewhat depressed.

Flour arrived more freely early in the week, and this had the effect of weakening prices, especially for shipping extras and lower grades, for which the demand has been light. The fluer grades of flour from Spring Wheat decided materially, but all grades made from Winter Wheats have remained firm, and have become, in fact, somewhat scarce. Flours between \$7 and \$7 75 have been taken pretty freely for the West Indics. Toward the

close, receipts again fell off, and although the demand for shipping extras did not improve, they ruled more steady. Some fair lines could have been placed at \$6.65, but few offered Iselow \$6.75. Southern flours continue scarce. Rys Flour and Corn Meal have been very strong.

Wheat has slightly advanced. Very little is coming forward by rall, and the quantity at hand is experiencing a rapid reduction. Nevertheless, in view of the early reopening of inlaad oavigation, and the probability that the Eric Canal will be open twenty days earlier than last Spring, holders have shown a disposition to meet the demand. Millers have bought freely, and shippers, favored by a decline is ocean freights, have been able to execute some orders, taking new Spring at \$1 58@\$1 60, with some old at \$1 49 and Red and Amber Winter at \$1 60@\$1 71, the latter price for choice new, at which the market was quiet on to-day's exchange.

Corn has met with a brisk export demand, with a good local trade; and as receipts have been small, an advance. In prices has taken place, partly attributable to a decline in ocean freights. Yesterday there were free sales at 88@89c. for Western Mixed and 90@91c. for Yellow; but to-day, under a variety of influences there was some deeline, the sales being mainly at 874@88c. for prime Mixed, afloat, including parcels to arrive at the lower figure, and 884c. for Western Yellow.

Rye and Barley have been dull, and prices are so unsettled that our quotations must be regarded as wholly nominal.

Oata were strengthened early in the week, by some out-of-town demand, but the close is weak, boat-loads of prime Ohio selling to day at 69c. in store.

The following are the closing quotations :

Flonr-		Wheat, Spring, bash	\$1 45@	1 60

GROCERIES.

FRIDAY EVENINO, March 17, 1871.

The Spring trade has not yet commenced to show a volume of much magnitude, and the reports for the week contain a record of a comparatively small amount of business. Importors and holders of goods, however, appear to feel much confidence, and cousider the prospect as encouraging. Inland navigation is opening much a rlier than usual, the cost of transportation both by water nd rail is gradually being reduced, and large amounts of domestic products wintered over will soon be seeking the seaboard for which imported goods in the usual order of things must be returned, and groceries among the first, especially as values now are undoubtedly low, and though likely to prove in sufficient supply for ordinary outlets, there is no great excess in the accumulations. The disposition, therefore, is to offer moderately and insist upon The passage of the bill by the House of Represenformer rates. tatives, abolishing the import duty on Tea and Coffee, it is thought will prove to be a more political movement, and not likely concurred in by the Senste. Awaiting the issue, however, operators are disposed to move with greater caution.

The entries direct for consumption, and the withdrawals from bond, showing together the total thrown on the market for the week, were as follows:

Tea. black	7.763 pkgs.	Laguayra		Sugar, Brazil.	bags.
Groen	8,156 pkga.	Other		Manila, &c	bags.
Japan	2,143 pkga.	Sugar, Cuba		M'laa'ea, Cuba	5,892 hhda.

TEA.

There has been very little business doing in this market outside a fair distribution in times, and the position really shows few features of interest. Buyers have already on hand a pretty good supply, and knowing that there is enough stock now here in the hands of importers to render additional purchases, either as to quantity or assortment, a comparatively easy matter, there

is no inclination to come into market, until consumers are more plenty and the jobbing business shows greater life. In the prevailing condition of market values naturally are somewhat slack, but there is no aerious decline, nor do holders seem inclined to grant any, feeling confient that a little patience will bring matters in better shape as the spring trade gradually sets in. Taking off the duty by the Honse of Representatives will not be concurred in by higher house it is thought, but in view of the possibility of such a law being passed operators generally are cautious, huyers fearful of loss and holders of gooda ln bond hopeful of gain. Sales of 3,500 pkgs Green, and 3,300 Oolong.

Imports this week have included 429,538 lbs. of Black per "Espiegle," from Foo Chow; 382,281 do. do. per "Marathon," from Hong Kom; 580,603 do. do. per "McGilvery," from Amoy; 47,991 do. do., and 732,595 do. Greena per "Montana," from Shanghae; 654,859 do. do. and 25,885 do. Japana per "Argonan," from Shanghae; and 7,960 do. Greens und 4,120 do. Japana per "Cleta," from Whampoa.

