
Love food. Love Liebherr.

With technology that is a class apart,
indulge in freshness always.

LIEBHERR

Perfecting preservation since 1954.

Global success: The Liebherr Group.

Liebherr is a third-generation, family-owned company founded in 1949 by Hans Liebherr with his ground-breaking invention of the world's first mobile tower crane.

With over 70 years of success, Liebherr is known as a pioneer in high-quality, breakthrough innovations and countless cutting-edge technologies in numerous industries. One of the world's largest manufacturers of construction machinery, Liebherr has expanded its broadly diversified portfolio to 13 product segments including earthmoving, deep foundation machines, mobile and crawler cranes, tower cranes, concrete technology, material handling technology, mining, maritime cranes, aerospace and transportation systems, gear technology and automation systems, components, hotel, and refrigeration and freezing. The company currently employs about 49,000 people in more than 140 companies in over 50 countries worldwide.

Liebherr Appliances India Private Limited specialises in the production of high-quality refrigerators and freezers for the Indian market. The new production plant covers an area of 2,02,343 sq. mtr. The ultra-modern and flexible production facilities has the capacity of around 5,00,000 units per year, and can be expanded when necessary.

Portrait of the Liebherr Appliances India

Freshness technology

Taste that stands the test of time: Freshness is a question of technology.

Storing groceries in ideal climatic conditions not only ensures extra-long freshness and storage time, it also makes a substantial contribution to avoiding food waste. With our appliances this is possible – thanks to the perfect combination of integrated freshness technologies.

EasyFresh. Ideal for fruits and vegetables.

The freshness guarantee in your Liebherr fridge. Unpacked fruits and vegetables feel right at home here. At the same temperature as in the fridge compartment and air-tight.

DuoCooling. No drying out.

Our cutting-edge technology in fridge-freezers with two completely separate refrigeration circuits ensures that there is no air exchange between the fridge and freezer compartments. The food neither dries out nor are odours transferred.

Fresh. Sustainable. Healthy.

There are three main reasons that motivate us to keep perfecting it. First: An ideal climate contributes to keeping your food fresh for longer. You can enjoy it fresh for longer. Second: This prevents unnecessary food waste and means you have to go shopping less frequently. Three: Optimal storage helps to protect vitamins and nutrients. And this contributes to a healthy diet.

Perfecting preservation since 1954

A food lover like you needs appliance makers who are equally passionate about food. Which is why Liebherr refrigerators help you preserve food at temperatures appropriate for keeping them fresh for long. After all, we know that you will never compromise on the preservation of the food you love.

G German Engineering

Images are for representation purpose only.

Tasty for longer.

You don't compromise when you're shopping. You look for natural ingredients, the best quality and maximum freshness. Of course, anyone who values good food wants to keep it fresh for as long as possible. That is precisely why we have developed innovative freshness technologies and improve them year after year, so your food still tastes fresh.

EasyFresh. Ideal for fruits and vegetables.

Unpackaged fruits and vegetables feel right at home here. Stored at the same temperature as the fridge compartment and sealed airtight in the safe.

DuoCooling. No drying out.

Our cutting-edge technology in fridge-freezers with two completely separate refrigeration circuits ensure that there is no air exchange between the fridge and freezer compartments. Groceries do not dry out nor spread odour.

NoFrost. No more defrosting.

The automatic defrosting function guarantees that frozen foods remain fresh. There is no longer a need to store frozen food temporarily during manual defrosting. The constant optimal freezing remains the same without interruptions.

Maintaining optimum humidity and temperature, the secret of longer freshness.

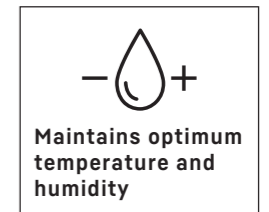

Introducing EasyFresh technology

Everyone loves to have fresh food. And the freshness of food depends not just on temperature, but also on humidity levels. In a traditional vegetable tray, the humidity level is dependent on the temperature inside the refrigerator. Whereas, Liebherr's EasyFresh drawers come with low- and high-humidity modes that allow you to control the humidity level according to the requirements of the food stored in them. So that, now, you can separate and store your fruits and vegetables as per their humidity requirements and keep them fresh for longer with just a gentle touch.

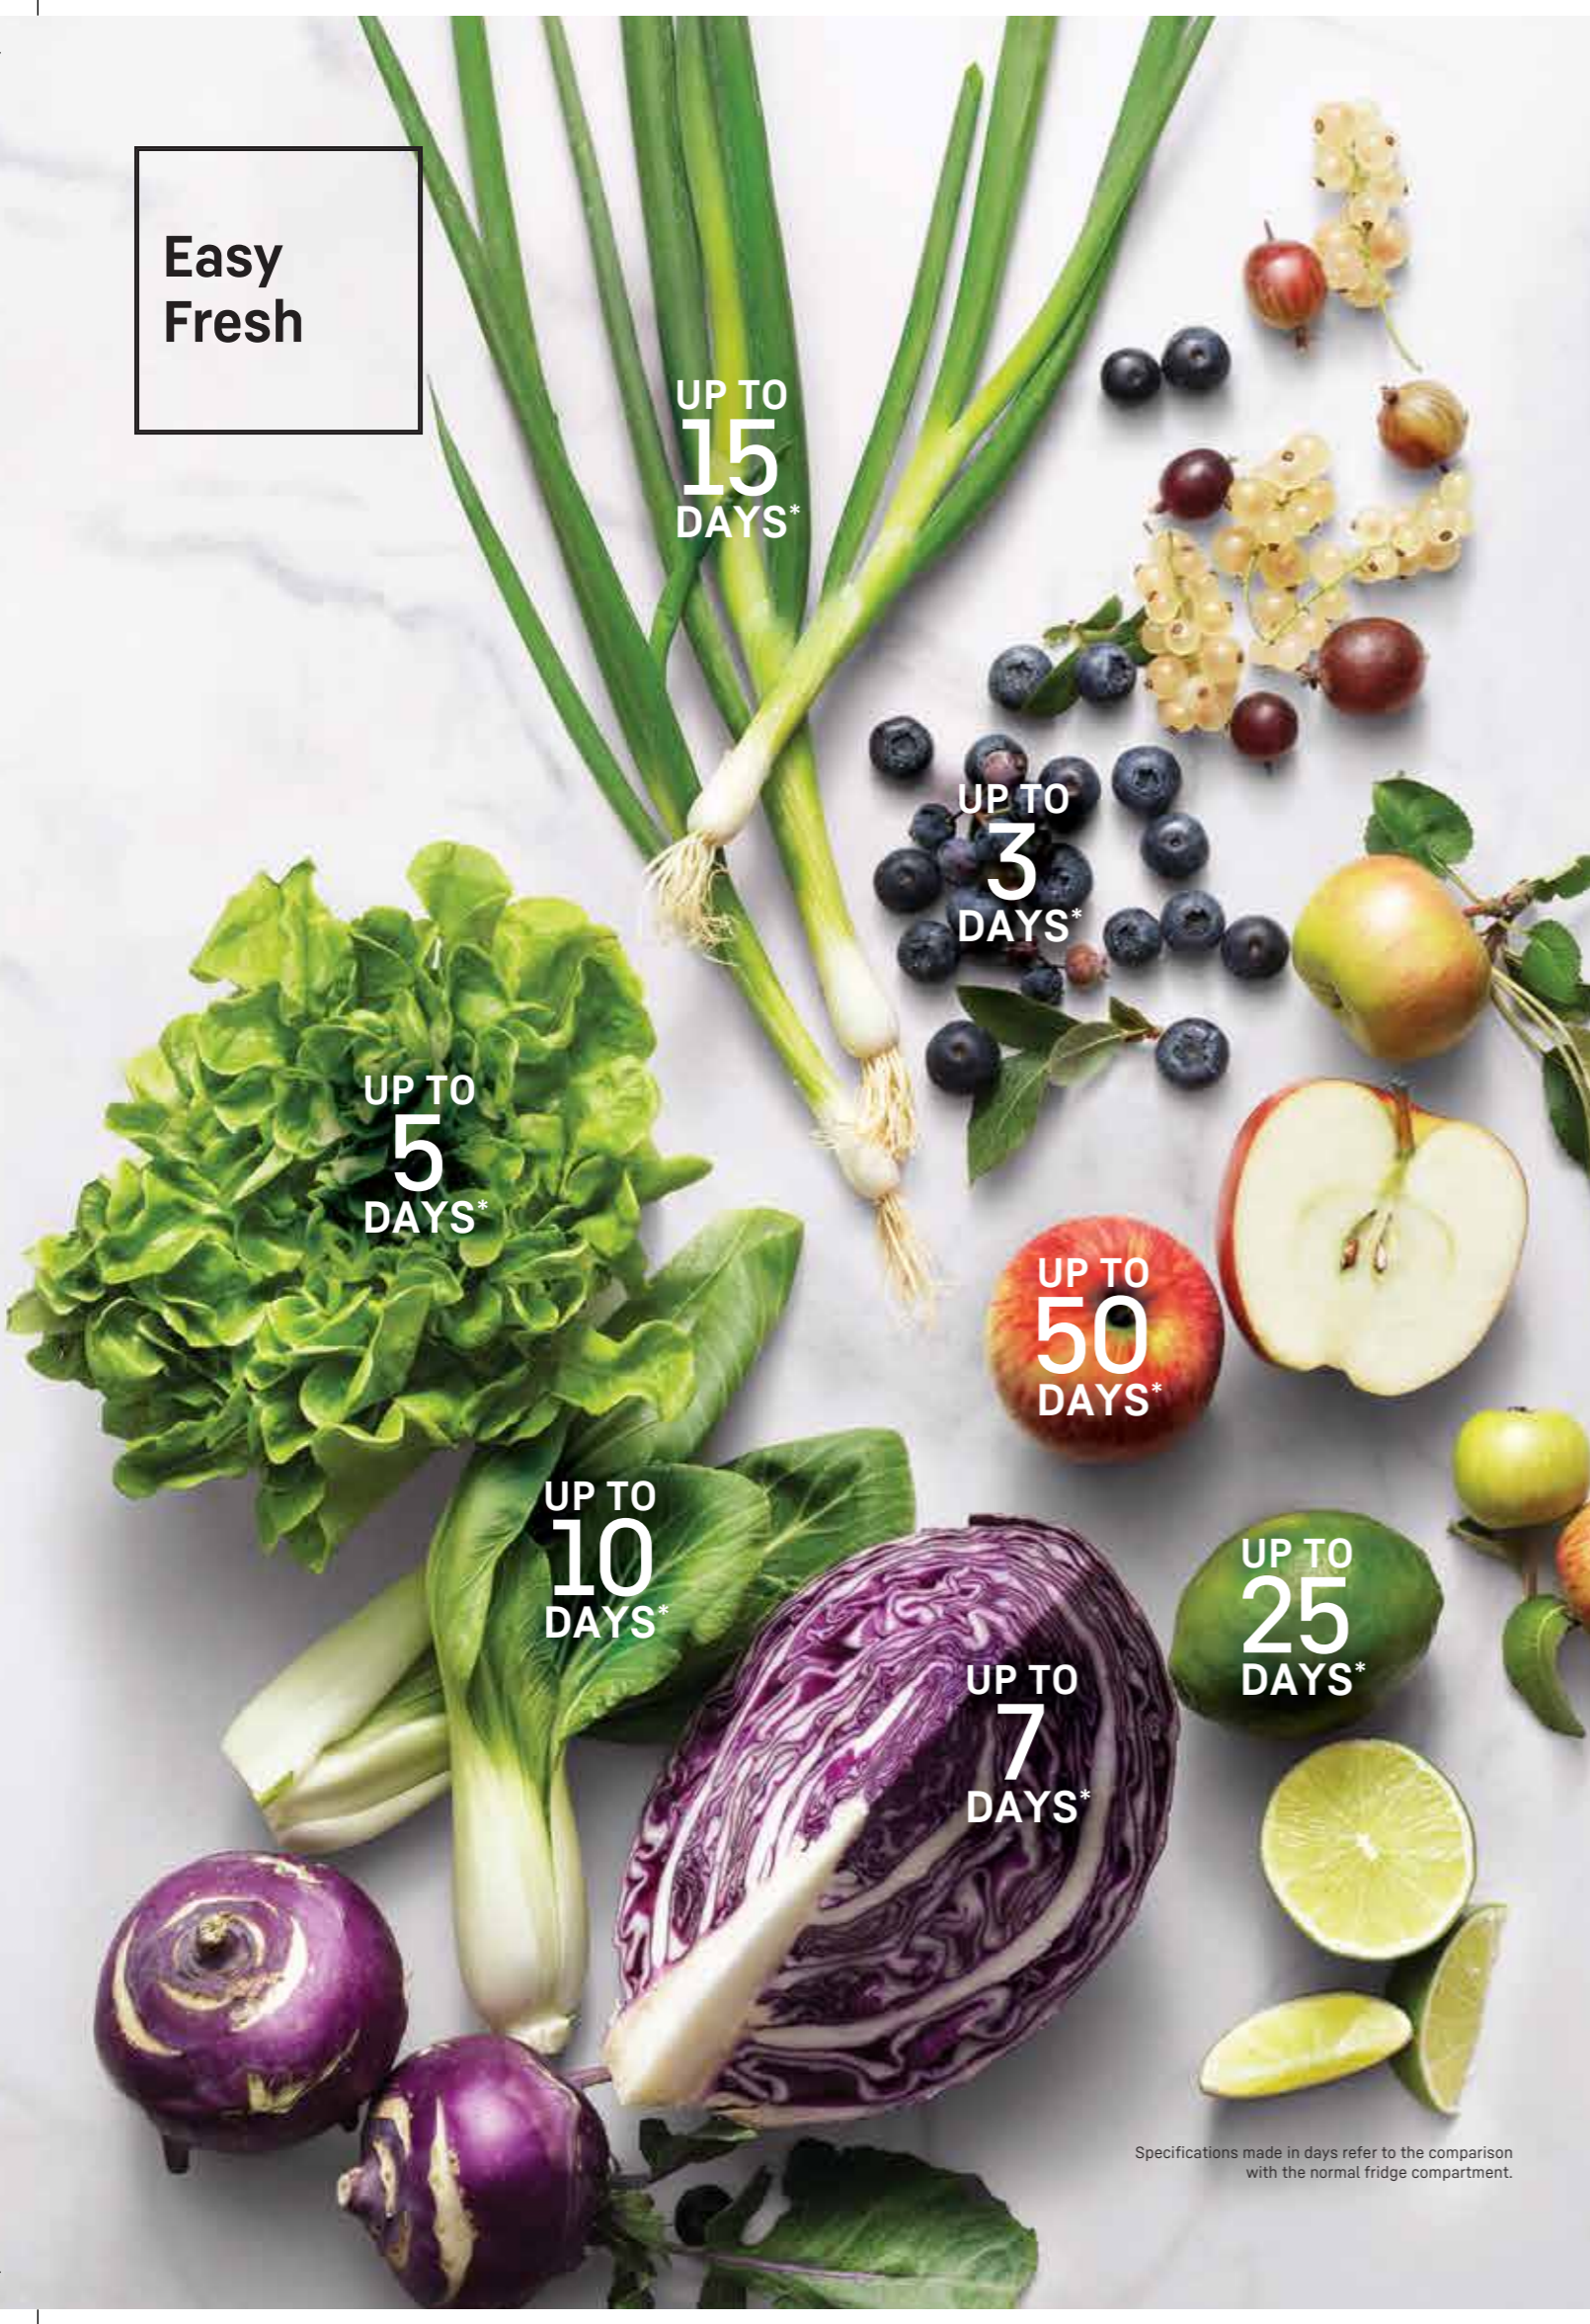

Love freshness. Love Liebherr.

Features that demonstrate our love for food

VarioSafe

Provides clarity and creates order. Smaller foods and packages, tubes and jars can be perfectly stored in the drawer.