The following table shows the imports of Tea into the United States (not including San Francisco), from January 1 to date, in 1871 and 1870:

	Black.	Green.	Japan.	Total.
1871	5,605,894	8,688,556	3,304,132	17,598,602
1870	8,329,009	4,152,982	1,076,281	11,558,272
The Indirect importation				
wall, have been 7,908 pkgs	a since Janu	ary 1, against 1:	,804 last year	•

COFFEE.

The movement has been even less than last week, and in a general way a decidedly dull tone has been a ruling feature of the market. The large job. bers, as a rule, hold a very fair supply, from which they are enabled to meet the wants of their present small attendance of customers without much difficulty, while the entire trade find the distributive call so light at present, and wholesale values so high, that they are disposed to postpone operations until the latest possible moment, in hopes that something may turn up to give them an advantage, though sellers claim that instead of concessions they will soon be enabled to successfully insist npon a further advance. No one has entertained an idea that the bill to do away with import duties will become a law during the pressent session of Congress; but as such a thing is possible, all likely to be affected await a decision with some little interest, as the effect of the act would be to cheapen goods duty paid and increase the value of lots in bond. On Brazils holders have remained very strong in their terms, with some entirely withdrawing samples, more encouraging advices from the point of production, and an absolute loss on many parcels at ruling rates acting as a stimulating influence. Business certainly has been quite dull, and the stock and assortment have increased somewhat, but the accumulation is far from large, and, with prospective small additions to the accumulation, every confidence is felt in the maintainance of present values, and as a rule an advance Is predicted. For East and West India descriptions there has been a very quiet market, buyers in most cases taking nothing except through actual necessity. but there is no loss of strength, and bids on a hasis of full former figures was the only inducement for sellers to enter into negotiations. We note 2,924 bags Rio, 2,200 bags Santos, 150 bags Maracaibo, 720 bags Costa Rica; and shipped from first hands to Europe, 3,035 bags St. Domingo. Sales at Baltimore of 6.884 bags Rio.

Importa this week have included 5,000 bags of Rio per "Eigil," Of other sorts the importa have included 1,256 bags of Jamaica per "Annie Tibbets;" 1,517 do. St. Domingo per "Oliver;" 2,118 do. per St. "Port-au-Prince," and 316 do. sandries.

SUGAR.

The market for Raws has varied somewhat during the week, but on the whole the improved tone noted In our last has become more general and with the exception of slightly slack feeling on one or two days, when the movement happened to be a little slow, the tendency was rather toward a higher rauge. Sellers have gained their advantage from smaller and better assorted receipts, a greater inclination to place current arrivals in store, and the increased wants of refiners who have run supplies pretty low in meeting the recent call for their production. It is also claimed by importers that they cannot lay sugars down here at present prices and secure a margin for profit, and this naturally adds to the firmness. Buyers have taken a considerable amount of stock off the market and all of it will probably go into early consumption, but they have not operated without caution, and few purchases were made beyond known wants, as hopes are entertained that the new crop will soon again move into market with enough freedom to cause a re-action. On the recent decline the depres-sion was less decided on clayed sugars than on Muscovado, and now the upward turn is most marked on the latter, indeed some operators claim that the advance is merely the working up of the low grades to their proportionate difference with the previously better supported upper qualities. Refined further advanced and sold freely, but huyers having filled their largest orders the husiness became a little more moderate, though without any decided reaction in values, and at the close the feeling is again rather in sellers' favor. The sales of Raw embrace 7,850 bhds. Cuba; 750 hhds. Porto Rico; 500 hhds. Demerara ; 485 hhds. Martinique ; 240 hhds. New Orleans ; 4,965 boxes Havans : 32,032 bags Mantla, and 781 hhds. Melado.

Imports at New York, and stock In first hands, Mar. 16, were as follows: Cuba, Cuba, P. Rico, Other Brazil, Manila, & c, Mel Other Brazil, Manila, &c, Melado *hhds. bags. bags. hhds. P. Rico, "hhds. MOLASSES.

In the way of generally interesting features the market for foreign goods is almost entirely bare, business still showing a comparatively small aggregato and prices remaining much the same as last week with a more or less nominal tone, especially on the old crop. Distillers are very small operators, refluers though working somewhat more freely and occasionally calling for a cargo still have enough stock from direct importation to make them feel a little independent, and the trade have taken less than their usual average. The ma-jority of holders seem rather inclined to offer their supplies to the full extent of the notice and accept easy terms though there is no undue pressure to realize on any grade. Domestic of strictly prime and choice quality continues firm, but the bulk of the stock is undesirable and owners appear to want to get rid of it at almost any price. Sngar House Molasses is less active, and offered at about 2c. decline from former figures. Sales of 1,730 hhds. Cuba Muscovado, mostly old crop and part to arrive coastwise ; 1,070 bhds. Caba Clayed ; 250 hhds, Porto Rico ; 100 hhds, Euglish Island, etc., In small lots ; about 100 pkgs, new crop St. Croix ; and 1,025 bhls, New Orleans,

The receipts at New York, and stock in first hands, Mar. 16, were as follows:

	19,913	P. Rico, *bhds, 252 1,770 1,853	Domerara, *bbds. 20 1,103 2,433	Other "bhds 606 53	N. O. bbin \$29 33,755 10,014

"Including tierces and barrels reduced to hhds.

SPICES.

The movement of invoices still amounts to almost nothing and the wholesale market is extremely dull. There is a fair call for jobbing lots, but even here business has a slow tone and buyers evidently are not inclined to take more goods than they can handle to immediate advantage. Holders, however, with all the stocks well under control and nothing of magnitude expected to arrive, are unwilling to give up any advantage and asido from the usual occasional shading on small odd lots about former prices are current, Nutmegs, Mace and Pepper showing the greatest strength.

FRUITS, &c.

The market has been very quiet since the date of our last, formal purchases of the trade having been sufficient to sapply their wants for the present. Layer Raisins have been easier, owing to a pressure to sell, and prices declined to \$2 75, but close again at \$2 80. Turkish Prunes are quiet, but held preity confidentiy at former prices. Currants are dull, but no noticeable decline can be Sardines are held more confidently than at the date of our last, but noted. move slowly and generally in small lots. Almonds have been fairly active for Languedoc to arrive at 10% gold, with free sales, but at the close are held at 11c gold and 19c currency, and are rather quiet. Brazil nuts are lower. Dates are in fulr demand.

The supply of Foreign Green fruit from the Medditerranean is large and from one to three cargoes are disposed of dally at anetlon, and considering the large sapply prices are well maintained ; to-day some 12,000 boxes were sold. Messina Oranges bronght \$2 15@1 05 per box, Lemona \$3 75@3 95; the Palermo bronght \$1 33@3 75 per box fer Oranges and \$3 80@1 00 for Lemons. The sapply of Weat India is rather light and these retain former prices. Oranges sell at \$13 00 per bbl. Baracoa Cocoanuts, \$10@45 per thousand; Bananas \$1 75@2 50 per bunch and Carthagena Cocoanuts, \$65 per thousand.

The market for Domestic Dried has ruled quiet for state Apples, which have been in full supply, prices, however, are without change. Southern have met with a small demand and ruled steady. Blackberries have shown a further movement; all to be had at 12%@13c for prime have been bought up; they are now held at higher prices. Peaches, both 'pared and unpared, are merely nominal, as they are very few in market. Other kinds are firm and sell readily. Peanuts continue to be held with much firmness, the bulk of the stock is in the hands of one or two parties and a further advance in prices is looked for. Pecana are scaree, about all the stock to be had has been bought within the Past few weeks, by parties anticipating a rise in prices.

Domestic Green is dull for both Apples and Cranberries, unless for the very choicest, for which former prices are obtainable.

ADVICES FROM PHODUCING MARKETS.

RIO Coffee.-Measrs. Wright & Co.'s telegram, dated Rio de Janeiro, February 23, 1871, states: Sales of Coffee for United States since the 6th inst. 72,000 bags; shipments, 69,000 bags; loading, 35,000 bags; stock at date, 73,000 bags. Exchange, 21%d.