Digital Touch Control UI

Your refrigerator's control panel places multiple functions at your fingertips. A digital touch UI takes your interaction with the refrigerator to the next level and lets you set the precise temperature with a quick tap of your finger. Now you know exactly what the temperature of your freezer and refrigerator is, even before opening the door.

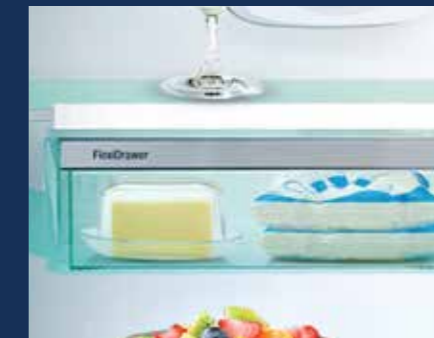

FreshBox

Can be used to store non-vegetarian items like meat and fish in a covered and vacuum-sealed environment that maintains freshness and avoids odours and spillage.

IceCream box

Keeps your ice cream fresh in an airtight environment, which avoids frost formation in ice cream and increases its shelf life.

FlexiDrawer

A flexible storage option that can fit into any shelf and can keep delicate packaged products separate and safe.

VarioBox

Ideal for keeping your cosmetics, medicines or any smaller packets, which you want within easy reach.

CoolPack

Allows the freezer to maintain a lower temperature for a longer period, for example, during a power failure. It can also be used externally to cool beverages or food items*.

Vegetable sorting system

The uniquely designed sorting system offers flexible spaces for storing leafy and solid produce separately, without any worry of them mixing up.

Spice boxes

Crafted specially for India, the spice boxes come with an easy grip and airtight silicon locking seal. These boxes maintain freshness, minimise loss of aroma & flavour, and prevent them from mixing with other food items.

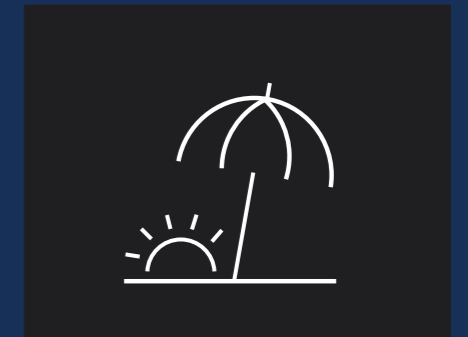

SuperFrost

The automatic SuperFrost function makes freezing simple and saves energy. It quickly reduces the temperature to -25 °C and thus creates the cold air required to preserve vital vitamins. As soon as the food is completely frozen, the automatic SuperFrost function switches back to normal mode after max. 65 hours, and thus assists in saving electricity.

SuperCool

The automatic SuperCool function lowers the refrigerator temperature down to as far as +1 °C for as long as 12 hours – ideal for rapidly cooling freshly bought food.

HolidayMode

This unique mode maintains the temperature of your refrigerator section at 10°C so that it does not smell bad when you come back from your holiday. This mode is applicable only to the refrigerator section; the freezer compartment temperature is maintained at the set value.

The above features and accessories may vary from model to model. Images for representation purpose only.

The above features and accessories may vary from model to model. Images for representation purpose only.

EasyFresh range

Higher the moisture retention, longer the freshness. Liebherr's new TDCs 4765 and TDCs 3565 refrigerators, with EasyFresh technology, help you retain the moisture of food conveniently. In traditional vegetable trays, the humidity level depends on the temperature inside the refrigerator. Whereas, these Liebherr refrigerators with EasyFresh technology let you maintain the humidity level according to the requirement of the food stored. Now, you can separate and store your fruits and vegetables and extend their life.

DuoCooling range

Liebherr's DuoCooling technology, helps you preserve food with precision. Ordinary double door refrigerators come with a single cooling circuit, which may result in unstable cooling and a loss of moisture. This results in food drying out and losing its freshness. Instead, DuoCooling technology provides independent cooling circuits that give you greater control over temperature, while keeping food fresher, for longer.