Cuba Sugar,-HAVANA, March 10 .- The market has remained on the whole in about the same condition noticed at the date of our last, buyers having continued to offer lower prices, whilst few holders are disposed to sell at least than 10@10% rs per arrobe No 12, common trsin, according to condition of the siaple. Very special lots still bring a fraction more than the outside figure-owing to their scarcity and demand. The cable solvices from the United States and Europe have continued unfavorable for our sugar market, although yesterday a small recovery in New York for Muscovado has been reported, and shippera to those quarters have shown less disposition to operate than last week; therefore, the demand prevailing is simost exclusively for bright special classes for Spain and the Mediterranean, the production of which is unusually small this year and held by most holders at extravagent figures. The sales which have been reported during the week amount to about 10,000 boxes of all kindsagainst 8,500 boxes last week.

Shipments this week from Havana and Matauzas have been as follows:

To New York	Boxes.	Hhda.
Postos	. 638	618

THE DRY GOODS TRADE.

FRIDAY, P. M., March 17, 1871. There has been a better jobbing trade doing during the past week, though the demand has undoubtedly been lessened by the unpleasant weather of the last few days. There are a large number of buyers in the market already, and more are arriving daily, but the weather has prevented them from canvassing the market to any extent. The Southern trade is relatively better than that from the West, though there are more Western buyers in the market toward the close of the week. The jobbers in that section have been endeavoring for several seasons past, to get centrol of the jobbing trade in their respective localities, and have apparently succeeded in a measure, as it is a noticeable fact that the full package sales to the West are increasing every season, while there is also some falling off in the trade in this market with Western retailers. The better class of trade still visits this market, and will doubtless continue doing so, as the advantages to be gained here, on purchases of any considerable amounts, are suf ficiently great to make it an object for this class of buyers to come directly here. To small dealers, however, the nearest market generally offers the greatest inducements, and it is these buyers who are yearly appearing here in smaller numbers. Their individual purchases are small, but the aggregate is considerable, and jobbers here will find it worth their while to make some exertion to retain it.

The retail trade here and in other cities, is improving somewhat, and retailers' stocks are becoming broken. The weather since Tuesday has been unfavorable for an active retail trade, but the demand is still good for this season of the year, and dealers are anticipating a satisfactory season.

DOMESTIC COTTON GOODS .- The demand for cotton goods has been fair in a general way, but the trade improves slowly and is still below the expectations of dealers. There was some weakness apparent in several lines, early in the week, but we think the market rather steadier toward the close.", The increase in the production, since the heavy rains of a few weeks ago, has been heavy, and stocks are accumulating in first-hands. This naturally has a tendency to weaken the market, and certain lines which were advanced not long since, will doubtless experience a decline. Whether or not this will be general it is difficult to state, as the matter rests entirely with agents, and it is decidedly difficult to ascertain what they intend doing. A few makes of medium and low grades brown and bleached goods have already been reduced by jobbers, and it is said that agents generally would make extra discounts to purchasers of large lots. The print market is unsettled, and the demand remains comparatively light. There was a decline of 1c. to-day in several brands of standard, and corresponding reduction is looked for in other brands within a few days.

DOMESTIC WOOLEN GOODS .- There is a very good trade doing in all woolen fabrics, and the market is well sustained. The pro-duction of light weight fabrics has about ceased, and the stock in first hands is unusually light. Few goods will be carried over into next season, and the market is thought to be in an eminently healthy condition, with all classes of dealers. Cloths sell well in healthy condition, with all classes of dealers. Cloths sell well in light weights, but the demand for heavy goods is even less than is usual at this period of the year. This is due, however, to the fact that prices are very stiff, as dealers purchasing so early in the season as this, have generally been able to obtain a concession from the quoted prices, which holders are not disposed to grant in the present condition of the market. Cassimeres are in fair de-mand, at full prices. Shawls are quiet in first hands, at the mo-nerate state down being the market. mand, at full prices. Shawls are quiet in first hands, at the moment, as the demand from retailers has not been sufficiently heavy as yet to break jebbers' stocks. FOREIGN GOODS.—There is a moderate improvement in the

jobbing movement from day to day, and the sales of all season. able fabrics are in more satisfactory amounts. Dress goods sell able tables are in more satisfactory amounts. Dress goods sell freely, and dealers are looking forward to an active trade through ont this month and April. Linens are quiet in first hands, but are selling more freely with jobbers, though the movements are in limited amounts. Shawls are in fair demand, but the war greatly reduced the number of skilled operatives, and it is difficult now to obtain full assortments of perfectly finished good .

The exports of dry goods for the past week, and since January 1, 1871, and the total for the same time in several previous years are shown in the following table :
